Within the narrow limits at our command we cannot deal at length with the numerous contents so ably set forth by the author. We appreciate very highly the literary style of the book. It is from that point of view a marked exception to some of the modern gardening books that have come under our notice of late.

To summarize as briefly as possible, we may say that Mr. Pemberton has divided his work into two main divisions, with chapters containing numerous sub-headings. In the first part he deals with the rose, the flower of England, the botany of the rose, British wild roses, wild roses of other countries, summer flowering roses, and autumn flowering roses. Historical and literary references of course abound.

The second part is mainly cultural, and here indeed the sub-headings practically cover the whole area of rose cultivation. The appendix comprises a descriptive list of selected roses recommended for cultivation and method of pruning. There is a colored frontispiece of *Rosa canina*. Price \$2.62 net.

I take pleasure in inclosing money for renewal, especially as you give such good value for the price.

GEORGE MILNE.

Point Claire, P. Q., March 14, 1908.

PERSONAL.

Visitors in Boston: F. E. Conine, Stratford, Conn.

Harry Smith of Detroit has taken a position with the park department.

Visitors in New York: Thos. J. Grey, Boston; J. F. Bradshaw, Wallace, N. C.

A. S. Nodine has taken the management of the Lines Greenhouses, Milford, Conn.

E. E. Fletcher, a popular salesman at the Music Hall Market, Boston, and Miss Mary Twomey were married at Manchester, N. H., on March 14.

Chas. L. Seybold, superintendent of Carroll Park, is chairman of the committee in charge of the flower show to be given in connection with the exhibition of the National Sculpture Society next month in Baltimore.

R. Vincent, Jr., White Marsh, Md., with his wife, sails for Europe on April 4th on S. S. Caledonian. They will leave London on April 21 with the British Horticultural Press party for Holland and the different points of interest in Belgium. Later they will visit the principal growers of geraniums in France.

TRIBUNE HORTICOLE.

This enterprising little Belgian contemporary, founded only a year or two ago, is one of the most up-to-date gardening papers in Europe. Its editor, M. Louis Gentil was formerly at Kew and subsequently went to the Congo. After his return he was appointed curator of the Brussels Botanic Garden, a position for which his wide and exceptional experience preeminently qualified him. We notice in a recent number of the *Tribune Horticole* a capital illustration of M. Calvat's lot of new seedling chrysanthemums that were staged at the last Paris show, and also several engravings of some of his latest novelties.

C. H. P.

CARNATION GROWERS ORGANIZE.

We understand that a meeting of growers—principally carnation growers for the New York market—was held at the auction room of Wm. Elliott & Sons, last Saturday, for the purpose of discussing the business situation and adopting ways and means for improving the present market conditions and organizing for some independent plan for disposing of their product. The meeting was well attended by the Long Island growers, but the New Jersey contingent was not adequately represented, and after a lengthy discussion the meeting adjourned to meet later in New Jersey. Henry Weston of Hempstead presided.

I have been a constant reader of HORTICULTURE from the first number. It is getting better and better all the time; cannot do without it, so you will find enclosed one dollar for another year's subscription.

Elkhart, Ind., March 19, 1908.

AMERICAN ROSE SOCIETY

ART INSTITUTE—ROSE EXHIBITION HALL.

The Chicago men certainly have acted in the spirit which has made their city the Imperial City of the West. The beautiful Blackstone Hall in the Art Institute is to welcome the treasures of the best rose cultivators of the nation.

The exhibition will be opened on Wednesday, March 25th at 5 P. M. The first session of the annual meeting will be called at 7.30 P. M. sharp, the second session at 2.30 P. M. of the 26th, and a third meeting will follow.

The headquarters of the Society will be at the Stratford Hotel opposite the Art Institute on Jackson Boulevard.

President Simpson will open the meeting with an address. Papers or addresses will be offered by J. A. Valentine of Denver, on "Roses in Colorado;" W. A. Manda of South Orange, N. J., on "Rose Gardens;" George A. Maynadier of the Department of Agriculture, Washington, D. C., on "Soils;" Robert Craig of Philadelphia, on "Roses in Pots for Easter;" W. H. Elliott of Brighton, Mass., on "The Proper Size of Greenhouses for Commercial Purposes;" J. F. Sullivan of Detroit, "Roses for Decorative Purposes."

During the meetings the Secretary will lay before the Convention the matter of the Rose Journal as a quarterly missive; one third of the members required to start the work for a year have enrolled.

Special Prizes.

The large list of Specials betokens a most creditable interest in the coming Rose Show. August F. Poshmann, Morton Grove, Ill., is manager, George Asmus, 879 West Madison St., Chicago, Ill., is assistant manager, and will be in charge of exhibits in Art Institute,

Michigan Ave. and Adams Street, Chicago, Ill., March 25, 26, 27.

Send an application for entry to T. E. Waters, secretary of the Chicago Florists' Club, 21 E. Randolph street, or file with Benjamin Hammond, secretary of the American Rose Society. A supplementary list is ready for all interested persons. It is urgently desired that all intending exhibitors will let the committee know

GEORGE ASMUS
Exhibition Manager.

early what they will send. Last year at Washington exhibitors delayed doing this until the very last day in the afternoon, and the result was that the beautiful show which ensued, was really not known until it was on the ground, and this rush made it hard work to handle.

Division F.—Special Prizes for Cut Blooms, Etc.

F. 145. Fifty Blooms American Beauty Rose. American Rose Society's prizes, \$50, \$25.

F. 146. Display of cut Roses, all varieties. Challenge prize, valued at \$250, offered by Benjamin Dorrance; the winner to hold the prize a year and on relinquishing it to the society for another competition at the end of that period to receive a silver shield suitably engraved as a permanent record of his having held the prize. The names of the winners will be engraved consecutively on the prize.

F. 147. Outdoor Roses in bloom—in pots or tubs. \$200 cash for first prize, by Philip Breitmeyer of Detroit; \$100 cash for second prize, by Arthur T. Boddington, of New York City. Exhibits to consist of 150 plants, not more than five plants of one variety; each to be correctly labeled. All types and classes suitable for out-of-door planting may be included.

F. 148. Vase of one hundred Richmonds, \$50 in gold, offered by E. G. Hill Co., Richmond, Ind.

F. 149. Fifty Blooms of any Rose of American origin now in commerce. Silver cup, value \$25, offered by Alexander Montgomery, Natick, Mass.

F. 150. For the largest and most varied collection of Cut Roses of all classes, one or more blooms in a vase, the variety to count 65 points. Silver cup or \$25 in gold, offered by W. A. Manda, South Orange, N. J.

F. 151. Twenty-five Blooms of La Detroit. Prize of \$25 offered by John Breitmeyer's Sons, Detroit, Mich.

F. 152. The Vase of Roses showing the most artistic arrangement in the exhibition. \$25 offered by Welch Bros., Boston.

F. 153. For the most beautiful exhibit in the hall, a prize of \$20 in gold is offered by Miss M. I. Hammond, Fishkill-on-Hudson, N. Y. Each lady visiting the exhibition the first day to cast a vote on leaving the hall and the exhibit receiving the largest number of votes to receive the prize.

F. 154. One hundred Blooms of Killarney. \$50 offered by Robert Simpson, Clifton, N. J.

F. 155. Fifty Blooms of Liberty. \$25 offered by Adolph Farenwald, Hillside, Pa.

F. 156. Fifty Blooms of Killarney. \$25 offered by Dingee & Conard Co., West Grove, Pa.

F. 157. Fifty Blooms of Erldesmald.

\$25 offered by Traendly & Schenck, New York.

F. 158. Fifty Blooms of Bride. \$25 offered by Emil Buettnier, Park Ridge, Ill.

F. 159. Fifty Blooms of Liberty. \$25 offered by John Davis Co., Chicago.

F. 160. Fifty Blooms of Kaiserin Augusta Victoria. \$25 offered by The Glode Coal Co., Chicago.

F. 161. Fifty Blooms of Golden Gate. \$25 offered by J. A. Budlong, Chicago.

F. 162. Fifty Blooms of Ivory. \$25 offered by J. P. Wilcox, Council Bluffs, Iowa.

F. 163. The best one hundred Blooms of Pink Roses in the show. \$50 offered by Poehlmann Bros. Co., Chicago.

F. 164. Fifty Blooms of Red Roses, Richmond and American Beauties excluded. \$25 offered by Poehlmann Bros. Co., Chicago.

F. 165. One Hundred Blooms of Richmond. \$50 offered by Poehlmann Bros. Co., Chicago.

F. 166. One Hundred Blooms of Kate Moulton. First prize, \$25, offered by Wietor Bros., Chicago. Second prize, \$20, offered by Geo. Reinberg, Chicago.

F. 167. One Hundred Blooms of Uncle John. \$25 offered by Wietor Bros., Chicago.

F. 168. One Hundred Blooms of Mad. A. Chatenay. Silver Cup, value \$25, offered by Vaughan's Seed Store, Chicago.

F. 169. Fifty Blooms of American Beauty. \$50 offered by The Mogg Coal Co., Chicago.

F. 170. One Hundred Blooms of Bride. \$25 offered by The Pulverized Manure Co., Chicago.

F. 171. One Hundred Blooms of Sunrise. \$25 offered by The Florists' Review, Chicago.

F. 172. Twenty-five Blooms of Bridesmaid exhibited by growers having less than 50,000 square feet of glass. \$25 offered by Basset & Washburn, Chicago.

F. 173. Twenty-five Blooms of Bride exhibited by growers having less than 50,000 square feet of glass. \$25 offered by Basset & Washburn, Chicago.

F. 174. One Hundred Blooms of Mrs. Potter Palmer. \$50 offered by S. Freeman & Sons, Chicago.

F. 175. The best new Rose not in commerce and never exhibited before the American Rose Society, vase to contain not less than twelve and not more than twenty-five Blooms. Silver Cup, value \$25, offered by F. R. Pierson, Tarrytown, N. Y.

F. 176. Fifty Blooms of American Beauty. Cyclopedia of American Horticulture by Prof. L. H. Bailey, value \$30, offered by The American Florist Co., Chicago.

F. 177. Best Twenty-five Blooms of Pink Roses not disseminated prior to 1908. Silver Cup, value \$15, offered by J. B. Deamond Co., Chicago.

F. 178. Twenty-five Blooms of Bridesmaid. \$10 offered by W. W. Barnard Co., Chicago.

F. 179. Twenty-five Blooms of Richmond. \$10 offered by Geo. Keller & Son, Chicago.

F. 180. Twenty-five Blooms of Sunrise. \$10 offered by Leonard Kill, Chicago.

F. 181. Twenty-five Blooms of Uncle John. \$10 offered by F. R. Newbold, New York.

F. 182. Twenty-five Blooms of Killarney. \$10 offered by Kroeschell Bros. Co., Chicago.

F. 183. Twenty-five Blooms of Bride. \$10 offered by A. Dietsch Co., Chicago.

F. 184. Fifty Blooms of Mad. A. Chatenay. \$10 offered by Welland & Olinger, New Castle, Ind.

F. 185. Fifty Blooms of American Beauty. Two tons of Florist Bone offered by Darling & Co., Chicago.

F. 186. Twelve named Varieties of Hybrid Perpetuals in pots. \$10 offered by Kroeschell Bros. Co., Chicago.

F. 187. Twenty-five Blooms of Killarney. \$10 offered by Holten & Hunkel, Milwaukee, Wis.

F. 188. Exhibit of cut Roses, four varieties, Twelve Blooms of each variety, open to Private Gardeners only. \$25 offered by Harry O. May, Summit, N. J.

F. 189. Two Hundred Lily of the Valley. First prize \$10, offered by H. N. Bruns, Chicago. Second prize \$8, offered by Poehlmann Bros. Co., Chicago.

F. 190. Vase of One Hundred American Beauties. Silver Cup, valued at \$10, offered by Crane & Co., Chicago, Ill.

F. 191. Best Fifty Blooms of Tow Rose

never before exhibited for competition. Silver Loving Cup, valued at \$20, offered by Heller Bros. New Castle, Ill.

Since issuing the above list, further special prizes have been offered, as follows:

A special growers' prize for the men who actually grew the flowers, by Peter Reinberg of Chicago, a first prize of \$25, second \$15, third \$10. A sweepstake by the Horticultural Society of Chicago, of a silver medal. A. L. Randall Co. offers a prize of \$10 as a second for Ivory, and there was omitted in the printed list a prize by H. A. Michell Co., Philadelphia, for the best display of 50 Kate Moultons, a silver vase, valued at \$25.

A. L. Randall Co., 21 E. Randolph street, will receive and take care of any flowers sent for exhibition.

BENJAMIN HAMMOND,
Secretary.

Fishkill-on-Hudson, N. Y.

THE MICHELL TROPHY.

"We present a picture of the Henry F. Michell Co. trophy, for the best fifty roses, Kate Moulton, exhibited at the annual convention of the American Rose Society, Chicago, Ill., March 25 to 27.

It will be noticed that it is a practical, useful vase, having a base of six and a quarter inches and an opening at the top of six inches, so that it will take, not only considerable stems, but will hold a goodly quantity of water. The height is twelve inches.

The trophy, which was designed and made by a Philadelphia company, has a beautiful hand-chased representation of the Kate Moulton rose on the front. It is finished in French gray and is one of the most beautiful of the many beautiful prizes contributed from time to time by the H. F. Michell Co.

ROSES AT WESTERLY, R. I.

A good example of profitable rose-growing is to be seen in the houses of S. J. Reuter Co. at Westerly, R. I. Most of the standard varieties, with the exception of American Beauty, and many of the newer aspirants are grown here and all are grafted stock from one to four years old except Chatenay, which Mr. Reuter finds grows much better on its own roots. The latter is especially luxuriant and at the present time is producing blooms of phenomenal size on stems of unusual length. This rose requires a large quantity of water when in active growth.

Among the roses to be given a good trial here during the coming season are My Maryland and Cardinal. John Cook's two beautiful seedlings, also Mrs. Jardine and Mrs. Potter Palmer. The latter is expected, of course, to do as well as Chatenay has done. Miss Kate Moulton has been grown during the past season, but with indifferent success, and being so nearly like Chatenay will be discarded.

While on the subject of Mr. Reuter's establishment we might mention the superb carnations grown there—150,000 plants altogether. Young stock that has been in small pots and is now ready for a shift is being planted out in cold frames, where it will remain until moved to houses or field.

The old range of 17 houses—most of them small—covering altogether about 65,000 sq. ft., will be taken down this coming season and five large, modern houses of equal capacity in the aggregate will be erected in their place. Two additional boilers of 150 horsepower have recently been installed.

ROSE APPLE BLOSSOM.

An attempt is being made on the Continent to boom this variety, but I may say I am already acquainted with it.

Readers of the H. T. J. naturally desire to be up-to-date but at the same time have no wish to spend money on new things of no improvement on already existing varieties, and I think I should inform you that as early as last year my firm (Messrs. Hugh Low & Co.) invested somewhat heavily in "Apple Blossom." As however, this variety turned out so unsatisfactorily, my firm have not offered it to the English trade.

From my own observation I should say "Apple Blossom" was no improvement on already existing Polyanthas, and now that we have the perpetual flowering "Baby Dorothy," which has larger heads and larger individual flowers of better color, there is no room for "Apple Blossom."

Most nurserymen will agree with me it would be an advantage to reduce the number of old and inferior varieties of roses, and rose growers should take a leaf from the Carnation growers' book, for as soon as a variety becomes out of date they cease to propagate it, and so put their money on the right horse.—Lawrence J. Cook, in Hort. Trade Journal, London.

In the light of the above communication the views of an American plant grower of extensive experience—Anton Schultheis, of College Point, N. Y.—may prove interesting. Mr. Schultheis is very much impressed with the pretty little Apple Blossom rose as a subject for greenhouse forcing and especially as an Easter plant. Its continuous blooming propensities, the color and fragrance of the flowers so aptly suggested in the name Apple Blossom are, in Mr. Schultheis opinion, a sufficient assurance of the coming popularity of this novelty which will make an excellent companion for the crimson flowered "Baby Rambler."

NOTES ON NEWER ROSES.

(An interview with P. Joseph Lynch, of the Dinger & Conard Co., by G. C. Watson.)

Tausendschon, ("Thousand Beauties,") is perhaps the most important of the newer roses this year and as a seller is making a record. We consider this the most sensational climbing rose yet introduced. In addition to being a grand outdoor rose it is being taken up by the commercial florists as a good Easter plant.

J. B. Clark is not as free blooming as Liberty or Richmond, but is a much more rapid and vigorous grower and the flowers at their best will measure 7 in. across and 5 in. deep, intense scarlet shaded with dark crimson; fragrance, foliage and stem all that could be desired. Hardy as far north as Canada.

"Baby Rambler" was a great seller last year and this season we have two good companions to it—a pink in Annie Muller and a white in Catherine Zeimet.

Etoile de France might be termed a crimson-velvet Cochet, and can be used with propriety along-side of the universally popular white, pink, and yellow Cochets—using in the same connection the Baldwin ("Helen Gould") for red. The flower is almost as large as American Beauty and nearly if not quite as fragrant while the color is far superior.

The eminent horticulturist, M. de Vilmorin, stated recently that we had about reached the limit of improvement among the various classes of garden roses, and that a new species to work up from would be most likely to furnish the best results. He mentioned Rosa rugosa as the most promising subject for the purpose and the rosarians have already started on this stock. In Sir Thomas Lipton we have a valuable variety, a pure white, large and full double, fragrant and a continuous bloomer. The great objection to rugosa is its too, too, thorny stems but efforts will no doubt be made to modify this fault in future varieties.

A good word must be said in passing for Triumph de Pernet Pere. Color vivid crimson, form refined and symmetrical when open—the buds long and pointed. Jean Pernet the celebrated French rosarian thinks this is the best he has yet sent out.

We are more than ever enthusiasts on Killarney and that reminds us of a point which every grower of new roses should remember. For years we could not grow Killarney without a dose of mildew but after the stock got acclimated we began to get this variety in its true form. A grower is almost certain to be disappointed with imported stock the first year or two, and should plant wherever possible the home grown article. Where acclimated stock can be procured it is much preferable to the imported even if the first cost be greater—which it often is not.

The demand for big two and three-year pot-grown plants for May planting is increasing. While these are expensive the desire for immediate and gorgeous effect is so strong among the wealthy—an ever increasing class in our progressive country—that we are constantly improving our facilities in that direction.

If you ask us to name the best H.

CRIMSON HYBRID TEA ROSE—GRUSS AN TEPLITZ

Courtesy Ellwanger & Barry

P. red rose we would say Cheshunt Hybrid. Best grower, best color, best foliage, best every way; free flowering, magnificent as to size, perfect in form.

We like Uncle John, of course, and find the demand for it increasing yearly but we have one even better in Souvenir de Pere Notting which may be truly described as an improved Uncle John.

Among the promising roses for the future not only for the garden but for greenhouse culture we think Intensity and Olivia, both H. T.'s, stand a good show. Intensity is the deepest crimson maroon with large, full double flowers, and quite fragrant. Olivia is a deep rose, almost unique in color, of fine substance and has most beautiful buds.

A MODERN ROSE HOUSE.

We have had something to say heretofore concerning the "modern" rose house. The picture on the front page of this issue shows the interior of one. This is one of two houses built for Robert Simpson at Clifton, N. J., by Lord & Burnham Company, in 1906, of their Sectional Iron Frame Construction, having continuous ventilating

sash on the north and south side of the ridge.

There are two houses 30 feet wide by 465 feet long, built 26 feet apart, and connected with a passage 8 feet 4 inches wide. The section of these houses was designed to meet the idea of Mr. Simpson, who is one of the most successful rose growers in the country.

While the ground on which these houses are built, is level, the inside of each house is graded up 18 inches at the north side, so that the benches can be worked without any raised walks. On referring to the photograph you will notice that the ridge is carried further to the north than is usual in 3-4 span houses. This was done so that the ridge would not cast any shade on the north bench. The houses are heated by hot water, supplemented with steam. The steam pipes are also used for fumigating purposes.

The owner is justly proud of these houses, and on one interested in rose growing can visit his place without feeling that the time has been well spent and that he has added something to his previous knowledge of the business.

INDOOR COMMERCIAL ROSE CULTURE.

A Paper by Eber Holmes before the Gardeners' and Florists' Club of Boston.

Let us look for a moment at the rose growing industry twenty years ago, that we may better appreciate the situation today. We had then such varieties as Gontier, Bennett, Bon Silene, Safrano, Mermet, and other good ones. It cannot be said that these have run out or have deteriorated. They have simply been superseded by better varieties. We had an illustration of this recently in the Safranoses exhibited by W. H. Elliott at the Boston show. At that time also we had the old style house, 100 ft. long and about 18 wide, with wooden walls and benches built up high to bring the plants up to the light. Now, we build glass walls and keep the plants nearer the ground. The question might naturally be asked, to what do you attribute the advance in the quality of roses produced today over those of that period? The reply is, first of all the modern house. If I had to follow the rating given to flowerers in the exhibitions taking 100 as a total, I would give the modern house 40 points. The other 60 I would divide equally between the use of grafted stock, improved methods of growing, and new and better varieties in cultivation today.

As to Size of House.

Taking these points in this order, what is the best house? and another question often asked is, what is the limit of size? We have a house 22x500 feet, even span, continuous ventilation at the top on both sides, containing five benches, which I like very much. It is a very easy house to build and maintain. The width could be increased to 34 or 36 feet at a slight additional cost, and the extra space obtained would be of great value for an extra bench or wider walks. It is an old saying that the best roses grow next to the walks, for the more air and light the plants get the better the results. We have another house 54x300 ft., which I like better, with the possible exception that it is not so easy to make repairs on a high roof as on a lower one. These large houses are easier to heat than the smaller ones. They catch every ray of sunlight in winter, fires can be banked earlier and started up later than in the smaller houses. It is no experiment now, but it is a fact that with the larger body

of air the temperature does not fluctuate as it does in a small house.

We find that our large house runs even on cold nights with less trouble than smaller ones. With ventilation at the top on both sides and front ventilators hinged at the bottom so that the air strikes upward instead of directly on the plants, the temperature can be controlled in spite of the long stretch of roof. It costs a little more proportionately to build the larger house, for it must be made stronger and braced to withstand any gale that may blow. The steeper the pitch, the greater the resistance, and the large houses are triumphs of the builder's skill. I think that 60 ft. is wide enough for any rose house. The only limits to the length are the size of the field and the purse of the builder. I believe that the largest houses produce the largest flowers, everything else being equal, and no man needs any better argument in favor of this type of house than the fact that men like Elliott and Montgomery, who are the most conservative and at the same time the most progressive rose growers we have, after years of experience with large houses, erect larger ones.

Grafting.

The next consideration is the practice of grafting so common now, in the place of using own root plants. I cannot do better than recommend Montgomery's treatise on grafting to anyone wanting this subject explained in a digestible manner. I might say, however, buy the very best stock obtainable. As soon as received, we unpack and bury in a cold cellar away from frost, first a layer of loam, then one of stock, until all are covered, taking it out as required for potting, or it can be heeled in, in a cold green-

house if there is room and no cellar or shed is available. If you have no cold house in which to start the stock, clean out a pair of benches on the north side in the coldest part of your house, and hang up burlap to keep out the sun but not so as to exclude the air. Keep well damped down and syringed, being careful not to get the roots too wet.

The grafting case, also, if it has to be built in a rose house, should be on the north side or it will be difficult to keep the heat down as the season advances. Cheese cloth makes a good shade for the grafting case, and under these same conditions a cloudy day is to be preferred to a sunny one for this operation. We prefer standing up to a table about the height of a potting bench when grafting; it is as comfortable as the position you assume when sitting down to this work, and a man can work faster when he does not have to keep changing his position. A good man will graft from 150 to 175 an hour. It is important that the grafts should not be allowed to wilt, but should be placed in the case as quickly as possible, which should be as air-tight as it can be made, and closed up at once. More plants are killed, perhaps, by improper treatment in the case than in any other way, and there is a good deal in knowing enough to let them alone for the first five days or so if the thermometer reads aright and the plants look fresh and moist. If, however, the case should be too hot, or dry, or seem too full of moisture, I would not hesitate (with the ventilators in the house closed) to open the case for a few minutes and remedy the defect. It is important to keep water out of the cut until it has healed thoroughly.

We find when buying young stock

NEW My Maryland ROSE

"My Maryland" has more good commercial points than any other Rose. Price, 2 1-2 inch pots, \$25.00 per hundred; \$200.00 per 1000; \$5.00 per dozen.

of new varieties that we often get more than we pay for in the shape of red spider, etc. In this case we always dip small lots as soon as received in tobacco water, or syringe with whale oil soap to which a little moisture has been added. In regard to the time of planting, I have seen roses successfully transplanted at any time of the year, the earlier the better for young stock. It is simply a question of money and convenience, and on large places the planting covers several months.

About "Secrets."

It is not necessary for two men to copy each other too closely to each obtain good results. In fact this may have been some man's undoing before this. Remarks written on watering are often misleading, for one soil will use up two or three times more water than another. So in other ways. Take Richmond for example; I have seen it cut down in the summer with splendid results, and thought that was the proper way to treat it after the first year. I have seen it left without pruning, standing to the top of the stakes, and also tied down, doing absolutely nothing. I have seen others tied down giving an abundance of magnificent flowers. All this goes to show that it is not so much how it is done, as who is doing it. The greatest discoveries of science and manufacturing are sometimes the result of an accident and it is no less true of some secrets in rose growing today. The observant man, in addition to experimenting, will note every detail in the working of his place, and out of some miscalculation or disaster today will possibly see the way to success later. All men make mistakes; the ones who make the least are the most successful.

There are laws governing plant life and growth which must be obeyed, but the man growing roses for profit who can distinguish between the superficial and the fundamental, and produce good stock with economy, which is the key note of commercial success, is well on his way to the top of the ladder.

(To be Continued)

The American Association of Landscape Architects held its monthly meeting in Boston at Hotel Brunswick on March 10, with an attendance of 16. F. M. Clark of Boston was a guest and spoke on dock, harbor and water-front improvements. A. A. Shurtleff spoke on "Municipal Improvements." Frederic L. Olmsted, Jr., presided.

OBITUARY.

Willis Grant Johnson.

Prof. Willis G. Johnson, Associate Editor of the American Agriculturist, died at his home in New York City on March 11. Prof. Johnson was well-informed on agricultural topics and fruits and especially on fruit tree pests, having formerly served as state entomologist of Maryland. He

WILLIS GRANT JOHNSON

had a very wide acquaintance and the news of his death in the midst of his usefulness will be a severe shock to a large circle of friends. Prof. Johnson was an earnest, self-reliant, always busy man, courteous and companionable in manner and a ready talker on every phase of farm and garden work. He leaves a wife and two children.

E. Annabil.

E. Annabil of McPherson, Kan., died suddenly on March 6, in his sixty-ninth year. Until his retirement from business two years ago Mr. Annabil was at the head of the Annabil & Co. Seed House. A widow and five children survive him.

Julius C. Gerlach.

Julius C. Gerlach, who died at St. Augustine, Fla., on March 9, located

in Newark, N. J., about forty-three years ago, and has continued in the florist business in that city until within five years, as the junior partner in the firm of Begerow & Gerlach. Mr. Gerlach was much interested in public affairs and did a great deal of charitable work. He was unmarried.

Mrs. Mary Elizabeth Shaffer.

We are sorry to report the death of Mrs. Mary Elizabeth Shaffer, mother of Geo. C. Shaffer, a well known retailer of Washington, D. C. Mrs. Shaffer died on the morning of March 16th, after a short illness.

Henry McGair.

Henry McGair, who until within a few years carried on a florist business in Olneyville, R. I., died on March 5 at his home.

George E. Dougherty.

George E. Dougherty, florist in Jay St., Brooklyn, N. Y., died on March 5. A father, brother and sister survive him.

THE BOSTON VIOLET

The people today are looking for New Violets just as much as they are for new roses or carnations.

THE BOSTON VIOLET

For the past two years has been placed before the most sceptical buyers in America and they prefer it to any other.

THERE'S A REASON

The Boston Violet is the largest, the most fragrant, it has a very pleasing color, and it is a great keeper.

THE BOSTON VIOLET

Is a variety that is early grown, it is the strongest grower and is in crop from September to May.

THE BOSTON VIOLET

Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

Distribution will Commence in April. Order Now.

PRICES—\$2 per 12; \$12 per 100; \$100 per 1000.

WILLIAM SIM, : : CLIFTONDALE, MASS.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The announcement that Eber Holmes, of the Montrose Greenhouses, one of our most successful rose growers, would read a paper on Indoor Commercial Rose Culture was sufficient to bring out a large and deeply interested crowd at the March meeting of this club. The paper proved to be as expected a very valuable and eminently practical addition to the literature of the rose growing fraternity and at its close its author was accorded a most enthusiastic vote of thanks. W. H. Elliott, being called upon, talked interestingly on the topics, Why do we succeed? Why do we fail? He said that failure is more often due to lack of attention than to lack of knowledge. Tricks and secrets are of no avail without the partnership of man and eternal vigilance. There are a thousand little things that make for success. The greatest mistake a grower can make is in pinning his faith to one idea; too much attention to soils and too little to air and water; fertilizers are a great stumbling block and are the cause of more failures than anything else. High attainments are made possible with best equipment; modern outfits bring greater opportunities but they also bring greater burdens and close application to every detail is the main factor in success. Mr. Elliott's remarks were received with full appreciation. It was announced that William Sim

would give a talk on Sweet Peas at the April meeting.

On the exhibition table were exhibits as follows: From W. H. Elliott, Eber Holmes and R. T. McGorum fine roses, including Richmond, Killarney, Bride, Bridesmaid and Mrs. Morgan; Jos. Fuller, double blue lobelia; Wm. Sim, Boston, violets and sweet peas; H. F. Calder, violets; H. F. Wood, seedling violet No. 7; W. W. Rawson & Co., Anchusa Italica, Dropmore var. Honorable mention was given to the two last named exhibits.

ST. LOUIS FLORIST CLUB.

This club held their monthly meeting on March 12, only twenty members being present. Vice-President G. H. Augermuller was in the chair. The trustees reported that a hall had been secured at 11th and Locust streets in the Bowman building, and by vote it was decided to hold future meetings there. Fred Ammann reported for the potting committee that little progress is being made; subscriptions for stock will be received until May 14, and blanks can be found at any of the wholesale florists. There were but two exhibits of roses, both from Illinois, by J. F. Ammann and E. W. Guy. The judges pronounced them highly commendable. An interesting discussion followed. Ed. Easterday of Nokomis, Ill., was a visitor. Flower shows, and how to make them attractive to the trade, will be discussed at the April 9th meeting.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

"Carnation Night" on March 11 was a great success. The exhibition tables were filled, the quality of the flowers was fully up to the standard of last year and some considered better. The attendance was larger than we ever had. New York, Orange, Newark, Tewksbury, Mass., Morristown, Madison, Dover and Montclair, all had their delegates and we had all we wanted to do to seat them comfortably. A. R. Kennedy read an able paper on the cultivation of the carnation. He is an advocate of the indoor method of planting direct from pots into the bench, and the flowers he has exhibited at the various meetings show that it is with him entirely successful.

A. Roper came in person and brought Bay State, a grand variegated variety. It scored 90 points and was awarded a certificate of merit. Seedling No. 21 from same grower scored 76 points and got honorable mention; his carnation No. 1000 received a vote of thanks. John E. Haines, through O. A. Miller, sent Imperial, Pink Imperial and John E. Haines, which had previously received certificates of merit. Harvard from J. D. Cockeroff scored 85 points; certificate of merit. John Green had red seedling No. 1 and white seedling No. 2. Judges were favorably impressed and would like to see them in larger quantity. Carnation No. 20, from W. A. Manda, scored 80 points; honorable mention. May

from Baur & Smith, honorable mention. Cultural certificates were awarded A. R. Kennedy, gardener to Dr. L. D. Ward, for White Lawson and Victory; John R. Mitchell, Rose Pink Enchantress and Winsor; A. Herrington, carnations Beacon, Robt. Craig, White Perfection and Enchantress, and stock Queen Alexandra and Cattleya Trianae, John Dervan, gardener to A. C. Van Gassbeck, mixed roses; Herbert Entwistle, gardener to Julius Cattin, Primula obconica; H. B. Vyse, gardener to A. R. Whitney, Cineraria hybrida. Votes of thanks to Daille-douze Bros., on Afterglow, which had previously been certificated; R. M. Schultz for Enchantress; John Downing, gardener to Dr. D. H. McAlpin, Winsor and vase mixed carnations; Florham Farms for Anemone St. Bridgld, and display of indoor cauliflower.

The meeting on April 8 will be "Rose Night." John R. Mitchell, who has shown his ability as a grower, has promised an essay. We hope to get most of the new things and our own members promise to make up on standard varieties, so a good show is in sight. E. REGAN.

ELBERON HORTICULTURAL SOCIETY.

The regular meeting was held on March 9, President W. Wood in the chair, with a large attendance. Mr. Collins, florist, of So. Elberon, read a very interesting paper on landscape gardening and a lively discussion followed. A hearty vote of thanks was accorded Mr. Collins. Mr. McFarlane White Plains, N. Y., scored the highest number of points for 1908. A.

Bauer staged a vase of Stock Queen Alexandra, and scored 95 points; J. Kennedy, vase of hyacinths, 85 points. An exceedingly well-grown specimen of a large single-flowering pelargonium, Kingswood, novelty 1907, grown by A. Bauer, received certificate of merit. G. Masson tendered his resignation as secretary, as he is to take another position, and the society thanked him for his good services. A. Bauer succeeds him for the remainder of the year. After adjournment the ladies of the members were invited in and Mr. Logan entertained all with his phonograph. At the next meeting, March 23, W. Robertson will read a paper on "How to make a vegetable garden." A. BAUER, Sec'y.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of this society was held in Bardeck Hall, New Britain, Conn., March 13. The society usually conducts its meetings in County Building, Hartford, but on this occasion the entire body were the guests of the New Britain members.

President Huss read an exhaustive paper on the rose, tracing its history from the remote ages to the present day, and included valuable cultural remarks. J. Gerard gave an interesting address on the duties and privileges of the amateur, and emphasized the value of membership in a live horticultural society. Mr. Lorenzen gave an interesting account of his recent Central American trip. Alexander Cumming, City Forester, Hartford, read a paper on the arrangement and care of shrubs and pointed out how

largely a tastefully arranged shrubbery added to the value of property.

Mr. Shultz read an amusing paper, prepared by a New Britain school girl, on "The trials of the amateur gardener". One of the points made by the youthful authoress was, that when the average New Britain hubby postponed his home-coming until the "wee sma' hours", his ready excuse was that he had been up to Hartford, attending a meeting of C. H. Society. Mr. Shultz also acted as chairman and his tact and ready wit added much to the enjoyment and success of the meeting. There was a large number of members present and altogether this meeting will be remembered as one of the most successful held under the auspices of the society.

A. C., JR., Sec'y.

THE NATIONAL FLOWER SHOW.

The preliminary premium list for the great National Flower Show to be held in Chicago, November 6-15, 1908, has been issued. There are 350 classes, regular and special, each carrying from one to four premiums. It is a remarkable list and is liberal enough to bring out a big response in exhibits. We shall have occasion to refer to it at greater length in the near future. We hope every interested reader will send to Secretary Rudd for a copy. It is well worth perusal, and gives some little idea of the magnitude of the long-talked-of-event.

The next meeting of the New York Florists' Club will be held in the old meeting room, Grand Opera House Building, Monday, April 13.

LENOX HORTICULTURAL SOCIETY.

The annual Rose and Carnation night was held March 7th in the society's rooms, and was the most successful ever held. Some sixty vases were shown of the leading varieties and the quality was very high. In the various carnation colors Beacon seemed to be the most popular scarlet, Winsor in pink, White Perfection and White Enchantress in white, Pink Imperial in dark pink and Enchantress in light pink; Mrs. Patten as a variegated out-classed Variegated Lawson and Harlowarden as a crimson showed strongest among the older varieties. The new crimson, Harvard, shown by J. D. Cockerott, as well as Wanoka, exhibited by Wanoka Greenhouses, were much admired and were given highest award.

A splendid vase of gardenias was shown by F. Heeremans, whose success with them has been far above the average. Stocks cut from four-inch pots running from 2 1-2 feet to 3 1-2 in length were shown by A. H. Wingett, the varieties being Queen Alexandra, Beauty of Nice and Princess Alice. A bunch of 300 Princess of Wales violets of unsurpassed quality was shown by F. Heeremans. Boston violet sent by Wm. Sim unfortunately arrived in very poor condition. Roses were exhibited by A. H. Wingett and F. Heeremans. Also a salmon-pink sport of Beacon carnation by the former.

The following is the list of prize winners. First prizes in carnation classes to F. Heeremans for Winsor, Enchantress, Robert Craig and Helen Gould; A. H. Wingett for White Perfection, Pink Imperial, and Mrs. M. A. Patten; A. J. Loveless for Beacon and White Enchantress; D. Dunn for Winsor and Red Lawson; G. Breed for Harlowarden and Deheim; S. Carlquist for Enchantress. First prizes in rose classes to A. H. Wingett for Bride, Bridesmaid and Richmond; F. Heeremans for Liberty and American Beauty. Certificates of merit to J. D. Cockerott for carnation Harvard; Wanoka Greenhouses for carnation Wanoka. Certificates of cultural commendation to A. H. Wingett for vase of mixed stocks. Diplomas to F. Heeremans for carnation Enchantress, gardenias and violets; Wm. Sim for Boston violet. The judges were G. H. Thompson, E. J. Norman and R. Spiers. G. H. INSTONE, Sec'y.

ST. LOUIS FLOWER SHOW.

The third annual Spring Flower Show given by the St. Louis Horticultural Society opened in Masonic Temple, Tuesday, March 10, with the hall well filled with blooming plants and cut flowers. A pleasing innovation was a display of nursery stock in a side room. The walls were decorated with maps showing how gardens should be laid out. These displays were made by H. Weber and Sons, C. C. Sanders and Emil Rotenhofer. Other exhibitors were: Fred C. Weber, Chas. Beyer, Theo. Miller, Benzela Floral Co., J. C. Vaughan and Geo. A. Kuhl.

Awards in the competitive classes were placed as follows:

Weber. 1st, 2nd, and 3rd. Display of cut flowers in vases, Wm. Schray & Sons; 2nd, Koenig Floral Co.

Peter Reinberg's exhibit intended for competition arrived one day late. The judges were Messrs. R. F. Tesson, Alex Waldbart and Andrew Meyer, Sr. The attendance fell below expectations.

The visitors were entertained by the executive committee at a banquet on Wednesday evening. Among them were: J. S. Wilson, Western Springs, Ill.; Geo. A. Kuhl, Pekin, Ill.; J. F. Ammann and Henry Blexen, Edwardsville, Ill.; H. T. Pyfer and Peter Olsen, Joliet, Ill.; Claude Wiley, Murphysboro, Ill.; A. S. Halsted, Belleville, Ill.; Ed. Easterday, Nokomis, Ill., and A. T. Hey, Springfield, Ill.

The Rochester Commercial Florists' Association was organized recently with Fred W. Vick as president; F. J. Keller, vice-president; Geo. B. Hart, secretary and treasurer. Meetings will be held at 24 Stone Street on the second Monday of each month.

The Bowling Club of the New York Florists Club, has secured accommodations at the Albion alleys, 117 West 23rd St., and a series of practice games will be played every Friday evening. W. E. Marshall is chairman

PLANT IMPORTS.

There were entered at the port of New York during the week of March 11 to March 17, inclusive, the following goods.

From Antwerp: R. F. Lang, 19 cs. plants; Te. Order, 192 tubs shrubs, 3 cs. plants, 2 cs. bulbs; McHutchison & Co., 2 cs. plants.

From Rotterdam: H. F. Darrow, 64 pgs. plants; Wm. Elliott & Sons, 41 cs. do., 13 cs. trees and shrubs; Livingstone Seed Co., 17 cs. trees; P. Ouewerkerk, 71 cs. do.; T. C. Pollock, 27 cs. plants; McHutchison & Co., 148 cs. do., 10 pgs. do., 10 cs. trees; H. & O. Smith, 69 cs. plants; Stumpp & Walter Co., 1 cs. do.; Vaughan's Seed Store, 31 cs. trees, 6 cs. plants; Maltus & Ware, 172 cs. do., 125 pgs. do., 13 cs. trees, 70 cs. plants and roots; Sundry Forwarders, 45 cs. trees, 22 cs. plants, 11 cs. flower roots, 10 bags flower seed.

From Germany: August Rolker & Sons, 3 cs. trees; R. F. Lang, 3 cs. plants; Sundry Forwarders, 4 cs. do.; 27 pgs. do., 6 pgs. flower roots, 1 bals. shrubbery.

Via Southampton: McHutchison & Co., 1 cs. plants; August Rolker & Sons, 9 cs. do.; O. J. Smith, 6 cs. trees; J. M. Thorburn & Co., 13 pgs. garden seeds; sundry forwarders, 5 pgs. trees, 7 cs. bulbs.

The L. L. Olds Co., Clinton, Wis., lost their entire plant by fire on March 5. The loss is placed at \$50,000, partially insured.

SUCCESS REWARDED BY SUCCESS—THE UNPRECEDENTED

sale of High Class Aster seed more fully demonstrates the fact that cut flower growers of the better classes, as well as the retail florists from all parts of the United States and Canada, also Europe, are open to conviction that the trade demands a higher and better grade and quality of Asters than has heretofore been produced, consequently our improved chrysanthemum type of Aster Lady Roosevelt seed is in wonderful demand, and not only the seed, but also the cut flower product from this unsurpassed improved variety of Aster as same are being contracted for already for next September delivery by retail florists from several large cities of various parts of the United States, viz: New York, Pittsburg, New Orleans, Denver, &c., at \$1.00 per dozen, net. As we are able to produce this superior Aster Lady Roosevelt by our special improved Scientific Intense Culture Methods with bloom stems 36 in. or more in length enables us to ship the cut flower product to any city in the United States east of Denver without deterioration, as with the large, long, stiff wiry stems they absorb a large quantity of water before shipping, which preserves them in transit, and also two or three weeks after their arrival at their destination.

Marvelous as it may seem, we are expecting this season to improve upon our last seasons accomplishments by growing our Aster plants 6 feet tall, wherein last season they were only 4½ and 5 feet in height, thereby producing bloom stems 36 to 48 inches in length with flowers 4½ to 5½ inches in diameter, thus enabling us to realize net \$4 000 or more, from the one ¼ acre that we intend to grow for the cut flower trade. These will be marketed in at least 40 and possible 60 different cities in the United States, from Boston, Mass., to Denver inclusive. This is our proposed plan for creating a demand and sale for our unparalleled Chrysanthemum type of Aster, Lady Roosevelt for those who may in the near future become producers of this special Aster from the seed they are now purchasing from us. FOR still further desired information send for our illustrated folder—which also contains other very interesting information relative to other special crops we are engaged in the culture of.

LAGER & HURRELL, - - - SUMMIT, N. J.

A NEW SOCIETY LAUNCHED.

On Saturday afternoon and evening, between forty and fifty gentlemen lovers of orchids or interested in orchid culture met, pursuant to call, at the hall of the American Institute, New York, to consider the feasibility of and take preliminary steps for the organization of an orchid society of America. Among those present and those from whom approving letters were received, amateur enthusiasts, gardeners and commercial firms were well represented, and the spirit displayed left no room for doubt as to the excellent prospects for the proposed organization. The meeting organized at 7.30 P. M. by the selection of Wm. J. Stewart of Boston as temporary chairman, and Ed Roehrs of Rutherford as temporary secretary. The result of the deliberations was the appointment of a committee of nine on organization to formulate plans and nominate officers and to report at an adjourned meeting, the date of which will be later announced. The committee was constituted as follows: Clement C. Moore, George Schlegel, Dr. Kitchen, J. E. Rothwell, Mrs. Geo. B. Wilson, G. V. Nash, H. A. Siebrecht, Jos. A. Manda and John E. Lager. The exhibition in connection with the meeting continued from 4 till 10 P. M. A few of the more interesting and rare things included in the various groups were as follows:

From Lager & Hurrell, about three dozen species in pots and pans, including *Camerotis purpurea*, a little gem very rare *Dendrobium nobile* Allani-
anum, *Amesianum*, *Cambridgeanum*, and *chryso-discus*, the latter a beautiful little hybrid; *Laelio-Cattleya* C. B. Roeb-
ling, *Cypripedium* Mrs. W. A. Roeb-
ling, and the odd looking *Oncidium fuscum*.

From Julius Roehrs Co., *Cattleya* *Trianae* *alba*, *C. Schroderae* dark lipped varieties, *Cymbidium insigne* a pale pink flower with carmine pencilling on the lip (its first appearance in this country), *Cypripedium* *Leeanum* *Chinkaherryanum*, *Phalaenopsis* *Rimestadiana*

From Clement C. Moore, gardener E. Knight, *Cattleya Schroderae* var. *The Gem*, *C. Sch. Oritani* and several other lovely forms of this glorious orchid and a hybrid between *Cattleya Mendellii* and *Brassavola Digbyana*, a beautiful flower with very large fringed lip. C. G. Roeb-
ling, gardener James Goodier, sent, among other things, a collection of *exypripedium* crosses, in-

cluding *C. X James K. Polk*, *C. X Prewettii*, *C. X W. H. Harrison*, *C. X Germynanum*, *C. X Andrew Jackson*, *C. X Medera superba*, *C. X Sallierii*, *C. X John Tyler*, *C. X Adrastus*, *C. X Patrick O'Mara*, and *C. villosum* *Roeblingianum*, the blue-lipped *Cattleya Trianae* *Roeblingiana*, *Dendrobium Ashburtonianum* and *Devonianum*.

J. A. Manda, *Cypripedium glaucophyllum*, *Williamsii*, *Winneanum*, *media superba* and *Lathamianum aureum* and *Phaio-Calanthe Arnoldiae*.

Carrillo & Baldwin, *Laelio-Cattleya Myra* (*C. Schroderae X Laelia flava*) and *Coelogyne cristata alba*

Seth Borden, gardener F. Varden, *Dendrobium thyrsoiflorum* and other out bloom.

At the meeting of the Dayton (O.) Florists' Club held on March 2, officers were elected as follows: President, H. H. Ritter; vice-president, Mrs. Elizabeth Young; treasurer, George Bartholomew; secretary, H. Frank.

CHOICE SINGLE FLOWERING ENGLISH WALL-FLOWER FOR EASTER BLOOMING

We have an elegant lot of these old-fashioned favorites, field-grown plants, which were potted up into four-inch pots during the latter part of September and which have been carried through the winter in cold frames and are now in prime condition to move. If placed in a carnation house temperature they will come in nicely for Easter, at which time there will be ready sale, at remunerative prices.

Strong, bushy, shapely plants from four-inch pots, \$1.25 per dozen; \$8.00 per 100; \$70.00 per 1000.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

CHRYSANTHEMUMS

Novelties for 1908 in 2½ inch Pots, Ready for Immediate Shipment

MRS. NORMAN DAVIS. Pure white, an improved Mme. Carnot. Best exhibition white out.
DOROTHY GOLDSMITH. Might be called a bronze F. S. Vallis, and easy doer. The finest bronze out.
KATIE PALGRAVE. A clear, waxy white, resembling Mrs. A. T. Miller, but fuller, and two weeks later
MRS. SOUTHGATE. As large as F. S. Vallis, but a brighter yellow.

O. H. BROOMHEAD. An immense, solid bloom, rich deep rose, with sturdy dwarf habit.
W. MEREDITH. Dark crimson, with gold reverse. An enlarged Edwin Molyneux. A reliable variety.
MARY DONELLAN. A splendid deep yellow.
JOSEPH STONEY. Best exhibition crimson.
HAROLD WELLS. Pure white. A monster.
MRS. J. C. NEIL. Solt canary yellow. An improved Cheltoni.

50c each, \$5.00 per doz., \$35.00 per 100

Also a Large Stock of the Leading Chrysanthemums on Hand. Varieties and Prices on Application.

The New Double Flowering Blue Lobelia **KATHLEEN MALLARD** Ready for Immediate Shipment. 25c each, \$2 50 per doz.

Of Interest to Retail Florists

While counter trade is badly affected by the sudden and very numerous appearance of fakirs a healthy balance is maintained through a large order trade. Stores generally are reporting satisfactory business ahead of last year's returns. The coming of St. Patrick's Day has brought forth many interesting window displays. John Breitmeyer's Sons show some good pot plants of dwarf Japanese peonies. Wm. J. Farrand is cutting some good peony flowers.

WASHINGTON this week, there is not sufficient activity to make life interesting. The glut in the carnation market is depressing in the extreme. Flowers are fine, but persons seem to prefer the spring flowers, for which there is more demand than for any thing else, though the prices of these have dropped. Violets can hardly be disposed of at any price, and the quality is quite poor. Grass in the parks is very green, the trees are already in good bud, and everywhere nature has taken on the tint of resurrection.

OPPORTUNITY FOR A FLORIST.

C. A. Hege, president of the Salem Iron Works, writes as follows: It has occurred to me that some of your readers, who are florists, might be glad to know of a good opening for a florist in the south. I believe here in Winston Salem is such an opening, as our town of Winston Salem, N. C., has about 25,000 population and no regular florist. There are two amateur florists here, who might do something if they understood the business. Nearly all the flowers used for floral designs have to be ordered from outside. If you care to mention these facts in your paper I will gladly answer any inquiries relative to same.

EVERLASTING

LEWIS'S WEEKLY BOARD FILE

takes the place of Memo, or Order Books, also a line of nails or of the old fashioned Spike Spindle Sets, from both of which it takes time to remove all but the top paper. Just the thing and the latest device for sale slips, orders to be filled, this week's daily engagements, and a reminder of next week's. The board File is made up of sets of our Devoe Patent Spring Spindle File. The board is of polished Golden Oak, 10 x 5 inches, with brass name plates in which are the days of the week neatly printed. Can remove days of week and place Salesman's name in for cashier's desk. Its good points are that it is Cheap, Ornamental, a Time Saver, makes no holes in the paper, cannot injure operator or customer. PRICE: Set of 7 on a Board, or Florists' use, \$2.00; set of 6 on a Board (omitting Su day), \$1.75. Devoe's Spring Spindle Paper File, Typewriters' Note Book, Hat and Reading Book Holder, comes in Mission Green, Mission Black, Polished Golden Oak base, and is the only perfect Spindle File, best and cheapest Note Book Holder. While in use any Paper can be changed or displaced without removing "Memo", Sale Slip, Copy Lists, Etc. SINGLE FILE, 4 in 1, postpaid 25 cts. Wanted - Florist Supply Houses to Handle. GEO. B. HART, 24 Stone St., Rochester, N. Y.

NEWS NOTES.

The plans of the Spokane Nursery Co., Spokane, Wash., for its plant on the North Side include fireproof concrete buildings, some 23,000 square feet under glass, and private water system, to be completed at an expense of \$50,000. J. H. Mumm is president of the company.

J. T. Withers, landscape gardener and forester from Jersey City, is giving a series of lectures under the auspices of the Twin Cities Florists' and Gardeners' Club and the different improvement societies. So far the lectures have been well attended, and a lot of interest is shown. Mr. Withers speaks very highly of the great possibilities in park work and street tree planting in Minneapolis.

The board file advertised in this issue fills a long-felt want in the daily office and order department of the wholesale or retail florist. Among the firms already using these inexpensive time and labor savers are Thos. F. Galvin, Henry M. Robinson & Co., S. Hoffman and N. F. McCarthy & Co., Boston; A. H. Hews' Pottery, North Cambridge; R. Armstrong Natick; W. W. Edgar Co., Waverley; Mann Bros., Randolph; Thos. Roland Nahant, and many others, all of whom regard them as indispensable.

The "Japana" Cut Flower Holder

A handy article for florists. Sells to the trade on sight. Made of glass in three sizes. The "Anglais" Table Decoration, something entirely new, long needed. The florist and housewife will appreciate this article, as it simplifies the art of table decorating.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

Without a rival in knowledge of the requirements of the trade and the ability to supply them. Our New Illustrated Catalogue, recognized as a work of art unprecedented in its line for variety, novelty and completeness, tells the story fully, and if you have not yet sent for it, do so now.

'TIS FREE TO EVERYBODY IN THE TRADE

H. BAYERSDORFER & CO., 1129 Arch St., Philadelphia, Pa.

FLOWER MARKET REPORTS

BOSTON The present week opened with a fair activity which augured well for the week's business, but it was short-lived and the past three days are in no respect an improvement on the conditions reported last week. All crops are in full tide and the demand is insufficient to move the accumulation. It looks like a heavy load on an uphill road until Easter comes, after which better things may, perhaps, be hoped for. There is no shortage of any staple but all are of the finest quality and finish. The trouble lies entirely in the demand and consumption.

BUFFALO Conditions have changed but little during the past week, as all kinds of stock are getting more plentiful daily with a consequent lowering of prices all along the line, but even had the supply been in moderate offerings it is doubtful if it would have resulted in injecting the needed activity into the trade, shipping trade being light and speculative trading almost eliminated. Carnations are in their flush and the quality has not been equaled this season. The bargain signs read, "today only," but are seen the day after in the same place. It is to be hoped that the coming week may see an improvement in the conditions which have prevailed in the cut flower market so far in the Lenten season.

CHICAGO Business fair with plenty of stock. Beauties more plentiful and other roses at their best. Carnations are beginning to shorten up a little, which means better prices. For the past few days, the number of white carnations bought by Chicago retailers for the purpose of coloring green is surprising. They do not stop at carnations, white roses and lilies being given the same treatment in honor (?) of St. Patrick's Day. Bulbous stock, including lilies, is still very plentiful. Single violets are coming in fine shape and are preferred to New York doubles, which are beginning to shake a little now. With the rose show only a few days off it is pleasing to notice the fine stock that is being cut by some of the prospective competitors for prizes; with good weather it is expected to have the largest and best rose show ever given by the American Rose Society.

NEW YORK. The remark of one wholesaler that he expected to be obliged to begin giving green trading stamps with every flower sale doesn't seem a bit preposterous after one has made the circuit of the wholesale flower market and marveled at the inexhaustible supplies pouring in from all directions and sympathized with the dealer in his inability to move more than a small fraction of the accumulation in any legitimate manner. The rose is now in the same plight which the carnation has had to face for some weeks past and all semblance of standard values for anything in this line has disappeared. The prediction is made that the carnation market will presently see a decided improvement. We hope the near future will

prove the forecaster to have been right in his prediction. Such excellence of quality as is in evidence on all sides merits a better return.

PHILADELPHIA The volume of business was fully maintained last week, but prices rule lower if anything. Carnations have never been so plentiful at this season. American Beauty and other roses are more plentiful and have sustained a serious drop in quotations. Liberty is of fair quality but takes a back seat as compared to Richmond, both in the price and the demand. Violets are more plentiful, the cold frame growers being now in. Lilies, tulips and daffodils are in fair demand and now rank above the carnation as a paying crop. Snapdragons are more plentiful and being well received. A slight improvement is noticeable in the sweet pea market, and the quality is, in general, very choice; orchids normal. The greens market is rather unsatisfactory. A good many shamrocks were sold but many more were given away by the dry-goods men. One department store distributed forty thousand small pots gratis as an advertisement.

TWIN CITIES We are glad to report good business with steady prices. Roses in best grades are still scarce, while the others are plentiful now. Bulbous stock and violets crowded the market somewhat at the beginning of the month, but at present there is just about enough to supply the demand.

PHILADELPHIA NOTES.

Green carnations, green tulips, green roses, green everything on St. Patrick's Day in Philadelphia! The trouble is, these monstrosities were in demand, and traders had neither soul nor sentiment beyond the dollar. Will dirty deformities sell—overboard goes every little spark of celestial fire these traders may have possessed! We regret to have to report this from the home of the Pennsylvania Horticultural Society and the "Pioneer" Florists' Club of America. Shades of Bartram, McMahon, Buist and Meehan!

Wm. Kleinheinz says in regard to snapdragons that plants from cuttings are two weeks later than from seed and offer no advantage to offset. Back to seedlings again next year. Mrs. Morgan is a rose he could not do without under any consideration. Golden Gate and Uncle John also fine. Jno. H. Dodd's superintendent at the Wanamaker estate is also a believer in Uncle John and is trying what is said to be an improved Uncle John: Souvenir de Pere Notting.

Samuel Batchelor is highly pleased

Immediate possession. State full particulars, city water, population, rent, size of house, etc. Address: Retailer, care HORTICULTURE.

This narrative is the experience of many men and it is true.

Hammond's Grape Dust

For Mildew on Roses, Carnations, Etc., in use since 1884

Clifton, N. J., Oct. 11, 1907.

Dear Mr. Hammond:

In reply to your inquiry regarding my experience with Grape Dust, would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for mildew on roses.

I do not know anything about its constituents, nor do I care so long as it does the work, and is as economical as anything else on the market.

During the summer when the steam pipes cannot be brought into use to check mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than sulphur, because it is so much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants, will cover them more thoroughly, and Grape Dust can be put on with a bellows in about one-fourth the time that would be required for sulphur.

The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes I am, Yours very truly, ROBERT SIMPSON.

Put up in 5 and 10 lb. packages at 7 cents per lb.; also in 25 lb. bags, 100 lb. kegs and in barrels of 200 lbs., net. Kept in stock and sold by the leading Seedsmen in America.

USE "SLUG SHOT" FOR SOW BUGS, ETC.

Hammond's Paint and Slug Shot Works

Milwaukee, Wis.—W. Edlfsen, one house; J. Rost, one house.

New Orleans, La.—J. T. Dubois, three houses, 12x35, 11x100, 18x100.

The Pulverized Manure Co., Chicago, find the demand for their cattle manure products by the florist and landscape gardener far beyond their expectations, and what they considered would be a heavy stock for the spring trade was depleted materially by the end of January. This being their first year in this line preparations were not made to meet such an influx of trade, but the coming summer they will take the precaution to run their plant night and day and be in readiness for a large winter business.

SOLVING LOCATION PROBLEMS

It is not so difficult a matter to build high walls to preserve a uniform floor level where the grounds make a sudden descent, but it is quite another matter to secure successful growing houses where either nearby buildings or trees that the owner will not cut down, shade the houses certain times of the day. It is then that a U-Bar house, because of its extreme lightness, will give to your plants practically the same light that other constructions do in the best of locations. Under any conditions, in any position, U-Bar houses are fully twice as light as any others. Send for catalog.

DESIGNERS AND BUILDERS

1 MADISON AVE., NEW YORK

INTERIOR JOHN ASHE ROSE HOUSE

CONCERNING THIS MODEL ROSE HOUSE

HERE then is an up-to-date rose house for private places, one in which from August 1st to February 1st, 11,000 perfect top notch roses were cut from 500 plants.

With this particular arrangement of side-walks three things are accomplished:

All the plants on these 5-foot side benches can be as easily worked as the centre bench.

The plants are far enough from the sides to protect them from chills.

The ventilation following the roof-line and down the sides does not strike directly against the plants, as it does when there is no side-walk, but coming in contact with the heating pipes, reaches the plants tempered. Mildew, the rose grower's bugaboo, as a result is more easily prevented.

Now just take these advantages in combination with our Sectional Iron

Frame Greenhouse, with its exceptional lightness, and absolute *proven durability*, and you have *the* up-to-date rose house.

We have recently printed a book on "Greenhouses As We Build Them," for Colleges, Institutions, Parks and Private Places. We want to send superintendents and gardeners this book, and when writing, it will be a great help to us in completing our list of private places if you will kindly mention employer's name.

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which, if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Zimet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

A World Wide Fame

has been attained by the

WALSH RAMBLERS

They represent the highest attainment and progress in garden and forcing roses, being luxuriant, hardy, floriferous and of wide variety of color and form. The report of the Boston Spring Show in this paper shows how **their record previously made is being maintained in the new varieties.** My catalogue and price list, which you may have for the asking, lists the beautiful **Hiawatha**, and its companions, **Delight**, **Coquina**, **Paradise**, **Lady Gay**, etc. Also the best of the Everblooming Hybrid Teas, Hybrid Perpetuals and Penzance Sweet-Briars in strong, field-grown, dormant plants of first quality stock. Double Hollyhocks, Herbaceous Phlox, Paeonies. **Young Ramblers for Next Season's Forcing.**

Burpee's Two "Unique" New Vegetables, OF UNEQUALED VALUE FOR MARKET GARDENERS

"Fordhook"

... of ...
Nativa.
St. ... reproducid
from a Photograph of the Unique
Fordhook Bush Lima

FORDHOOK BUSH LIMA BEAN.

The *only* stiffly erect Bush form of the popular "Potato" Lima! Both pods and beans are twice the size of Dreer's Bush Lima and more than half again as large as the Challenger Pole Lima.

FORDHOOK BUSH LIMA is of stitily erect habit, branching freely but with all the branches held upright. This ideal bush growth is strikingly in contrast to the low-spreading growth of the *Kumeler* or *Dreer's Bush Lima*.

FORDHOOK BUSH LIMA has foliage like that of the large pole Limas. The leaves are large, smooth and a dark rich green,—identical with the leaves of *Burpee's Bush Lima*,—as contrasted with the smaller pale green leaves of the *Kumeler* or *Dreer's Bush*.

FORDHOOK BUSH LIMA bears tremendous crops! The beans are ready for use as early as those of *Burpee's Bush Lima*, which furnishes fine Lima beans for the table three to four weeks earlier than they can be had from the earliest pole varieties. The plump well-filled pods are *twice as large* as those of *Kumeler* or *Dreer's Bush*, while the individual beans are fully twice the size. The pods measure four to five inches in length, containing four to five large beans each.

FORDHOOK BUSH LIMA produces such large "Potato Limas" that visitors to our **FORDHOOK** and **SUNNYBROOK FARMS** have been astounded! The beans are very "fat" and lie so closely together in the pod that they are flattened on the ends. The pods are so closely filled that the beans are very easily shelled. **FORDHOOK BUSH LIMA** has an additional merit over all other varieties of the "Potato Lima" type. The green beans, even when of full size, are tender, juicy and sweet in flavor when cooked, resembling the flavor of the finer varieties of large flat Lima,—as distinct from the rather dry and mealy character of all other varieties of the *Potato*, *Challenger* or *Dreer's Lima* type.

FORDHOOK BUSH LIMA under widely varied conditions during the past season (1907), has fully justified all claims made in our introductory announcement last year. Indeed, in habit of growth, great productiveness and fine table quality, it has even surpassed our own expectations. **Per pkt. 10 cts. net; 1-4 pint 30 cts.; 1-2 pint 55 cts.; per pint \$1.00 net.**

"What's in a Name"?

The Name—**Fordhook**—is known to planters everywhere as that of our Pennsylvania farms, so famous as the home of the largest Trial Grounds in America. The name **Fordhook** is widely known, also, as that of the finest extra long *Cucumbers*,—the best all-the-year-round *Squash*,—the earliest large *Watermelon*,—and the most unique *New Bush Lima*. With such a record, our friends will readily understand that when we have a new Musk Melon, of most unusual merit,—upon which we willingly stake our reputation,—we naturally give it **The Name—"Fordhook."**

Burpee's New "Fordhook" Musk Melon.

Fully equals our *Emerald Gem* in delicious flavor. So firm is the rough-netted skin and so solid the thick salmon flesh, that the melons carry to market even better than do *Burpee's Netted Gem*,—the famous "Rocky Ford" Melon.

FORDHOOK MELON is the result of a cross between *Burpee's Emerald Gem* and the *Improved Venus Lind*. As shown by the illustration, it resembles the *Improved Venus* in form; it is equally as roughly netted, while the skin, showing between the netting, is emerald-green. The flesh is very thick, of an attractive deep salmon color and surpassingly sweet to the very rind. It is fully equal in flavor to the *Emerald Gem*. The beautiful salmon flesh, while so surpassingly luscious, is not only very thick, but also extremely solid. The rind, although thin, is unusually firm, so that the fruits carry well to market. There are no musk melons, or cantaloupes, that are better shippers.

FORDHOOK MELON is most vigorous in growth, very early and extremely prolific. The fruits are ready for market fully as early as the green-fleshed *Early Venus Lind*. The vines grow vigorously and each vine sets from five to nine melons immediately around the stem. Frequently the fruits touch one another. The melons are remarkably even in size, weighing from 1 lb. 7 ozs. to 2 pounds each. "Fordhook" is so *thoroughbred* that there are practically no fruits unfit for market. We print letters from the originator and several other growers, all tending to prove that this unequalled new melon is well worthy of the name. **Fordhook** to emphasize that it is "**BURPEE'S BEST**" **CANTALOUPE.**

Per pkt. 10 cts. net; 1-4 oz. 25 cts.; 1-2 oz. 40 cts.; per oz. 75 cts., net postpaid.

New Musk Melon—Burpee's "Fordhook."—Two-thirds Size, from a Photograph.

✂ If not already received, be sure to send your address to-day for **BURPEE'S "BLUE LIST."** Most complete of all wholesale catalogues for Market Gardeners who plant for profit.

Echinops—Globe Thistle

My first acquaintance with the globe thistles was made some twenty years ago, while assistant in the Botanical Gardens of the University of Leipzig, in Germany. Of the different varieties in cultivation there it was especially *Echinops ritro*, with its deep, steel blue, ball-shaped flowers, which called forth my admiration. The decidedly ornamental foliage of this hardy perennial adds much to its showiness, and I have often wondered why so attractive a plant species so generally escapes the notice of the landscape gardener and horticulturist, for the instances where I have seen *Echinops* employed to its full advantage are indeed rare.

Globe thistles should never be scattered singly over a herbaceous plantation, but should invariably be massed in groups. A clump of them will always make a good showing, especially on the mixed shrub and perennial flower border, the dark colors, such as *Echinops ritro* and *E. sphaerocephalus*, to my taste being the most preferable. Both varieties, to which, as a third form, we may add *E. tenuifolius* are free branching, reaching a height of from 3 to 3 1-2 feet. *Echinops sphaerocephalus albus* of the same habit of growth bears white

balls, while the tall growing form, *E. giganteus* grows up to the stately height of from 5 to 6 feet.

It is only recently that I have occasionally noticed globe thistles used as they should be, noteworthy in some Bar Harbor gardens. Plant lovers among the society classes are ever alert in recognizing the real ornamental qualities of perennials and *Echinops*, as our illustration shows, possesses those qualities.

Richard Rothe

Notes From the Arnold Arboretum

Though we have had a touch of real spring these last days and in sunny spots crocuses and snowdrops begin to flower, the trees and shrubs show not yet any perceptible sign of life except one shrub which had been in full bloom outdoors in the Arnold Arboretum since the end of January and has stood clothed in a mass of golden blossoms often surrounded by ice and snow and even braving the fierce east winds without damage to its flowers. This remarkable shrub is the Japanese Witch Hazel, *Hamamelis japonica* and particularly its variety *H. japonica* var. *arborea*, in its general appearance very much like our native Witch Hazel, but instead of flowering in autumn the flowers appear in the latter part of the winter or in very early spring and are much more showy on account of their brighter color. The four slender, usually somewhat crumpled petals are bright golden yellow and the small cup-shaped calyx is of a deep claret color inside while outside it is covered with a dull brown tomentum. The leaves hardly differ from those of the native Witch Hazel except that they are somewhat broader and less distinctly toothed.

The typical *Hamamelis japonica*, also sometimes called *H. japonica* var. *Zuccariniana*, has petals of a paler color and the calyx pale purple or only yellowish inside and is of shrubby habit with more upright branches, while *H. japonica* var. *arborea* has bright golden yellow petals and a deep purple calyx; its branches are of slightly darker color and somewhat more spreading and it grows into a small tree up to 20 or 30 feet in height.

Both forms are perfectly hardy here and only in very severe winters have the flower buds been known to be injured, particularly when a spell of mild weather was followed in the latter part of the winter by very severe frost. It is, however, astonishing how much frost the delicate looking flowers can stand. This year, for instance, a few warm days in January were sufficient to induce the buds to burst and to expose the petals, each warmer spell caused them to come out a little further, and there was no sign that the intervening cold waves, even down to zero weather, had any noticeable injurious effect except perhaps that the petals remained a little more crumpled.

Branches cut in midwinter form a very pretty distinctly Japanese-looking decoration for vases; about two days in a warm room suffice to bring out the flowers which exhale a peculiar but faint odor.

It seems strange that such a handsome and interesting hardy shrub, really the only winter-blooming shrubs in our northern latitudes, should be so little known and so rare in our gardens, though it had been introduced into cultivation as far back as 1862 by Siebold. One reason for its rarity may be sought in its slow growth and in its rather difficult propagation which must be effected by grafting in spring on potted stock of the common Witch Hazel in the greenhouse.

hadn't the heart to do any dissecting and concluded that after perusing it our readers would agree with us that we had made good use of our space in giving them Mr. Thilow's observations practically as presented by him to the Philadelphia club.

Reporting the exhibition

In liability to criticism the reporter stands a good second to the judges in dealing with the exhibitors at a large show. Woe be unto him who in his

story of the exhibits and the awards inadvertently overlooks an item, however small. In fact, the small contributor is the more exacting. But, as all newspaper men know, it is a question how far it is wise to try to go in the publication of unimportant items in awards, etc., which contain nothing of general interest. Just why, for instance, a man would feel slighted because of omission to record the fact that he had been given a third prize, is rather hard to understand; to the uninitiated it would seem that he should be grateful if accorded obscurity under such conditions. But large exhibitions are coming with increasing frequency, while the problem of stretching paper pages still remains unsolved in the editorial cloister and while this fact remains we hope that forgiveness and free absolution will not be withheld from the man with the scissors.

The remedy

Many an anxious business man is wishing today that he could peer into the future and have some foreknowledge of how the commercial situation will shape up for the coming season. That we are only entering upon the beginning of a year's business depression in horticultural industries is a view one hears frequently expressed by men whose wide experience and keen instincts entitle them to something more than a mere hearing. These observers tell us that we need look for little improvement in trade conditions until after the approaching political contest has been settled. On the other hand we find some—but we confess they are in the minority—who point to the fact of our great agricultural prosperity, our unlimited resources and who draw from this and other premises the reassuring sequence of returning confidence and reviving activity. No doubt, if there was less pessimistic talk, prosperity would be more quickly achieved, for there is no question that a restoration of the good times of a year ago rests mainly with ourselves. Depressing expressions and gloomy forebodings do much to aggravate and prolong dullness. A gleam of light indicative of the dawn of a brighter day has already come from the seedsmen who report trade better than they had expected it to be and actually showing a substantial gain over last year. For the nurserymen we predict a like experience. The country was never more solvent than it is today and the majority of the nurseryman's patrons will order their regular quota of stock for ornamental as well as for economic purposes—possibly more of the latter. The florist, too, will have his share, for his products have now become a necessity with most of the people. Fortunately for all those who deal in goods horticultural, the existence of such a paper as HORTICULTURE affords an unexcelled means of promoting business, accelerating the movement of material and providing every one with something to do, through a liberal use of the cheap but potential medium for wide publicity afforded by its advertising columns. In other words, HORTICULTURE's prescription for this business interruption is, Advertising, in big and frequent doses. The time has really come for us to resume our normal course.

A story well told

We present in this issue the first installment of the delightful account of a brief European trip, read before the Philadelphia Florists' Club by J. Otto Thilow. It was our purpose, owing to the length of the paper and our limited space to exercise our editorial prerogative and, selecting some of the most interesting points touched upon by Mr. Thilow, make a summary which would come within our limits but found ourselves so absorbed in the story so entertainingly told that we

British Horticulture

NEW SWEET PEAS

As previously indicated in these columns, there is a useful batch of sweet pea novelties available this season. Hybridizers in this direction are still actively engaged in seeking to further perfect this increasingly popular annual. Amongst the firms who are making a special line of this branch are Messrs Watkins & Simpson of 12 Tavistock street, Covent Garden, London. Mr. Alfred Watkins has been President of the National Sweet Pea Society, and he is a member of the Executive Committee of that organization. The members of the society who paid a visit to the firm's local grounds at Twickenham in 1906 were able to judge of the extreme care which is taken to ensure the varieties being sent out properly fixed in character. W. Atlee Burpee, who inspected the nursery last summer, was considerably impressed with the splendid display of bloom on the firm's ground. Messrs. Watkins & Simpson have this year a very useful selection which will evidently secure many admirers on both sides of the Atlantic. These are of the giant-flowered type, with the many standards now so popular amongst exhibitors. Gladys Unwin has already established itself in public favor amongst market florists. Nora Unwin shares with Dorothy Eekford the honor of being the best white in the National Sweet Pea Society's list. Phyllis Unwin is a deep rosy carmine self. The other new comers offered by the firm comprise: A. J. Cook, violet mauve self; Frank Dolby, pale blue; Mrs. Alfred Watkins, pale pink, with salmon shading; E. J. Castle, carmine with salmon shading; Evelyn Byatt, flame tint. Nora Unwin received an award of merit at the National Society's trials at Reading last summer.

THE WINTER FLOWERING CARNATION SOCIETY

An attractive schedule has been issued for the spring show of this society which will be held on April 1st. On the same day the annual meeting will be held, at which a scheme for the registration of new varieties will be presented. P. Smith of Modstead will deliver a lecture on the afternoon of the show on "The present and future of the winter flowering carnation." The floral committee have arranged to award certificates of merit to new varieties. In order that a full opportunity may be afforded of the form and habit of the variety those plants in bloom will have to be shown besides the cut flowers. It is arranged that a variety must gain at least 30 points to entitle it to a first-class certificate and 25 points to entitle it to an award of merit. Five points will be allotted for each of the following qualities: color, size, fragrance, substance, calyx, general appearance, length and substance of stem, and habit of plant.

Leading growers are this season offering Mrs. H. Burnett, salmon; Aurora, buff, flaked pink; Mikado, heliotrope; Ceres, yellow, flaked salmon pink; and Marmion, cherry, picoteed with white. The last named received an award of merit from the Royal Horticultural Society and a first-class certificate at the Southampton show last year. An English grower has produced a rival to Mrs. T. W. Lawson, named Evelyn Davy. Although a trifle smaller than the famous American variety it is claimed to produce four times the number of blooms. The color is described as a vivid rose cerise.

A NEW FERN

In the hardy exotic house of one of our largest fern growing establishments is to be seen *Osmunda palustris*

Mayi. This was exhibited at the Holland House show, and received a first-class certificate from the Royal Horticultural Society. The normal variety is quite plain, but in this one all the pinnules are twisted and semi-erected. It was obtained from one of the hardy exotics grown in Brazil. Many varieties that come from tropical countries like Brazil are hardy in England, but the ferns from which *Osmunda Mayi* was raised were found on a mountain. There appears to be an increased interest taken in fern culture on this side. Some meritorious displays are often made at the leading shows by the florists making a specialty of this branch of horticulture. A useful handbook on all phases of fern culture is now being prepared for publication by a leading firm of London publishers.

W. H. Adsett.

The Present Care of the Herbaceous Border

Everywhere we turn we hear the query, "How have your perennials come through the winter?" and the chances are that the answer will be: "They are looking fine; better than we expected, after such a changeable season." But take care; you may be deceived. Everybody that has grown perennials for a few years knows that more losses occur from now until the tenth or fifteenth of April than at any other time. But those that have just started a collection, either last spring or last fall, are the ones that should be warned.

Let us divide a general collection into two sections. First, those that have foliage above ground all winter. It is a curious fact, and one not generally thought of, that all plants in this section, with few exceptions, have fibrous roots, which enables the plant to stay well into the soil, so we do not cover these to keep them from lifting but to keep the foliage and crowns from the sun. Second, those that have their dormant crowns more or less under the ground; and a great many of these have tuberos, or thick, fleshy roots, which lose their fibres in the fall, so readily lift out enough to expose their crowns. These have to be covered to prevent this lifting. In other words keep frost in the ground as long as possible.

Now, according to my experience, losses will be greater during the next three weeks than at any time during the winter; and there are reasons enough. For example, March thirteenth and fourteenth were warm and springlike, and the fifteenth a thunderstorm, then on the morning of the seventeenth the thermometer registered eighteen above and on the eighteenth a snow-storm. All this is likely to happen three or four times before it is safe to expose plants to bright sunlight; for it is the hot sun in combination with the cold nights that does the killing.

So, because we have two or three warm days, do not uncover your plants, but wait till the frost is out of the ground where covering has been done. By doing this you will be wise and bring losses down to a minimum.

Frederic J. Pea.

SPRING SHOW AT BOSTON.

THE FARQUHAR GROUP.

Boston's great spring show is now a thing of the past, but it will long live in the memory of those who were privileged to see it. When we say it was a great show we know we are but repeating what has always been said by somebody about all spring shows, but in this case the phrase means all it suggests, for it was in respect to quality in most lines, attendance and more distinctly in brilliancy, finish and quantity it excelled anything in the spring show line for a long time.

Whether we take into consideration the exquisite sweet pea display of Wm. Sim, the superb ranibler roses of M. H. Walsh, the beautiful array of over two hundred vases of rare orchids from J. E. Rothwell, the gorgeous collection of seedling amaryllises from T. D. Hatfield, the comprehensive display of narcissi from Wm. Whitman, or the wonderful cyclamens shown by Dr. Weld, W. A. Riggs or E. J. Mitton, the high quality of the show is evidenced by either of these individual factors, and

when we recall the grand massing of white, purple, yellow and green in the unprecedented group of spring flowering plants from R. and J. Farquhar & Co., which is shown in the above illustration, and which won the rare honor of a gold medal, it tells the story of spring's exuberance in no uncertain language. In fact the large exhibition hall was a riot of color, in azaleas, acacias, genestas, lilies, rhododendrons, lilacs and primroses in a setting of palms and ferns; the small hall was equally brilliant with orchids and thousands of narcissi and the large lecture hall with its ranks and ranks of carnations, roses, sweet peas and collections of bulbous material was a scene of floral beauty not soon to be forgotten.

Among the things worthy of special mention in addition to those above alluded to were the following: A fine group of palms and Easter flowering plants, effectively arranged, from Edward MacMullin; a group of rare palms, arranged with ferns, primroses, acacias and genestas from the Harvard Botanic Garden, attesting to the rare skill and taste of Robert Cameron; specimen ericas and acacias from Mrs. Fred Ayer; cinerarias, stellata and florists' varieties, from Wm. Whitman; W. A. Riggs' big array of narcissi and other bulb flowers, which won the Rawson silver cup; schizanthuses amaryllises and bulb flowers from Mrs. J. L. Gardner; orchids from

GROUP OF ORCHIDS FROM SETH A. BORDEN.

Seth A. Borden, especially rich in dendrobiums; roses from Waban Rose Conservatories and W. H. Elliott, the former beating on Killarney and the latter on Richmond; also the roses from Montrose Greenhouses including Brides, which won first prize; a gorgeous group of Chorizanthe glauca from Mrs. J. L. Gardner, plants four feet through; a very effective group of genestas in trained forms from Thomas Roland; anemusas from W. W. Rawson & Co., and enough carnations to make an excellent exhibition all by themselves contributed by S. J. Goddard, M. A. Patten, Wm. Whitman, Mrs. J. C. Phillips, Ellen A. Mansfield, Backer & Co., R. D. Kimball, Chas. Strout and others whose names will appear in the following special mention. A. Roper's leviathan Bay State, which makes a sensation wherever shown, got a silver medal; W. A. Manda's seedling Number 20 was given honorable mention; Afterglow, shown by Wm. Nicholson & Son, won a silver medal; E. A. Wood's new carnation, Mrs. Geo. A. Frost, was awarded a certificate. Among seedling carnations shown were Ruth Hayes, a crimson from H. A. Stevens, a white and a scarlet from Backer & Co., Edward, a pink from W. H. Shumway, a crimson from M. A. Patten and Priscilla, S. J. Goddard's handsome variegated. Helen Goddard stood out well among the standard varieties.

Certificates of merit were given to Wm. Sim for the following varieties of sweet peas: W. W. Smalley, pale salmon; Mrs. Alex. Wallace, lavender, Le Marquise, purple and blue. Among the rambler roses shown by M. H. Walsh were Arcadia, a densely double dark crimson, which received a silver medal; Excelsa, a large petalled double crimson, the progeny of Gen. Jacquemot and Crimson Rambler, which won a certificate of merit, Celeste, which got honorable mention, Posey, double pink, Lucinda, single pink, Jewel, single light pink, Lady Gay, Hiawatha, La Flame and De-

GENERAL VIEW OF PART OF MAIN HALL.

light. J. L. Smith, gardener for Mrs. A. W. Blake, received a cultural certificate for an enormous specimen of *Nephrolepis Barrowsii*, which was commented upon as one of the most striking specimens shown in many years. Wm. Downs also received a cultural certificate for a vase of handsome yellow snapdragon. Honorable mention was given to F. C. Green for pink Roman hyacinth Excelsior; to W. A. Manda for *Asparagus elongatus*; W. W. Rawson for *Lobelia Kathleen Mallard*; H. A. Dreer for *Blush Queen Alexandra marguerite*, and Walter Hamewell for annual chrysanthemum Evening Star. Violets were well shown by Wm. Sim, H. F. Woods, H. F. Calder and Estey Bros.

The lecture hall stage was filled with

a fine plant group by Gen. S. M. Weld. In the vegetable classes a silver medal for superior cultivation was given to F. E. Cole. V. Butta showed some novelties in salad greens.

THE PERKINS' SEEDLINGS TO BE PROPAGATED.

Our readers will be interested to know that Mr. T. E. Perkins, of Red Wing, the originator and owner of the famous collection of seedling apples known as the "Perkins' Seedlings", has disposed of a number of the best of them to some of the nurserymen of the State, by whom they will be propagated, and as soon as possible put upon the market. There are in this noted collection many long-keeping varieties, and some of excellent quality. Probably no seedling orchard in this country has aroused more interest than the one referred to. Since it came into bearing, some ten years ago, the fruit from this orchard has been exhibited repeatedly at our state fairs, 100 and more varieties, and the interest in this exhibit is fully maintained, notwithstanding it has been now so many times repeated. A very full exhibit of the collection, made by Mr. Wyman Elliot, at the American Pomological Society meeting in Boston some years since, received in recognition the Wilder medal, and was looked upon with astonishment by our brothers in the east. Grown as they are from the seed of one lot of Malinda apples, evidently crossed with a number of other varieties, there is such a uniform hardness, freedom from blight, and other good qualities in the collection as to mark this orchard as one of the remarkable horticultural phenomena of the times.—Minnesota Horticulturist.

Winter is past; the heart of Nature warms Beneath the wrecks of unresisted storms; Doubtful at first, suspected more than seen, The southern slopes are fringed with tender green. —Holmes.

MACMILLIN GROUP AND PART OF WALSH EXHIBIT.

AMERICAN ROSE SOCIETY

Annual Exhibition and Meeting Held at Art Institute, Chicago, Ill.

Buffalo To Be The Next Meeting Place

Officers Elected

PRESIDENT—August Poehlmann, Morton Grove, Ill.; **VICE-PRESIDENT**—W. F. Kasting, Buffalo, N. Y.; **SECRETARY**—Benjamin Hammond, Fishkill-on-Hudson, N. Y.; **TREASURER**—Harry O. May, Summit, N. J.; **EXECUTIVE COMMITTEE**—E. Gurney Hill, Richmond, Ind.; P. Welch, Boston; Peter Bisset, Washington, D. C.; A. Farenwald, Roslyn, Pa.; P. J. Lynch, West Grove, Pa.; J. J. Curran, Salem, Va.; Philip Breitmeyer, Detroit.

The American Rose Society convened at 8.30 o'clock Wednesday evening, March 25, with a fair representation of members present, mainly from other cities in the beautiful lecture hall of the Art Institute, Chicago. President Simpson read the following address, which was received with appreciative applause:

President's Address.

Ladies and Gentlemen, Fellow Members of the American Rose Society:—Another year has rolled around and we again meet in our annual convention to look and talk over the work of the year that is past, and to plan the policy and work of the Society in the future.

Last year we met in the capital of our country, and many of us felt honored by having the privilege of taking the hand of the President of the United States in curs and receiving his kindly greeting and good wishes for ourselves, and noting his appreciation of the work being done by the Rose Society and many of the individual members. It was said by many of our members that the Washington meeting was in many respects more enthusiastic, and gave promise of larger permanent results than any of its predecessors.

This year through the generous invitation of the Chicago Florists' Club the American Rose Society plants its banner in the city of Chicago, the great and magic city of the West, where more roses are produced under glass, and distributed from this point over a larger area, than perhaps can be said of any other center in the country, not even excepting the city of New York. It seems therefore eminently fitting that this society should honor this city and this rose growing centre by holding its exhibition and convention here this year. Many of you have seen the splendid exhibitions given in the city of Chicago in the past and have felt certain that the rose exhibition this year would be a distinct advance over anything hitherto attempted or seen in this city of big things.

I wish most heartily to express my appreciation of the work done by the Chicago Florists' Club and the Rose show committee appointed by the club to secure special premiums and arrange the many details incident to an

undertaking of this kind. When we remember that the local florists have on their hands and minds the National Show to be given here next November, and that they will have to give much of their time and means to put it through in a manner befitting the occasion and the scope of the undertaking, we are constrained to take off our hats to the men who have secured such an array of special premiums as our list shows, and have made possible such a splendid exhibition as that we have seen today.

The meeting of our society here in this western centre, for the first time in its history, is a good augury for the future of the society, I am very sure; we shall miss a good many faces here that have become familiar through meeting them so frequently at the annual gathering in the East, but we are to make new friends that will join with the old in making this society a tower of strength, and make it truly national in scope and character as well as in name.

Use of the Society.

In seeking to make recruits to our organization one frequently hears the remark, "What is the use of having so many societies anyway, and what benefit would it be to me if I should join the American Rose Society?" The only answer that I can give is, "That practically every grower of repute who has had his attention called to the aims and purposes of this organization has become a member of it, and if we give the matter a very little thought we will find that, with a very few exceptions, the men who hold aloof are back numbers in the trade. You will find that the brainiest and most progressive men in the business today are members of the Rose, the Carnation, the Chrysanthemum, or some other society devoted to their specialty. An orchid society is now being projected as a necessary adjunct to the orchid business. Read the printed matter on the back of the Rose Society's letter paper and you will find "Its aim is to increase the general interest in the cultivation and to improve the standard of excellence of the rose for all the people; to foster, stimulate and increase the production in every possible way of improved varieties of the rose suitable to our American climate and

requirements." A very noble aim this surely, and one that should naturally inure to the benefit of every man engaged in the growing or selling of roses for a living. The annual exhibitions, affording as they do to raisers of new roses the very best opportunity of getting their novelties before a critical tribunal, and the opportunity offered the searchers for novelties to see these and judge of their merit is a very important feature of the work of such societies; and the man who follows up these exhibitions and has the judgment to discern the good and bad points of both new and old varieties, and will gauge his planting accordingly, discarding the varieties that have become old and common and giving space to newer sorts of undoubted merit, is the man who will have money to build more greenhouses and buy automobiles. Very few of the visitors to the Washington or Boston exhibition returned home without receiving inspiration to strive for a higher grade of flowers as the product of his skill, with the feeling of satisfaction with his calling, and with a determination to add dignity to it, and to make his business stand for something in the community.

The Work Ahead.

The Rose Society certainly claims a share in the good work of making conditions more favorable for the rose grower of today. What has been done up to the present, however, is as nothing compared to the work that lies before it when with increased membership and available funds it is in a position to disseminate knowledge that will enable lovers of the rose, and that includes practically every citizen of this country, to plant varieties, and cultivate them in such a way as to give joy and satisfaction to the planter. There will then be sold by the nurseryman and florist for outdoor planting more roses than we can at present conceive of, and the prophecy will be fulfilled: "The desert place shall rejoice and blossom as the rose."

More has been done during the term of our present secretary to put the society upon a sound and permanent basis, and to present its claims and benefits to the florists of the entire country, and to many who do not grow roses for a living than most of you are aware of, the volume of correspond-

ence and the amount of clerical work done would stagger most of us, if it should be put upon us; and he certainly deserves the thanks of every member of this body for his painstaking work, done entirely for love of the good cause, and refusing any pecuniary compensation therefor. During the past year the expenses have been out of proportion to the income, the officers having advanced money to meet obligations and carry on the work, trusting to the receipts of this meeting to balance accounts; failing in this, I suggest that a few friends of the society meet here in Chicago, and together lift the treasury out of its awkward predicament. Certificates for new varieties authorized at our last meeting and life membership certificates have been provided at considerable expense, but we think to the credit of the society. A resolution was favorably received at the Washington meeting requesting the executive committee to consider the proposition of establishing a rose journal. This matter has received considerable thought and discussion during the year at the hands of the committee, and the secretary was authorized to go ahead and issue a prospectus, which has been sent out broadcast and has been commented on very favorably. The secretary will present to you a fuller report on this proposition; I would ask for your careful and thoughtful consideration. If the members will support it in sufficient numbers it can be put through, otherwise it must be dropped.

The June Exhibition.

A committee was appointed to confer with the Association of American Nurserymen relative to the holding of an exhibition of outdoor roses in June, under the joint auspices of the two organizations. Mr. Hill, as chairman, will report on the work of this committee. Through the good offices of our ex-president, Mr. Newbold, an invitation has been extended to the American Rose Society by the Horticultural Society of New York to hold a June show this year in Bronx Park, New York City; the latter society to furnish the money and take care of all the details, and our society to offer certificates, medals, etc., and assist in arranging the schedule. The offer was accepted and the exhibition is assured, but the executive committee of the Rose Society authorized the offering of certificates, bronze and silver medals for new varieties only. It is the wish and desire of the members of the committee that the nurserymen, and all others who grow outdoor roses extensively, will keep this exhibition in mind and arrange to make extensive displays of roses in Bronx Park next June. The educational features of such an exhibition, that is free to all, should be very great, and as an advertising medium it is not to be despised.

In arranging the program for this meeting the commercial rose grower has perhaps been brought to the front more than the amateur, which probably is as it should be at the present stage; but it will not do at all, I think, to allow this society, now, or in the future, to drift into a trade organization and have its work restricted to the holding of exhibitions and exploiting of new varieties; that would be praiseworthy work, but it can do that

and a great deal more by opening wide its doors, and seeking the co-operation of every man and woman in this broad land who has roses in his heart or in his garden. We should have in our ranks every authority on roses in the country, and the secretary should have a list of these authorities to whom he could refer questions that are too difficult for him to handle.

Finally, gentlemen, let us take a wide outlook; let us be broad in our views, and in our discussions at this meeting let us be considerate of each others' feelings, remembering that we have but one object in view, the placing of the rose on the pedestal where she rightfully belongs, and the ennobling of our calling and profession.

Secretary Hammond then read the minutes of the last meeting and presented his annual report.

Secretary's Report.

The Secretary first and foremost desires to publicly acknowledge the value of the service rendered by the four trade papers, "American Florist," "Florists' Exchange," "Florists' Review," and "Horticulture," named in order of their age, for the courteous consideration which one and all have given to matters pertaining to the American Rose Society. It has been the effort of your Secretary to get as much publicity as we could, because this Society was founded with the idea of its becoming an extensive popular association to spread the love of the beautiful rose among the people.

And another important fact is that the work of co-operation and patronage incumbent upon a national society cannot be done unless the society is provided with revenue, and the revenue depends upon its membership. The American Rose Society should be able to patronize local societies by offering its medals freely, but all this takes revenue. The life membership fund gradually increases, affording a revenue of 4 per cent, on the investment per annum, and the fund is now close to \$3,000.

The money awarded by the Society at its last show reached the sum of \$309.00 for stated premiums besides the special premiums. The Bulletin of the annual meeting which was begun under Secretary W. J. Stewart's term of office has been continued and 600 were issued. These books seem to be highly appreciated, secretaries of kindred societies asking for them in various instances. To get out these books nicely is considerable expense, and part of this cost was met by soliciting a half or full-page advertisement; out of 60 letters sent out, favorable replies came back.

At the Washington meeting last March the desirability of issuing a certificate of merit for new roses which did not reach the score required for such novelties to win a society medal, was discussed and recommended. The Executive Committee acting upon that recommendation prepared such certificates and issued seven: E. G. Hill Co., Richmond, Ind., "Rhea Reid"; F. H. Kramer, Washington, D. C., "Queen Beatrice"; Myers & Santman, Wyndmoor, Pa., "Wyndmoor"; M. H. Walsh, Woods Hole, Mass., "Paradise," "La Fiamma," "Delight" and "Junjata." This recognition seemed to please everyone.

Up to last year there had not been any certificate of life membership nor any society seal; a handsome certificate was made, a special seal prepared and adopted, and 51 of these life certificates have been issued to persons who have paid the \$50.00, which is the amount that is creating the permanent fund of the Society. The certificate was sent to the family of deceased members.

The American Rose Society has been invited to hold a June Show in the Botanical Garden in Bronx Park, New York City, in connection with the New York Horticultural Society. Ex-President Frederick R. Newbold attended one of the executive committee meetings and formally extended the invitation and the same was duly accepted. The Executive Committee held five meetings in New York City; these meetings were always attended by some from a distance, and such members as were not personally present invariably reported by letter.

Early in the year Vice-President Philip Breitmeyer of Detroit set the pace for a fine special premium list, seconded by Arthur T. Boddington of New York, which under the fostering care of Messrs. Poehlmann and Asmus and others of Chicago swelled to very satisfactory dimensions.

At the last annual meeting a "Rose Journal" was a topic which grew out of the question given by President Simpson, "How to increase the interest and thus the membership." The Secretary assumed the responsibility of issuing a prospectus and of mailing the same to all present membership; the details of the results will be taken up more fully separately.

The record of the year shows that after nine years the American Rose Society lives—it has crossed the Alleghenies, born in Atlantic City on the ocean shore—holding its earliest exhibit in the Metropolis of America, going to the Garden City of Pennsylvania, then to the scholarly city of Boston, from there to the capital of the nation, welcomed by President Roosevelt, then accepting the cordial invitation from Chicago. Here we are in this Imperial City of the West with such a show before our eyes as maketh the heart glad, and our motto is, "A Rose for every home, a Bush for every garden"; and this, if carried out, means beauty and grace in the homes of all the people.

In the absence of Mr. May, E. G. Hill read the treasurer's report which was as follows:

Treasurer's Report.

The treasurer's report for year ending March 20, 1908, is as follows:

Total cash received on general account	\$1339.62
Total Disbursements	1077.97
To balance on hand.....	\$253.55

In addition to above general account seven new members (life) have joined the Society, making a total of 55 life members to date.

Mr. Hill called attention to the low financial state of the treasury and urged that the society ought to be better cared for by the many men engaged in the rose growing industry which had built more greenhouses and more fine homes than any other one plant. There have been fortunes made

out of roses and it was time something was done to put the society on a good footing. W. A. Manda advocated offering medals and certificates instead of regular cash premiums, calling attention to the fact that these classes were practically ignored at the present show. This was referred to the executive committee. J. A. Valentine then read his paper which was accorded a vote of thanks. W. A. Manda gave an interesting talk on rose gardens, their beauty, their construction and enumerated a few select lists for planting. He spoke enthusiastically of the value of the Rambler varieties for covering rocks and unsightly spots and predicted that this class would soon be extended to include climbing roses that would bloom continuously. After a vote of thanks to Mr. Manda the meeting adjourned until Thursday forenoon.

Thursday Morning Session.

The meeting on Thursday morning opened with a paper by J. F. Sullivan on "The Rose from a Retailer's View and the part that it plays in Decorations, simple and elaborate, of the present day," which was of a high order, vigorous, and a splendid addition to the literature of the Society. An interesting discussion followed wherein Philip Breitmeyer and W. J. Stewart called attention to the merits of the old fashioned Bon Silene and other small roses. W. H. Elliott then read his paper, "What is the proper size of a Greenhouse to grow Roses for Commercial Purposes," which was eminently practical and to the point, in favor of the large type of rose house and elicited many interesting questions, to which he replied. Mr. Maynardier's paper on "Soils" was next listened to.

Buffalo the Next Meeting Place.

The selection of the place for next year's meeting was next in order and Buffalo was the city chosen.

The Election of Officers.

Then followed the election of officers. August Poehlmann, of Morton Grove, Ill., was elected president; W. F. Kasting, of Buffalo, vice-president; Secretary Hammond and Treasurer May were re-elected; Philip Breitmeyer, of Detroit, was added to the Executive Board.

The Exhibition.

The spacious hall in Art Institute was admirably adapted for the rose exhibition which needed only the setting of green furnished by the decorative plants to make it perfection. The exhibits were mainly in the large special classes, the smaller classes being nearly ignored. Richmond, Killarney and American Beauty were displayed in great profusion and superb quality. The color arrangement of the groups was excellent. Among the newer candidates for honors were Mrs. Potter Palmer, Cardinal, Rhea Reid and Wyndmoor, all of which came in for much careful inspection by visitors.

J. F. Ammann was an exhibitor and winner on a number of the regular classes: Poehlmann Bros. won the Dorrance Challenge prize, the E. G. Hill prize for 100 Richmond, their own prize for 100 Pink, the Vaughan cup for 100 Chateaux, the Freeman prize for 100 Mrs. Potter Palmer, the American Florist Special for 50 American

Beauty, the Kroeschell Bros.' prize for 25 Killarney, the Darling prize for 50 American Beauty, the Holton & Hunkel prize for 25 Killarney, and the Bruns prize for 200 lily of the valley. A. Farnewald won the Montgomery cup for 50 blooms of rose of American origin now in commerce, and the Davis Company prize for 50 Liberty. The E. G. Hill Co. won the Manda cup for the largest and most varied collection and the Poehlmann prize for 50 Red, Richmond and American Beauty excluded, with Rhea Reid. W. H. Elliott won the Simpson prize for 100 Killarney, and the Dingee-Conard Co. prize for 50 Killarney. Bassett & Washburn won the Traendley & Schenck prize for 50 Bridesmaid, the Buettner prize for 50 Bride, the Pulverized Manure Co. prize for 100 Bride, the W. W. Barnard Co. prize for 25 Bridesmaid, the A. Dietsch Co. prize for 25 Bride and the Crane Co. cup for 100 American Beauty. Peter Reinberg won the Wilcox prize for 50 Ivory, the Wieter Bros.' prize for 100 Uncle John, the Florists' Review prize for 100 Sunrise, the Keller prize for 25 Richmond and the Newbold prize for 25 Uncle John. George Reinberg won the Poehlmann Bros. Co. prize for 100 Richmond. Myers and Samtman won the Mogg prize for 50 American Beauty, the Deamud cup for 25 Pink not disseminated prior to 1908 with Wyndmoor and the Heller Bros. cup for 50 blooms of rose never before exhibited for competition, with Wyndmoor. Albert Lies won the Bassett & Washburn prizes for 25 Brides and 25 Bridesmaid from growers with less than 50,000 feet of glass. Wieter Bros. won their own prize for 100 Kate Moulton. Robert Scott & Son won the Pierson cup for best new rose not in commerce and never exhibited before this society with Mrs. Jardine. Vaughan's Seed Store won a silver cup and three other prizes in the pot plant classes. The Welch prize for the most artistically arranged vase went to Robert Simpson for vase of Richmond. A certificate of merit was given Myers & Samtman for Wyndmoor. Special mention was given W. A. Manda for Cherokee roses, George Reinberg for display of roses, J. A. Budlong for display of carnations, Bassett & Washburn for new Carnation Orland P. Bassett, and The E. G. Hill Co. for Afterglow. W. H. Elliott received cultural certificate for Killarney.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual club banquet will be held at Horticultural Hall, Boston, on Wednesday evening, April 1st, at 7 o'clock. Tickets, which are \$1.50 each, may be had from Peter M. Miller, 32 South Market Street, Boston, also from any other club members. No tickets will be sold after March 28. There promises to be a banner attendance at this banquet. The entertainment will be a splendid one and a first-class orchestra has been engaged for dancing.

The club will hold its next field day at the establishment of Thomas Roland, Nahant, on Saturday, April 11, 1908. This will be the club's first visit to Mr. Roland's. Particulars as to car service will be mailed to all members.

William Sim of Cliftondale will lecture on Sweet Peas at the next regular

club meeting on April 21. Other attractive features are being prepared for this meeting.

W. N. CRAIG, Secretary.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The annual meeting of the Executive Board was held in Niagara Falls, N. Y., at the Prospect House, on Monday and Tuesday, March 23 and 24. Those present were President F. H. Traendley, ex-President W. J. Stewart, Vice-President George W. McClure, Secretary W. N. Rudd and Messrs. Theodore Wirth, J. K. M. L. Farquhar, John Young, E. V. Hallock and George Asmus; also ex-president Wm. Kasting, Prof. J. F. Cowell and ex-Mayor Cutler of Niagara Falls.

NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

A meeting of this society was held on March 17, about sixty members being present. Walter Angus, gardener to Mr. R. Scoville, gave a very interesting and instructive paper on primulas, cinerarias, calceolarias and allied subjects, which was followed by a general discussion. James Bruce, Thos. Nye, A. J. Thompson, W. Bretschneider made very fine exhibits of primulas and cinerarias; John H. Slocombe, a large bunch of perfect double violets. Mr. Angus was accorded a very hearty vote of thanks for his able paper. The meeting was followed by a smoker, which was thoroughly enjoyed by all present.

The society will hold their fall exhibition in Music Hall again this year in November. Quite a number of entries are already in for the amateur gardeners' window-boxes and vases. On April 7 Peter Zuger of Elizabeth Park, Hartford, will read a paper on Bedding Plants.

AMERICAN SOCIETY OF PARK SUPERINTENDENTS.

The executive committee of the American Society of Park Superintendents met at Buffalo, N. Y., on March 21, at the Genessee. President Cowell in the chair. There were also present secretary-treasurer F. L. Mulford, John Chambers and Theodore Wirth. Arrangements were made for the annual meeting of the society at Minneapolis, Minn., on Aug. 11 to 14. Resolutions were adopted commemorative of the late R. H. Warder of Lincoln Park, Chicago.

FLORISTS' HAIL ASSOCIATION.

Hail losses recently reported are, R. S. Murray, Bellefontaine, Ohio; H. D. Schilling, Indianapolis, Ind., and Jos. R. Goldman, Middletown, Ohio. JOHN G. ESLER, Sec'y F. H. A.

CHICAGO FLORISTS' CLUB.

Special notice is given that the next regular meeting will be held Thursday, April 2, at 8 P. M. at the Union restaurant, 111 E. Randolph street.

A CORRECTION.

In the paper by Eber Holmes in last week's issue on page 373, line six the word "moisture" should have been "nicotine."

Obituary

William H. Spooner.

Wm. H. Spooner, for many years a leading horticulturist of Boston, died on Saturday, March 21, in his 75th year, after one week's illness. Up to

WILLIAM H. SPOONER

the time of his final sickness Mr. Spooner was in his usual health and spirits and made his frequent trips to Horticultural Hall, which he was in the custom of making regularly for many years back as a devoted member and faithful officer of the Massachusetts Horticultural Society. At the time of his death Mr. Spooner was the accredited representative of this society in the Massachusetts Board of Agriculture. In former years he had served as a vice-president and trustee of the society and for a term of two years as its president. Some forty years ago Mr. Spooner was associated with the late Francis Parkman in the exploitation of fancy nursery stock and roses. He then became a member of the firm of W. C. Strong & Co., nurserymen and florists, and, about the year 1872, on the dissolution of this firm, he took the Boston store of the concern on his own behalf and conducted same until bought out by W. J. Stewart, who had been in his employ as manager. He then took up the business of hardy rose importing and growing, which he continued for many years at Jamaica Plain, Mass. afterwards disposing of it to J. F. Shea.

Mr. Spooner was a man of kindly, sympathetic disposition, beloved by a large circle of friends in horticultural circles. He served in the Massachusetts legislature for two terms and was a constant advocate and friend of agricultural progress and legislation. A faithful, conscientious man, he will be missed and mourned.

E. J. Castle.

The English trade papers record the death of E. J. Castle on March 4, at the age of 39. Mr. Castle was at one time on the editorial staff of "The

Gardener." He was an able writer, having a thorough knowledge of practical and scientific gardening and allied subjects.

John Moller.

John Moller, an old and valued employe of Siebrecht & Son, New York, while trimming a tree fell to the ground. He was carried to the St. Vincent Hospital, where he died on March 13.

C. T. C. Deake.

Cyrus Towner Curtice Deake died on March 11 at his home in Asheville, N. C. He was the founder of the Idlewild Floral Co. Mr. Deake was 84 years of age, and is survived by his wife.

James P. H. Ruth.

James P. H. Ruth, who had greenhouses at Wyomissing, Pa., died at his home in Brookside on March 16, aged 41. A widow and daughter survive him.

E. D. Darlington.

E. D. Darlington, superintendent at the Fordbrook seed farms of W. Atlee Burpee & Co., at Doylestown, Pa., died on the morning of March 26.

Joseph Kaiser.

Joseph Kaiser, a florist of Belleville, Mo., died suddenly on March 14 in his fifty-ninth year.

Alfred Hildred.

Alfred Hildred, a prominent retail florist of Chicago, passed away on March 17.

J. M. Gasser.

This well-known and highly respected florist of Cleveland, Ohio, died at Flint, Mich., on March 12, of heart failure, after a period of ill-health extending over two years. Mr. Gasser

J. M. GASSER

was born in Switzerland in 1841 and came to Cleveland when a youth. He served in the Civil War and was wounded. After the close of the war he was employed in the post office, and afterwards conducted a small ice cream business in Cleveland and

taught dancing, and at the same time began a modest trade in selling flowers, getting his supply from Boston, New York and Philadelphia. Close industry on the part of Mr. and Mrs. Gasser resulted in a rapidly developing business, which finally grew into the leading florist establishment of the city, with extensive greenhouse ranges as a source of supply. In his active business days Mr. Gasser, although working hard and incessantly, was never too tired or too busy to extend a generous welcome to a visiting brother florist. He was an earnest supporter of the S. A. F. and a regular attendant at its conventions, and when the society met in Cleveland thirteen years ago he entertained the visitors in lavish manner. He leaves a wife and one married daughter.

The business will be carried on with no change in policy or plans at present.

NATIONAL HORTICULTURAL SOCIETY OF FRANCE.

The magnificent autumn shows of this society, which are held every year in Paris, are a source of delight to every admirer of the chrysanthemum, and there are many features of interest to be seen there that are wanting in our English shows. Just now, when the chrysanthemum fever is very strong among the French growers, there is a keen desire to keep up the interest in every possible way. It is now announced that the next Paris chrysanthemum show will be the twenty-fifth in succession, and that a portion of it will be devoted to exhibits of an artistic and literary interest. The final arrangements are not yet made, but a preliminary notice has been given that there will be a special department reserved for those who can exhibit books, publications, prints, engravings, pictures and old catalogues relating to the chrysanthemum. Another part of the show will be reserved for blooms of old varieties that were in cultivation prior to the year 1896.

C. HARMAN PAYNE.

NATIONAL CHRYSANTHEMUM SOCIETY OF ENGLAND.

At the recent annual meeting of this society the following appointments of officers were made: President, Sir Albert Rollitt; chairman of committee, T. Bevan; vice-chairman, E. F. Hawes; treasurer, John Green; foreign secretary, C. Harman Payne; general secretary, P. A. Witby. The late president, C. E. Shea, has been obliged to retire on account of ill health. A practical grower for show and a seedling raiser of some repute a few years ago, Mr. Shea's services have been recognized by the society by placing his name on the list of vice-presidents. For lack of funds the society is unable to continue the publication of the year book started last year. It will be observed that Mr. C. Harman Payne has been again elected foreign secretary, a position he has occupied for 20 years in succession.

SOME NEW THINGS IN AN OLD
COUNTRY, OR ONE MONTH'S
OBSERVATION BY LAND
AND SEA.

Read before the Philadelphia Florists' Club, March 3, 1908, by J. Otto Thlow.

To give a recital of current events and the routine of everyday life with its special happenings in parts of Europe would be only a repetition of what you often read or have known; and that which is historic or prehistoric we can glean from the unending list of novels and magazine sketches contributed from time to time by those who have visited Europe and have studied the quaint and ever-interesting points and general conditions, and through their enthusiasm, which is usually incited after a first visit, some very interesting descriptions are given. These might be termed pilots for those who contemplate a trip abroad, and a fair guide to points of interest.

The average American maps out the territory he wishes to cover, and in this particular his judgment is rarely commensurate with his desires, and upon his return he can always find one who has been over the same ground who can tell of entirely different scenes and incidents which have been overlooked. It all depends upon with what enthusiasm and zeal one starts out on a sight-seeing trip for enjoyment, recreation and knowledge. We are assured of one fact, however, that traveling broadens the mind, ripens experience and adds to life's category interesting events, and we thereby learn in part how the other half of the world is living.

It is true that even the ordinary conditions as they confront the average American when traveling in Europe are to him new; in particular the ancient landmarks and objects of interest, and every wonder of which history, ancient and modern, is elaborate in its description. Customs, conditions and the general routine of everyday life in Europe, so vastly different to American methods, make a lasting impression.

Horticulture Abroad.

To the horticulturist there is much of interest, especially so when it appears that the conditions seem to be so favorable for the development of plants, some of which we try to bring under subjection to our varying conditions, to which they unwillingly yield. The methods of cultivation followed in the production of plants are the same methods which have been applied for many years, or even decades, with but few variations. We have either not yet learned how to do it, or the system coupled with the conditions will remain where it is. This much, however, can be said of our European brother horticulturist: his training is much more thorough, his early association with plant life, which in some degree is tutored in his home, stirs a more intense love for the art and an untiring interest for the vocation. Men and women in the homes of city and country regard the most humble domicile incomplete for themselves and families without plants, flowers or shrubbery under their own personal care. This inborn love for the adornment of the home has been handed

down to posterity, so that it has become a part of the nature of children to busy themselves with the care of plants. A much greater impetus to the advancement of horticulture is given by the personal interest of the nobility and the people of means in that they are surrounded with the best taste in the horticultural art, and perpetuate the estates of their ancestors with even more elaborate outlay and show, and do much by personal contribution to perpetuate the interest among those who are engaged in the pursuit of horticulture as a business.

It was my good fortune to have the privilege of making an interesting journey across the ocean with one who knew just how to "do" Europe, and we did it as best we could in the short space of four weeks. Therefore, there is much of interest yet to be told from a more extended tour than could be gleaned from so short a stay in the places of interest as this sketch will afford. Having had the honor of being the traveling companion of Mr. Jacob D. Eisele, who is not only known to the most of our trade fellows here, but also to the horticultural craft of Europe, our reception was with a pomp and courtesy in which I undeservedly participated, and which permitted me to penetrate some of the so-called Meccas of Horticulture. Just what we saw and did would be so little interesting to you, yet to tell how we did some things might be wholesome to all interested.

Ocean Comforts.

The newest thing belonging to an old country was the magnificent ocean palace, the "Kronprinzessin Cecile," the North German Lloyd's crowning effort of ocean comfort. This ship we boarded September 17, leaving Hoboken at 11 o'clock that day for what we hoped to be a delightful trip across the Atlantic. At no time during this short journey of six days was there a moment unprofitably spent, and having become accustomed for many years to a simple mode of living, so far as food was concerned, it was quite natural for the digestive organs to resent such great surprises as one is enticed to indulge in, especially when you must pass in the attitude of a cake walk before seated observers on deck. Everything of an entertaining nature is afforded a tourist to employ the time, not excepting the comforts of the extensive and cozy smoking room.

On Monday, September 23, at 10 A. M., we were unloaded on the tender at Plymouth, England, remaining long enough to have our cigars inspected and reduced, then entered the train on the London and Southwestern Railway for London, passing through Devon, Somerset, Surrey and Middlesex, then reaching the world-famous, and England's historic city, London, where the concourse of the masses through the ages have learned by discipline and practice to pass and repass on foot or by vehicle without friction.

In London.

As much as a part afternoon and evening would afford was profitably indulged in; an evening ride on a bus seated near the front, and close to the driver, who, for a slight recognition, was willing to point out and call out the noted places, and if the

trip did not include some of the distant places of interest, they were numbered among those of the passing thoroughfare. After retiring and a few hours of sleep it was quite in place for a stranger to be aroused to witness a London fire in the neighborhood of the hotel. A few moments watching and anxiety as to our safety assured us that the firemen were better able to cope with the conditions, and the hazard seemed to be lessening, so we were constrained to retire again for the balance of sleep due us.

Fortune seemed to lurk about us, and for the full enjoyment of the following day we had the best of weather, and at no time during our stay in this great city did we encounter the well-known and dreaded fog. A trip to the outskirts and among some of the well known horticultural establishments filled the two days with pleasant experience, and very pleasant recollections: enjoying while riding through the country the homes of the cottagers and their surroundings; many little homes in bowers of vines and bloom, and every inch of the enclosure rich in bright flora.

Kew and Covent Garden.

Having already determined upon a visit to the pride of England's horticultural school—Kew Garden, our desire was intensified by what had already been enjoyed. Starting from Charing Cross Sub, we were soon at Kew Gardens, which well deserves the name of a perfect Eden in good order. The botanical department is of more than ordinary interest in that it is attractive and under a splendid system and care. Many beds were planted with such stock as we could never venture a trial, and were there in full glory. The roses and dahlias were clothed with a wealth of bloom, and a promise of more. The arrangements for studying trees and shrubs; in fact, all plants, were minutely confined to proper labeling, which even to the novice is an incentive that there is need of system and classification in horticulture.

Many other places of great and noted interest were to be seen, but our stay permitted only a few; viz.: the noted St. Paul's and Westminster Abbey. An early start was made the next morning for the renowned Covent Garden to watch and study the trend of commerce in plants and flowers. Much is done in a very short time and at an early hour. At this time, September 26, cut chrysanthemums are in abundance, with the almost glut of roses cut from field-grown plants, and hardy asters (Michaelmas Daisies) in masses of color. The fruit and vegetable markets were equally active, and afforded much interest. We returned to the hotel in time for breakfast, and then to train for Dover, embarking there on a modern turbine steamer for Ostend, Belgium. Conditions were certainly of the best—lunch uninterrupted, and the balance of time on deck.

In Belgium.

Ostend (Belgium's Atlantic City, or Newport) was reached in early afternoon, and after the customs department officers had made their usual examinations, we were under way for Ghent, arriving there in good time to see part of this historic city—among quaint conditions and interesting peo-

ple. The cities of Ghent and Bruges are highly interesting in horticulture—the home of the azalea and bay, the fields of tuberous begonias, and glass areas of palms. Prominently in all thoroughfares is seen the ever faithful and unpaid laborer, the dog, hitched beneath the hand carts, tugging and helping the load onward; the wooden shoe in evidence on the children in the city, and the laborers in the fields. Ghent is an active city of 160,000 inhabitants, with many places of historic interest. Bruges, one hour's train ride east, is also very interesting and very quaint. The impression left by this short sojourn, the kind attention and courtesy of our Belgian friends, are not to be forgotten.

Sunday morning, September 29, we went by early train to Brussels, where a full day of sight-seeing was afforded, visiting its Galleries, Palace of Justice and Park, the latter being particularly interesting, as it bears the mark of nature's freedom. The Sunday morning market in the Court, surrounded by many ancient and historic structures, is very interesting, combining peculiar subjects; viz.: flowers, birds, pigeons and dogs. The mass of humanity which gathers here during the morning hours are through with their bartering by noon, the Court becomes deserted, and then the promenade streets and avenues are active and brilliant with gay attire of people on foot and in vehicles. One day in Brussels systematically conducted will afford a very fair idea of its proportion, its life and condition.

In Germany.

The next point of interest was Cologne, Germany, which was reached by 11 P. M., after a ride of six hours. As time was short in this city, we were fortunately domiciled near the famous Dome, and at 6 A. M. on the morning of September 30 another glimpse of the wonderful structure conveyed a favorable impression of this masterpiece of architectural art and genius. At 6.15 A. M. we were on the deck of the Rhine boat, "Elsa," prepared for a day of sight-seeing along this noted stream, which has been the ambition of millions of Americans, and seen by as many. The trip is one of unending interest, and rarely satisfies the observer with one glimpse of its grandeur and constant change of panorama, but from only its partial impression it leaves a determination to see it again.

This narrative is the experience of many men and it is true.

Hammond's Grape Dust

For Mildew on Roses, Carnations, Etc., in use since 1884

Clifton, N. J., Oct. 11, 1907.

Dear Mr. Hammond:

In reply to your inquiry regarding my experience with Grape Dust, would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for mildew on roses.

I do not know anything about its constituents, nor do I care so long as it does the work, and is as economical as anything else on the market.

During the summer when the steam pipes cannot be brought into use to check mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than sulphur, because it is so much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants, will cover them more thoroughly, and Grape Dust can be put on with a bellows in about one-fourth the time that would be required for sulphur.

The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes I am, Yours very truly, ROBERT SIMPSON.

Put up in 5 and 10 lb. packages at 7 cents per lb.; also in 25 lb. bags, 100 lb. kegs and in barrels of 200 lbs., net. Kept in stock and sold by the leading Seedsmen in America.

MONTROSE GREENHOUSES

MONTROSE, MASS.

Seed Trade

Counter trade is active throughout the Southern Central and Western States and is looking up in New England, but no where is it as active as last year at this time. Counter trade is so dependent on the weather that March this year could scarcely be expected to equal such a warm spring-like month as March of a year ago. Mail order houses are now the busiest they have been for several years, and if there is no decline in the volume of business for the next thirty days, they will have had one of the best years in the history of the trade, if it ends right there, but it will not, of course, though it will be nearing the vanishing line after April 20.

The danger of stretching one's capital over too great a volume of business has been very clearly brought home to many who have been rash enough to do this. So far as known, few seedsmen can be included in this list, be it said to the credit of the seed trade, but some other industries with which the seedsmen are in close business touch have not been so wise or prudent, and several firms are some distance removed from Easy street in the matter of financial resources. A forcible reminder of all this was the passing of the Erie Preserving Co., of Buffalo, N. Y., into the hands of receivers some ten days or two weeks ago. This is one of the old firms in this line of business, having a large trade in all parts of the country, and turning out annually from its several plants, not far from 1,000,000 cases of goods. It is believed that the firm's embarrassments are only temporary and that they will operate as usual the coming season.

There are two or three other prominent concerns in this same line of business who are sailing uncomfortably close to the shoals, and it behooves seedsmen to be very careful to whom they extend credit, and particularly in large amounts. This warning may possibly save many vain regrets.

F. B. Mills, of Rose Hill, N. Y., who for the past two or three years has been conducting a large part of his business from Syracuse, N. Y., and who this season opened a branch at Washington, Iowa, is said to be doing a very heavy business. He directs everything from his perch on the crest of "Rose Hill," and seldom takes the trouble to confirm or deny any rumor about himself or his business. He is one of those reticent men from whom information is drawn only with a corkscrew. But after all, success is usually the measure of a man's ability, methods so long as they are legitimate being a minor consideration.

The selection of the Pouchatrain as the headquarters of the American Seed Trade Association at the annual convention at Detroit, June next, does not seem to have met with unqualified approval. This house is all that can be desired, excepting in the matter of price. It is strictly European, single rooms costing from \$2.00 per day up. Even if no advance in rates is charged,

it will cost from \$4 to \$5 per day to live at this hotel, while the Cadillac, which is a high-class hotel, charges \$3.50 per day including meals for one in a room, or \$3.00 each per day with two in a room. It is understood that the Cadillac would have been selected, but from the fact that it was booked up for another convention the same week as the seedsmen's. But could not the seedsmen have postponed their convention a week?

There is no desire to find fault with the gentlemen having this matter in charge, and perhaps their reasons when clearly understood, fully justify their action, but the writer is only stating what seems to be the sentiments of a considerable number of seedsmen. However, let us hope everything will end in complete satisfaction to all.

Most of the pea and bean growers report their acreage for the coming season as fully booked, and in fact unless there is a very full crop, short deliveries of the wrinkled varieties of peas will be the general order of the day. There is little doubt that a 75 per cent. delivery will be more acceptable to canners especially, than 100 per cent. Even to the seedsmen, a 75 per cent. delivery means more profit than full delivery, as full delivery usually means a surplus in the growers' hands with which the dealer must reckon in making prices, and generally it means a surplus to be carried over at the end of the season.

Not much activity at present in wholesale lines excepting in the matter of fill in orders, but the retailers are having their innings, and may they wax fat and prosperous.

The California Seed Growers' Company has purchased a portion and rented the remainder of the Furlong ranch near Gilroy, Calif. H. M. Wolfe is president, and it is stated that Ah Him, who has had charge of the field department of C. C. Morse & Co., will be manager.

The L. L. Olds Co., of Clinton, Wis., have opened temporary quarters in the Isham building.

TRIP TO THE GHENT QUINQUENNIAL.

The British horticultural traders' annual tour this year will be made to Holland and Belgium on account of the Ghent Quinquennial, and the itinerary as published by the Horticultural Trade Journal is as follows: April 21, leave London; 22d-23d, in bulb district of Holland; 24th, nurseries of Ghent and Loochristii; 25th-26th, Ghent; 27th, those booked for seven days return to London; the ten days' party start for Brussels, where they remain until the 30th, when they go to Bruges and start for London. Arrangements are made for entertainment by the Dutch bulb growers. This is an excellent opportunity for those who wish to make this trip without worry about conveyances or foreign language.

LIBRARY NOTES.

Last week's notes on a new book on the rose were from the pen of Mr. Payne.

As a rather keen collector of rare old gardening books, I can only express my regret that there is not the same facility for acquiring them that there is for getting the new ones. Whenever one goes or whatever one wants it is always the same story, that all the old gardening works are being bought up by Americans. Books that a few years ago could have been bought on the Quais in Paris for a few cents each are now almost unobtainable for the same number of dollars. By this I am encouraged to think that the literary interest in modern gardening among Americans is also keen and therefore I continue my Library Notes for their special information. The first to claim attention in this week's notes is:

The Flower Garden, by T. W. Sanders. The author of this bulky little octavo is a well-known horticultural writer, and editor of one of our most popular gardening papers. He is a practical gardener of many years' experience, and has among much other literary work edited and brought up to date many of the books written by the famous Shirley Hibberd. The Flower Garden, now presented to the public, is indeed one of the most comprehensive books on outdoor flower gardening we have, and is divided into three main divisions—first, the formation and management; second, the arrangement of plants, hardy and half-hardy of every description; third, ornamental trees and shrubs suitable for the open air in English gardens. It can easily be understood that in a work extending over 450 pages these main divisions are capable of infinite sub-divisions.

The general plan of the work is systematic and in orderly sequence. A nicely gotten up book, brimful of practical information and an excellent present for any enthusiastic garden amateur. \$2.00.

Sweet Peas and Their Cultivation, by Charles H. Curtis. A capital little manual by the secretary of our National Sweet Pea Society. It is a neat little treatise that ought to be on the shelves of every lover of the flower. Price 36 cents

La Revue Chrysanthemiste 123

Rue Baudin, Paris). This is a new monthly journal devoted to the chrysanthemum, and is the official organ of a new French society for the cultivation of the popular autumn flower. In form and contents it is somewhat similar to "Le Chrysanthème" which has been running now for thirteen years. Free to members.

C. HARMAN PAYNE.

ORCHIDS

We are at present booking orders for freshly imported Orchids for delivery 1905, of all leading kinds at reduced prices. We have just received the following:—*Oncidium Sarcodes, O. Forbesii, O. Tigrinum* and *Sophranites, Grandiflora* and *Coccinea*.

LAGER & HURRELL, Summit, N. J.

New Violet BOSTON

In introducing this new variety to the trade I wish to state that I have been growing it in quantity for the past two years and do not hesitate to state that it is entirely distinct, a strong grower, a free bloomer, and the first single violet in cultivation. Ready for distribution in April and May. Orders booked now. \$2 per 12; \$12 per 100; \$100 per 1000. 500 at 1000 rate.

CHOICE SINGLE FLOWERING ENGLISH WALL-FLOWER FOR EASTER BLOOMING

We have an elegant lot of these old-fashioned favorites, field-grown plants, which were potted up into four-inch pots during the latter part of September and which have been carried through the winter in cold frames and are now in prime condition to move. If placed in a carnation house temperature they will come in nicely for Easter, at which time there will be ready sale, at remunerative prices.

Strong, bushy, shapely plants from four-inch pots, \$1.25 per dozen; \$8.00 per 100; \$70.00 per 1000.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

CHRYSANTHEMUMS

Novelties for 1908 in 2½ inch Pots, Ready for Immediate Shipment

MRS. NORMAN DAVIS. Pure white, an improved Mme. Carnot. Best exhibition white out.
DOROTHY GOLDSMITH. Might be called a bronze F. S. Vallis, and easy doer. The finest bronze out.
KATIE PALGRAVE. A clear, waxy white, resembling Mrs. A. T. Miller, but fuller, and two weeks later.
MRS. SOUTHGATE. As large as F. S. Vallis, but a brighter yellow.

O. H. BROOMHEAD. An immense, solid bloom, rich deep rose, with sturdy dwarf habit.
W. MEREDITH. Dark crimson, with gold reverse. An enlarged Edwin Molyneux. A reliable variety.
MARY DONELLAN. A splendid deep yellow.
JOSEPH STONEY. Best exhibition crimson.
HAROLD WELLS. Pure white. A monster.
MRS. J. C. NEIL. Soft canary yellow. An improved Cheltoni.

Of Interest to Retail Florists

CHICAGO Southern jonquils have been a leader as the quantity shipped in has forced prices to a low figure decidedly to the retailer's advantage. The green flower business for St. Patrick's Day must have been overdone as a great many carnations, roses, tulips, etc., were seen on the following day. It is a speculation anyway. A large number of flowers must be colored to make a fair window display and apparently the novelty of green flowers has worn off. Where in other years a customer would select a dozen this year one or two was the limit.

DETROIT Springlike weather brought forth a large increase of counter trade over previous weeks, and store openings created very generous calls for large flowering plants and plant baskets. While twice we came near to having a glut the wholesaler has escaped with only a very slight infection by this microbe. A. W. Farrand is bringing fine white lilac from American grown trees to this market. Easter lilies promise to be very good but somewhat shorter in stem than in previous years. There will be plenty to go around. Some florists are already preparing cool storage houses to keep azaleas, lilacs, etc., which may be badly needed owing to the lateness of Easter.

NEW RETAIL FLOWER STORES.

T. L. Metcalfe, Jackson, Tenn.; H. H. Crawford, manager.

J. C. Hatcher, Schenectady, N. Y.; George Hatcher, manager.

Charles I. Bean, Springfield, Mass. Frank Vogt, 4138 Cottage Grove Ave., Chicago.

Charles A. Towns, Tilton, N. H. Myers Bros., Eleventh Ave. and 13th St., Altoona, Pa.

A GREAT ASTER.

Of the modern type of aster evolved within the past few years, the strain now being offered to the trade by Charles A. Kibbe of Elmhurst, Ill., stands in the first rank. These superb asters with their enormous blooms carried on stems from two to three feet high rival the chrysanthemum in effectiveness, and the class is indispensable to every florist.

INCORPORATED.

Kelley Floral Co., St. Louis, Mo.; E. G. Kelley, J. F. Wohlfarth, Anna Wohlfarth; capital, \$2,000.

NEWS NOTES.

W. M. Eldridge & Co., Wilkes Barre, Pa., will dispose of their stock and fixtures and retire from business.

W. D. Conrad has been appointed by Judge Holt receiver for Alfred Van Praag, florist, 1207 Broadway, New York, with bond of \$500.

The store of Henry Burt, Syracuse, N. Y., which was damaged by smoke from a near-by fire last week, was quickly put in order and business now is going on as usual.

A. F. LEWIS MFG. CO., E. Boston, Mass.

PERSONAL.

Albert Greer is starting in the vegetable growing business at Vancouver, Wash.

George Reid has taken a position at Blantyre, R. W. Patterson's estate at Lenox, Mass.

Philip Breitmeyer and wife of Detroit have returned from a two weeks' trip to Florida.

George M. Geraghty of New York has taken a position as manager of J. H. Dunlop's store at Toronto, Can.

B. E. Vandervoort is starting in the nursery business at Normal, Ill., and his packing sheds are already under way.

Herman Dorner, of Lafayette, has been appointed professor of floriculture at the University of Illinois, Champaign. Mr. Dorner is a graduate of Purdue University.

Charles P. Price, who since July, 1896, has been superintendent of the Middlesex Fells reservation under the direction of the metropolitan park commission of Massachusetts, has tendered his resignation, to take effect April 1, and it has been accepted. His successor will be Albert N. Habberly.

David McIntosh, who has been gardener on the Bell estate at Newport, R. I., during the past twenty years has moved to Tuxedo park, N. Y., to take charge of an estate recently purchased there by Mrs. C. M. Bell, in whose employ he has been at Newport. David McIntosh was for five years, and up to his change of residence, secretary of the Newport Horticultural Society.

NEWS NOTES.

The first sale of the fruit auction Co., New York, will be held on Wednesday, April 1, at 204 Franklin street, and the sales will continue at the same hour on following days until further notice.

It is stated that a large greenhouse is soon to be built at Eastport, Me., to meet the demand in that vicinity for plants and flowers.

We understand that the Plant Growers' Market will vacate their premises at 43 W. 27th street, New York, on May 1.

Flower Market Reports.

BOSTON The market is still dull and lifeless. Conditions have not improved over last week. Flowers of all descriptions are plentiful with but small demand. Carnations are in fine condition, also roses, especially American Beauty. Lilies are being received in large quantities, and if stock continues to come in as fine shape as at present good results are expected from the Easter trade.

CHICAGO As the Lenten season advances business holds about the same and the wholesalers have no complaint. A great many split carnations are shipped in but ready sale is found for them to the sidewalk vendors and to department stores in out of town places that put on sales of carnations at low prices. American Beauties are more plentiful and of good quality. Southern jonquils are coming in large quantity and selling very cheap. This stock has a tendency to hurt the forced bulbous stock in prices. Azaleas, tulips and jonquils in pots, also cinerarias, are abundant in the plant line.

INDIANAPOLIS The market contains much more stock than the demand is using up. Wholesale prices appear to be lower than usual considering the quality and time of year. The trade in flowering plants seems to be far in excess of that of cut flowers. Beauties and all tea roses are first-class and are in quantity more than sufficient for the needs of the market. Carnations and bulbous flowers are abundant and can be had at the lowest market figures. Sweet peas are bringing good returns and no trouble is experienced in disposing of select stock. Lilac is seen in quantity but difficult to move. A big improvement in trade is reported by retailers in all sections of the city. Present indications do not point to any material change in prices.

PHILADELPHIA We are happy to be able to report that the market here is picking up a little. Carnations cleaned up much better and with smaller receipts prices are bound to improve. The demand all along the line was better, and while no decided advance has taken place in prices of the leading staples, a much better tone prevails. American Beauty roses shortened up considerably. Richmond continues fine but Liberty is a little off color. Bridesmaid and Killarney lead in the pink section, with the latter in best demand. A few of the new Mrs. Jardine are coming in and are eagerly snapped up. The violet situation improved greatly Friday and Saturday. The singles are sagging a little as to quality. It is thought that the cold frame crop will not last until Easter. Sweet peas are still very good and selling well. Southern daffodils are very plentiful and go mostly to the street men. The local product has the call, being larger, better substance, fresher and of the high-toned varieties such as Emperor, Empress, etc. These

1000 Strings of Smilax MUST BE SOLD BEFORE EASTER

Strings 6 feet long. 15 cents each.
Let me send sample lot.

VERN L. SCHLURAFF, - - - ERIE, PA.

go to the best stores and bring good prices. Paper Whites and Romans are nearly over. Easter lilies and callas are plentiful and go fairly well. Dendrobium Wardianum and Cattleya Schroderae lead in orchids. Cypripediums are about done.

TWIN CITIES The past week showed no changes to speak of. Business during the whole month has been good, with the exception of a few stormy days. Bulbous stock is going up a trifle. Chicago is sending in quite a lot of cheap flowers, especially roses in the lower grades, lilies and other bulbous flowers. There will be a nice lot of Easter lilies, azaleas, rhododendrons, astilbes, etc., on hand for Easter.

WASHINGTON The market is still demoralized by the excessive glut due to the beautiful weather and to the quiet of the Lenten season. Outdoor bulbs are beginning to flower now which will further help to lower prices of all other flowers. Carnations still remain of fine quality, but violets are very poor. Roses, even American Beauties, have gone tumbling down in price and we cannot reasonably hope for any better report before the Easter rush is on.

NOTES FROM TWIN CITIES.

Mr. Theodore Wirth left on March 19 for the meeting of the executive committee of the S. A. F., and also to attend the executive meeting of park superintendents to arrange for the next convention which will be held in Minneapolis.

J. F. Withers, who had been in Minneapolis for ten days lecturing on the treatment of trees and landscape gardening, accompanied Mr. Wirth. Mr. Withers also gave a lecture before the students of the State Agricultural School and before the Twin City Florists' and Gardeners' Club at their meeting at Holm & Olson's in St. Paul on March 17. All the lectures were very well attended and much appreciated.

NEWS NOTES.

Azalea Star of Somergen will be shown for first time at the Quinquennial, Gh-nt, in April, 1908.

The Denison (Texas) Civic Improvement League has just completed its second annual distribution of flower seeds through the public schools, which proved a great success, more than seven thousand packets being furnished for planting in home yards. Prizes will be offered for the best results obtained from the planting of these seeds and liberal prizes will be offered for the greatest improvement of home yards under a plan very successfully employed last season.

DURING RECESS.

The first meeting of the New York Florists' Bowling Club was held at the office of W. E. Marshall. Eighteen members were enrolled and officers chosen as follows: President, W. E. Marshall; secretary, J. Austin Shaw; treasurer, J. A. Manda. Dues were fixed at fifty cents a night. Only members of the New York Florists' Club will be eligible for membership.

After the transaction of business, bowling was indulged in, and among the best scores were the following:

A. Rickards.....	124	236	148
W. Rickards.....	130	167	129
W. E. Marshall.....	128	163	138
Mr. Schreiner.....	137	181	186
Jos. Feurich.....	173	165	192
J. A. Manda.....	156	171	181

Competition for President Traendly's transportation offer begins on April 3, and twenty games are to be rolled; the five winners must average 155 in the twenty games. The contest promises to be a lively one.

CLUB AND SOCIETY NOTES.

The New England Dahlia Society will hold an exhibition on September 17, 18, 19, at Lorimer and Gilbert Halls, Tremont Temple, Boston.

At the meeting of the Maryland Horticultural Society at Hotel Rennett, Baltimore, March 8, arrangements were made for a summer meeting at White Marsh, September 22, on invitation of R. Vincent, and for the winter meeting on December 1, 2, 3 in Baltimore.

The Winnipeg Florists' Association was formed at Winnipeg, Man., on February 27, with officers as follows: President, Mr. Eurchart; vice presidents, Messrs. Stolper and Akins; secretary, Mr. Birch; treasurer, Miss Sidle; corresponding secretary, Mrs. Kempster.

The Milwaukee (Wis.) Florist Club gave its fifth carnation exhibition on March 5, which was a decided advance over any previous show. Competition was admitted only between the local growers and N. Zweifel secured a majority of the prizes. Heitman & Baerman, A. Manke & Sons, Mueller & Schroeder and C. C. Pollworth Co. being other winners. Special mention was made of carnations Winona from F. Dorner & Sons Co., Aristocrat, White Enchantress and Andrew Carnegie from Chicago Carnation Co. F. P. Dilger showed fine bulbous flowers; E. G. Hill Co. Rhea Reid and Pohlmann Bros. Mrs. Potter Palmer roses.

WILLIAM H. LUTTON

HORTICULTURAL ARCHITECT AND BUILDER

WEST SIDE AVENUE STATION (C. R. R. OF N. J.)
JERSEY CITY, N. J.

Have not been established 50 years, but long enough to convince the wide-awake Florist and Gardener that it is to his interest to place his work in thoroughly practical hands.

(150,000 sq. ft. glass erected in 1907 will substantiate this claim)

And why not? My material is the best that can be secured. My iron frame construction has every modern feature that years of practical experience can embody.

AND THEN THERE IS THE COST TO BE CONSIDERED.

Why not let us take up this important question now?

SNOW AND ICE FREE ROOFS

Right here is where you appreciate the tremendous advantage of the curved eave with neither plate nor gutter to hold back the snow or collect icicles. This photo was taken in Canada. The U-Bar greenhouse is entirely free, while a gutter constructed house at the rear is so completely snowed under that you cannot see it. We have recently replaced that house with a U-Bar. Send for catalog.

Hardy Roses

American Grown—Superior to Imported

We have unsold at the present time the following varieties—all field grown plants, grown in our nurseries at Rochester, N. Y.:

Anne de Diesbach	Prince Camille
Clio	Edith Brunner
Frau Karl Druschki	Crimson Rambler
General Jacquemont	White Rambler
John Hopper	Yellow Rambler
Mme. G. Luizer	Philadelphia Rambler
Marshall P. Wilder	Common Sweet Briar
Mrs. John Luing	Mme. G. Brunt
Paul Neyron	Wichitana (The Type)

These plants are in our storage cellars and can be shipped at any time. Prices on request.

Notes From the Arnold Arboretum

With the exception of *Hamamelis japonica* of which I have spoken in the last issue there are at present in the Arboretum no other flowering trees or shrubs to attract attention. This does not, however, mean that bright colors are entirely wanting. The generally rather dull coloring of the bare shrubbery is enlivened here and there by shrubs with brightly colored branches, among the most conspicuous being several kinds of Dogwood. The best of them are *Cornus stolonifera*, the Red-Osier Dogwood, and *C. alba sibirica* with lighter more coral-red bark; in trade the latter is often erroneously called *Cornus sanguinea*; the true *C. sanguinea*, however, is a European species with dull dark red and thinner branches, less handsome than the Siberian Dogwood. Other good red-barked species are *Cornus Baileyi*, *C. Amomum* and *Cornus obliqua* (*C. Purpusi*). A pleasing contrast with these red-stemmed Dogwoods is formed by *C. stolonifera flaviramea* with bright yellow branches, a comparatively new variety and not yet so well known as it merits to be. It first came to the Arboretum in 1891 from Enfield, N. Y., and was subsequently distributed from here. Besides *Salix alba vitellina* it is perhaps the best yellow-stemmed shrub we have. Of the Yellow Willow there is also a pendulous variety, *Salix alba vitellina pendula* which is one of the best and hardiest weeping Willows in cultivation, combining a perfect pendulous habit with brightly colored branches. *Salix alba britzensis* is another brightly colored Willow but with red instead of yellow branches.

All these shrubs are most effective when massed together in larger groups and if winter effects are especially desired, it is to be recommended to cut them back occasionally, so as to produce a larger number of vigorous young shoots, for the one year old branches show the most brightly colored bark. The effect of planting in masses is well shown by the bands and groups of red-stemmed roses as *Rosa lucida*, *R. blanda* and *R. carolina* along one of the driveways in the Arboretum; in a single shrub the color would hardly be noticed, while these dark red masses particularly if seen from a distance, form a prominent feature in the wintry landscape.

Besides the red and yellow-stemmed shrubs there are many others with branches of various conspicuous colors too numerous to be mentioned. I shall here only draw attention to some species with bright green branches as *Kerria japonica*, *Cornus sanguinea viridissima*, *Rosa lucida alba*, several species of *Cytisus* and *Laburnum*, *Acer Negundo*, and *Sophora japonica* and to some shrubs with pale gray or whitish bark as *Elaeagnus argentea*, and *E. umbellata*, *Shepherdia argentea*, *Hippophae rhamnoides*, *Lonicera tatarica*, *Viburnum Opulus*, *Rubus occidentalis*, *Salix irrorata* and *S. daphnoides* and *S. acutifolia*. The whitest bark, however, we find among the trees in several birches as *Betula papyrifera*, *alba*, *pendula* and *populifolia* which on account of the brilliant whiteness of their trunks are at all times of the year a conspicuous feature in the landscape.

A few shrubs still hold their brightly colored fruits and thus add variety to the shrubbery. Easily the best of them is the now well known and appreciated *Berberis Thunbergii* whose scarlet fruits have lost but little of their brightness during the winter. Two other Barber-

ries whose fruits withstand the wintry weather equally well are *Berberis Sieboldii* and *B. Rehderiana*, but neither of them is as good as *B. Thunbergii*; their fruits are smaller and are not produced so profusely and the shrubs themselves are of lower stature and not suited for hedges. Also the common Barberry and its allies hold still most of their berries though considerably shriveled. *Viburnum Opulus* is another shrub whose clusters of brightly colored fruits though partly dried up are still a conspicuous feature of the shrubberies. Also the whitish fruits of *Myrica carolinensis*, the Wax-berry, and *Rhus Toxicodendron*, the Poison Ivy, are still hanging on to the branches and not without ornamental qualities, and so are the black or bluish black finish of the several species of *Ligustrum* and the lustrous black fruits of *Rhodotypos*.

Alfred Rehder.

Prunus Davidiana, Franch

Many of the cherries, peaches and almonds are most valuable for their ornamental qualities. To some of them the far-famed Japanese gardens and landscapes owe much of their charm. Yet much to our discredit we have hitherto given them but little space in our gardens and plantations. Of this worthy group the earliest to unfold its flower buds is *Prunus Davidiana*. In the vicinity of Boston it makes its display during the second week in April if the season is normal, though if the spring is somewhat forward the buds may begin to expand late in March. At any event we may feel sure that it will charm us with its floral offering before even the Forsythia displays its golden bells, or Spiraea Thunbergii whitens its arching branches. This dainty little tree is indigenous to northern China. Here it assumes a form very much like that of the common plum and attains a height of twelve to fifteen feet. The flowers, which are borne abundantly in advance of the leaves, are nearly an inch across and are white or pink in color. It is perfectly hardy in Massachusetts, yet its flower buds may occasionally suffer from the trespass of an untimely frost. For this reason it may be well to see that it has a somewhat sheltered place. Then too, its branches may sometimes be affected by the so-called "Japanese die-back;" yet this is not a serious menace to its use. As might well be expected from its relationship to the peach it is not a long-lived tree and may need replacing. Although not fastidious, it is distinctly a garden plant. It needs a well-drained soil, plenty of food and a protected location. It may be used to good advantage in the shrubbery with the more refined of the small trees and shrubs. Yet perhaps the very best association would be in a group composed of its attractive cousins, such as *Prunus pendula*, *Prunus subhirtella*, *Prunus Pseudo-Cerasus*, *Prunus triloba*, *Prunus Japonica*, and *Prunus tomentosa*. All in all it deserves to be much better known and more frequently planted. It has decided merit in the neatness of its habits, in the purity and charm of its flowers and in the timeliness of its florescence.

which it has so long enjoyed abroad. The Hills, Dawsons, Walshes, Cooks, Mandas and Montgomerys of the coming generation will rapidly multiply. The Egans, Hiawathas, Rhea Reids, Wellesleys and Cardinals of today, beautiful as they are, are destined to be superseded by children fairer, more productive, continuous-blooming, yet absolutely hardy. All honor to the men who have had the courage to take the initiative.

Our readers who recognize the importance of and appreciate HORTICULTURE'S continued efforts to provide instructive horticultural literature from the most advanced standpoint will be pleased to know that the series of notes from the Arnold Arboretum by Mr. Alfred Rehder, begun in our issue of last week, will be continued regularly throughout the year. The new plants brought to light by Mr. Wilson in his North China explorations will be fully noted by Mr. Rehder in these columns as fast as their horticultural value in America is demonstrated under the unerring eye and hand of Jackson Dawson. It is on the lines herein suggested that we look to see the most notable horticultural advancement during the next decade. As heretofore remarked, HORTICULTURE hopes to do its humble part in helping to spread the light of progress in these coming days which promise so much. In this respect we have other good things in store. Tell your friends.

The problem which intruded itself so forcibly at the American Rose Society exhibition in Chicago of how to do full justice in judging exhibits from a long distance in competition with those of local production is one which has already assumed a disturbing importance in the American Carnation Society and is sufficiently serious to warrant immediate consideration and prompt adjustment if possible. So long as the rules and system of judging leave the judges no option but to base their conclusions solely upon what is in sight at the moment of judging it cannot be expected that exhibitors from a distance will subject their product in the classes of material which are sure to lose certain values by long transportation, to the chances for discredit thus presented. If these societies whose shows must, in the nature of things, be composed of perishable material would have their exhibitions anything more than local affairs it seems imperative that concessions in some form in the interests of distant contributors must be forthcoming. The "zone" system with a certain number of points or fractions of points conceded on color or other changeable qualities according to miles traversed seems to present the best solution.

Our Frontispiece

Our frontispiece shows one of the most promising roses ever introduced to the American trade. Killarney has more than "made good." White Killarney, originating with the prince of rose growers, Alexander Montgomery, is destined to take a position of leadership in the commercial cut flower trade, putting into the shade the varieties that have for many years been indispensable. We learn that the F. R. Pierson Company, of Tarrytown, N. Y., has secured one-half interest in this sterling novelty—another evidence of the far-sighted judgment of the man who first discovered carnation Winsor.

Earnestly hoped for but long deferred, the day of the American rose seems at last to have dawned. Devoted men have been working and experimenting during the past few years on many lines which might furnish a possible basis for development of new races adapted to the peculiar conditions of American climate, and now that the foundations are laid we may expect to see results follow in rapid succession which will stimulate rose breeding and ultimately bring rose culture in this country to the pre-eminence

The rose in
the ascendant

The New American Carnations in England

With the great contrast between the climate of England and America, it is surprising what similar verdicts are arrived at in the judgment of the new varieties of American carnations. It is the simple truth which tells in the end; all the beating of drums and clanging of cymbals in the world will not make a bad carnation a good one. And if good, no matter if grown in the sun of California, or the smoke of London, they produce mighty fine flowers.

While many of the small growers over here do not test any of the new American introductions, others do so only in small quantities and are not really in the position to judge. At Bush Hill Park we bite rather largely at some of the novelties, yet more often, I am inclined to think that we are in the position of the cat, while the monkey was using its paw to get the chestnuts out of the fire. In other words, the small grower greatly prefers that a large grower shall cultivate and show the novelties for the first year, get the stock well climatised, and, I might add, free from disease, because it is wonderful how invariably this is in the crate as packing, yet much of it, I am inclined to think, is created on transit. Still that does not alter the fact that it is there and requires getting rid of, because the average British grower has a great abhorrence of rust.

The loss, again, is no small item in importing carnations from America, and often those that you save figure out as very expensive plants. We all realize that practically the last word has been said in the matter of packing, so we do not look for better results in the future.

Aristocrat came over very badly diseased and was slow to make a start away. We grew it under glass all summer, and commenced to cut in mid-September. The formation of the flower is considered almost ideal, the great fault being the color, which has too much magenta in it for British taste; its stem is good and calyx held well throughout the London fogs.

Beacon is unanimously voted the best scarlet; in fact it is most difficult to find any fault with it. We all have a very warm corner in our hearts for the raiser of it. We grew it indoors all summer, started to cut early and have been cutting ever since.

Winsor is another general favorite, all the best London shops having a strong fancy for the color, and its short stem in the early part of the season is not too strongly objected to, yet the Britisher dearly loves a more shapely flower.

White Enchantress is good, and all like it, yet White Perfection leads in purity of color; as yet there is no great rush for this child of a noble sire.

Rose Pink Enchantress is disappointing; the dull days cut its unstable color up sadly, yet when the stock has been more rigidly selected down to a true shade, it may live on.

Imperial and Pink Imperial are not of a habit which

is popular in England, and the color of the former is not bright enough to become a favorite, while the latter is pretty without being great.

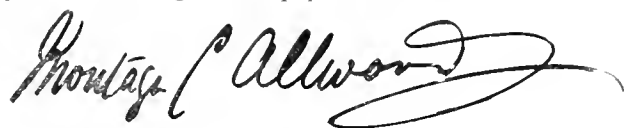

Red Riding Hood we did not stock, and those who did, wished they had not.

Red Chief is the right color and would have had a great future in Britain if only larger, yet under the circumstances life will be short.

Victory is just coming into its own: it has regained its health and with us is remarkably fine, but all last season it was very sick itself, and made all of us feel quite bad.

Britannia is a general favorite throughout; it flourishes wonderfully well under pot culture, the deep rich color being popular.

Mrs. H. Burnett, another of last year's British introduction, has won favor in some localities, the salmon pink color being a most popular shade in London.

Bush Hill Park.

The Fertilizer Question

Editor HORTICULTURE:

Dear Sir:—My attention has been called to a statement in a recent number of HORTICULTURE regarding remarks made by me before a recent meeting of the Carnation Society concerning the use of chemical fertilizers and their effect on the production of carnations.

In order that I may make my position perfectly clear I may say that after a good many years of experimenting under glass on crops of different kinds, we have reached the following conclusions and it was these conclusions that we referred to in our talk before the carnation people:

- (1) That so far as the securing of healthy plants and the production of profitable crops of flowers was concerned, fully as good results could be secured by the use of good composts alone as where chemical manures were applied.
- (2) That florists were prone to over-estimate the value of chemical manures, especially bone, in the growing of crops.
- (3) That the more highly concentrated and soluble the chemical manures used, the more likely there was to be injury resulting therefrom, owing to the fact that it was exceedingly difficult to properly gauge the handling of these materials in the growing of crops under glass.

We stated, I believe, and will repeat that if we were in position to always get good well decomposed stable manure, either cow manure or horse manure, we would want nothing better in the growing or forcing of crops under glass.

Very truly yours,

B. T. GALLOWAY,

Chief of Bureau.

AMERICAN ROSE SOCIETY

THE CHICAGO MEETING CONTINUED.

W. A. Manda's talk on outdoor roses at the Wednesday evening session was very interesting. He called attention to the fact that there are on record in Paris the names of 11,016 varieties and species of roses and in a private collection in that city some 8000 varieties. He recommended the laying out of rose gardens on more or less formal style with beds from five to six feet wide and of varying length and planting the roses in rows leaving room between the plants for cultivation. He said it was a good plan to put the H. P. sorts in the centre row and the H. T.'s, which are not so tall growing, on the outside and the beds would then look well all through the season. Standards and ramblers placed at intervals lend variety, the latter being adapted for pillars and arches up to 20 ft. in height. For hedges he recommended *Rugosa* as most useful. For a protective hedge nothing equals the *Wichuraiana* hybrids. He declared that people do not prune roses as severely as they should. Old wood should not be allowed to remain. In the discussion which followed, Wallace R. Pierson said it was his intention to plant five hundred white and pink Maman Cochet roses for summer cut flowers, as an experiment.

J. F. Sullivan's paper on Roses for Decorative Purposes, delivered on Thursday morning was, as briefly noted in our previous notes, very favorably commented upon. Philip Breitmeyer commended it warmly and called attention to the increasing call by flower buyers for the old-fashioned small varieties such as *Bon Silene* and *Safrano*. He spoke reminiscently of Boston's priority in the growing of these pioneer varieties years ago and submitted that, from the evidences in the present exhibition, Boston was "still in the ring." W. J. Stewart followed Mr. Breitmeyer in appreciation of Mr. Sullivan's effort. He believed that the rapid recent development in varieties of large size had now left room for the existence of buds of the *Bon Silene* type as a separate class, adapted to special uses and with a remunerative commercial value in the flower market. He said that Boston could not aspire to compete with Chicago in its vast ranges of rose growing houses, or its unlimited market for the productions of same but, as in the case with all New England agricultural and manufacturing industries Boston's position as the producer of the highest type of flowers would be maintained, quality rather than quantity being a proposition forced upon the New Englander by natural conditions and restrictions from which he could not escape.

Following W. H. Elliott's very practical paper on the size of commercial greenhouses, A. Farenwald remarked that in his opinion success in rose

forcing was not dependent upon the size of the house but the ability of the man operating it. He spoke of the great dangers of wind pressure in the case of vast roof surface and thought that the only question to consider in comparing large and small houses was that of economy. Mr. Elliott in reply maintained that wide and lofty houses may be heated with a proportionately lesser amount of pipes than small houses. Thorough construction would solve the wind-pressure problem and it might yet be a question as to whether houses might not be constructed large enough to ensure all the pure air needed without any provision for ventilation other than to prevent over-heating in the day time.

On Friday morning, March 27th, President Simpson read an invitation from the Horticultural Society of New York, to hold a June Rose Show, in connection with that body, in Bronx Park, New York City. This matter had been brought up before the Executive Committee by Ex-President Frederick R. Newbold last November. Upon motion of Mr. Valentine it was voted that The American Rose Society accept the invitation and join with the New York society in its June Show, and that the Secretary extend the thanks of the Society for the invitation, which is without expense to the American Rose Society for accommodation or service.

The paper by George B. Maynadier, of the Bureau of Soils, Department of Agriculture, on the subject of Soil—the constituent parts, the effect of water, etc., was closely followed. John Thorpe related some experiences where *La France* grew at Nyack, N. Y., with much vigor—and other varieties at Madison, N. J., illustrating by his experiences the force of the suggestions of Mr. Maynadier.

The vital question of the growth of the Society was taken up by Secretary Hammond and laid before the meeting in detail—the step taken to produce a publication as a means of extending the influence of the Society interesting the membership at large—the prospectus sent out and the responses in return shown. All present took much interest and some part in the discussion. Frank R. Pierson, said he was heartily in favor of the project, but suggested that, in lieu of any advertising support, the needed backing be done by direct subscription to the fund. In response to Mr. Pierson's suggestion, a number of gentlemen present started a subscription list with a substantial sum and the meeting endorsed the project, leaving it in the hands of the Executive Committee and Secretary.

The paper received from Mr. Alexander Dickson, of Newtownards, Ireland, was then read. Upon motion of Mr. Farenwald it was ordered that the Secretary be directed to convey to Mr. Dickson the thanks of the Society.

Mr. Robert Craig's paper was presented by W. P. Craig and a vote of thanks given as it was a pertinent subject of much interest.

The question of the desirability of

incorporating the American Rose Society under a State law was raised and referred to the Executive Committee.

In addition to the list of prizes won at the exhibition as given in last week's issue there should be mentioned F. R. Newbold's special for 25 blooms of *Uncle John*, which was won by Poehlmann Bros., the John Davis prize for 100 Mrs. Marshall Field, awarded to Peter Reinberg, and the specials offered by Peter Reinberg for the men who did the actual growing of the exhibits considered, which were awarded to the growers for W. M. Elliott, Poehlmann Bros., and A. Farenwald, first, second and third respectively. The sweepstake silver medal offered by the Horticultural Society of Chicago for the best vase of roses among the prize winners was won by W. H. Elliott's vase of *Killarney*. Miss M. I. Hammond's special for the most beautiful exhibit in the hall was decided by vote of the ladies visiting the exhibition to belong to the group of rose plants shown by Vaughan's Seed Store.

Wyndmoor is said to be a cross between *American Beauty* and *Safrano*. It pleased everybody by its fresh, bright appearance at the exhibition after its journey of nearly a thousand miles. The flower is handsomely modelled, rich pink in color, and the foliage is similar to *Beauty*.

Victory, *Aristocrat*, *Afterglow*, *Winsor* and *White Perfection* were on deck and well-represented the progress in carnation culture up to date.

Most favorable comment was made on the splendid keeping qualities of *Cardinal* in the exhibition. Messrs. Poehlmann Bros. regard this handsome, fragrant crimson rose as a commercial winner.

Chicago treated the visitors to a great assortment of weather, all of which was borne without murmur until the blustering rain storm of Friday, which at times put an embargo on outdoor locomotion.

Newport Fairy, although passed over by the judges with merely a commendatory mention, attracted much attention and was greatly admired. It is said that the similarity of its flowers to those of *La Piamma* was the cause of its side-tracking, but the glossiness of its foliage, its floriferousness and graceful habit gave it a high place in the estimation of all.

Mme. Chatenay showed up in grand form, but it looks as though Mrs. Potter Palmer in time place it where *Bridesmaid* placed the *Catharine Mermet*—in seclusion.

THE BANQUET.

The banquet at the Union Restaurant on Thursday evening was enjoyed as all such affairs are, by both visitors and hosts. A touch of sadness was added by the sudden calling away from the table of genial Phil. Foley who was to have officiated as toastmaster, owing to the death of his brother's child. W. N. Rudd was called upon in the emergency to fill

the vacant chair and with customary adaptability and ready wit did full honor to himself, his guests and the occasion. The visiting ladies in the meantime were taken to luncheon and the theatre under the guidance of Mrs. J. C. Vaughan and other ladies of Chicago, and we learn from reliable sources that they had a glorious time "all by themselves."

Leonard Kill, president of the Chicago Florists' Club, opened the post-prandial exercises with a few well-delivered words of welcome. Toastmaster Rudd then assumed authority and, by way of diversion introduced president Traendly of the S. A. F. to respond for the American Rose Society and president Simpson of the American Rose Society to respond for the S. A. F. Both gentlemen responded in satisfactory manner. Ex-president W. J. Stewart was next introduced as having served the longest official term in connection with the parent society and responded accordingly. President Kill was here induced to say a few more words—the toastmaster's comment thereon being "His oratory is fine but the quantity deficient." Next came Philip Breitmeyer with a nice complimentary speech and then Secretary Hammond with an eloquent tribute to the rose, its influence in the home and in the garden. J. C. Vaughan next spoke for "Horticulture in Chicago" and W. F. Kasting followed with a characteristically practical talk on the meeting and exhibition of the American Rose Society to be held at Buffalo next year. J. A. Valentine, introduced as "the man always there—no matter where" made a witty speech. E. V. Hallock spoke for the school garden question, saying that "it beats any other thing you can get up." Then the toastmaster drew upon his special reserve of wit in introducing P. Welch of Boston who returned the compliment with a sally that brought down the house and coolly told the Chicagoans that they got all their hustlers from Massachusetts. W. H. Elliott was the closing speaker on behalf of the rose growers.

CHEROKEE ROSE.

Horticulture Pub. Co.

Gentlemen:—We note on Page 367 of the March 21st issue of HORTICULTURE reference made to the Cherokee rose, and the question asked in connection with it why "some enterprising grower does not take up this beautiful variety." Not wishing to throw any bouquets at ourselves, would say that we have the Cherokee rose in stock, and have had it for many years, and while we do not have large quantities we can supply a reasonable demand for it. We figure, therefore, that we must be numbered among enterprising growers.

Yours very truly,

THE DINGEE & CONARD CO.,
P. J. LYNCH, Treas.

West Grove, Pa.

Our remarks in reference to the Cherokee rose were meant to apply to its forcing for cut flower purposes. Perhaps "some enterprising grower" will be glad to know where the stock may be procured.

Come on, April, through the valley,

In your robes of beauty drest,

Come and wake your flowery children

From their wintry beds of rest.

Come and overblow them safely

With the sweet breath of the south;

Drop upon them, warm and loving,

Fenderest kisses of your mouth.

—Phoebe Carey.

PHILADELPHIA SPRING FLOWER SHOW.

Among the features of this annual event, which occurred on Tuesday, Wednesday and Thursday last, were the big azaleas from the Newbold estate at Jenkintown. These measured seven feet in diameter and were perfect in flower and foliage, a dazzling picture. It is claimed that no such plants can be bought in Europe or America today at any price! Mr. Batchelor deserves credit for their superb condition, and won a first prize the money value of which was far below the intrinsic merit of the exhibit. Obconica primulas from the same place were the largest flowers ever seen here—high-colored and as big as a silver dollar, but the first in this class went to larger plants with smaller flowers. The latter were from the Pepper estate. We think the judges should always lean to quality rather than size where the schedule will permit, which they do not seem to do. There was a fine exhibit of geraniums from Batchelor, but the bigger and commoner plants from the Paul estate got first. Now, in both the obconica and the geranium exhibits the verdict ought to have been exactly the reverse—in order to give due emphasis to quality over quantity.

The main display consisted of spring flowering subjects, such as hyacinths, tulips, daffodils, Easter lilies, callas, etc.—outside of the subjects already mentioned. In these classes the more prominent prize-winners were: William Kleinheinz, Samuel Batchelor, John McLeary, Wm. Robertson, Joseph Hurley, Jno. Hedland and Thomas Long.

The centre of the main hall had the time-honored pagoda built by the Graham Co., white pillars draped, festooned with vines, decorated with plants and flowers and electric lighted.

In front of the stage, for the Dreer premiums, was an interesting group of plants, among which were the white and pink Baby Rambler roses; a fine lot of amaryllises, *Primula Sieboldi*; *Pteris Childsi* and *Asparagus Colemani*. A fine group of foliage plants was put up by the Paul estate. Lager & Hurrell, Julius Roehrs Co. and Alphonse Pericat each staged a good collection of orchids. J. Goodier, gardener to C. G. Roebing sent an exhibit of amaryllis—magnificent as to size and varied in color. It is a long time since we have seen such flowers. *Azalea mollis* was in evidence, splendidly flowered; but with no foliage. Flowers without foliage were seen in other shrub sections, and were not particularly pleasing, artistically. Some good forced lilacs were shown with good foliage. The finest *Amerpohli* fern we have ever seen graced the top of the main stairway. It was a perfect ball, every frond faultless, full to the centre, three feet in diameter and as many deep. Give Mr. Robertson credit for this beauty. *Todaecoides* and *Piersoni* ferns graced the newel posts—fine specimens. *Michell* and *Dreer* occupied the rotunda with seasonable exhibits of seeds and tools. Some fine specimens of *Cineraria stellata* were used effectively at top of stairway. Louis A. Conche made an interesting exhibit of Erfurt broad leaved water cress. A first

prize went to a splendid specimen of ferns—sporadocarium variety of *Polypodium* with glaucous green foliage—from Thos. Long, five feet through. Wm. Kleinheinz took first in cut roses with a fine lot of Golden Gates. Robertson carried the honors in cut carnations. *Calla Rossi* (among which was one with a double spathe) was an interesting exhibit. This variety is a deep yellow—purple in the throat—a lovely thing! *Calla Devoniensis* was also well shown.

Newport Fairy rose from Roehrs' captivated everybody and was a bright spot in the show. Wyndmoor rose, fresh from its Chicago honors, was shown in fine shape, by Myers & Samtman. The finest crimson hyacinth was *Roi des Belges*. Nothing can beat this for shining brilliancy, size and form. *Queen Alexandra*, the pink spirea, was well shown in various collections—the best colored lot being staged by Robertson. In the daffodil exhibits *Princess Ida*, a lovely pure white trumpet, was conspicuous, as was *Glory of Leyden*, C. J. Backhouse and *Queen Victoria*. Among the tulips worthy of notice were *Everdina Jacoba*, *Sulphur Murillo*, *Hobbema*, *White Van Vondel*, *Lord Beaconsfield* and *Queen of the Netherlands*. *Mon Tresor* is still the loveliest yellow. *Prince of Austria* is a grand new orange red. James Coleman, gardener for Walter Lippincott, exhibited some fine English wallflowers in pots. The darkest crimson rhododendron, according to H. Waterer, is *De Brun*, and this variety was well shown in the stairway exhibit.

PERSONAL.

Adam Graham, wife and two daughters are spending a few weeks at Tryon, N. C.

J. A. Newsham, of New Orleans, sailed for Central America on March 19. Many of the members of the Horticultural Society were at the boat to see him start safely on his journey.

Arthur Niessen, Philadelphia, who has been ill for the past five weeks with typhoid, is now convalescing favorably at Atlantic City, and expects to be back at work before Easter.

Robert Hunnack, gardener for W. B. Leeds of Newport, R. I., sails on S. S. *Mauretania* on April 22 for a six months' visit to England. His wife accompanies him. Mr. Hunnack was gardener to F. W. Vanderbilt for nearly twenty years.

Francis Canning has returned to Villa Nova, Pa., where he will again have charge of the Bodine greenhouses and grounds. He is as enthusiastic as ever—his five years as instructor at Amherst, Mass., having broadened but not dulled the keen edge of his horticultural progressiveness. His Philadelphia friends will be glad to see him often around the club and society meetings as of yore.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Once a year this organization has a good social time with ladies, music and refreshments. This year there was a division of views as to what form it should take, some wanting a banquet, others a dance. The problem was threshed out at one of the meetings and the banquet men won, much to the chagrin of the dance men. But Boston likes to emulate her good sister, Philadelphia, in the matter of harmony and so a dance was hitched on to the banquet and so everybody was made happy. The affair came off at Horticultural Hall, Boston, on Wednesday evening, April 1, about 275 members with their ladies sitting down to the banquet tables, and the tables and alcoves were beautifully adorned with flowers and plants generously contributed by members of the club. Wm. Sim out shined himself by presenting every lady with a bunch of one hundred luscious violets and the irrepressible treasurer, Ed. Hatch, had placed at each guest's plate a little box presumably containing jewelry, which it did—a safety pin—this being Mr. Hatch's April first joke, for all of which he fully atoned by inviting everyone to visit the "old mill" which he had erected at one end of the hall and imbibe a sample of the old mill's product.

After the food had disappeared Treasurer Hatch took up his duty as inimitable toastmaster and successively called upon President Westwood, Secretary Craig, J. K. M. L. Farquhar, Vice-President Downs, and a galaxy of singers and musicians, who provided entertainment of a high order. Then the floor was cleared and the dancing began—lasting into the indefinable—and it goes without saying that old men and matrons, young men and maidens as represented in the club which is Boston's pride had "the time of their lives."

It was announced that the next "field day" would be Saturday, April 11, when the club would, upon invitation, visit Thomas Roland's greenhouses at Nahant. The members will take train for Lynn at the North Station, 12.30 P. M., and will be met at Lynn by Mr. Roland with his chargers.

NEW YORK FLORISTS' CLUB.

Secretary Young has arranged for the following exhibits at the next meeting of the New York Florists' Club at the old club rooms in the Grand Opera House Building, 5th Ave. & 22nd St., Monday, April 13th:

Roses—"Newport Fairy" from Julius Roehrs Co., Rutherford, N. J. "Rhea Reid" from E. G. Hill & Co., Richmond, Ind. "Wyndmoor" from Myers & Santman, Philadelphia Pa. "My Maryland" from John Cook, Baltimore, Md. "Mrs. Potter Palmer" from Pochlmann Bros. Co., Chicago, Ill. "Mrs. Jardine" from W. P. Craig, Philadelphia, Pa., and "Cherokee," from W. A. Mandt. Carnation "Lloyd" from H. A. Jahn, New Bedford, Mass.

NATIONAL ASSOCIATION OF GARDENERS.

The National Association of Gardeners opened its fourth annual convention in New York on March 19. An interesting talk was given by P. O'Mara on Thursday P. M., in which he attributed to the private gardener and his employer all that is highest in horticultural lines, and commended the policy of the association. A dinner was given on Thursday evening followed by an instructive talk by Prof. Powell regarding planting and handling of an orchard, and brief but entertaining remarks by P. O'Mara, Harry Bunyard, H. S. De Forest, L. W. C. Tutthill and others.

The display of flowers included many novelties. The Pierson U-Bar Co. cup was awarded to Prof. Osborn, Jas. Bell, gardener. In carnations, the contest for first was close between Jas. Pell and Mr. Wynne, gardener for W. W. Herroy, and an equal prize was awarded—a silver cup offered by P. Henderson & Co. Oscar Carlson took first on carnation seedlings, his No. 14 being a deep crimson; J. P. Sorenson was second with a variegated seedling from Prosperity. The Bobbink & Atkins cup was won by J. P. Sorenson on roses. John Shore was first on violets, Wm. Brabenburg first on hardy bulbs.

The business meeting was held on Friday and the by-laws were amended fixing the annual dues of associate members at \$2 instead of \$10, as previously. The board of directors was elected: A. Allum, James Bele, A. Bullen, Chas. Dumper, E. J. Day, Jas. Delaney, Chas. Elliott, C. Gebhardt, John Hays, T. J. Kempton, Robt. Meeks, W. Paget, T. Runieville, J. P. Sorenson, C. Shaeffer, J. Shore, J. Tiplady, J. Wallace, C. T. Zapel, W. E. Maynard.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the above society was held on March 19, presided over by President Chas. Edle. At a special meeting held March 5 the committee on chrysanthemum show reported that they had prepared a premium list which would be distributed as soon as ready. It was decided to have a special class of cut chrysanthemums for growers outside of Louisiana for the purpose of getting entries of new varieties from our northern and eastern friends who supply the great bulk of cut flowers to this city. It was further decided that non-members of the society would be charged one-half of the first prize premium; said amount to be paid to the secretary before the opening of the show. The probable dates of the show will be November 12-15, inclusive. Special prizes will be given to the public schools for exhibits. A. Alost announced that at the next meeting he would give the date for the annual visit to his place. R. Eichling of the U. J. Virgin establishment exhibited *Lilium Harrisii* and lily of the valley.
CHAS. R. PANTER, Secretary.

TARRYTOWN HORTICULTURAL SOCIETY.

A well attended meeting of this society was held on March 27th. President Angus filled the chair and in the absence of Secretary Neubrand, Wm. Scott was appointed secretary pro tem. Letters were read from donors to our prize fund for the next fall exhibition, and most of the prizes given last year will be duplicated, so the outlook is bright for the November show. The committee in charge are busy preparing the schedules, which will be sent to all interested in due time. The prize for cyclamens, presented by Wm. Scott, was awarded to James Stuart, gardener to Mrs. E. A. Constable; also a cultural certificate. Mr. Stuart brought eight plants in 6-7 inch pots, which were perfect in every way and were greatly admired. He was also awarded a cultural certificate for a large plant of *Dendrobium nobile*, in full bloom. W. H. Waite, gardener at Greystone, received honorable mention for a vase of schizanthus.

Mr. Tibbits, White Plains, N. Y., will at our next meeting give an illustrated lecture on "Aquatic Gardens." He has been very successful with aquatic plants and we anticipate a pleasant evening. A prize is also offered by Wm. J. Smith, White Plains, N. Y., for best two flowering plants.

L. A. MARTIN, Cor. Sec.

A HUSTLING MEMBER.

We learn that Theodore Wirth has by personal solicitation secured this year for life membership in the S. A. F. the following named gentlemen: John Monson, O. A. Will, Hugh S. Will, L. S. Donaldson, J. M. Underwood, R. A. Latham, Thos. W. Nagel, James Souden, all of Minneapolis; E. P. Holm, A. S. Swanson and L. L. May, of St. Paul; Alois Frey of Chicago. If all the parties who have from time to time taken occasion to bemoan or criticize the limited membership list of the national society would get busy and emulate the example of Mr. Wirth, how different things would be! Here is an object lesson for every member not only of the S. A. F., but of all clubs and societies.

CLUB AND SOCIETY NOTES.

The California State Floral Society met on March 13 in San Francisco and nominated H. Plath for president, Mrs. F. J. Halpin, corresponding secretary. The annual flower show will be held May 14, 15 and 16.

At the meeting of the Springfield (Ill.) Florists' Club on March 16, officers were elected as follows: President, Carl Rauth; vice-president, R. T. Donnell; secretary, Frank A. Friedly; treasurer, Geo. Van Horn.

The Cape Ann Horticultural Association, organized in the early 60's, met at City Hall, Gloucester, Mass., March 19, and voted to disband and to donate the funds on hand to the Huntress Home.

Obituary

E. Dillwyn Darlington.

The brief announcement in last week's issue of HORTICULTURE of the sudden demise of Mr. Darlington came as a shock to his many friends in all parts of the country. He had been ill with pneumonia only four days and no one expected a serious result. The funeral was largely attended on Monday, the 30th ult., by personal and business associates, the Burpee establishments at Fordhook, Sunnybrook and Philadelphia being shut down out of respect to his memory and to give all a chance to attend the last sad rites. Mr. Burpee had only just started on an extensive tour to the South and West, but broke all engagements and hurried back home, Mr. Darlington, like most of the Burpee forces, being not only an employe but a warm personal friend of the proprietor. The grief of every one, from the highest to the lowest, was heartfelt and sincere. Not only

E. DILLWYN DARLINGTON

has the Burpee establishment suffered a severe loss but the trade at large and his local community have cause to mourn a splendid personality cut off in its prime of usefulness and well doing. By tongue and pen Mr. Darlington was ever ready to impart to his fellow men from his rich store of knowledge, and no amount of labor or personal inconvenience ever stood in his way when the call of duty sounded to the platform or the printed page. Mr. Darlington has been in charge of the Burpee trial grounds at Fordhook for twenty-five years. Previous to that he had been in the commercial florist business at Doylestown. This, with the experience of trees and shrubs in the nurseries of Hoopes Bro. & Thomas at West Chester and his work during the winter months at the Burpee seed warehouses in Philadelphia, made him an all-round man of exceptional attainments. His mother, his widow and three children, also two brothers and three sisters survive him. We extend to them, to his firm and to

his business associates our heartfelt sympathies. It will be a long time before we find as good an all-round man for the niche in our wordly affairs which he filled so ably and well.

G. C. W.

Simeon Sinnrells.

Simeon Sinnrells, a one-time florist, grower and retailer of the District of Columbia, died at his home in Anacostia, March 26th, after a long and painful illness. He was one of the pioneer florists of the District and did a great deal to raise the standard of the business in this locality. For a number of years past ill health had prevented his following this vocation.

Peter L. Guigue.

Peter L. Guigue, a florist of Long standing in Norwalk, Conn., died on March 19. Mr. Guigue came to that city from Germany in 1866 and was employed on the Le Grand Lockwood place until he started in business for himself. He was a kind-hearted, public-spirited man and will be greatly missed.

Theodore Williams.

Theodore Williams, a pioneer horticulturist of Omaha, Nebraska, died on March 16, aged 60. Mr. Williams was especially interested in fruit raising, and some of his methods of grafting have become well known in all sections of the country.

James W. Rideout.

James W. Rideout, a florist in Boston until his store was destroyed in the big fire of '72, later superintendent of the cemeteries of Quincy, Mass., died on March 30, at the age of 74.

George Griswold Haven.

George Griswold Haven, who died in New York, March 18, was the owner of Sunyeroft, at Lenox, Mass., and a frequent exhibitor at the Lenox shows.

We have received sad news of the death on March 29 of the father of R. F. Gloede at the residence of his son in Evanston, Ill. Mr. Gloede's business associates, and his many friends in the Society of American Florists of which he has long been a member, will sympathize with him in this loss.

The Canadian Florist reviews the admirable work done for the city of Toronto by John Chambers in the twenty-nine years in which he has filled the position of park superintendent, and the stimulus his enthusiasm and progressive ideas have given the trade, and adds: "The great difficulty the city is experiencing in finding a suitable and competent successor to Mr. Chambers shows how eminently well qualified he was for the position."

INDOOR COMMERCIAL ROSE CULTURE.

A Paper by Eber Holmes before the Gardeners' and Florists' Club of Boston.

(Continued from page 509)

Filling the Houses.

We have used loam for planting after being piled up one and two years, and have also used it plowed and chopped up in the field one day, and in the house planted the next without any different results. I would, however, prefer four to six inches of sod rotted and chopped up with cow manure. If this has been put together the previous to plant in. On large places the old fall so much the better, for it is easier method of piling up soil ahead has given place to the horse and disc harrow in the spring.

The large houses are easier to fill than the old style where a man pushed a wheelbarrow 100 feet or more. A house up to 40 feet wide can easily be filled by removing glass or sash in the sides and driving teams alongside with the loam. Five or six men make a good gang for operating these houses when filling. With two or three men outdoors loading and unloading the carts and three or four inside, placing, treading and leveling, good progress will be made. Before filling, all woodwork should be whitewashed, or receive a dusting of air-slacked lime. We also use lime mixed with the soil for planting and particularly in loam and manure for top dressing. It is a very good and cheap fertilizer and sweetener of the ground and might be used a great deal more freely than it is.

Planting.

Before commencing to plant, if the weather is hot, we use a light shade of whiting syringed on the glass. It is cheap, quick to apply, good for the men and plants while the work is being done and can be washed off with the hose if rain does not come in time to take it off. I do not like a line for planting young stock as it is in the way and takes too long to move around. We use a marker made of light strips of wood with pegs fastened on. One man can handle it—two men, one on either side, may work quicker. Being the same width as the bench boards it cannot get out of line, and the distance in the row is obtained by following the end mark every time it is moved. It will make 20 holes every time it is moved and enables a bed to be carried through at once. Team work comes in to good advantage in planting where it is important to transfer them quickly. A good man should be detailed to pick out the stock, for it is useless to waste time on poor plants. It will take one or two men to pick out the plants and knock them out into flats, one with a wagon to cart to the house where they are to be planted, a couple to dig holes,

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot Magna Charta, Mrs. John Laing Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Hillarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Zimet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

two good men to plant, and one at least to pound down. Six or eight men working well together will plant 4000 young plants in a day if the beds are ready prepared. In planting it is well to grade the plants as they are set out of the flats, placing the larger ones in the back row and the smallest in the front. I would not leave too much dish around each plant as with the frequent syringing necessary at this time they collect too much water.

Replanting Old Stock.

In replanting one year or more old stock we use no line or marker but commence at one end of the house digging up, clearing out old loam, throwing in new and resetting at one time. We do not like to do more than necessary of this for it takes five men a month to go through 10,000 square feet of bench and thoroughly overhaul it and costs \$1,000.00. Three years seems to be about the limit of age for profit. It has been said that Richmond should be replanted every year; this is not necessary with us and others report the same. A feature of Richmond is that while grafted stock makes a larger plant in the fall, giving one or two crops before the own root plants come into bearing,

in the middle of winter the self-rooted stock is livelier than the grafted and will throw up long shoots from the bottom four to six weeks earlier than the grafted.

Disposition of the Surplus.

After planting we give a thorough watering around the plant without wetting the whole bed and after that we give no more water for from one to three weeks as the case may require but rely on syringing and cultivating to keep things moving. Keep the soil stirred once a week among newly planted stock. It can be done quicker than the weeds can be pulled out, which come if the soil is not scratched over, and is of incalculable benefit to the plants. As soon as the planting is finished all left over stock can be planted out in the field where it will take care of itself and, unless required, it can be left there until just before the ground freezes in the fall, when it can be brought in and potted or planted thickly on a bench in a cool house, where they will make good plants for Easter or Memorial Day. If lifted about the first of September they will make acceptable plants in pots for Christmas. Liberty makes a splendid rose for this purpose. If established in pots in the summer, treated as a hybrid in early fall, it can be well flowered for Christmas. If needing room now for replanting, any healthy plants to be dug up, if potted, will be fine for Memorial Day. Last year we had 800 plants of Liberty in a house with Brides and 'Maids. They did well up to Christmas, but after that they refused to work. About the first of

March we trimmed the weak wood out of them, and as they grew kept them pinched back until the 15th of April. Between the 15th of May and the 15th of June we cut over 10,000 good flowers from these plants. About eight weeks before Christmas is late enough for the final pinching back for Christmas flowers.

This method of holding back flowers is not so new as some may imagine as it was practiced in the middle west 20 years ago. In regard to drying off plants to be carried over to another year it seems as if more harm is done by too much drying off than otherwise. The beds will dry naturally in the heat of the summer; the wood should never shrivel and foliage should be syringed enough to keep down spiders. This summer treatment is where local conditions and soils call for different treatment.

Syringing.

Syringing is another operation which calls for discretion. Is it paradoxical when we read, do not let roses get soft, and do not let them get hard, in notes written on the subject? The softness to be avoided is of the foliage and young shoots caused by insufficient air, too much fire and syringing:

RHEA REID

THE BOSTON VIOLET

The people today are looking for New Violets just as much as they are for new roses or carnations.

THE BOSTON VIOLET

For the past two years has been placed before the most sceptical buyers in America and they prefer it to any other.

THERE'S A REASON

The Boston Violet is the largest, the most fragrant, it has a very pleasing color, and it is a great keeper.

THE BOSTON VIOLET

Is a variety that is early grown, it is the strongest grower and is in crop from September to May.

THE BOSTON VIOLET

Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

Distribution will Commence in April. Order Now.

PRICES—\$2 per 12; \$12 per 100; \$100 per 1000.

WILLIAM SIM, : : CLIFTONDALE, MASS.

the hardness to be guarded against is of the older wood caused by too low a temperature and not enough syringing. How this operation varies with the seasons. Commencing now with the increasing sun and still lots of fire heat at night, evaporation is rapid and good heavy syringings are in order to keep the foliage clean and large. Special attention should be given to ends of benches where pipes may be nearer the plants and dry walks should be damped down every day. If a general syringing is not given every day the plants should at least get a spraying through the bottom from every other walk. I believe in afternoon syringing in the summer time, especially for young and replanted stock. I would not do this later than four o'clock and not on cold or wet days, and would discontinue it as soon as the nights get cool. As the fall approaches it must be done early in the morning so that the plants can dry off before night or mildew and black spots will soon make their appearance. In the winter when the plants will not dry, the syringings have to be cut down to about one a week and even then some varieties have to be shaken to remove the surplus moisture or they remain wet over night. At this time we rely on frequent damping down of the walks and boards, combined with spraying through the bottom of the plants to keep the wood soft and induce it to break. Disbudding is another thing which must be done at the right time. When the plants are growing fast this should be gone over at least every other day.

Mulching is another important matter. Right now is the time to apply a coat, if not already done, if good flowers are wanted for the next three months. I believe that Sept. 1st is late enough to mulch for Christmas flowers. If applied later when the days are shortening it is difficult to dry the plants out and make them break properly. We apply a light dusting of bone flour—about 100 lbs. to 2000 square feet of bench surface—and then, for the same space, from one half to three quarters of a cord of good cow manure chopped up with dry loam and a little lime. In a few weeks this becomes a part of the bed as it will crumble and can be leveled down and is in good condition later to receive liquid manure. If top dressing has to be done later I would lay it in ridges rather than blanket the whole bench with it. We find pails of wood or zinc the handiest things to use for applying top dressing. Here, again, five or six men can work together to good advantage and will cover about 5000 square feet in a day.

Fumigation and Ventilation.

Fumigation must be attended to regularly and the proprietary articles sold are cheaper in the end than the old-fashioned tobacco stems. A little sulphur should always be kept on the pipes to keep down the mildew, always remembering that prevention is better than cure. When flowers are not selling well the plants require particular attention, as poor stock is of no value in a falling market.

Ventilation is of the utmost importance in rose growing. Commencing

now with the warm spring days approaching, a little air should be given early in the morning. Soon the temperature will begin to rise before 7 o'clock and, if air has not been carried all night, the night man can put on a little on his last round. I like to anticipate the rise, and by frequently raising the ventilators a little always keep ahead of the game, and by this method the houses never get so hot in the springtime and the plants are kept healthy and clean. It is important that the houses be kept clean at all times, with no muddy places or water standing in the walks, especially when the firing is reduced to a minimum. The flowers should be cut as early as possible in hot weather and be placed at once in clean water. It is noticeable that every man's stamp is on his own products. A man handling roses in a store can tell you without any distinguishing mark who grew this lot or where these flowers came from.

In conclusion, a few words about the new varieties. It is the part of wisdom to go slow unless you know what they are; descriptions are often misleading, and the only way to find out is by experience. I think that undoubtedly when White Killarney comes on the market, if it proves to be a good shipper, it will be an acquisition, as it possesses the good growing qualities of its sister, Killarney.

In that soft season of descending showers
Call forth the greens, and wake the rising
flowers.
When opening buds salute the welcome
day,
And earth retentive feels the genial ray.
—Pope.

Seed Trade

The bill now before Congress in the interests of pure seeds seems to be attempting the impossible. Absolute purity is something unattainable as to any inert matter and in the case of grass seed, any natural grasses that might spring up spontaneously from the soil might produce seeds so nearly like the variety to be harvested as to make it next to impossible to separate them. For this reason it looks very much as if this bill is so drastic in its character as to defeat its purpose.

A law that is impossible of enforcement manifestly cannot be enforced, and therefore the framers of this particular measure have rather overreached themselves. It seems that certain so-called experts from the Department of Agriculture were before the committee which was framing this bill, presumably for expert advice, but with the exception of Professor W. W. Tracy, not one of the number has ever had any practical experience in the seed business and not one would be employed by a practical seedsmen in the capacity of an expert adviser. The real seedsmen who could have given practical information were not called, but the so-called professors and theorists of the Department were the ones who were asked to advise in the framing of measures to regulate the seed business.

It is quite safe to say that not any important industry could be attacked as the seed business has been in Congress without someone of the members rising in defense of its interests, yet the seed business, important as it is, had not one friend in the House and it may truly be asked, "was there none so poor as to do him (it) honor?" Undoubtedly the explanation of this condition of things is due to the fact that the seedsmen are politically a negligible quantity and do not have to be reckoned with by Congressmen who choose to make footballs of their interests. This is an unfortunate condition of affairs but there is apparently no remedy for it and all the seedsmen can hope for is to appeal to their Senators and Representatives for justice and show them, if they are willing to be shown, the unreasonableness and injustice of hostile legislation.

While this measure is undoubtedly aimed especially at grass seed dealers, as now worded it necessarily affects all seeds and as it is ostensibly in the interests of the farmers, it may be well to show those Congressmen who take such a paternal interest in our agricultural communities, that in the last analysis the farmer will be the man to suffer more than the seedsmen. The former are the men who grow the seed and sell it to the seedsmen and if the bill under consideration should become a law more than 90 per cent. of the grass seed produced would be unsalable as no seedsmen could buy them without risk of incurring the penalties prescribed in the bill.

Doubtless the grass seed dealers have not been as careful about handling adulterated seed as they should have been and have possibly invited the proposed restriction; however, they

should have seen in measures enacted in the past, the trend of events and "the handwriting on the wall."

Of course unless the bill is modified it would never be enforceable and perhaps it might be just as well to permit it to go through Congress and become a law to show our more or less wise solons that in their zeal to aid the farmers they have overdone the business.

Some time ago it was stated in these columns that it looked very much as if Congress would in time pass laws regulating the entire seed trade and this statement was ridiculed by many. The proposed measure seems to be a long step in the direction of government supervision of the seed business and it is difficult to see how it can be interpreted in any other way. This matter will be discussed further in subsequent issues of HORTICULTURE.

This is the busy time for the retail seedsmen and all over the country night work is going on in an effort to keep up with the accumulating business. It is to be hoped that the present activity will continue for the next sixty days at least and, if so, the trade will undoubtedly have had one of the most prosperous years in its history.

Many items are becoming exhausted but it is not quite true as stated in some publications that such varieties of seed corn as Stowell's Evergreen and Country Gentleman are scarcely obtainable at any price; as a matter of fact these items are offered more freely now than two or three months ago. From about the first of February the activity in these lines began to decline and prices to weaken and either of these varieties can now be bought at from \$1 to \$2 per bushel less than on February 1. There is more real scarcity in the early varieties than in the late ones. Good field corn such as Leaming, Pride of the North, Longfellow and Sanford, are very scarce and in some sections these varieties or some of them at least, are selling as high as \$2.50 per bushel with the prediction that they will reach \$3.00. All of the yellow flint varieties are in very short supply and prices are ruling unusually high.

C. C. Morse & Co. are authority for the statement that the California Seed Growers' Co., recently organized at Gilroy, Cal., has been dissolved, by agreement. Ah Him, their Chinese foreman who organized the company, has withdrawn from it and returned to China the 24th ult. for a prolonged visit.

MUSHROOM SPAWN

Michell's English Brand

Used by the leading growers on account of its superior quality. SPECIAL PRICE FOR THIS WEEK ONLY: 12 bricks \$1.40; 100 lbs. \$5; 1000 lbs. \$47.50.

A POINTER → → → Spawn inserted under the sod in lawns and pastures in spring will give a good crop after the fall rains—at almost no expense.

PUBLICATIONS RECEIVED.

The Sweet Pea Annual, by Charles H. Curtis and Horace J. Wright. This is the official organ of the National Sweet Pea Society, and is the fourth yearly issue. In every way it is an improvement on former issues. It contains 100 pages with numerous illustrations. Among the articles we notice Mr. Burpee's impressions, Sweet Peas in New South Wales, Sweet Peas in the Antipodes, A Catalogue of Sweet Pea Names, and many others.

The Grand Rapids Greenhouse Co., Grand Rapids, Mich., which was formed some months ago by several of the leading market gardeners of that place, has now contracted for the erection of ten large houses to be located near the present houses of Samuel J. Perry, the general manager. The company is capitalized for \$500,000, and already has an acreage of eight acres.

THE QUALITIES OF FORMOSA LILIES.

Mr. Editor:—Will you please lend your columns to the following question: I notice *Lilium Formosa* advertised as a variety free of disease. To one who has been experiencing these last two seasons the growing deterioration of the Japan longiflorum and multiflorum stocks, this sounds tempting, were it not for the fear that other qualities of this lily may turn out disappointing. May I appeal to such of your readers, who have already tried this lily in previous seasons, to give to their brother florists their experience as to habit of the plants, size and style; also substance of the flowers; whether free flowering, and whether early or late, or easily kept back? Are they fit for pot plants, or only for cut? They must have been tried in this country ere this, possibly for several seasons, sufficiently to allow the claim "entirely free from disease;" but I notice nothing special claimed about other desirable qualities, except to be superior to *Bermuda Harrisii*, a pretty general remark! An open expression on this subject will be thankfully appreciated by the writer and many a lily grower in America.

Editor HORTICULTURE.

Dear Sir:—Answering your correspondent concerning *Formosa* lilies we beg to say that we have about 1000 pots. They are strictly free from disease and we have not thrown away ten plants out of the 1000 pots. They are tall growers with very substantial stems and produce more flowers than any of the other *Longiflorum*s. They can also be forced as early as *Harrisii* lilies but by doing this they may not bloom as large as they ought to. We kept our lilies in the house temperature of 50 to 55 degrees, at night sometimes 60 degrees. We are cutting flowers now. There are about five or six different kinds mixed but the flowers are almost the same, also bloom at the same time. The type of the flowers is rather short but they open up very fine pure waxy white and keep very good. They are good for both pot or cut flowers but if wanted for Easter trade, pot them in the month of November and keep them cool. Yours very truly,

HINODE FLORIST CO.
Whitestone, N. Y.

Dear Sirs:—Replying to "America"

regarding *Lilium Formosa*; we bought a case last fall but did not try to bring them in early as we had a lot of other lilies on hand. The *Formosa* has been in bloom now about six weeks. Some plants measure 30 to 40 inches high, with leaves from the root up and every leaf perfect. They average 5 to 7 flowers to the plant and the flowers stand out firm and stronger than any lilies we ever grew. The flowers have more substance and last longer than any we ever grew. Ours were all pot grown, one bulb in a 6-inch pot and there was not a dwarf or deformed plant in the lot, so they must be free from disease. The plants stand very erect and while the stalk is no larger than other lilies it seems more firm and hard. This year we shall grow them entirely and will try some of them for early, but not for Christmas. They can hardly be classed as a Christmas flower, any more than poinsettias are appropriate for Easter, and when one can have something the year around, like lily of the valley for instance, the novelty wears off.

Yours truly,
Rochester, N. Y. SALTER BROS.

Dear Sir:—In reply to your correspondent, here is our experience with the new *Lilium Formosa*. We grew five thousand of these bulbs the past season. They arrive in this country the latter part of August, but whether they come from the *Formosa* Islands or not, we do not know. We understand these are simply the *Giganteum*, *Longiflorum* and *Multiflorum*, which were moved from the Island of Japan seven years ago by Japanese residents who took up their homes in the Island of *Formosa*. These bulbs after having been planted on fresh soil and in a warmer climate have matured early and so far are free from disease. They come into bloom at about Christmas and are first class in every respect so far as our experience goes though the size of the bulbs was rather small, a good many being from five to six inches in diameter; very few 7-9. We think if the Japanese would be careful to plant their bulbs on new soil each year they would soon get free of disease. Our experience has been limited to one season's growth. We are of course going to try them in larger quantity another year.

Trusting this information is satisfactory, we are, Respectfully,
BASSETT & WASHBURN.
Chicago, Ill.

ANCHUSA ITALICA VAR. DROP-MORE.

None of the varieties of the *Anchorusa* have been planted to any great extent, yet they are exceedingly attractive. The variety above mentioned is one of the latest introductions, and according to European papers was considered one of the best novelties of the season, two years ago.

It is a strong, vigorous grower, with

coarse, dark green foliage and a large branching spike, which last summer grew almost three feet high; so that, with a fairly wet summer it would reach fully four feet. The spike is also nearly three feet wide near the ground.

The flowers commence to open early in July but, like other plants belonging to the borage family, they soon drop; although this debars its use as a cut flower, it does not spoil its use as an ornamental border plant.

The individual flowers are about three-quarters of an inch in diameter, and stay on the spike in full beauty two or three days, but the unopened flower buds are so numerous that the flowering season is from four to six weeks in length.

The exquisite color of the flower is its principle recommendation, being a beautiful shade of deep pure blue.

Of Interest to Retail Florists

The long expected decision of Judge Murphy in the case of Knauss vs. Leadley, Detroit, in which the latter sold his flower business to Knauss because of ill health but reopened just a few weeks after the deal was consummated and only two blocks from his old location, has been handed down.

On Oct. 2, 1906, Knauss gave Leadley the Ivanhoe flats worth \$10,000 and \$1500. in cash for the floral business. Leadley had shown books to Knauss to prove that the floral business averaged a profit of \$6500 per year. After Knauss took hold the profits dwindled and the business was run at a loss, and Knauss started suit to recover his flats. Judge Murphy's decision is a vigorous one. It reads as follows:

"In short, without further and wearisome analysis of the testimony, a deliberate swindle has been planned and consummated by the defendant. Indeed his testimony not only brands him as unworthy of belief, but convicted him of wilful falsification on the stand."

The Judge says "that the books were fixed, that expenses were understated and profits overstated. He points out that since Knauss took hold of the floral business it has improved, and that in the trade back Leadley will get a much better business than he had before."

NEWS NOTES.

Fred W. Zeitfuss has started in the florist business at Clarion, Pa.

Hiram Palmer, of Dighton, Mass., has started in the violet growing business.

The Sanborn Florist Co., has started in business at Lakeport, N. H., with H. A. Sanborn as manager.

Mr. Kessler of Kansas City, has taken the position of superintendent of parks at Indianapolis, Ind.

Henry Frueck of Detroit is to try the baths at Carlsbad, Germany, for his health, and intends to leave home about June 1st.

Mrs. Lydia Anger of Fort Wayne, Ind., is arranging to open a branch for Von Bochove & Co., of Kalamazoo, Mich., in connection with her present store.

V. J. Gorley, president of the Grimm & Gorley Florist Co., St. Louis, has purchased the property at 4550-60 St. Louis avenue with greenhouses thereon for \$10,000.

The Rosery on 18th St., Washington, D. C., has been closed for the season. Weiland & Olinger of New Castle, Ind., are preparing to add to their already large range of greenhouses five more of the latest type of construction for carnations exclusively. When these are completed the sixteen houses now standing will be devoted to roses.

FLOWER MARKET REPORTS

BOSTON We have little to report as to the conditions in the Boston flower market other than to say that no improvement is yet apparent. If possible, conditions are more unsatisfactory. Roses are coming in very abundantly, but carnations are moderating; still, on account of the slack demand, accumulations are inevitable and the speculator is master of the situation. Growers of bulbous material are warned against ever placing this market in the position it has filled of late; there is no profit in it for them or anybody else.

BUFFALO For the past two weeks the receipts have not been very heavy, though business has slightly improved and the cleaning up at the end of the week has been better than for a few weeks previous. Prices have been low all along the line, especially in violets, carnations and roses. The latter are coming in more abundantly, the quality being good, particularly Carnots and Kaiserins, but the demand is not strong. Beauties dropped in price with the others. As for lily of the valley there has been no demand whatever; the same may be said of gardenias. The Friday special sales have helped to clean up considerable surplus stock at the end of the week. It is hoped that in another week a change for the better will be seen, as for the past week hardly 50 per cent. of the real value was realized.

DETROIT While counter trade cannot be very brisk with Easter so near some relief is expected through the effect of an offcrop on carnations. A very good lot of flowering plants is in view for Easter with a liberal supply of well-budded stocky Harrisii. Carnations are apt to be short.

INDIANAPOLIS The past week has brought quite a decided change in both retail and wholesale circles. There has been quite a generous amount of counter trade and decorative work which has used up lots of stuff. Most of the florists report a fine trade in flowering plants. Excellent Beauties and teas are on the market. Carnations are of good quality, plentiful and cheap. Bulbous stock is to be had

in any quantity at prices below what it ought to be. Lilies are plentiful enough but demand light. Sweet peas, lily of the valley and other stock are moving briskly. Prospects are good for a large supply of everything for Easter.

NEW YORK. As our price quotations fully indicate, New York is still in the dumps as to cut flower trade. The daily avalanche comes in and takes its chances at being moved, that being the main question and the matter of price being entirely subsidiary. This general statement applies practically to the entire list. Cattleyas hold steady at normal figures, but this is true of nothing else in the line of staples.

PHILADELPHIA The hopeful conditions reported a week ago proved transitory and the few warm days played havoc with the situation by forcing in enormous quantities of all kinds of flowers. The demand also slackened up, and present conditions are as bad as they well can be. All roses are fine and plentiful, the colors going rather better than the whites as a rule. Carnations are more sluggish. Sweet peas very good, very plentiful and move better than many other staples. Cattleyas are the only item worth mentioning in orchids and are if anything scarcer. Lily of the valley cleared out a little better but is still far from its standard position. The warm weather has been hard on violets, the singles suffered first; now the doubles are showing symptoms. Daffodils are much in evidence. Easter lilies and callas fair.

WASHINGTON The glut in the cut flower market still continues, though the past few cool days have improved the situation considerably. Several of the local firms have had large orders for decorating for the spring openings. All of the fruit trees are budding, some in full bloom, and all kinds of hardy shrubbery is showing bud and color.

"GRANDMOTHERS' DAY" IN PHILADELPHIA.

Our old favorite, General Jacqueminot, paid a visit to Penneck Bros. this week, in color and sweetness still a "top-notcher." Niphetos and Marechal Neil helped to make an old-time reception lifelike and interesting. The old-fashioned bouquet, bunched up tight like a cauliflower-head, with a paper collar outside, was also in evidence. Mr. Cartledge refused to admit that it was grandmother's day.

BUSINESS CHANGES.

M. Bloy of New Castle, Ind., has purchased the greenhouse business of G. A. Rackham, Detroit, Mich., and will take possession at once.

"Hodgson the Florist," an establishment which for nearly four decades was on Fifth avenue, New York, has closed its recent store at 56th street and its affairs are being conducted from an apartment house in 58th street near Eighth avenue.

INCORPORATED.

East End Floral Co., Memphis, Tenn.; C. Hamner, C. C. Brown, E. G. Bell, M. J. Anderson, W. L. Terry; capital, \$10,000.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

GREENHOUSES BUILDING OR COMPLETED.

Cleveland, O.—F. R. Williams Co., 8 houses, each 25x300.
 Indianapolis, Ind.—A. Wiegand, show conservatory.
 Brampton, Ont.—Dale Estate, made of orchid houses.
 New Castle, Ind.—Weiland & Olinger, five houses, each 30x300.
 Grand Rapids, Mich.—Grand Rapids Greenhouse Co., ten houses, each 10x500.
 Toronto, Can.—McIntyre & Trimble, range of houses.
 Roslyn, Pa.—Edward Towill, rose house, 35x150.
 Brockville, Ont.—Brockville Asylum, one house.

A LOW-PRICED LEVEL.

Gardeners, park men and others whose work calls for the use of a leveling instrument should investigate the Bostrom Improved Level, advertised in this paper. Its simplicity and low price as compared with the complex instruments heretofore considered indispensable should popularize it at once. We have a letter from the department of horticulture and landscape gardening of the Michigan State Agricultural College stating that this instrument has been given a practical trial in their field work and has proved to be the best in its class. Send to the manufacturers for a descriptive circular.

HAIL LOSSES.

The florists of Southern Indiana were visited by a heavy hail storm on March 18 which, despite the immediate measures taken for relief means considerable loss at this season. The victims include D. H. Schilling, F. A. Conway & Co., E. Hukreide, H. Rieman, City Greenhouses, and numerous market gardeners of Indianapolis and G. R. Gause of Richmond.

WANTS, FOR SALE, ETC.
 Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

ROSES FOR DECORATION DAY

Remember You May Deduct 5 Per Cent if Cash Accompanies Order

Hardy Perpetual Roses

We offer exceptionally strong two-year-old dormant, low-budded stock (on Manetti) in the following varieties, true to name:

Alfred Colomb Carmine.
Anne de Diesbach Bright carmine.
Ball of Snow Pure white.
Baron de Bonstetten Dark crimson shaded
Baroness Rothschild Satiny pink; extra.
Captain Christy Delicate flesh color.
Duke of Edinburgh Bright vermilion.
Frau Karl Druschki The finest white in existence.

Fisher Holmes Dark rich scarlet.
General Jacqueminot Rich velvety crimson.
John Hopper Beautiful rose-pink.
General Washington Beautiful red, shaded
 carmine.
La France The finest light pink.
Margaret Dickson White, pale flesh center.

Magna Charta Clear rosy pink.
Mme Gabriel Luizet Light, satiny pink.
Mme. Plantier White.
Mr. John Laing Soft pink; most desirable
 variety.
Paul Neyron Beautiful dark pink.
Prin e Camille de Rohan Velvety crimson.
Ulrich Brunner Cherry-red.

The Grand Pink Hybrid Perpetual Rose **Mrs. Sharman Crawford**. One of the finest Roses grown Deep rosy pink, the outer petals shaded with pale flesh-color, white at the base of petals, and distinct from all other Hybrid Perpetual Roses. Bundle of 5 for 75c; 100 for \$15.00.

We also carry about 25 other varieties. Write for list and price. Prices on Hardy Hybrid Perpetual Roses, \$1.50 for 10; \$12.00 per 100; \$110.00 per 1000.

ENGLISH MOSS ROSES

Assorted, White, Pink, Red. Large dormant plants, from open ground. 85c for 5; \$12.00 per 100.

STANDARD, or TREE ROSES

(Grafted on *Rosa Canina* or *Rugosa* Stock) Large, well grown, selected plants in the best and most serviceable varieties. 35c each; \$3.25 for 10; \$25.00 per 100.

Baby Ramblers

THE TREE BABY RAMBLER—Grown as a Standard

35c each; \$3.50 per doz.; \$25.00 per 100.

Mme. Norbert Levavasseur (Baby Rambler). Strong, field-grown plants: \$1.25 for 10; \$12.00 per 100.

Catherine Seimeth. A very important novelty. A white Baby Rambler rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume in a high degree. 45c each; \$4.50 per doz.; \$35.00 per 100; extra strong, 60c each; \$6.00 per doz.; \$45.00 per 100.

Anny Muller. The pink Baby Rambler, and bound to find favor where the Baby Ramblers are popular. 45c each; \$4.50 per doz.; \$35.00 per 100.

Mrs. Wm. H. Cutbush. A grand acquisition to the Baby Rambler class.

Color intense crimson, and exceptionally free-flowering. 25c each; \$1.00 for 5; \$18.00 per 100.

Baby Dorothy. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. This variety has created quite a sensation when exhibited at the English National Rose Society's and other shows. "Baby Dorothy," when planted out, flowers perpetually from spring until autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 50c each; \$2.00 for bundle of 5; \$35.00 per 100.

Hybrid Tea, or Everblooming Roses

Hybrid Tea, or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in winter, they give a wealth of bloom all through the summer months and late in the fall till frost checks them.

The Grand New Rose Lyon Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral red or salmon pink shaded with chrome yellow. Very fragrant. \$1.25 each; \$6.00 for bundle of 5; \$12.00 for 10.

The Killarney Rose This is a grand rose for either indoor or outdoor cultivation; is a strong grower, and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, two year-old field-grown stock, 25c each; \$1.00 for bundle of 5; \$18.00 per 100.

Flaman Cochet Roses. The best of all Roses for summer flowering and cutting.

Pink—Color a clear, rich pink changing to silvery rose, very double and fragrant.

White—A sport from the above, with all its characteristics, color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride. 25c each; 75c for bundle of 5; \$12.00 per 100.

Rose, Etoile de France. Flower large, possessing petals of very good substance; magnificent cupped form. Superb crimson red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very

long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field grown, 25c each; \$1.00 for bundle of 5; \$18.00 per 100.

Gru's an Teplitz. No Rose in commerce can compare with Gru's an Teplitz as a budler. It is a perfect sheet of richest crimson-scarlet all summer. A strong, vigorous grower. Hardy. 20c each; \$1.50 for 10; \$12.00 for 100.

New Hybrid Tea Rose, Queen of Spain. This grand Rose is without doubt the Rose of the season, a seedling from Antoine Riviere and a H. P., with the scent of *Sour de la Malmaison*, the color is pale flesh, darker in the center. Flowers are erect on stout stems, very full, and of excellent form; petals broad and leathery, a good opener and strong grower. 75c each; \$2.25 for bundle of 5.

Countess of Gosford. (New.) A very beautiful variety of the Hybrid Tea class, somewhat resembling Killarney. Color delicate pink; fine flower and bud; a splendid acquisition. 50c each; \$2.50 for bundle of 5.

POPULAR HYBRID TEA ROSES

American Beauty, Kaiserin Augusta Victoria, Clothilde Souper, Caroline Testout, Hermosa. 20c each; 75c for bundle of 5; \$12.00 per 100.

Rambler Roses

Dorothy Perkins. Resembles the Crimson Rambler, except in color, which is a lovely shell-pink. 15c each; 65c for 5; \$12.00 per 100.

Crimson Rambler Rose. American grown. We can supply extra-strong.

WELL-KNOWN CLIMBERS.

Mme. Plantier, white. **Baltimore Belle**, pale blush color. **Prairie Queen**, red, changing to pink. **Seven Sisters**, clear pink. 15c each; 75c for 5; \$12.00 per 100.

New Climbing Rose, CLIMBING FRAU KARL DRUSCHKI. This is a climbing sport from the well known snow-white variety, Frau Karl Druschki, and should become very popular. Good, strong plants are offered as follows: 50c each; \$2.50 for 5.

Our Wholesale Catalogue of Quality seeds and bulbs now ready and it contains forty pages of seeds and bulbs and roses you need, fully described. Write for it to-day—a postcard will fetch it.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St. NEW YORK CITY

CANNA BULBS

Fine plump, Northern Grown, and in fine condition. Not to be compared with Southern grown stock, that are never thoroughly ripened and therefore are very slow to start growing.

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which, if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

Flora's Harbingers of Spring

It is no surprise that spring has been celebrated in glowing terms by poets of all ages. Winter has its charms but it never can be compared with spring. Oh! what new life and vigor is given us when the first breath of balmy spring reaches us after a long, dreary winter. Even Solomon with all his riches, splendor and wisdom rejoiced when winter was gone and had this to say: "Lo! the winter is past, the rain is over and gone; the flowers appear on the earth; the time of the singing of birds is come, and the voice of the turtle is heard in our land."

THE BEAUTIES OF THE SPRING BULBOUS FLOWERS

Dead indeed to this world is the man who does not contemplate with admiration the beautiful jewels that come up out of the cold ground. How have they manufactured these beautiful shining colors from the damp, frozen earth? This and many others are the secrets and puzzles that trouble us each succeeding spring. Our hearts ache when we see these little messengers battered and beaten by frost and snow, but we admire and love them for their courage.

Oh! you little wonders. You are more precious to me than diamonds and gladly would I go on bended knee at your first appearance and adore you. We are glad we have learned and know that you have not come through frost and snow to please man alone. The busy bee, your sweet companion, is out and about and he also admires fine forms and bright colors and is soon doing a work which is the principal object of all living things.

EVERYBODY SHOULD PLANT THEM

Leaving the sentimental and coming to the practical, we are indeed sorry that for every dozen planted of the early spring flowering bulbous plants such as snowdrops, crocuses, glory of the snow, squills and the like, there are not millions throughout this great land. They are of the very easiest culture, needing no protection of any kind and will grow and flourish in almost any kind of soil or situation. Thousands and thousands of dollars are spent erecting expensive greenhouses and paying coal bills and I venture to say that we have no plants in our greenhouses that will compare with masses of scillas, glory of the snow and crocuses that are grown so cheaply out of doors. We get larger blossoms like amaryllises with gaudy colors in our greenhouses, but to the true lover of flowers the little gems of early spring are by far sweeter and more pleasing. In fact, the comparison is like comparing diamonds to blocks of granite.

EASE OF CULTURE

Some will be surprised to know how many beautiful plants are in bloom as early as the twentieth of March. If they were harder to grow some persons would think more of them. They only require to be dibbled into the soil in the fall an inch or two and they will blossom just as surely as the season will return. Several weeks of pleasure can be had from these early flowering bulbs before the herbaceous plants begin to bloom. Plant

LEUCOJUM VERNUM

them on the terraces and near the steps and foundations of the house where they will be enjoyed by all. In such situations they blossom early and for later succession plant colonies of them where they will flower later. The florist can multiply his customers by a lavish planting in every vacant spot around the greenhouse and salesroom.

THE FIRST TO BLOOM

On the fourteenth of January of this year in a warm sheltered nook we beheld the first snow-drop and it recalled to our memory the words of the poet:

"Already now, the snowdrop dares appear,
The first pale blossom of the unripened year;
As Flora's breath, by some transforming power,
Has changed an icicle into a flower;
Its name and hue the scentless plant retains,
And winter lingers in its icy veins."

There are about eight or ten species of snow-drop, but the two kinds that give the most satisfaction in our garden are the common snow-drop, *Galanthus nivalis*, and the giant snow-drop, *Galanthus Elwesii*. The snow-drop is a true winter flower and *Galanthus nivalis* is so cheap that it ought to be planted in large colonies. It is hardly credible that in this northern latitude the last flowers out of doors last year disappeared during the last weeks of November and the first flowers of this year appeared in the middle of January, thus leaving only six or seven weeks without flowers out of doors.

SOME DESIRABLE VARIETIES

The giant snow-drop, *G. Elwesii*, is by far the largest and finest species and gives satisfaction here. It is as

easy to grow as the common snow-drop and much more effective. Other kinds we grow are *Fosteri*, *Ikarae*, *Imperati*, *latifolius*, *plicatus* and *robustus*, *praecox*. A slightly shady, cool, moist spot makes a congenial home for them and if given these conditions they will grow and increase.

THE CHIONODOXAS

The *Chionodoxas* or "glory of the snow," are early spring flowering bulbous plants of exquisite beauty and are capital for massing effects. They are not fastidious about soil and will grow in almost any situation. The cream of the genus is *Chionodoxa gigantea*; it has larger flowers than any of the species or varieties and I can heartily recommend it as a first class garden plant and of the easiest culture. There is a white variety of this species which is rare and expensive. *C. Lucillae* has slightly smaller flowers than the above kind, but is the most widely cultivated species. The white variety of this plant is also in bloom; it is rare, but makes a pleasing mass of white.

C. Sardiensis has much darker blue flowers although smaller than any of the other kinds. We grow *C. Tmolusi* but it comes into flower later than the other kinds.

THE SCILLAS

The Siberian squill, *Scilla Sibirica*, is a mass of blue flowers now but it is so well known that it needs no introduction. We can only say that no garden is complete without large masses of this charming early flowering plant. Its white variety is a little more expensive but it makes an excellent companion to the many blue flowers in blossom now. It grows and thrives just as well as the species. *Scilla bifolia* is not quite as well known as the Siberian squill, nevertheless it ought to have a prominent place. It is quite distinct from the Siberian squill. Its flowers are not quite as large, but there are more in the cluster. It has also a white variety which is blooming beautifully now. This species and variety loves a light sandy soil.

THE SNOWFLAKES

The snow-flakes are near relatives of the snow-drops and in fact they look more like large, overgrown snow-drops, than anything else. There are several species but the most common kinds are the spring snow-flakes and the summer snow-flakes. The spring snow-flake, *Leucojum vernum*, grows six or seven inches high and has large drooping flowers resembling large snow-drops. The tins of the petals are well marked with a green or yellowish spot. It makes a good border or rock garden plant and the photograph here reproduced shows a plant in our rock garden. The summer snow-flake is not in bloom yet, but it is about a foot in height and will be in bloom in about two weeks if the weather holds favorable. Snow-flakes grow well in any good garden soil.

Crocuses are in their glory in the grass and it is there they look their best. Other plants in bloom now are *Bulbocodium vernum*, *Iris persica*, grape hyacinths and *Fritillaria pudica*.

Robert Cameron

Botanic Garden, Cambridge, Mass.

British Horticulture

ARBOR DAY CELEBRATION

The "Arbor Day" movement has not yet taken a firm hold in this country as in the United States. Britishers are somewhat slow in adopting new ideas, even when the project has such commercial advantages to recommend it as is the case with the extension of afforestation. Mr. E. D. Till, of The Priory, Enysford, Kent, who is an enthusiast on this subject, has done his utmost to secure a general observance of "Arbor Day." For several years there has been a festival at Enysford, and the most recent one which I lately attended was of a highly successful character. The natural ornamentation of the village was augmented by additional trees, the planting being skilfully performed by four young lady students from the Swanley Horticultural College. Mr. Till enthusiastically directed the proceedings, delighted with the success which has attended his efforts in Kent. He has been considerably encouraged in his praiseworthy work by letters of commendation received from such notable men as President Roosevelt, Sir Oliver Lodge, the late Dean Hole, Sir John Cockburn and others. At a meeting held in the evening Mr. Charles Dawson, the originator of Arbor Day in Ireland, was one of the speakers. Had tree planting been continued in Ireland, he said, since the union, as it was before, owing to the liberal grant then made by the Irish Parliament, Ireland would be a very different country today. He strongly emphasized the importance of tree planting as a means of increasing the wealth of the country. The successful work of the lady gardeners and the importance of municipalities adding to the beauty of urban centres by tree planting was alluded to in an address delivered by myself. If other districts could secure a grafting of some of Mr. Till's zeal Arbor Day would make great strides in Britain.

CARNATION CULTURE

Truly, carnations now occupy a prominent position in the flower market at Covent Garden. One leading grower devotes 85,000 square feet of glass entirely to their culture, and he is able to have a continuous supply of bloom. Amongst the novelties he is sending out this season those from the American raisers are well to the fore. These include Afterglow, Winona, President Seelye, Defiance, Lawson, Enchantress, Red Chief, Sarah Hill, White Fair Maid, Splendor and Andrew Carnegie. The latter is a scarlet sport of Harlowarden but is not recommended by the grower this side as he considers there are better scarlets. Amongst the 1905 novelties Winsor is credited with being the best and it has gained awards from the Royal Horticultural Society and the Winter Flowering Carnation Society. Aristocrat is described as "in form, stem, habit and size nearer perfection than any carnation today."

W. J. H. Adsett.

Notes from the Arnold Arboretum

The past winter has not been a very severe one and has done but little damage to the more tender trees and shrubs at the Arboretum. This is particularly evident in the evergreen plants which show with very few exceptions no effects of frost at all. Among the Conifers we note that *Cephalotaxus Fortunei*, *Torreya nucifera*, *Thuyopsis dolabrata* and *Libocedrus decurrens* with the protection of only a few Pine and Hemlock boughs have remained perfectly uninjured. *Taxus baccata*, the European Yew, which in more severe winters is always more or less injured and of which we therefore have no large plants has remained quite unharmed. Much hardier is the Japanese *Taxus cuspidata* which has as yet never suffered by the frost and always kept its dark green foliage unchanged through the winter, while the foliage of the native Yew, *Taxus canadensis*, has turned to its usual brownish red winter color. *Taxus cuspidata* is therefore to be considered the best Yew for our climate; it is more vigorous than the other species though less graceful in habit than *T. baccata*. *Cryptomeria japonica* also has not suffered and even a small plant of *C. japonica* var. *compacta* has escaped injury.

Our young Cedars of Lebanon, *Cedrus Libani*, show not the slightest trace of injury and as they have during the last years proved their hardiness in the climate of New England, we may hope to have at last succeeded to get hold of a hardy race of this beautiful and famous tree. The seeds from which our plants were raised were collected in 1902 by Mr. Siehe for the Arboretum in the high mountains of Asia Minor where the ground is snow-covered during the winter and the climate is probably more severe than in any other locality in which the Cedar of Lebanon is known to grow. Our largest plants are now about three feet high and look healthy and promising; there seems to be no reason why they should not grow here also into such stately trees we admire so much in some old European parks. If this will be the case, the Cedar of Lebanon ought certainly to be classed as one of the most interesting and important introductions of the Arboretum.

Broad leaved evergreens have stood the winter almost equally well and only a few have suffered in exposed situations. Of Rhododendrons and Kalmias neither leaves nor flower buds have suffered in the least and we can therefore count on a splendid display at flowering time. *Leucothoe Catesbaei* has in open situations the leaves partly injured by the frost, while in the shelter of Hemlock Hill its foliage has retained its bright green color. *Pieris floribunda* (*Andromeda floribunda*) is known as hardy, but this year even *Pieris japonica* (*Andromeda japonica*) has neither flowers nor foliage injured; usually it suffers very much and we therefore have only small plants. It is a pity that this shrub is so tender, for it is the most beautiful of the Andromedas with its large pendent panicles of white flowers appearing early in spring.

Euonymus radicans has not suffered in the least last winter; its three most important varieties were described and figured in this magazine last year by Mr. Koehler in vol. 5, page 372 and vol. 6, page 441. The variety *Carrieri* seems somewhat more tender than var. *reticulatus* and var. *vegetus*; I noticed outside of the Arbor-

etum a plant of it climbing on a wall with all its foliage destroyed by the frost. Even *Euonymus nanus* has retained a large part of its leaves though they have turned to a purplish green color. Of the allied genus *Pachistima* the western species, *P. myrsinites*, has its foliage partly injured by the frost, while the eastern *P. Canbyi* is uninjured; both are low shrubs of little ornamental value, except for rockeries; the first resembles in foliage somewhat *Euonymus radicans* var. *reticulatus* and the second *E. nanus*.

The Inkberry, *Ilex glabra*, holds still all its leaves uninjured, while the Japanese *Ilex crenata* has the foliage partly destroyed by the frost in some shrubs and in others growing side by perfectly uninjured, which shows that individual differences in regard to hardiness exist sometimes in different plants of the same species; it is further interesting to notice that of the small leaved variety not a single plant has suffered. That *Ilex opaca* has stood the winter well is perhaps not necessary to mention.

The Box-trees, *Buxus arborescens* as well as *B. japonica* have not suffered in the least; the latter species is still little known; it is of a lighter pleasanter green, but does not grow as high as the first species.

Alfred Rehder

Pinus ponderosa or Bull Pine

This has several other names: Pinus Carigana, Pinus Engelmani, Pinus Jeffreyi, also Yellow Pine, Heavy Pine, and Montana Black Pine. Its habitat reaches from the Niobrara River to the Black Hills and from the foot hills of eastern Colorado to the Pacific slope, where it is sometimes called the Silver Pine and often the Yellow Pine. There, it reaches its grandest proportions, attaining a height of two-hundred feet. For our western prairie, our semi-arid regions, and for the great, bleak Northwest, it is by far the most valuable evergreen we have. In spite of its heavy foliage, when once established, it will endure without flinching a long series of dry years. I have made a close study of this tree for over thirty years and its hardiness, robustness, adaptation, and intelligence make it a remarkable tree. Never plant in any of the northern States seeds from the western slope. They make an utter failure wherever tried. If you want to plant on the western plains or in the semi-arid regions, get seed from the Colorado foot-hills. But should you plant trees from these same seeds in North Dakota, you would make utter failure, yet for all the Northwest, there is ample provision, for trees raised from seed from the high altitudes of the Rockies and the Black Hills are perfectly hardy. Ordinarily, this tree is a failure in the East. To make a success of it there, seed should be gathered from the highest belt growing in the Rockies where there is snow on the ground eight months in the year and much rainfall in summer.

ITS INTELLIGENCE

While in the mountains, after a succession of dry years, I noticed several groves on steep hill sides where

the water had nearly all run off, that were turning yellow and at a distance they looked as if dying. Come to examine them, I found that on account of the excessive drowth, they were dropping half their needles while the rest were fresh and green. They did not have provision for the whole family and so they were carrying just what they could. Down in the valley, two hundred feet from an irrigating ditch, there were the same kinds of trees with needles, long and glistening, of the healthiest green. I wondered how this could be as they, too, were on a steep hillside. Having occasion to dig beside the irrigating ditch, I found a mass of roots from those distant trees pumping up water and sending it to the topmost branches, keeping them fresh and green.

If you go into Northwestern Nebraska, you will see them perched like cliff dwellers on the tops of dry, inaccessible bluffs where the soil is too poor to raise grass. They are up there out of the way of fires. Were it not for this enemy, doubtless the plains of the West and the Sand Hills of the North would have been covered with them.

Nurserymen have not always succeeded with them and complain that they are hard to transplant, that the loss is heavy, and it takes years to recover from the shock.

AN IMPORTANT DISCOVERY

At this station, after years of careful experimenting, we have found a process by which you can raise them from seed as easily as you can peas, and you can transplant them with no more loss than with elm or ash, and you can grow them as easily as you can potatoes.

The trouble has been, we have grown them under screens as we have other evergreens, but they resent this; they do not want any coddling. The process is so simple any one can raise his own at small cost.

On a trip to the Black Hills, we noticed a lot growing near the railroad, on a spot where the soil had been scraped down to the hardpan. The seed had fallen in the autumn from the trees near by. These had been covered with snow. They sprang up early in the spring and there they were thick as they could stand. I took the hint, sowed a lot of seed out in the open in the fall, and never saw a finer stand. I found that by growing them without shelter, so they were used to the intense heat of summer and the cold of winter that they were so vigorous that I ventured to transplant them when a year old, and here I ran into another splendid success. The yearling plants had a heavy root system to support those long needles. You drift under the bed and get all the roots, which are twelve to fifteen inches long. Now dig a trench eight inches deep, straight on one side, set your plants against this straight side, double in the roots—for you need all—draw in the earth with one hand while you hold the tree with the other. After planting a while, take the hoe and fill the trench and stamp solid. After a day or two hoe or rake the surface to prevent evaporation. If there are no white grubs

and the ground is fairly moist and in good condition, you will save 95%.

A FINE SIGHT

I wish you could see our Ponderosas in all stages, those one year old, those one year after transplanting and you will acknowledge that our beautiful rows of three year olds, twelve to eighteen inches high, with their long glistening needles of freshest green are the finest you ever saw. We mention this process because we believe it can be made worth millions to the West and Northwest. A year ago, I sent a pound of seed to a man in Manitoba. He wrote he ventured to plant one-half of it and now had 3000 fine trees and was a green hand at it and this his first effort. If you can't get seed in the fall, make your bed in the spring, spade it up fine, rake it level, put on a pound of seed to eight feet square and cover with half an inch of fine loam or sand. It is best to soak the seed in blood warm water, changing every twelve hours to keep from souring. In about three or four days, they begin to sprout. Then plant and see they do not dry while germinating and you will be surprised at your success and will rise fifty per cent. in your own estimation.

In appearance this tree somewhat resembles the Austrian Pine, only the needles are much longer—sometimes ten or even twelve inches in length with a glossy polish enabling them to resist the hot winds. Under the above process, we have transplanted these trees when there was no loss in two exceeding hot and dry summers, when there was but four inches of rain during the summer months, with no irrigation. The roots are trained near the surface. If left alone they form a long tap root; for this reason, transplant when a year old and then you develop the most perfect root system.

What a pity these trees so easily raised cannot be planted on the semi-arid plains. Out there, with forests, groves, and wind-breaks, the hot and drying winds could be checked and dry farming could be carried on with success. Two years after transplanting, put them out where you wish them to stand in grove or wind-break. Some call them too coarse for the yard but I like them. Give them a chance to develop and they make a symmetrical tree. Their freshness in winter and sturdy growth make them very attractive. When once established, they make about two feet a year. They do not grow as rapidly as the Jack Pine, but they can endure the drowth and hot winds much better. If you have steep hillsides, inclined to wash, or rocky places you cannot plow, plant them to these pines. You cannot afford to have idle ground when land is worth \$100 per acre.

THE LUMBER

This is all right for framing and inside work. Exposed to the weather, it does not last as long as White Pine. For inside work, finished with hard oil, it is very beautiful. As it grows with great rapidity, the grain is quite coarse but when well polished it is about as attractive as any lumber we have.

A good deal of clear lumber will often be saved for frames and cornices. This is all right if well painted. We emphasize the importance of this tree for its many excellent qualities. Its ease of propagation and transplanting, its rapid growth, its drowth resisting qualities make it the most promising of all the evergreens for the great prairie States.

C. S. Hummer

Rhododendrons

Of all cultivated shrubs the rhododendrons undoubtedly occupy the premier position as the gayest and their value for landscape work is now becoming more generally recognized. Few subjects in the long list of our hardy shrubs, can show the improvement to be seen in the rhododendron of today, and much of this improvement has been achieved within recent years, through the enterprise and skill of such growers as the Waterers, who have devoted over half a century to the improvement of flowering shrubs, and to the rhododendron in particular.

It has always been a source of wonder to me that these beautiful shrubs are not grown on a more extensive scale. There are a great many people who believe that the best of the English hybrids cannot be grown in the New England States, but one has only to consult any up-to-date catalogue of varieties to be astonished at the large number of sorts that have proved available for planting in New England.

In passing, I cannot refrain from drawing attention to what I might call the trend of the times, so far as the planting and laying out of grounds is concerned. Very different are the fashions of today, compared with those of twenty years ago when sentinel yews, clipped conifers, and formal flower beds, were predominant and garden adornment was mainly of a formal nature. At the present day, a more natural treatment of lawns is being practiced, and dame fashion now points to flowering shrubs and herbaceous plants as being the more preferable material to use.

The laying out or planting of outside grounds, is not subject to any rules, and can never be reconciled to any fixed principle, but like many other branches of gardening depends largely on the natural surroundings, and perhaps more especially upon individual taste. The architecture, or outline of the dwelling is the primary consideration, for, although the residence may be from an architectural point of view absolutely perfect its ultimate effectiveness must depend to a great extent upon its setting. The accompanying illustration shows a case in point. A few years ago this beautiful little mansion was suffering the indignity of being surrounded with about a score of small mounds or "flower beds" of various designs. This method of embellishment was objectionably artificial, and quite disproportionate to the extent of the area involved. It represented nothing in nature, and by no stretch of imagination could we call it art. When it was decided to introduce a more natural and appropriate form of embellishment, rhododendrons were chosen as most suitable for this purpose. They were planted in irregular groups, at various points of vantage, where they could be seen from a distance across the intervening water and seldom have I seen a more charming picture.

RHODODENDRONS ON A SHADED LAWN

If one wishes to keep the beds gay after the rhododendrons have finished flowering, a very pretty effect may be obtained by a thick planting of *Lilium auratum*, which is a fine contrast against the dark green foliage. Small groups of this lily on the outskirts of shrubberies are very pretty, and they may also be used freely by the sides of woodland walks in the wild garden, or alongside carriage drives.

Regarding the best sorts of rhododendrons to grow, I might name dozens of varieties and rhapsodise over their various good points, but here I must content myself with naming a few sure hardy ones which are able to withstand our rigorous winters. *Everestianum*, a very free blooming variety, the color being rosy lilac, spotted and fringed; *Alexander Dancer*, bright rose; *Mrs. John Clutton*, one of the finest pure whites; *Concessum*, a beautiful clear pink; *Charles Bagley*, bright red; *Mrs. Anthony Waterer*, a magnificent pure white; *The Queen*, blush turning to white; *August Van Geert*, carmine, spotted claret; *John Waterer*, a very dark crimson; *Mrs. R. S. Holford*, a magnificent variety, the color being a rich shade of salmon; *Hannibal*, rosy carmine; *Lady Eleanor Cathcart*, light rose, spotted chocolate.

When planting rhododendrons, it is an important cultural point to remember that they will succeed in almost any soil which is free from chalk, or lime. In sandy loam the plants grow with as much vigor and luxuriance as they do in peat. Where the soil is of a heavy nature it may be rendered suitable for them by a liberal admixture of rough leaf soil. If the soil is poor coddling in a thoroughly decayed state forms one of the best manures for these plants.

They should always be kept well protected during the winter months. For the tops of the plants, evergreen branches such as spruce, are the best, and a good, thick covering of leaves between the plants will make an ideal winter protection.

Again, Easter is with us—its inseparable worries and misgivings increased by the peculiar conditions prevalent in this disturbed year. In this, HORTICULTURE'S fourth annual Easter number, we extend to the florist trade, so indispensable to the proper observance of this vernal holiday, and to the seed and nursery trade without whose aid the people's spring would lose much of its charm, our earnest hope that the season may be in the fullest degree a joyous one for them, yielding profit and encouragement beyond anything experienced in the past. To the large and ever increasing number who have given us their support as subscribers and advertisers through the trying season just passed, we feel deeply grateful. For those who have seen fit to use the columns of this special issue to bring the attention of our readers to their spring offers we solicit the patronage of all who are pleased to see HORTICULTURE flourish. We know that the most enterprising and honorable firms in American horticulture are represented in our list of advertisers. Read what they have to say.

When Richmond first came upon the scene the prediction that it would in time supplant Liberty as a popular commercial cut flower was received with more or less doubt. That it would put even American Beauty upon the defensive was, however, something that its most ardent admirers did not dream of. Yet it has done so as florists coming in contact with discriminating buyers will testify and as is realized by those who have attended recent exhibitions and have made due use of eyes and ears. In fact, Richmond and Killarney, representing the highest development in rose growing in two continents up to the present time, seem now in a way to put all the favorite florist roses of yesterday into the background for good and to be practically the pioneers of a new generation of roses for a new generation of buyers, different in standard of type from any that have gone before. The advent of these superb varieties has injected new life into all departments of commercial rose industry and there is a certain satisfaction in knowing that neither one of them came into being through chance or haphazard experiment but were in each instance the product of long continued effort on well considered lines.

Having enjoyed opportunity on several past occasions to see what the Chicago retail florists are capable of doing in the way of table, drawing room and boudoir floral adornment we were much disappointed over the omission at the recent exhibition of the American Rose Society of any provision for displays of the decora-

Colored Plate with This Issue

MORNING STAR & EVENING STAR.

tive possibilities of the rose. All such exhibitions where the public are asked to attend, fall far short of their capacity for usefulness when they fail to make direct appeal to the public through displays primarily illustrative of the decorative possibilities and various uses of the material shown. The very generous list of special prizes offered for vases of roses—some of them duplications and others not competed for—might have been apportioned between the “technical” and the “spectacular” interests with distinct advantage to the general effect of the exhibition in question and with no little benefit to the rose industry. The growing of flowers of a high degree of merit is very properly recognized with premiums of great value and honor but flower growing as a vocation would soon lose its zest were it not that the public want to buy and make use of the product. Anything that increases this interest and use by opening the public eye to artistic floral possibilities and application must directly benefit the whole industry and particularly the grower and it looks like a monumental mistake when the floral decorator is not called in to supplement the excellent showing of the flower producer in the public exhibition hall.

Narcissi and Daffodils

It was with delightful pleasure that I beheld at our spring show just past, the evidence of better patronage bestowed on the short-crowned section of Narcissi “Mediocrinati” of Baker, which I regret have not hitherto found the deserved recognition they are entitled to in our broad country. In my opinion, in their many diverse and quaint forms, they possess more subtle charm than their individually more gorgeous brethren, the large trumpet daffodils “Magnicorinati.”

They are particularly effective and pleasing in large clumps in the herbaceous border and rockeries, and equally captivating in semi-shaded woodland margins of ponds, lakes and running brooks. Since they can be planted more thickly together than the larger trumpet section, on account of their smaller bulbs and less massive foliage, they thus offset the individual splendor of the larger ones by the greater number of flower scapes from a given space.

The section under consideration does not take so kindly to enriched soils as the larger daffodil does, and therefore should not be planted in ground newly enriched, especially by the use of the fresh and ranker stable manures. Bone meal seems to be conceded to be preferable to any other fertilizer and this moderately if longevity is to be looked for. Soot is desirable for its stimulating effects, as well as for its pungent properties for warding off insect encroachments, the most injurious of which is the larva of the Narcissus fly—“Merodon equestris”—the mature fly being exactly like a bumblebee in size and shape and hums and hovers about in similar fashion. I have come across a num-

ber of them on different occasions in the parks of Boston where practically no narcissi or but very few are planted, showing the wide distribution of the pest. The imagined inadaptability of many of the narcissi to our soil and climate, due to their aggravating disappearance at times, may in a large measure be attributable to the ravages of this pest rather than to peculiarities of climatic environment. The larva of this fly enters the base of the bulb and penetrates to the core, eating the latter away and causing the collapse of the bulb.

The Narcissi belong to the order Amaryllidæ. I do not know that because this is so the juices of Amaryllidæ proper possess the same properties as are found in the Narcissi, but I do know that the fly in question is equally partial, if not more so, to that class of bulbous plants, as I had an experience in that direction in common with a famous bulbous plant enthusiast in my neighborhood, our method at one time being to put out of doors our respective collections of *Hippeastrums* in late summer to ensure well ripened bulbs, but the ravages of this fly were so great that it drove us under cover with but little ceremony of protest after which, none, or comparative very little trouble was experienced by continuous growing and ripening of the bulbs indoors.

Considering the facts herein stated as regards the rapacious proclivities of this insect in the narcissus field, it would seem the part of wisdom and prudence in order to circumvent its further spread, to carefully examine all bulbs before planting, and ascertain that no larvae are present, by closely observing that there be no puncture in the cushion-base of the bulbs from which the roots are emitted. A bulb soft and somewhat spongy under pressure is to be regarded with suspicion and accordingly destroyed.

So much for the pleadings of the charm of the Mediocrinati section of Narcissus, ninety nine per cent. less than what might be said of them.

H. G. Dunlap

Two Good Annual Chrysanthemums

(See Colored Supplement with this Issue.)

Morning Star and Evening Star are two of the best forms of Annual Chrysanthemums. They are both of the Burridgeanum type and have the advantage over the original form of being self-colored.

Morning Star is of a delicate primrose yellow, while Evening Star is clear golden yellow; both growing about eighteen inches in height. They are most useful for cutting purposes, and may be grown in the summer garden or forced in the greenhouse during winter—for the latter use they are almost equal to the Golden Paris Daisy.

NEWS OF THE CLUBS AND SOCIETIES.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HOR- TICULTURISTS.

Annual Meeting of the Executive Board.

The Executive Board met at the Prospect House, Niagara Falls, March 23 and 24. President Triendly and Messrs. McClure, Hallock, Wirth, Farquhar, Asmus, Young, Stewart and Rudd were present. Messrs. Kasting and Cowell were appointed to fill the vacancies caused by the absence of Mr. Murray and Mr. Beatty. The usual routine business was transacted.

The programme for the August convention was discussed and the main features decided upon, the details being left as usual to the president and secretary.

As the charter provides that the main office of the Society shall be in the city of Washington, the President was instructed to appoint an official representative of the Society in the city of Washington who should maintain such an office.

Mr. Hallock was appointed a committee to revise parts of the proceedings relative to school gardens, to make such additions thereto as seemed advisable and put them in shape for publication for general distribution, carrying out recommendations made by the Society.

It was resolved that the President of the Society be authorized to offer the silver and bronze medals of the Society at the horticultural exhibitions in this country for new and meritorious plants or flowers of American origin, provided that he is convinced that the exhibition at which they are proposed to be offered shall be more than local in scope and of sufficient extent to warrant recognition by this Society, no more than one medal to be awarded to the same plant or flower.

Chas. H. Keitsch of Buffalo having been nominated by the Buffalo florists, was elected superintendent of the trade exhibition.

The Secretary was instructed to correspond with the census bureau with a view to having the method of obtaining the census statistics in so far as they relate to floriculture more carefully considered and that certain changes be made which will render the results more reliable and more valuable.

Considerable attention was given the action of the Society regarding the nomenclature committee and registration, and it was the sense of the Board that the following out of the proposed course would entail an indefinite but large expense on the Society in the future, and therefore the Board could not concur and the matter was referred back to the Society for further consideration. It was the sense of the Executive Board that it was neither feasible nor desirable for this Society to attempt to fix the commercial value of any plant or flower under present conditions.

In view of the fact that it would soon be necessary to republish the by-laws, the committee discussed them in detail and recommended certain

amendments to be submitted to vote at the next convention, most of them being merely verbal corrections.

An examination of the treasurer's report showed that the Society now has in its permanent fund about \$5,200 and nearly \$4900 in its general fund. This showing was very gratifying to the members of the Board, and it was believed it would also be pleasing to the members in general.

The members were more than pleased with the hearty and cordial manner in which the local people assisted them in their work, and especially with the manner in which Mr. Cutler more than redeemed all the promises made at Philadelphia.

Practically the entire lower floor of the Cataract House has been placed at the disposal of the Society as well as the grounds adjoining. This will give ample space for the trade exhibition and the meetings under one roof and on one floor, and will also give room for the planting of flower beds for the exhibition of plant novelties. Mr. Isaacs, the proprietor of the Cataract and International Hotels, assured the committee that he would be glad to have any such planting done and would furnish without charge a competent gardener to care for the plants up to exhibition time. As these accommodations are all furnished without expense to the Society, it would seem that the financial results of the convention at Niagara Falls must necessarily be better than ever before.

Following the custom of some years past the accrued interest on both the permanent and general funds was ordered added to the reserve fund.

George W. McClure was appointed chairman of the committee on sports and J. R. Cloudsley was appointed as a member of that committee, the third member to be announced later. Mr. Ewing and Mr. Philpott of the Canadian Horticultural Association met with the committee on the last day and arrangements were partially completed for joint sessions of the S. A. F. and the Canadian Horticultural Society, details being left to be settled at a later date. The question of international games was left to the Sports Committee. It was decided that the bowling games should be held at Buffalo during the last day and evening.

The final resolutions which were adopted with enthusiasm expressed the appreciation of the Board for the "many courtesies shown us by everybody we came in contact with during our visit." Ex-Mayor Cutler and Mr. Isaacs of the International Hotel Co., and Major Butler of the Natural Food Co., and President and Mrs. Kasting were personally thanked in the final resolutions both for assistance offered and hospitalities extended, and the Board adjourned more than pleased with the kindness and courtesies shown and with the highest anticipations for a successful and enjoyable convention.

It should be noted by the members of the S. A. F. that Mr. Isaacs offered in case enough early reservations of rooms were made at the Cataract House to reserve the entire hotel ac-

commodations of the building for the members of the S. A. F. If this offer be taken advantage of, it will result in an ideal and unique situation in the experience of the Society. Trade exhibition, meeting hall and hotel accommodations all under one roof. The rates are from \$3.00 to \$5.00 per day, American plan, that is, meals included.

W. N. RUDD, Secretary

NEW JERSEY FLORICULTURAL SOCIETY.

At the regular monthly meeting of this society on the 3rd inst., an additional attraction to the usual display of the season's flowers was given by the W. A. Manda special prizes awarded by the committee as follows: 1st. William Reid, for a specimen Anthurium; 2nd. Popken & Collins for standard white lilac; 3rd. John Derwin, for a specimen Cineraria stellata. There was a table of orchids by Lager & Hurrell of Summit; hyacinths, by Thomas Jones of Short Hills; stocks, by Max Schneider; vases of roses, carnations, antirrhinum and sweet peas, by John Derwin. An interesting account of the formation of the new American Orchid Society was given by Henry Hurrell and a unanimous vote expressing the good wishes for its success and prosperity passed.

JOSEPH B. DAVIS.

DETROIT FLORISTS' CLUB.

The Detroit Florists' Club held a grand exhibit of Easter plants in connection with the last regular meeting. The principal plants shown were Baby Rambler, hybrid roses, spiraeas, azaleas hydrangeas. Special mention is deserved by Jas. Taylor, of Mt. Clemens, for beautiful snapdragon, Robt. Klage for bulbous stock, Kaiserin and La Detroit roses. The Department of Parks and Boulevards staged a very interesting collection of calceolarias. Philip Breitmeyer held the attention of the boys for a long time while telling of his recent trip south. Messrs. Robt. Rahaley and A. Sylvester, of the Michigan Cut Flower Exchange, staged all plants. A liberal lunch helped to impress the experiences of this banner evening more firmly in our memory.

FRANK DANZER.

HORTICULTURAL SOCIETY OF NEW YORK.

The regular monthly meeting and lecture of this society was held in the rooms of the American Institute, Berkeley Lyceum Building, 19-21 W. Forty-fourth street, New York City, on Wednesday, April 8, 1908, at 4 o'clock P. M. Mr. H. H. Saylor, Architectural Editor, Country Life in America, delivered a lecture on "An Architect's Views on the Use of Plants in Tying the House to the Landscape," illustrated by lantern slides.

THE WINNIPEG (MAN.) FLORISTS' ASSOCIATION.

The Winnipeg Florists' Association spent a most enjoyable evening on Thursday, March 26th, at the green-

houses of J. Riddle on Park Ave. Much business was discussed and by the reading of a paper by Mr. Muntenberg on the "Aim of the Association," which was greatly enjoyed. Seven new members were balloted on and accepted, and the meeting wound up with music, song and story, during which a dainty little repast was provided for the members by Mr. Riddle.

FLORISTS' CLUB OF PHILADELPHIA.

The monthly meeting of this club was held on the 7th inst. President Hahman in the chair. Robert Pyle of the Conard & Jones Co. gave an instructive address on advertising as applied to the horticultural business. The discussion which followed was a lively one, being participated in by such experts as Godfrey Aschmann, Robert Kift, Alexander Wallace, George D. Clark, J. Otto Thilow and others. A. Roper, Tewkesbury, Mass., exhibited a vase of Carnation Bay State, which came in for much favorable comment. A dwarf pink Lupin (*Lupinus polyphyllus Moerheimii*) was shown by Edward A. Strond. This is a soft pink in color, dwarf and compact in habit and would appear to be a promising subject for an Easter pot plant. The entertainment committee was instructed to arrange for a club smoker in the near future. Adolph Farenwald gave an interesting report of his experiences in Chicago at the rose show and dwelt particularly on the extent of glass devoted to roses in that locality and the up-to-date business system prevailing. Compared with what he supposed—it was simply wonderful, and made him feel a very small potato. In fact the speaker evidently felt during his recital that it would have been money in his pocket if he had never been born and that henceforth he would view his own achievements in a humble and contrite spirit. That old saw about travel broadening a man must have a hole in it somewhere when it makes him feel small like that. White Killarney rose from Waban was illustrated and commended by Robert Kift, who gave it as his opinion that in this we have as big an advance in white roses as occurred when the Bride was introduced.

NEW BEDFORD HORTICULTURAL SOCIETY.

About seventy members and guests were present at the annual banquet of this society on March 26, which was a pronounced success. The room was beautifully decorated with palms and ferns loaned by James Garthley, and the tables were resplendent with vases of Lloyd carnation, while at each place was one of the new crimson carnations of H. A. Jahn. Speeches and music followed the banquet. The committee in charge included James Garthley, H. A. Jahn and J. H. McVickers.

SOUTHAMPTON HORTICULTURAL SOCIETY.

The regular bi-monthly meeting of this society was held Thursday, April 2, President Clark in the chair. After routine business W. L. Jagger read a very interesting paper on Agricultural Education. The next meeting will be on Thursday, May 7.

U. G. AGER, Sec'y.

Obituary

Warren Ewell.

Once more comes to us the painful duty of recording the death of one of Boston's long-time florists, Warren Ewell, the last surviving member of the once widely-known firm of W. S. Ewell & Sons, died on April 2, aged

WARREN EWELL.

56 years. He was a member of the Massachusetts Horticultural Society, and an ex-president of the Gardeners' and Florists' Club of Boston. Up to within a few years he was one of the largest contributors to the spring exhibitions at Horticultural Hall, bulb forcing being his specialty.

Broken down and discouraged by business reverses and failing health during the past three years he has been missed from club meetings and other gatherings where he was so long a familiar figure, but many kindly inquiries for him have always been forthcoming and merry, lavish Warren's place in the hearts of those who knew him longest and best was never vacated. Very few of the famous aggregation of congenial gardeners and florists known as the Old Guard, who were so conspicuous in the annals of Boston floriculture in bygone years and of whom Warren Ewell was one, are now left. Younger hands have now taken up the local activities and will no doubt be found worthy successors of the pioneers who did their part so well. But for both young and old there never will be another Warren Ewell.

Charles Ingram.

Charles Ingram, gardener and florist, was found dead in his room at Wellesley, Mass., on Sunday morning, April 5. The medical examiner who was called stated that death was due to rheumatism of the heart. Mr. Ingram, who was otherwise of sturdy and athletic build, had been a great sufferer from rheumatism from time to time for many years. He was born of Scotch ancestry at Reading, England, and, by a notable coincidence, he is now buried at Reading, Massachu-

setts. His father was Edward Ingram, who was born in New Bedford in 1807. A young Charles Ingram in 1831 was regarded as a notable young florist, having been the foreman in some of the most famous gardens in England before coming to this country twenty years ago. He was at one time on the staff of the "Gardener's Chronicle" under Dr. Macosco, a position for which he had education and brilliant mind well equipped. His last professional position was with the late firm of Ewell & Sons, which he was connected with for several years with several florists supplying the locality of Boston and vicinity with S. J. Faxon, W. S. J. Ruggles, and other similar firms, and W. J. O'Brien, Wellesley Hills, being employed at the latter part of his career. His age was 50 years.

William Griffin.

The death of this accomplished gardener and contractor marks a valuable loss to American horticulture. He died, on March 26, at his home in Lakewood, N. J., was buried and expatriated, although he had been ill for several days. Indeed he was able to dictate matters of importance in his work on the afternoon of the day on which, a few hours later, he died. Mr. Griffin was in his 70th year. He was born in Kent, England, and came to this country when about 21 years old. He was a surveyor in England and also after he came to America, but soon became identified with garden and landscape work, which became the business of his life and in which he displayed great skill and taste. He developed Woodmere on Long Island, and afterwards went to Lenox, Mass., where he laid out and superintended with signal ability for several years the beautiful Elm Court estate of W. D. Sloane, and where his relations with brother gardeners from far and near were characterized by the kindest hospitality. Ill health compelled his

WILLIAM GRIFFIN

retirement to a sanitarium. After his recovery he entered the employment of Alex. McConnell, superintending landscape planting, etc., and later went to Georgian Court, Lakewood, as gardener on that noted estate. Mr. Griffin is survived by a widow, three

daughters and a son. He was fond of home life and indulgently devoted to his family.

Mrs. Bernard Beers.

Pauline, wife of Bernard Beers, of Denver, Colo., died on March 26, as the result of an operation. Mrs. Beers was a valuable assistant to her husband in his business for many years and was highly esteemed.

John Davidson.

John Davidson, the landscape gardener who laid out Pine Banks park, Malden, Mass., of which place he was superintendent from 1887 to 1904, died on April 1 in his seventieth year. He was born in Lanark, Scotland.

George O'Brien.

George O'Brien of Lenox, Mass., died on April 5, after a brief illness, aged 26. He had ably assisted his father in his greenhouses and had made many friends.

Samuel Gass.

Samuel Gass, a lifetime resident of Pittsburg, Pa., and for many years engaged in the florist business there, died March 26 at the age of 64.

Christopher Hansjosten.

Christopher Hansjosten, florist at Mt. Elliott Cemetery, Detroit, Mich., died on March 25.

NATIONAL APPLE SHOW.

One thousand dollars in gold will be awarded as a special prize to the grower of the best single apple exhibited at the national apple show in the Spokane (Wash.) State Armory, Dec. 7 to 14, 1908. The competition is open to the world. In addition, prizes aggregating \$14,000 and numerous trophies, medals, banners and ribbons will be hung up for exhibits in other classes.

Officers of the Spokane County Horticultural Association, headed by H. W. Greenburg, under whose auspices the exposition will be held, have completed preliminary arrangements for the incorporation of the National Apple Show Society under the laws of Washington, with a capitalization of \$100,000, which will be immediately subscribed by local people.

Growers in all parts of the United States and Canada, as well as Europe, will be invited to send exhibits for competition. Advices already at hand are that growers in the provinces of Nova Scotia, Ontario, Quebec, Alberta and British Columbia, and New York, Maine, California, Ohio, Michigan, Missouri, Iowa, Nebraska, Massachusetts and several other eastern and middle-western states will enter as contestants, and it is known that practically every recognized district in the Northwestern and Pacific states will be represented.

The primary object of the organization is to popularize the apple as the great national fruit, by creating a greater demand for high grade fruit at prices which will leave a profit to the grower without working a hardship upon the consumer. The plan is to educate the people to the knowledge that there is nothing more healthful than a good apple to begin and end the day. Thus will the apple come into its own as the king of fruits.

HORTICULTURE AT THE UNIVERSITY OF MINNESOTA.

Work in horticulture at the University of Minnesota is given considerable attention. It is given under two distinct heads. The first includes a course in horticulture extending over a period of two years in the high school of agriculture, in which there was an attendance this year of 582. Horticulture is required of all the students of this course. It is grouped under four heads, fruit growing, vegetable gardening, forestry and greenhouse laboratory work. The two first-mentioned subjects are largely explained by their titles. Forestry here includes only farm forestry, and ornamental planting in a general way. Greenhouse laboratory work includes actual work in budding, grafting, the making of cuttings, sowing seeds, packing plants, and other exercises, all of which is done in the greenhouse in the winter. To handle such a large number of students requires very careful systemization of the work.

The College of Agriculture is a continuation of the work begun in the school, or students may enter the college from other high schools. The courses offered in horticulture, in this college are fruit and

vegetable growing, systematic pomology, plant breeding, nursery work, greenhouse management and floriculture, landscape gardening. In the way of research work this department has a well-equipped greenhouse of about 2500 square feet, and thirty acres of land at the central experiment station, and two special fruit breeding stations embracing ninety-two, or a total of 122 acres.

The breeding of fruits adapted to the cold climate of Minnesota and adjoining states is a work of much interest to this department, and for which it receives liberal appropriations.

Professor Samuel B. Green has been in charge of the horticultural work at this station for twenty years. He has two special assistants in horticulture, two superintendents of fruit farms, and one foreman. He is a Massachusetts boy and a graduate of the Massachusetts Agricultural College.

THE BEST TEN OUTDOOR RHODODENDRONS FOR AMERICA.

H. Waterer of Philadelphia, on being asked to state which in his opinion were the most reliable rhododendrons in this climate, gave the following list: *Album elegans*, *Album elegans grandiflorum*, *Purpureum elegans*, *Purpureum elegans grandiflorum*, *Rosea elegans*, *Everestianum*, *Chas. Dickens*, *H. W. Sargent*, *Caractacus*, *Lady Armstrong*.

SOME NEW THINGS IN AN OLD COUNTRY, OR ONE MONTH'S OBSERVATION BY LAND AND SEA.

Read before the Philadelphia Florists' Club, March 3, 1908, by J. Otto Thilow.

(Continued from page 411)

We arrived at Bingen in the evening in good time for dinner, and thereafter took a trip through the town following its circuitous streets and winding courts. Early next morning we crossed the Rhine to Rudesheim, mounting the steep hills by cog roads, through the vineyards to the Niederwald, where a few hours sojourn and a walk through the woods, and then a study of the monster Denkmal, Germany's Victor Pride, satisfied us that the points of interest had been covered. As water was scarce, and we were not sure of its analysis, it was quite in keeping to indulge in a light lunch and pay homage to this historic spot by imbibing its famous product—Rudesheimer clear and refreshing. Another glimpse from the edge of the precipice and wall, the base support of this great monument, down the Rhine, with a panoramic view of this winding stream hemmed in by the ancient vineyards on its sides, gave us a deep and lasting impression of what Germany has cause to be proud of—"The German Rhine."

Frankfort.

We parted from this scene by noon on October 1st, leaving Bingen for Frankfort Germany. Two hours walk through the business streets of this city was pleasurable, and quite convincing that it was an active, business city, and up-to-date. The evening was spent at the Palmen Garten, enjoying an occasional visit to the vast glass structure covering some monster palms, and a beautiful garden. The rest of the evening was one of delightful music listened to by a large audience of Frankfort's music-loving people. Early the next morning we returned to this beautiful garden, and took a critical look at everything of horticultural interest. For precision, order and cleanliness the Palmen Garten is equal to the best. The glass houses are well stocked with interesting plants and a wealth of flowers. The grounds are beautifully laid out, and well broken up by groups of trees, shrubs and beds, which are kept in perfect condition through the growing season. The admission is one mark, and it is well worth this pittance for so instructive a lesson to a stranger, and so much enjoyment to one who can appreciate the vigilance it requires to maintain it in good condition.

Erfurt.

We left Frankfort October 2, arriving in Erfurt that evening after passing through some very interesting country, which showed that agriculture was carried on in the modern way, close cultivation in intense form. The long strips running toward the hills from which the crops had just been cleared, looked as though the soil had been run through a sieve; no weeds in evidence, all the available land was ready for its cover crop.

When reaching Zebra, a junction, the road takes an angle course over high elevations, directly east, which afforded opportunity to get a long view

of the Thuringian Forest in the distance to the eastward. Many villages and towns lay along the valley between the railroad and the ranges of hills. Nearing now the Saxon country gave me a slight inspiration, it being the land of my father's pride, and which I had for the first time the pleasure to look upon. The city of Erfurt needs no minute description, as it is known well to horticulturists the world over. The fostering of the seed-growing industry identifies this ancient German city with the whole world. My visit to Erfurt was the result of many a determined effort, this being the only opportunity I had of meeting face to face my numerous relatives, whose anxiety to see their American cousin was quite mutual. All that could be done to cover the ground in the forty-eight hours' stay was most courteously afforded by them. An auto trip through Gotha, Coburg, Friedrichsroda and to the Thuringian Forest was sufficient evidence that motoring is a delightful

J. OTTO THILOW

pastime, because of the splendid roads and the freedom accorded the autotist. The Germans might well point with pride to the well-kept forests, of which nearly 35,000,000 acres are in the German empire alone, 32 per cent. belonging to the State, apparently not a mis-happen tree to be seen from the roads. The resorts in these forests, or rest spots, are cozy and delightful to the tourist, offering the much craved-for refreshment and rest. This auto tour covered 110 miles in three hours; returning to Erfurt in the evening. Sixty minutes to the hour was hardly enough for so strenuous a time as was put in with these big-hearted people.

Beside the visiting of the historic points, a general look through the city was of intense interest. The next day, October 4th, we were invited to go with our friends to the historic city of Eisenach, west of Erfurt, and visit the famous "Wartburg" on the crest of the mountain, which has been standing for centuries overlooking the beautiful Saxon hills and valleys. After the winding road upward had been covered we responded to the call to make the inspection tour. Following the guide along the halls, through towers and narrow ways was a lesson

in very ancient history, concluding with a visit to the room once occupied by Martin Luther, and from his window the view down the mountain and along the valley is a panorama of rare beauty. After light lunch at the cafe we started on our winding descent down the mountain, and through the perennial garden, finally reaching Einach, where we again took train for our northeastern journey to Berlin. On our way we halted long enough at Erfurt to have our luggage thrown in through the open window, and bid farewell and separate from those with whom so short an association had made a deep and lasting impression.

Berlin.

Starting out early on the morning of October 5 we were at once struck with the order and cleanliness which seems to pervade this well-known city, and were reminded of the words of Burton Holmes in his introduction to his lectures on Berlin. "It were well if some of our American cities would send some of their councilmen, and mayor too, to Berlin and learn how they manage to keep a city clean." The ever-ready and present German cabby with taximeter was summoned for a ride through Brandenburger Thor to the Mausoleum at Charlottenburg, then back to the Sieges Allee—a marble congress of Kings, Prussia's rulers from Albert, the Bear, in 1170, to William the Great in 1861. The most noticeable features along this avenue and nearby were the well-kept beds of chrysanthemums with borders of ageratum, lobelia and alyssum. The most striking was the absence of the faithful French canna—it seems not to have the congenial conditions for its growth and development. A trip to the Court of Statuary facing the Palace ended that part of the day's sight-seeing in Berlin, the afternoon being spent at Potsdam, which is quite interesting, being the summer home of the Emperor. A trip to Sau Souci, and along the extensive gardens and glass structures out on the road leading to the old and new Palaces, and just before reaching the main entrance we saw the large iron grille gates, which were at the Chicago Fair, at one of the entrances to the grounds. Quite an interesting feature connected with this royal estate was the artificial ruin, built on a prominent point, rather effective, and at the same time transporting a scene as along the Rhine.

Hamburg.

The effort and exertion of trying to do Berlin in a day was quite a strain, but we were quite ready the next morning, Sunday, October 6, to leave for Hamburg, arriving there at 1 P. M. It might be said of Hamburg, a city of three-quarter million inhabitants, that its business activity, its brilliant stores, fine displays and very courteous clerk service and attention exceeds that of most other cities. The shopping districts are well supplied with florist shops, and what can be said of them as being of modern type and up-to-date in their display, is also true of the florists' shops in all the cities we had been through in Belgium, Germany and Holland. Most striking to an American visitor is their free use of the dahlia in even the most artistic designs, adhering mostly to solid, one-color effects, with ribbons and dyed

pass as accessories. The cut-glass vases in pots are among the foremost plants in decoration during the fall season, also scarlet geraniums with adiantums in designs of stunning effect. The show windows comprise two-thirds of the store stock in many cases, and are so arranged that the customer can walk about in the window among the display of designs and make their selection without disturbing the arrangement. A stop of nearly forty-eight hours in this city of industry was only enough time to become initiated into a few of the pleasures.

Amsterdam.

On Tuesday, October 8, we left Hamburg for the long journey to Amsterdam, passing through Bremen, then southward and changing at Osuabreck, moving direct west, reaching the Dutch Capitol at 5:30 P. M. Eager to meet directly the ancient and unchanged element and custom of the Hollander, we at once struck out to do the town as thoroughly as time would permit. In the most active business streets could be seen the life of all classes. With but few exceptions the streets had a gentle and easy curve, and when looking 100 feet ahead it appeared as if the upper-story dwellers should be able to shake hands from the windows of their respective sides. The houses along the older streets are nearly all out of plumb on the front—how it affects the interior we had no time to ascertain. The cause of this condition is said to be the sinking of the foundations—many of the culverts are close to the house-front instead of outside the curbstones.

With all the appearance of ancient conditions, yet there is a modern business activity equal to the largest cities. The florist shops along the busy street are just as modern in display as can be found anywhere; the style and good taste attract the eye and attention of the public. While it is a fact that effective methods of display have been long known in America among the aggressive florists, yet we must concede that there has been a simultaneous improvement along those lines in Europe to create a taste more for a natural than artificial in flowers, aided with the liberal use of ferns and graceful vines.

The train for the Hook of Holland left Amsterdam at 8:48 P. M., and was well loaded with passengers for England. Passing through Haarlem, The Hague and Schiedam, we arrived at the Hook at 10:48, where the boat was ready to cross the Channel to Harwich, England, which we reached at 8 A. M., October 9th, and London at 11 A. M.

The Closing Scenes.

Another half day in London permitted a visit to the longed-for Tower. Upon entering this labyrinth of gray stone, we followed sign boards, and were soon in its large halls, amid the show cases doubly secured with chains and locks, which contained precious stones and ancient garb worn by ancestors not of our kin. Onward and upward into other and confusing hallways and interior rooms of armor and trophies of war, ancient weapons taken from the fallen foe in distant lands centuries ago. Two hours among relics and beef eaters was quite enough, and highly interesting and instructive. The drill of the red jackets was very

entertaining, yet with the rigid discipline under which the British soldier is glad to serve. We had then to hasten away to Liverpool, where we boarded the "Arabic" and sailed at 5 P. M., October 10th. The stop at Queenstown afforded a great deal of mirth. The Irish lace and curiosity vendors boarded the ship, apparently under hazardous conditions, climbing its sides by ropes in order to reach the last few shillings left for mementos and curios. Those who were poor judges of lace satisfied the Irish merchants, who were mostly women, by buying a black thorn cudgel or cane.

The great and prevailing desire among people of all climes is to travel, go away from home, and see for the sake of seeing how things look, compare the conditions and customs of people, to see what others have that we do not have, to view natural curiosities, and profit by the change from our own environment. This tour, while it was to some extent over a beaten path of my traveling companion, who had taken previous observations at nearly every point covered, presented many new scenes unnoticed before, which afforded much pleasure. I desire to emphasize that the horticulturist without a doubt can and does glean more by traveling than those of any other profession because he works abreast with nature, and studies her resources, admires her productions, and loves the harmony produced in the landscape as well as in her flora.

THE "CITY BEAUTIFUL" MOVEMENT IN SPRINGFIELD, ILL.

(An Address by Mrs. E. S. Walker before the Illinois State Convention.)

The "City Beautiful" has become almost a household expression and is no longer considered a dream, a mere fad of the idealist; the interest in many directions is an established fact. The making of a more beautiful city is among the new arts. In the days of our forefathers the question of daily existence made too strenuous a life to give much thought to the artistic adornment of home or country. Now, when our republic takes high rank among the nations of the world, when peace and prosperity abound, the attention of men and women is directed toward the pursuit of this new art, the "city beautiful."

Interest in civic improvement in Springfield, Ill., was aroused by the meeting of the Civic Association of America held in Milwaukee, October, 1906. No one could fail to be impressed with the deep interest in this work exhibited by members present from Texas to Maine, California to New York, Philadelphia and Boston, men and women of broad intelligence, occupying high positions socially, giving of their time and talents in the interest of making greater and grander cities and towns in our own America. One of the results from attending this meeting was the inauguration of a "city beautiful" department in one of the local papers under the auspices of

the Women's Club of Springfield. The ground covered in this department during the period of its existence was: a cleaner city; the need of a good, pure water supply; the abatement of the smoke nuisance; the abandonment of obnoxious bill boards; a suggestion for securing a system of smaller parks; the cleaning up and cultivation of vacant lots, the care of back yards and alleys; the giving of more space in the erection of all new residences, for light and air; a plea for the elimination of all objectionable matter from the columns of the public press; the planting and care of trees; the duty of citizens in placing our public schools on a higher plane, both as to decoration, art studios and landscape gardening.

Our schools are centers of influence, they should take an active interest in the "city beautiful" movement; indeed they should be the chief civic centers of the community, since a problem is thrust upon us for solution, viz., the guiding of the future of the republic by the children of our homes as well as those born of parents coming to our shores from every foreign land.

The civic committee from the Woman's Club endeavored to interest the children of the public and parochial schools by instilling a desire to contribute to the general attractiveness of their homes and yards. Ten thousand copies of a suggestive circular were distributed to the pupils and eleven thousand packages of flower seeds were sold at a nominal price of one cent a package.

In addition to these prizes the daily newspapers offered cash prizes for the best essays written by the pupils of the 6th, 7th and 8th grades upon "What Children Can Do to Make the City More Beautiful." The Mayor issued a proclamation designating the first week of May as a special time for city house-cleaning. The results of this work were most gratifying. The climax, however, was reached in the great flower show. In this enterprise the Business Men's Association and the florists of our city took charge of the work and made the display a great success. The prizes awarded were trees, roots, bulbs and shrubs. A flower show upon a larger scale is among the anticipated events of the coming season.

Do you florists ever stop to think of the mission of the flowers you send forth? Of the brightness, of the good cheer they bring to the home life, and even when they cover the spot where rests all that is mortal of our loved ones, they there speak eloquently of the endless life. It is a beautiful thought that the sites of old colonial homes in New England, indeed almost the exact line of the old roadways, can be traced by the fragrant, blooming flowers which still persistently cling to life when the hands which planted and carefully trained them have been for many long years at rest.

In the distant and unknown future perhaps some flower may be culled whose fragrance shall serve to discover in the weedy, grass-grown ways of our lives, that in some work accomplished, some battle won of right over wrong, we too were counted worthy of remembrance. Any effort toward making the city beautiful can but make more beautiful the lives of its citizens.

WHAT IS THE PROPER SIZE OF A GREENHOUSE TO GROW ROSES FOR COMMERCIAL PURPOSES?

(Paper read before the American Rose Society by W. H. Elliott, Brighton, Mass.)

This is the question assigned to me. What I think is really wanted in this case is to know how large one really thinks a greenhouse should be built. My answer will be more on this line.

First, I wish to apologize for coming as an Eastern man to the city of Chicago to answer a question of this kind, for, if there is anyone who knows how large greenhouses should be, it is the Chicago man. I can, however, give you an answer in very few words. A greenhouse, for commercial purposes, should be as large as a man has money to build. That is, whatever money he is going to invest in commercial houses might best be put in one house. I would not hesitate to put 150,000 feet under one roof. In fact one could build a greenhouse to good advantage as long as it can be heated from central station. One can heat 100 feet each way with a gravity system, provided you had a fall of ten feet from the radiator pipes to the water line of the boiler. With a vacuum system I presume they might be carried a great deal further. Just how much I could not say, as I have not used that system. The continuous ridge and furrow houses need only be limited by the money to be laid out as the ridge could be carried 1000 feet each way. Much can be said in answer to the question of the advantages of the ridge and furrow houses as compared with the wide single roof. I shall speak in favor of the wide single roof, although I must admit that the well constructed ridge and furrow ranges around Chicago are as fine houses as I would expect to see anywhere, and I expect a strong argument in favor of that style from those using them. What influences me most in favor of the single roof is the snow.

Advantages of the Single House.

A roof that will clear itself of snow in mid-winter, at a time when the days are short, and prices high, is certainly to be desired. Another advantage to the single house is that it is easier to fill and empty; also that high houses are less expensive to heat. The variation of heat in the day time is not so great. They should be easier ventilated and handled. Larger amount of air space inside the greenhouse has proved to be an advantage rather than the disadvantage most growers supposed it would be. Mr. Holmes, in his address on "Rose Culture," before the Gardeners' and Florists' Club of Boston, stated as his opinion that 40 per cent. of the improvement in rose growing in the past twenty years was due to the up-to-date greenhouse, and I think he was right. It is one of the facts that we must accept that better stock can be grown in a large greenhouse than in a small one.

As to Width.

In regard to the width: It is hard to predict how wide greenhouses will be built in the next twenty-five years. Of course, with the ridge and furrow plan, the width is really unlimited, as the ventilation is taken

care of as you go along; but how wide do you suppose greenhouses will be built and depend upon a single run of ventilators to ventilate them? We have already seen them built up to 150 feet in width. Unfortunately, this wide house was not well constructed and is not considered a success, but it is really not the width. It is the question of construction. If a house was thoroughly and properly constructed could a house of this size be handled to advantage? I have not seen this wide house during the winter months; have no idea how the stock is growing. I looked this house over thoroughly at the time of the Convention last summer. It seemed to be considered an impracticable house. But the only reason given was the construction of the house. The question really is, if the house was strong and securely built would a house of that kind grow good stock? I would say that in that house at the time I saw it was growing as nice a lot of American Beauties as I could find anywhere. If the house will grow the stock, then that is really the vital question. The next question is, can a house of that size be constructed

and run as cheaply as a narrower house? There are a good many questions there that would need more knowledge and experience than I have had to answer. I cannot recommend the construction of houses of any such remarkable width. Sixty feet wide, with a pitch of six inches to the foot, I find to be thoroughly satisfactory. I would not hesitate very much to increase this width considerably, but, as soon as I increase that width, I must splice my bars, which I have not done on any of my large houses. Ventilation seems to be good. The air in these large, high houses always seems better than in the small ones. I do not quite understand why we need to ventilate greenhouses except to reduce the heat.

Should the air in a greenhouse keep pure and good without being renewed? If not, what is it that spoils it and should it not be much more serious in houses with much less air space?

Some Drawbacks.

I think it only fair that I should state what seems to be the most serious drawbacks in the construction of these large houses. In the first place, the unequal expansion of ridge, purlins,

MARSHALL P. WILDER

Courtesy Elwanger & Barry.

plates and sills. It is also a long distance to drive around them with a cartload of soil; leakage is increased if roofs are not kept in the best of repairs. There is also great danger from the wind, in houses of this size. The movement of so large a body of air as is contained in these houses strains the glass much more from the inside than in the smaller houses. They need to be built strong and glazed thoroughly. I have made up my mind to double nail the glass at the end of these houses.

As to Construction.

Horticultural builders charge more to cover the same ground with houses of this kind than they do with a number of smaller houses. They are right in this for they need stronger and more thorough construction. I do not like the iron frame with heavy rafters for this construction. We must guard carefully against the enlarging of our houses without properly strengthening all parts. My first large houses were weak in the outside walls. Thorough and permanent construction is what is needed, for many reasons. Not alone on account of wind and weather, but because this business has grown to be permanent and important enough to have a place of its own and not built up with the idea that it will some day be torn down and the land used for building purposes. A man building a factory don't have any such idea and our establishment should be just as permanent, or more so, as any factory. A proper location should be selected with great care; then get the best to do with and build thoroughly enough that the place can be inherited by your children and grandchildren. The fact that the growing of cut roses as a business was born inside of the last fifty years is no reason to suppose it will die out inside of the same time.

While I am wandering away from the question, allow me to impress on you the importance of taking the best of care of your house when built, especially in regard to painting.

SMALL FRUITS.

A paper read before the Vermont Horticultural Society by Wilfrid Wheeler.

(Continued from page 280)

Prepare Bed One Year Ahead.

It is best to prepare for strawberry bed at least one year before you are ready to plant it, breaking up sod and planting it to corn, or some crop which will keep the ground well stirred up, and rid it of weeds,—after the corn is harvested cut all the stalks in early September if possible, manure the ground—20 cords per acre is almost about right—and plough in the manure at least six inches deep. Harrow the surface of the ground and immediately sow rye or winter wheat for a cover crop. This is one of the most important steps in preparing land for fine crops, for this cover crop keeps the soil from washing, from deep freezing and thawing, and above all retains a great deal of the natural soil fertility. In the Spring, when you are ready to set your plants, the rye will perhaps be six inches high. Plow it under and at the same time you will bring to the surface the manure which you applied in the fall and which will now be in

the best condition and position for the roots of the newly set plants.

Another method of getting ready for a strawberry bed is by sowing a couple of crops of buckwheat the year before the bed is to be planted, and these together with some manure the same proportion as mentioned before will put the ground in excellent condition. Always keep in mind that soil well prepared is one-half the fight. In this method of soil preparation as in the other, do not plow the land in the spring until ready to set your plants, for the surface of the soil dries out very fast, and it is useless to plant in a dry soil unless rain is certain. After plowing, harrow the land and get the soil as fine as possible, and it is well at this time to harrow in a good dressing of lime about one ton per acre, but do not apply fertilizers now. Far better results are obtained from adding fertilizer when the plants are growing during the summer. It is impossible for the roots of a newly set plant like the strawberry to take up an adequate amount of nourishment from a highly fertilized soil, but this same plant will stand lots of feeding later on. A dressing should be applied about three weeks after the plants are set out, one thousand pounds of wood ashes and five hundred pounds of bone per acre to be followed a week later by a dressing of at least five hundred pounds of tankage or dried blood per acre.

Varieties and Culture.

It is best to have your plants all ready to set as soon as the field is smoothed off. But from the large number of varieties of strawberry plants that are offered for sale you will perhaps want to know something about the best to plant. While it is impossible to give exactly the kinds best suited to your soil and situation, most of the more productive ones readily adapt themselves to all soils and conditions. Perhaps quality cannot be the first consideration of the market grower.

For varieties it is best to choose at least four, and for market or shipping, all things considered, Abington, Sample, Elm Mary and Senator Dunlap are a good combination. For the home garden it is desirable to consider quality, and Marshall, Brandywine, Cardinal and Wm. Belt will produce fine, large berries. Of course soil conditions should be considered to some extent, and it may be best to try a number of varieties by degrees, selecting the ones best suited to your individual needs. Before setting the plants in the bed, trim off at least one-half of the leaves, and cut the roots well back, so that the new roots will get a good start. Do not set the plant any deeper than it grew in the original bed and be sure to firm the soil well about its roots. After the plants are set, keep the cultivator going and supplement the horse work with hand hoeings and weed pullings. Cultivation should continue until the middle of September, and then the plants may be left to harden before cold weather comes. In many varieties numerous runners will have to be cut off in order to get a good fruiting bed later on, for if all the runners are allowed to set and make plants the fruit will be small and poorly colored. Keep in mind that you want big, healthy crowns with plenty

of air space about them, so thin out surplus plants and give those which are left your best attention, and the picking question so troublesome in some places will not be so much trouble to you as one man can pick in a day twice as many large berries as small ones. Protect the plants in the late fall with coarse litter or leaves, remembering that you do not want to keep the frost out of the ground but rather in after it is once there, so cover lightly and remove the mulch in the spring as early as possible after danger of heavy frost is past. At this time apply dressing of wood ashes and later on, if the foliage is deficient, a little nitrate of soda or guano at the rate of 200 lbs. of nitrate or 100 of guano to the acre. Keep the cultivator going and remove all weeds until the fruit is formed, after which put on a mulch of straw, litter or leaves about the plants to keep the fruit clean and retain the ground moisture. This mulch will improve the fruit 50 per cent., and especially in a dry season when the plants need all the moisture they can get. Another advantage is that during rain the berries are kept from being spattered with mud or sand.

Picking.

Having brought your crop to this state, go over the bed at least every day and pick all ripe berries, breaking them from the plant with a stem. Use only new quart boxes, which can be obtained as cheaply as old ones, and it never pays to put good fruit in old boxes. Make two grades of fruit in picking, for there is always a demand for both kinds, and it will be found profitable to sort the fruit at the time of the picking, letting each picker use two boxes. The berries should be kept out of the sun and removed to a cool place before being packed. I might suggest that all picking should be done as early in the day as possible before the dew is off the plants; the fruit is harder at this time and will carry better, and it is a mistake to think that strawberries will spoil when picked wet. I know the question of strawberry pickers in country districts is often a perplexing one, and perhaps explains in a large measure the small amount of strawberries which are grown in these localities, so plan to make whatever ground you plant produce a large crop of fine fruit and reduce in this way the amount of hand labor in the picking season.

If you are near a small city or large town you may not be troubled in this way and your acreage can be increased accordingly, but every one must be the judge of his own conditions. If your market is near by do not pack the best berries in crates but have some long trays made to hold 20 or 25 boxes. The fruit packed in this way will not be crushed by the weight of the other boxes and will appear to a better advantage in the market. Your second class berries may be packed in crates as they can be shipped to more distant markets if there is no sale for them near by.

For the home fruit garden it is often more convenient to plant pot-grown strawberry plants in the late summer or fall. These plants when grown in hills will produce a good crop the next summer. The preparation of the soil

76-78 Wabash Ave., CHICAGO

for strawberries applies to all the small fruits but it will be found of benefit to prepare the soil deeper for gooseberries and currants and while these latter fruits will do well in almost any soil, they are more profitable if given a deep rich soil with plenty of bone meal and wood ashes worked into it.

Raspberries and Blackberries.

Raspberries and blackberries white not as important as the strawberry are worthy of more extended cultivation and should demand greater attention from horticulturists. These fruits are not as hardy as the strawberry and therefore need more protection during our cold winters. It is often found necessary in sections where there is little snow to lay the canes down and entirely cover them with earth. The raspberry which is a very important crop in Central New York, is grown too far from the markets to ship in the fresh state, so large areas are given up to the growing of raspberries for drying. The fruit is then sold at about 20 cents a pound, often returning the growers some 350 or 400 dollars per acre. It would seem as if there were parts of this state where such an industry would be profitable. Both blackberries and raspberries are better grown about six feet apart each way so that the ground can be more easily cared for and the first year at least some root crop such as carrots, beets or turnips can be planted between the rows.

Blackberries and raspberries like a good firm soil and do much better when planted on a hillside where the land is more or less springy. It is

best to support in some way the fruiting canes of these bushes and a simple device for this is to drive a strong stake into the centre of a clump of bushes, nail two cross arms on the stake and tie the canes to this stake.

When the fruiting season is over remove all dead canes and burn them. For varieties in raspberries, Cuthbert, Herbert and Worthy for red, Kansas, Gregg and Ohio for black, Columbian and Shaffer for Hybrids; blackberries, Snyder, Agawam, Ward and Dorchester.

The Gooseberry.

At one time not long ago the gooseberry was almost unknown in many of our gardens, and hardly ever seen in our markets and to many of us today it is a fruit unappreciated and neglected, but there is a future for the gooseberry. When it is thoroughly known it will outclass the currant in popularity and profit. We are only just beginning to realize its value. The

gooseberry can be grown farther from a market than any other small fruit and yet be sold at a profit, for it is usually shipped green and there is therefore no loss in transit. Gooseberries seldom sell for less than 10 cents a quart and if 10 quarts can be grown to a four-year-old bush, you can readily figure up the profits from the nature of this fruit when the bushes are set 6 by 8 feet apart making about one thousand bushes to the acre. Also gooseberries may be set among your young orchard trees giving an additional value to the land.

Currants may be set in the same way but being a more perishable crop could not be marketed so readily, though they can be used at home in the making of jelly, etc., which can be sold to the city people who are willing to pay a good price for a pure article.

Many of the farmers wives in New England are getting a very good income from the preserving of fruit which they sell at a profit even great-

er than the fresh fruit. Both gooseberries and currants need careful pruning and care to get the best results. All three-year wood should be removed from the bushes and just enough new cane left growing to insure the life of the bush. For varieties, Fays, Cherry and Perfection in currants are best; Downing, Triumph Chataqua, Industry and Red Jacket in gooseberries.

Freedom from Insects and Diseases.

Probably these small fruits taken as a whole are freer from insect enemies and diseases than any other class of fruit, but it is also true that they have very serious enemies which need careful attention or the crop will be ruined. The strawberry is attacked by a white grub and the root of the growing plant eaten off before you know anything is wrong. This pest can be controlled by a rotation of crops, never allowing strawberries to follow grass or potatoes without some other crop between. Leaf blights and rust can be prevented by spraying with Bordeaux. Currants and gooseberries are both attacked by the currant worm and what is far worse the San Jose scale. The former can be killed by the use of arsenate of lead or hellebore while the latter requires more stringent methods. An application of lime, sulphur and salt or some of the more recent soluble oils is found to be efficacious. Raspberries and blackberries are both much benefited by spraying with Bordeaux for leaf diseases but where rust appears the diseased cane should be cut out and burned and in bad cases the roots

and all dug out and destroyed. All small fruits are greatly helped by spraying with Bordeaux even if no disease is apparent and it certainly pays, for in the increased vigor of the plant or bush will come a corresponding increase in size and beauty of the fruit.

Keep in mind that to get large, fine fruit, you must have plenty of sun and air about the plant. Spraying and pruning must be thoroughly attended to, and above all the cultivator should be kept moving among the plants and bushes in the warm summer months.

Not alone should these small fruits, which add so much to the joys of living, be grown for mere profit, but also for the pleasure and experience that one can get from a healthful occupation in God's open air.

Interesting the Boys.

Many of you are no doubt often at a loss to give your boy an interest in the farm work. You often see him drifting away from the farm to the factory, to the city and to the mill, when if the farm had been made more attractive he would no doubt have become attached to the place and stayed at home in a more healthy, moral and physical atmosphere. Right here I believe that the small fruits have a mission for the farmer's boy, and can be made more interesting than the growing of hay, corn and potatoes, and the child can begin at them when he is quite young. So set aside a place on the farm and give it to your boy, and let him till this and have the income from a bit of land as well as the fun of growing some nice fruit for the table.

HAIL RECORD.

Recent losses are reported by the Vineclad Greenhouses, Boonville, Mo., amounting to \$500; C. Schlensker & Sons, \$3,000; H. Steicker, \$3,000; Meyer Bros., \$3,000, all of Indianapolis, Ind.

The above prices are for the trade only.

PUBLICATIONS RECEIVED.

Bulletin No. 296, of the New York Agricultural Experiment Station, deals with the San Jose scale question.

San Jose scale is no longer a paralyzing foe to fruit growers. Its advent is feared; because only hard, careful work can prevent its spreading when once it gains a foothold; but for several years it has been possible to assure fruit growers that the pest can be quite easily and cheaply controlled on small trees by spraying with the lime-sulphur wash. Recent experiences by the Station and practical orchardists prove that similar methods, slightly extended and more thoroughly followed, will not only check the spread of the pest, but also prevent material harm from it, even in old orchards of large trees. The cost of spraying such trees with the lime-sulphur mixture and of pruning and trimming to make the spraying effective is inconsiderable when compared

with the loss due to spotting of fruit, weakening of trees and decrease of crop from the unchecked ravages of the scale. Full details of these extensive and successful experiments are given in Bulletin No. 296 of the Station. All owners of orchards of old trees in scale-infested sections would do well to study these experiments carefully.

The Director of the Station will send the bulletin to any address without expense, on application.

We have received from W. E. Bontrager, florist in the Dept. of Horticulture, Wooster, Ohio, a copy of Bulletin No. 190, on Evergreens. Their Uses and Culture. This is a very practical treatise, well-illustrated and its general distribution should accomplish much in developing an interest in the planting of this useful class of trees.

Seed Trade

The mild weather of the past two weeks has brought an almost insurmountable volume of business to New York and Philadelphia seed houses. The interruption of a couple of cold days at the end of last week was a happy event, staying the rush of orders for the time being and affording opportunity for overworked clerks to catch up and get on their feet again. Business is reported from all sides as equal to the best of other years and no complaint has been forthcoming thus far.

THE MANN BILL.

A meeting of representative seedsmen will be held in Washington April 21st to consider the Mann bill, which in the opinion of many will drive seedsmen out of business altogether. Others take the view that the bill as at present drafted would prove so impossible of enforcement, if enacted, that it would be de facto a dead letter. A prominent member of the Wholesale Seedsmen's League when seen recently said that after reading the full text of the bill he was inclined to think Mr. Mann was really making an honest attempt to be fair, but that the subject was so difficult much more harm than good would probably result with even the best bill that could be devised. To his thinking the seedsmen should make no effort to fight it. Nature does not produce perfect products and the farmer whom the Congressmen imagine they would please would in the long run suffer much worse than the seedsmen. It would be a case of the bull in the china shop—molling and maddling where no real necessity exists.

GOVERNMENT SEED LABORATORY.

The number of samples of seed received for testing has increased rapidly during the year. In many cases more than five samples a month have come from the same source. Up to the present time the number of tests made for one firm or individual in any one month for either mechanical purity or germination has been limited to five.

In order to meet the growing demand for this work, arrangements have been made to increase the number of tests for germination not to exceed ten in any one month. The number tested for mechanical purity will remain the same as formerly, not to exceed five a month.

MORE ABOUT THE FORMOSA LILIES.

Horticulture Pub. Co.

Dear Sirs:—

Referring to our correspondence in your last number, we read with interest about the experience our brother growers have had with the Formosa lilies, and we would only like to add

FORMOSA LILIUM LONGIFLORUM

that contrary to the experience of the Hinode Floral Co. we found the size of the flower is rather what we would call pretty long, as you will see from the photograph we send you under separate cover, which was taken about two weeks ago.

Very truly yours,
SALTER BROS.

Editor HORTICULTURE:—

Referring to your correspondent's request regarding Formosa lilies in HORTICULTURE for April 4, would say that our experience with them this season has been satisfactory. The flowers are not so large and possibly not so numerous as in the old type but in other respects, notably health and earliness, the Formosa is much preferable to the old type. There is greater variation in height of growth, but we do not find that to be objectionable.

A. GRAHAM & SON.

Horticulture Pub. Co.,

Dear Sirs:—

As we are the original introducers of the Formosa Liliium Longiflorum, we think it will be of interest to your readers to state some facts about them, as there seems to be very little knowledge as to the origin of this comparatively new type.

As the Liliium longiflorum business is of the greatest importance for our concern in Yokohama, Mr. Uhei Suzuki, the founder and president of our company, did not spare either expense or trouble to bring a lily on the market that could compete in earliness with the Bermuda Harrisii. New plantations were started on different islands in the southern part of Japan with stock from our regular plantations in the vicinity of Yokohama, but they only resulted in entire failures and big losses of money because, although the lilies produced good bulbs, they did not give the desired results when forced.

Finally, Mr. Suzuki discovered on one island a wild-growing lily of the longiflorum type. He had the bulbs collected and cultivated in the same way the cultivations are made on the mainland. They proved to be a success but we had to wait for the results of forcing them in the States. Three years ago we received the first six cases in miscellaneous sizes of this stock and they turned out excellent. The year after, about sixty cases were consigned to us and again gave such satisfaction that we cabled to our Yokohama house to plant as many as possible. As a result we received over 300 cases last year and expect over 2,000 cases the coming season.

The Formosa lily flowers in the month of February on its native island or about two months earlier than the Bermuda lily. The bulbs are thoroughly ripened by the end of May, when shipments will commence which we count on reaching New York the end of July or the first part of August. The long rest the bulbs have until they can be potted will be decidedly in their favor.

The Formosa lilies should not be forced as hard as the Harrisii, otherwise they grow too tall. Nothing need be said about the quality of Formosa longiflorum bulbs, as they are recommended enough by the growers who have tried them.

Yours very truly,
THE YOKOHAMA NURSERY CO., LTD.

POT ROSES FOR EASTER.

Written for the American Rose Society by Robt. Craig.

It was thought by the officers of the Rose Society that some notes on this subject would prove useful to beginners in the business, and in accordance with that idea, I give the results of my observation and experience. The principal obstacle in the way of having fine specimen roses at Easter, lies in the difficulty of obtaining sufficiently strong plants; in roses of the Crimson Rambler and Wichuraiana types, strong canes can be had by planting out in the open ground in heavy soil, well manured and leaving the plants out at least one winter; when they are left out for two winters they make extra strong plants, with long, strong canes suitable for training into large specimens. Magna Charta, which is undoubtedly the best of all the Hybrid roses as an Easter pot plant, may be treated in like manner; this also applies to Clothilde Soupert, which is deserving of special mention on account of its freedom of bloom, distinct color and above all, its good keeping qualities; it may be kept, in a cool house, for two weeks in full bloom, which cannot be said of many of the varieties. Among other good Easter Hybrids for pots (I know of but few) may be mentioned Mrs. John Laing; Ulrich Brunner (of fine color but a poor keeper), Rodocanachi, Mlle. Gabriel Luizet, Gen. Jacqueminot and Killarney; if sufficiently strong canes of the latter can be had it is one of the most attractive—but these varieties do not make strong plants on their own roots in the open

ground, especially in the northern states.

Handling Imported Stock.

For such varieties as cannot be obtained from nurserymen in this country, recourse must be had to importing the strongest plants possible from Europe in the fall, preferably from England or Ireland, budded low on manetti. Those from Holland are generally budded too high on the stock to make attractive pot plants. Plants which are packed for shipment should have their roots surrounded by damp moss, and should be exposed to the air as little as possible from time of lifting until they are potted; many failures result from lack of this precaution. The plants should not be lifted until they have had some frost to thoroughly ripen the wood; in the latitude of Philadelphia this is usually from the middle to the latter part of November. I have never been able to get however, plants uniformly strong enough to force them the first season after importing; the plants are not graded into sizes and many sent are too small to make suitable plants the first season after importing. It is our custom to take only the stronger plants and the others are wintered over, as cheaply as possible in cold frames or houses, to be grown in pots the following summer, which treatment greatly benefits them. The Crimson Rambler, if carefully handled, will make fine plants the first season from open ground, but the other varieties will bloom more freely if grown in pots one season. The cost of wintering imported plants

in frames is about \$50 per thousand, and the cost of growing them through the summer about \$50 per thousand additional, but the improvement in the character of the plants fully justifies the expense for Easter purposes. Air should be given during the winter whenever the weather is mild enough, and every precaution taken to prevent the tops from growing as long as possible; after the young roots have started they should not be allowed to freeze, as they are thus easily killed; the pots should stand on a dry bottom and be packed in leaves, sawdust, ashes or other suitable material.

The Ramblers.

The Crimson Rambler has been for many years a very popular Easter plant, but its popularity is waning; it will still be grown, but in smaller quantities than formerly, but fortunately there are a number of climbers that may be grown profitably, and which have the charm of novelty. Among the very best are Lady Gay, Dorothy Perkins, Tausendschon and Hiawatha; the last named is especially charming; although the bloom looks frail, it is a fine keeper, and I look for it to increase in popularity. The new variety, Newport Fairy, will undoubtedly be largely grown when its merits become known. Another very fine one is Mr. Walsh's Juniata, and no doubt there are other hybrids in the Wichuraiana section which I have not had the opportunity of seeing.

Culture of Pot Roses.

The culture of pot roses for Easter is very simple, but there are certain

JOHN YOUNG

51 W. 28th St., **NEW YORK**

rules, as to temperature, airing, and the prevention or destruction of insects, which must be faithfully followed. The soil should be a clay loam enriched with well decomposed stable manure, and I like to add a liberal sprinkling of bone dust and fine sheep manure, the latter gives the foliage a rich dark color. The plants should be carefully and very firmly potted, using a potting stick to pack the soil about the roots. It is well to shade the house either with slats or by whitewashing the glass with whiting and coal oil, and sprinkle frequently with water to keep the wood plump until the young roots start; they should never be allowed to shrivel. Keep for five or six weeks in a night temperature of 40 to 45 degrees; the plants should by this time be well rooted and the temperature may be gradually increased, if necessary, to 60 or 65 degrees at night. When we have a late Easter, as this year, it may be at no time necessary to exceed 60 degrees; the lower the temperature at which they can be flowered in time, the better. Crimson Rambler and Wichuriana roses may be trained in various shapes, globular, oval, or in the form of fans, etc., or they may be cut back to about one foot from the pots and grown without any staking. In these severely cut back plants the clusters of flowers will be larger than where more of the wood is retained and the lighter branches allowed to bloom. Use tobacco stems between the pots to keep down insects, cleaning out and removing about once a month. Give always plenty of air if weather permits; if this is regularly attended to,

mildew is not likely to appear, and when the buds are set an occasional watering, say once in two weeks, with manure water is beneficial. Soot water is also excellent to improve the foliage and color of blooms and serves also to destroy worms.

To recapitulate, I should say the principal points to be observed are: Lift carefully, pot promptly and firmly, start at low temperature, always as much air as possible, use tobacco stems between the pots which should have some space between them from the very start.

PICKED UP BY WIRELESS.

Poehlmann Bros. will discontinue growing Perle and Sunrise roses and give the space to asparagus and Croweanum fern for the Chicago market. Peter Crowe says that outside of his own place he has never seen Croweanum so well done as at Poehlmann's. Poehlmanns will not build that proposed large addition this year, but will wait for more settled "times" and the glass market has thus got a big set-back. With a payroll of \$7,000 a month not including store salaries, with 500,000 chrysanthemums in the cutting bed, 236,000 young carnations potted up and five acres of carnation benches under one ridge-and-furrow roof there'll still be "something doing," however, at Poehlmann's, and John Evans' Challenge ventilator, new pattern, is preferred to all others. Speaking of Adiantum Croweanum, Peter Crowe says it will stand all the heat you can give it, and he's the man

who ought to know. "Connected houses opening together are all right for teas," says Mr. Poehlmann, "but the best for Beauty is the separate house, not over 20 ft. wide." If you want reasons, he can supply them.

At this point the receiver picked up a message from E. G. Hill who, by the way, is generally talking about roses except when he is asleep or is persuading you to buy something. Mr. Hill was calling attention to his new pink seedling rose, a cross between Beauty and another seedling which is destined to make a sensation equal to Richmond. The pink Testout seedling to which the name of Princess was first given is waiting for another name, "Princess" being already in use. Mr. Hill has a full bench of it. Among the new rose importations Laurent Carle, one of Pernet Bucher's introductions, is regarded as a fine bedding rose by Mr. Hill. It bears a large flower similar in color to Rhea Rebel. Lady Fair is a promising free-blooming La France-colored rose from England. The new English "Baby Rambler," Phyllis, is pronounced by Mr. Hill to be the best yet. It is glowing pink in color, and blooms abundantly. Another handsome garden rose is Konigen Carola, color Wellesley pink. Watch out for some sensational surprises in seedling carnations from Hill's shortly. He has them. If you don't believe it you can go and see and you'll doubt no more. And—

Hello!—here communication is interrupted by no less a person than Ed. George, who wields authority over

N. F. McCARTHY & CO.

Wholesale Florists.

84 Hawley St., BOSTON

the greenhouse department of Storrs & Harrison Company at Painesville, Ohio. A long jump from Richmond out the "wireless" is no regard of mileage. Mr. George says that Dreeer's variegated-foliaged Bougainvillea "W. K. Harris" is finding great favor with the florist trade by reason of its fine decorative effect when worked in among green foliaged plants. (Following apparently on the same lines with its illustrious namesake.) Mr. George imparts the pleasing news that palms, after an extended dull period, have been enjoying a nice active demand during the last few weeks. He has nothing but words of praise for Baby Dorothy rose, which he regards as a ranking companion to Baby Rambler, but sees no future for Amny Miller, which is "simply awful" for mildew.

The "begonia mite," that troublesome insect microscopic in size but prodigious in destructiveness, has been doing lots of mischief among the Rex begonias at Storrs & Harrison's, but the remedy seems to have been found in placing the plants in the palm house and giving them an abundance of moisture. Among the bedding plants worthy of more general use are the Acalyphas Miltoniana and bicolor compacta, the latter being the newer one and characterized by more lance-like foliage with variegation of clear-white and more drooping habit. Mr. George says that Verschaffeltii, Golden Bedder and Beckwith Gem are still far away beyond the demand for all the other colenuses and although old, retain their leadership over every type of newcomer.

A NEW FACTOR IN THE PLANT TRADE.

The new enterprise of the Fruit Auction Company in New York city whereby they inaugurate a series of daily plant trade sales throughout the season, conducted on lines similar to the wholesale fruit sales, brings to view many possibilities of paramount significance to the plant trade and which may mean, eventually, almost a revolution in the methods of marketing horticultural products. The innovation will be watched with eager interest by the trade and the effect of the establishing of this new and comprehensive outlet for the plant products carefully noted. That, with enhanced facilities for distribution, the magnitude of the plant sales of New York could be many times multiplied, requires no proving to those who know how far short our American cities fall in plant consumption as compared with European cities. The methods which have so enormously developed the fruit trade of the metropolis stand well to exert a similar influence on the plant trade. The superb equipment of the Fruit Auction Company's building, their great financial strength and the resourceful qualifications of John P. Cleary for taking charge of this particular department, are a guarantee that the new scheme will be well tried out.

CLUB AND SOCIETY NOTES.

A delegation from the Worcester Market Gardeners' Association visited Fitchburg, Mass., on March 28 and spent a most profitable day inspecting the greenhouses of James Heslam and

William Proctor. Cucumbers in all stages of development were seen. A collation was served at noon by Mr. Heslam.

Chicago Florists' Club meets the third Thursday of each month. Out of town visitors are always welcome. Four new members were added to the club at the last meeting.

The April exhibition of the Worcester County Horticultural Society was held on the 1st inst. Every class called for was represented. H. F. A. Lange, E. W. Breed and A. E. Hartshorn were the principal prize winners.

The Houghton Horticultural Society, Lynn, Mass., at their recent business meeting, decided to offer better prizes for competition at the fall show. Plans for summer outings were also completed.

The Twin City Florists' and Gardeners' Club has sent out cards bearing the wholesale and retail prices respectively of the various spring bedding plants in which the members are interested, the prices having been adopted as a standard by the club at a meeting on February 18.

At a meeting in New York on Saturday, April 4, the committee on organization of the proposed new orchid society recommended that further activity in organization be deferred for the present, and that those interested accept the suggestion of the New York Horticultural Society to associate themselves with that society and act as a special orchid committee, it being understood that at a later date the movement for an independent society would probably be resumed.

THE ROSE FROM A RETAILER'S VIEW AND THE PART THAT THE ROSE PLAYS IN DECORATIONS.

(A paper by J. F. Sullivan, before the American Rose Society.)

In attempting to treat this very broad subject many phases of it appear for the consideration of the essayist and the introduction of anything that is really novel seems most difficult, but if the mere recital of that which is well known, and the awakening of increased interest in the subject is, as I believe, valuable, the paper may be entitled to a place in the report of the proceedings of this society. It will be observed that the question is viewed from the position of a retailer of cut roses chiefly.

The Pioneers.

The present great extent of the rose trade was developed by many contributing factors, but I believe the chief of these were the pioneer retail florists, who in their time were the first to realize the commercial possibilities of the Queen of Flowers. To these men is due the honor of having appreciated the full worth of the rose and laid the foundation of its illustrious career. They loved the Rose and had faith in its future and no unfavorable circumstances deterred them in advancing the prestige of their adopted flower, nor from courageously asking a price for it commensurate with its actual value as determined by the cost of production. Many of these pioneers have passed away but their work is perpetuated, and

their monuments are seen in the present magnitude of the rose industry. These enterprising far seeing retailers in the early days of their experience were quick to perceive the manifest delight and approval of their discerning customers on being shown a rose of more than ordinary size and beauty, and thus encouraged, they in turn urged the growers on to increased efforts, and the latter stimulated more by the prospective reward than the love of their productions continued to improve the existing varieties of roses, and by the repetition of these progressive steps in the Eastern cities, chiefly Boston, there was created the substantial beginning of the evolution of the rose in this country, which has continued to the present day. Those were the days when reigned old Safrano, Isabella Sprunt, Bon Silene, Cornelia Cook as forcing varieties, and the annually forced crops of Gen. Jacqu, Anna d' Diesbach, Baroness Rothschild, Merveille d' Lyon and a few other hybrids.

The Rose the Chief Asset.

And here is suggested the inquiry, why have the retailers in the early days of floriculture and continuing to the present time selected the rose as the basic element in their business careers? Why have they continued to maintain the rose most conspicuously before their trade? Why are so many florists today, while not ignoring the increasing value of many other branches of the business making roses a specialty and succeeding in their efforts to permanently popularize them? Because the retailers wisely

view the rose as their chief asset in merchandising. Without it their place would be devoid of the essential attractiveness and proper equipment of a floral store. As an article of merchandise or practically considering it, the florists realize that in no other stock of cut flowers can they operate with the same degree of immunity from possible loss that the rose gives them; they can as every florist well knows stock up with a supply of tight cut buds, which being at once salable, continue to actually improve on their hands for several days, more or less according to the season and varieties, before they begin to decline, and even then, they are just about in the right condition for that funeral design for which he wisely suggests them. For shipping long distances no flower is more suitable or certain of satisfactory results viewed alone upon its splendid keeping qualities. Retailers of the seaboard cities use roses almost exclusively in their so called "steamer trade."

I am reminded of the case of some blooms of the Richmond rose, being shown at a meeting of the Detroit Florist Club three years ago. The same flowers after being kept in a refrigerator were shown at the exhibition of the American Carnation Society in Chicago eight days later. When the question of the dealer's supply is considered, the rose can be shipped to him if necessary by his grower situated far away, and the availability of the rose in all seasons adds great value to his chief commodity in stock.

Always Appropriate.

On no occasion of the many where flowers of some kind are used is the rose ever considered unsuitable or inappropriate. The retailer fully appreciates the appropriate character of the rose for all purposes of decorative effect and its unequalled position without a worthy rival in the affections of the greatest portion of humanity. The florist can in all sincerity suggest the rose as the friendly gift, the christening of either the baby or the vessel, and for the hand of the bride it is most essential. We can select it as the message to the sick room and with equal propriety use it as a mark of condolence and respect to the dead.

Indeed were the rose eliminated completely from the mountain of retail floriculture the cavity would be so great it would be difficult to properly identify it. These and many more that may be named, are the reasons why the retailers look upon roses as being the most reliable, valuable and indispensable article of their merchandise.

Keeping pace with the evolution of the rose in the various degrees of its advancement, came the improved methods in decorations, and here too, the Queen of Flowers plays a most conspicuous part. In the richness of its individual beauty, clothed alone by its own rich foliage, it enables the decorator to carry out, better than with any other flower, the idea of a modest, charming simplicity in decorative effect, with the most satisfactory results. How frequently we are asked to adorn a person, a picture, a mantle

or other object with "just one rose" so exquisite and impressive in its simplicity.

The Rose in Elaborate Decorations.

In depicting the part the rose plays in elaborate decorations, we may say the world cheerfully concedes the tribute this flower alone deserves above all others, it being the very essence of decorative effect in whatever manner it is shown. The individual flower, the vase of them, the bank of roses, or baskets of the same; and it is doubtful indeed if there can be found in any part of the country, a retailer whose establishment lays claim to being first class in its appointments, that does not give roses pre-eminence of importance in his store as a result of the recognition of their value fundamentally, in decorative effects.

And this is not surprising when he considers the distinctive beauty and striking grandeur of the rose itself stripped of all sentimental significance attached to it from ages past down to the present time. Standing alone in its purely decorative character it challenges the unvarying admiration of all who behold it. Ofttimes this admiration and devotion approaches the highest degree the heart is capable of.

Any one of the many beautiful varieties, without the accompaniment of other flowers or floral accessories is equal to any occasion, when the perfection of floral beauty and magnificent splendor is desired. Other flowers may in their respective seasons find a measure of favor, usefulness, and even popularity with

the lovers of the beautiful in nature, and in decorations you may mix them in an incongruous mass without doing great violence to their individual character, but the rose alone cries out pleadingly for a position of isolation where unaided by associates, ribbons, ferns or other accessories, the rare, unrivalled splendor and magnificence of its decorative effect, is most pleasing and appreciable.

Its Sentimental Value.

But it is not alone the practicability of the rose, it being the corner stone of the business edifice, that makes it interesting to the retailer. He with the whole civilized world recognizes the perfection of its natural beauty and the inexpressible thrill of joy experienced by those who behold it in its magnificent and unequalled splendor. The florist presenting the rose—fair, fragrant and exquisite, offers no apology when advancing its fame as the "Queen of Flowers," always encouraged and confident that no flower grows that can excel the rose, and where an occasion is presented when it is desired to express purity of life, a stainless character, unquestioned integrity, and virtuous career, we turn instinctively to the emblematical flower—the pure white rose. The rose is beautiful even in its dainty promising bud, the half or full open flower. Indeed the great artists often select the latter as subjects for their finest work, and not infrequently do we see some varieties in the very last stages of their development and even bordering upon decay, yet embodying the very perfection of floral beauty.

PERSONAL.

E. R. Chappell of Chicago has taken a position with Clarke Bros., Portland, Ore.

Visitors in Boston: Paul Berkowitz, Philadelphia; Robert Kift, Philadelphia; Wm. Appleton, Providence, R. I.

Visitors in Boston: Donald McLeod, Concord, N. H.; E. J. Harmon, Portland, Me.; Conrad Schultz, Westerly, R. I.

W. H. Witte has received the appointment of gardener at Wyman park, Johns Hopkins University, Baltimore, Md.

Austin Wallace has left Kokomo, Ind., for El Paso, Ill., where he will take charge of the El Paso Carnation Company's houses.

Frank Good will manage the flower department this summer at the Marlborough-Blenheim, Atlantic City, for S. Hofmeier of New York City.

Visitors in Chicago: Jno. and Mrs. J. Soper of Rockford, Ill., are in Chicago looking for material for building new office and salesroom. George F. Crabb, Grand Rapids, Mich.

Hugo Richter formerly traveller for Otto Beyrodt, Marienfeldt, will hereafter represent Messrs. Sander & Sons, St. Albans and Bruges, in the German Empire, Hungary and Russia.

John Cleary, father of John P. and Ambrose Cleary, both well known in the plant auction trade of New York city, lies at the point of death at his

home in Haverstraw. Old age is the cause.

Thomas Foulds, who for the past two years has been gardener for the Home Culture Clubs, Northampton, Mass., has resigned his position and will take charge of the estate of E. P. Leonard at Amherst, Mass.

NEWS NOTES.

L. Whinery has opened a greenhouse at Winona, O.

John Lamont has started in the greenhouse business at So. Hadley Falls, Mass.

Franklin & Crosby open their new greenhouse on Academy street, Danielson, Conn., on April 11.

It is stated that the Home Culture clubs of Northampton, Mass., will abandon the scheme of running a greenhouse and flower store.

Jacob Dietrich of Los Angeles has been appointed general agent for Southern California of the Yokohama Nursery Co., Yokohama and New York.

Robert B. Graves, the well-known florist of Northampton, Mass., celebrated his eighty-eighth birthday on April 2. Mr. Graves is vigorous and actively interested in his work.

Krueger Bros., florists, of Toledo, O., have recently purchased twenty-six acres on Woodville road, which will give them the opportunity to nearly double their present capacity.

Speaking of the use of grafted forcing roses, W. H. Elliott says that he grows his roses in thin soil, scarcely

of his best roses have been grown in deep enough to cover the union. Some not over three inches depth of soil.

Board of Park Commissioners, City of Minneapolis, Minn., 25th Annual Report, 1907. A beautiful volume, finely illustrated and full of interesting facts concerning this rapidly developing metropolitan park system under the able management of Theodore Wirth as superintendent.

The city of Nashua, N. H., has received a gift of \$5,000 from John E. Cotton on condition that the city government expend a similar amount within the space of two years for the improvement of Greeley Farm Park. The gift has been accepted and the city's appropriation has been made.

Mr. Geo. A. Parker, superintendent of Keney Park, Hartford, Conn., says of the Peetron Improved Levels, advertised in HORTICULTURE:

"Having purchased your Level last season, it gives me pleasure to say that for an accurate, low-priced instrument, so simple in its construction that a man without a technical training can use it successfully I know of no better Level than yours."

The Advance Co. of Richmond, Ind., are placing on the market a new coupling for shafting pipe in greenhouses and have made application for a patent on same. This is a neat, strong device for coupling up the shafting pipe by the aid of a monkey wrench only and holding same firmly in place, thus doing away with the disagreeable and hard work of screwing the line shaft together by the use of pipe wrenches up under the glass.

OF INTEREST TO RETAIL FLORISTS

SIMPLICITY AND HARMONY.

Our illustration shows a view in Strassburg's Hall, Detroit, as decorated for a debutante reception by John Breitmeyer's Sons early in the winter. Wild smilax and poinsettias were the principal materials used. We

introduce it particularly as an object lesson in simplicity and harmonious effect. It is exquisitely done and is, we think, worthy of a little study. In the majority of cases where florists are entrusted with such work it is very apt to be overdone.

Easter Suggestions

We all know only too well that during such strenuous times as Easter brings to us cut flowers can not be handled as carefully as during normal times. Even the best blooms will suffer by overcrowding in the ice box and the contact with buyer and seller, still we shall be compelled to ask a higher price for them than usual.

Therein lies a great pointer for the wholesaler whose future prosperity depends as much on the satisfaction the retailer's customer receives from the wares purchased in the store as does that of the retailer himself. The wholesaler knows full well what trials the retailer must encounter during such times and while the latter is perhaps willing to submit to the dictates of the wholesaler in the most important point of all—that is, the advance in prices—he only asks for one favor of him.

This one favor so important and yet so simple is somehow or other only reluctantly acceded to, although it has been practically the only stone in the path of prosperity for many wholesalers and more retailers who are one might be forced to say, entirely at the mercy of the wholesalers for their supply. This point so grudgingly granted is the supply of strictly fresh flowers. Everyone knows that it takes the cut of several days to supply the demand of one day, but several days is not a week. Give the retailer a chance to sell good flowers that will stand a little rough handling, so the customer may have something to en-

joy on the most important day of the year.

More co-operation is needed to solve the price problem so it may appear more reasonable to the public. Nobody will complain of a rise in prices around the holidays if within reason, but as long as we allow carnations to be sold at 15c. per dozen one day and the same goods are sold at \$1.00 to \$1.50 per dozen three days later, with a similar rise in all other flowers, the public is right in condemning our business methods.

It may be well for the wholesale house to try and clean up daily to faki's instead of sacrificing many thousands of flowers, but it is doubtful whether the net result increases the grower's profits. Certain it is, though, that in the eye of the public we are losing heavily, and the public after all is our legitimate judge.

Although far from wishing to advocate trust methods it seems proper to suggest to the grower that it would be cheaper for him to curtail his shipments several weeks in advance of the holidays and suffer the loss at home instead of through his city outlet. His product instead of bringing barely enough to pay express charges would bring him a fair return, while the retailer could then sell at a healthy figure, not fearing competition he simply cannot meet.

The public understand well enough that the holidays bring about an advance in everything and do not object to a reasonable one, but a jump from

EASTER PROSPECTS.

With Easter near at hand and the continuance of general business depression, the florist is kept in an uncertain frame of mind concerning his purchases for the holiday. It is therefore well for him to consider the situation carefully.

Do not let him fear that the lateness of Easter this year signifies a scarcity of stock, as there will be a sufficiency of cut flowers as well as of flowering plants for the occasion. What is needed is a care in selecting the very best, but in this instance, not the largest flowering plants, Christmas trade in New York having demonstrated that the sale of expensive plants and large lots of cut flowers was exceptional, and by no means the rule.

With favorable weather conditions there is every reason for believing there will be, at least, a fair Easter business all over the country. An impression prevails that in consequence of the stringency of the times flowers will be more generally used as Easter offerings than heretofore, the expense of other articles, such as jewelry, etc., being offered as a reason. Let this, however, not raise the hopes of the retailer and induce him to wade, perhaps, beyond his depth. Better by far he keep close to the shore and use more caution than ever before in selecting a good, but moderate supply. A profitable holiday trade is almost sure to follow.

NEWS NOTES.

It is said that a tug-of-war between Canadian and United States florists is planned as a part of the festivities of the S. A. F. convention at Niagara Falls next August. The teams are to stand on their respective sides of the Niagara river, the rope spanning the stream.

Maurice Wolff, of Detroit, became the victim of a check manipulator in the person of Geo. R. Muskey, carpenter, 41 years old, of Denver, Colo. With tears raining down his cheeks he ordered a wreath of Mr. Wolff for \$7 and tendered a \$10 check. When Mr. Wolff came to deliver the wreath he found the house empty and his cheque to be forged. He notified other florists at once and when friend Muskey tried the same trick at Schroeder's he was arrested, tears and all.

A LIBERAL OFFER.

The Kramer Bros. Foundry Co. of Dayton, whose advertisement is now running in HORTICULTURE, are practically the only manufacturers in the United States who make a specialty of plant vases. Their vases have many features of special value, such as drain faucet for drawing off superfluous water, adjustable reservoir plates so that they can be removed if customer does not want them in. The pedestals are all made in one piece instead of, as usual, eight or ten pieces, which leave unsightly crevices.

In their campaign to extend the sale of these urns and vases through the florists, Kramer Bros. are willing to send to any florist with a rating, who is interested, a sample line of vases with privilege of returning same if, after a fair trial, he is convinced that he cannot sell them. If he has a nice show room, permission will also be given to fill them with plants for the inspection of customers. This is a liberal proposition which, no doubt, our readers will appreciate.

The German Dahlia Society met on Feb. 23 at Berlin, when details concerning this year's exhibition, the trial of novelties in the palm garden and the worth of certificates were discussed. A show of novelties will be held at Quedlinberg, Sept. 12, 13, 14, at which every member will be permitted to exhibit, besides dahlias, any new plant.

FLOWER MARKET REPORTS

BOSTON Cut-flower trade is in bad shape here this week. It is not that the supply is too heavy, for it is no greater than at a corresponding date last year, but simply that the buyers seem to have ceased to buy for the time being. Yet the advance buying for Easter is exceedingly good and to this extent, at least, the situation is very encouraging. At the present time roses seem to be the greatest sufferers. Carnations are less abundant than they were and surpluses are depleted sufficiently to help materially towards a better return from wholesale markets. Violets are also showing a slight but unmistakable improvement.

Every one hopeful for the Easter outlook is bright. Roses, lilies and carnations are coming in freely and the demand is fairly good. The quality of stock is excellent. Violets, daffodils, tulips, lily of the valley, all are selling at fairly satisfactory prices.

Considering the slowness of sales made society must take the season of Lent rather seriously. Everybody has plenty of flowers and just as much time to turn these flowers into money. According to Messrs. G. Heintz and F. McGee, of Toledo, who were visitors last week, business there is about the same. While we have plenty of lilies for Easter there must be a shortage up the state because the Michigan Cut Flower Exchange is expressing large quantities of potted lilies daily.

INDIANAPOLIS Bullbous stock and lilies are advancing very rapidly and some apprehension is felt as to what kind of shape they will be in for Easter. Beauties and teas are now at the height of perfection and are disposed of at prices satisfactory to grower and retailer. Carnations are a little ahead of demand but so far no bargain counter sales have been advertised. Easter lilies and callas are in fair supply but move slowly. Violets are getting toward the end of their season. An abundance of fine sweet peas is to be had and sells well, while lily of the valley is only in light demand. Adiantum and asparagus are good property now. The retailers all report an exceptionally active week. Plant trade in particular is picking up.

both inexpensive and high grade selling readily.

NEW YORK The stagnation in the flower market in this city continues unabated. Indeed, it may truthfully be said that last week's market touched the lowest point ever reached in the experience of the longest established dealers. The quality of stock coming in is very heavy on all lines, and the situation suggests that possibly there may be an unexpected shortage for Easter on some things which the frequent warm days are driving to maturity more rapidly than the growers like to see. Lilies are already quite abundant in wholesale establishments, the majority of them having stalks shorter than ever before. Quality, in roses particularly, is very high.

PHILADELPHIA Stocks cleaned up a little better last week, and while no material advance has taken place in prices, the conditions are on the whole more favorable. We must expect carnations from this. These did not hold their own as compared with the previous improvement reported. Roses remained normal. Beauties not so plentiful. White roses in heavy supply. Medium priced reds the best sellers. Cattleyas, oncidiums and dendrobiums were in good demand with supply on the short side. Any amount of good lily of the valley can be had at prices that please the buyer very much. As the spring advances sweet peas seem to increase in favor, but prices are low. Single violets show effect of the waning season. Doubles still pretty good. Pink antirrhinum

a dainty quickly snapped up. Swainsona if long stemmed a good seller. Greens are in good healthy condition with supply and demand well regulated. Many strangers have been in town recently looking things over and the Easter plant bookings are reported brisk. Forsythias and some other spring shrubbery have commenced. The growers of indoor stock are hoping for cold weather until Easter, so as to keep all that demoralizing influx in abeyance. Southern daffodils, as well as home grown bulbous stock of all kinds, are over the crisis and now much easier to handle.

WINNIPEG Bath pot and cut flowers are selling well, although trade is still rather quiet, consequent on a large number of people wintering away from the city, but in the greenhouses plants and blooms for Easter are coming along splendidly.

NEWS NOTES.

G. S. Ramsburg of Somersworth, N. H., has secured the contract from the G. A. R. decoration committee of Dover, N. H., for Memorial Day.

Reports from the South show that the unprecedented warm weather has cut short the shipping season for nursery stock by at least three weeks.

On Tuesday, April 7, at Cleary's Horticultural Co., New York, announcement is made of a "Defiance Sale" of roses, trees, shrubs and bulbs. Catalogue can be had on application. Ambrose T. Cleary will wield the auctioneer hammer.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$32.50.

THE GLASS MARKET.

It appears that growers as a rule know a good thing when they see it, as is evidenced by their eagerness to take advantage of the extremely low prices of glass this year. Notwithstanding the hard season most growers have experienced, we find the demand for greenhouse glass far above normal. This proves beyond question that growers are simply investing their money in glass, knowing prices this year to be lower than for several years past, it being a fact that some have bought who will not erect new houses until 1909.

This excessive demand, especially for 16x24 Double, is having its natural effect in a stiffening of prices at the factories which shut down for the summer months usually in May; and while jobbers' prices have not changed as yet, there is a strong inclination towards an advance in the near future.

GREENHOUSES BUILDING OR CONTEMPLATED.

- Middlebury, Vt.—Page F. Potter, one house.
- Ottawa, Ont.—R. H. Wright, one house.
- Hannibal, Mo.—E. A. Hodge, one house.

Some of the Things you Forget

That is to say, you forget that we have them for sale. So this page is a memory jogger.

BENCH FITTINGS

The L & B Clamp kind. One fitting takes legs, side runners and cross braces. Makes an easy to erect, enduring pipe frame bench. Send for circular.

"IDEAL" WHITE LEAD

The strictly pure — made especially for the exacting requirements of greenhouse painting. It makes the "stay put" paint. Send for Booklet.

WIRING FRAMES

A few fittings and some half inch pipe makes a rigid, last forever frame. Send for circular.

HEADERS

The automatic kind. Prevents dead ends — Save time and labor. Get prices.

PIPE FITTINGS

When you order your "Burnham" boiler, include fittings. Prices right. Quality, L & B kind.

PIPE HOOKS

Not one kind, but various patterns for clamping to iron, or screwing to wood posts, or any other use. This is a special double clamp fitting which can carry any number of hooks from 4 up to 10. Order these too, along with the "Burnham."

GUTTERS

And this is where you are mistaken, for we carry in stock four distinct types of gutters. So you can't go astray with L & B No. 1908, our Standard Cast Iron Gutter with double side drips; No. 1750 our new V-shaped, with U-Bar drip gutter. Send for prices.

DREER'S SEASONABLE SPECIALS

Hardy Perennial Phlox

We are Headquarters for these. More than one hundred and fifty thousand one year old field grown plants now in pots.

Collection of Choice Standard Phloxes

- Aquillon** (Tall). Bright Tyrian Rose with crimson-red eye.
 - Andreas Hoffer** (Medium). An early and continuous pure white.
 - Bouquet Fleuri** (Dwarf). Pure white with crimson-carmine eye; free-flowering; each branch a perfect bouquet.
 - Bridesmaid** (Tall). White, with large crimson-carmine centre.
 - Beranger** (Dwarf). Ground color white, delicately suffused with rosy pink and distinct amaranth-red eye.
 - Bacchante** (Tall). Tyrian rose with crimson-carmine eye.
 - Clara Beuz** (Dwarf). Lovely carmine rose, with deeper eye.
 - Champs Elysee** (Medium). A very bright rosy magenta of an effective shade.
 - Eclairneur** (Tall). Brilliant rosy magenta with large lighter halo; an excellent variety.
 - Eugene Danzanydier** (Tall). Lilac, shading white toward the edges; large white centre.
 - Esclarmonde** (Tall). Lilac marked with white; aniline red eye.
 - Graff von Ungerer** (Tall). Large flower; white suffused throughout with rosy lilac and dark crimson centre.
 - H. O. Wijers** (Tall). Pure white, with crimson-carmine eye.
 - Henry Murger** (Tall). White with crimson-carmine centre.
 - Inspector Peiker** (Tall). Purplish mauve, washed with white.
 - Jeanne d'Arc** (Tall). A late-flowering pure white.
 - La Vague** (Medium). Pure mauve with aniline red eye; one of the best Phlox in our collection.
 - Otto Thalacker** (Dwarf). Tyrian rose with red eye and light halo.
 - Obergaerber Wittig** (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; the best of its type.
 - Pantheon** (Tall). Bright carmine rose.
 - Pecheur d'Irlande** (Tall). Crimson red, suffused with cochineal-red and carmine red eye.
 - Pacha** (Dwarf). Deep rose pink suffused with softerino-red and carmine-purple eye.
 - Professor Schliebm** (Tall). Pure mauve with crimson-carmine eye; an effective late flowering variety.
 - Papillon** (Medium). Bright violet purple, marked with white.
 - R. P. Struthers** (Tall). Rosy carmine with claret-red eye; one of the best Phlox in cultivation.
 - Sunshine** (Dwarf). Large flower, aniline-red with crimson-red eye and light halo.
 - Thebaide** (Dwarf). Carmine lake with brighter shadings and aniline red eye.
 - Von Goethe** (Tall). Tyrian rose, suffused with carmine lake and carmine red eye.
- Price choice standard varieties.** Strong, one-year-old field-grown plants. 75c. per doz.; \$5.00 per 100; \$40.00 per 1000.

Hardy Phlox

New and Rare Hardy Phloxes

	Pr 100	Pr 1000
Albion. A variety which originated with us several years since. It is a remarkably strong, vigorous grower, producing very large panicles of pure white flowers with a faint aniline red eye. An excellent sort for massing.....	6.00	\$50.00
B. Comte (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.....	6.00	50.00
Coquelicot (Dwarf). A fine pure scarlet with crimson-red eye.....	6.00	50.00
Fina (Medium). Crim.-red suffused with fiery-red; cherry-red eye.....	6.00	50.00
F.G. von La-sburg (Tall). The finest white in cultivation, the individual flowers being fully double the size of any other variety, pure in color; a strong, clean, vigorous grower.....	10.00	90.00
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size; early; unequalled for bordering; a perfect little gem.....	6.00	50.00
Inspector Elpel (Tall). Tender rose, with bright crimson-carmine eye.....	6.00	50.00
Jules Cambon (Medium). Very large, reddish purple, with exceptionally large pure white centre; the brightest and most distinct of this type.....	10.00	90.00

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

Primula sinensis

GIANT PINK

Now that the time is fast approaching for sowing seed for this beautiful greenhouse annual, a few words regarding it may not be out of place. I do not know of any primula which shows a greater diversity of color in its different varieties; the colors of the flowers ranging from white to deep crimson. Possibly not one of our greenhouse plants has received more attention than the Chinese Primula, and the improvement which has taken place by careful selection and hybridization can only be realized when the improved forms of today are placed side by side with the plant as originally introduced with its insignificant flowers and poor color. Not only has the flower been developed into beautiful single and double forms of superb color, but the foliage itself has undergone such changes that the plants are very ornamental subjects before the flowering period is reached.

Perhaps it would be well to mention a few of the choicest varieties at present in cultivation as a guide to growers in selecting their seed for the present season's sowing. The following named varieties are among the best that have been produced and worthy of a place in any greenhouse:

Crimson King, a fine deep crimson with individual flowers measuring nearly two inches in diameter, ten to twelve flowers being produced on the umbel while at least three inflorescences are borne by the plant during the flowering period; Giant White, a remarkable white variety; The Duchess, pink, dark in the center and approaching white near the outside of the corolla; The Czar, dark blue; Pink Beauty, blush pink, with flowers two inches or more in diameter; Giant Pink, large pink flowers borne on immense umbels and certainly one of the best forms of *Primula sinensis*.

Primula sinensis is not at all difficult of culture but like most other plants repays the cultivator who exercises great care in its cultivation. And surely a plant which blooms continually for a period of from eight

to twelve weeks is deserving of the most careful treatment. The flowering period may be lengthened if successive sowings are made from the beginning of May until the end of June or even later. Clean pots should always be used, preferably new ones, care being taken to soak them for a few minutes in water. Good drainage should be provided because it is only by paying attention to seeding trifles that good plants can be grown and the primula greatly resents a stagnant condition of soil moisture.

Five-inch pots or pans are good for seed sowing purposes and after drainage is afforded, the compost, which consists of good fibrous loam and leaf soil in equal proportions, run through a half-inch sieve and mixed with a small amount of sand, should be placed fairly firm in the pots to within half an inch of the top. Sand should then be sprinkled thinly on the surface and the seeds evenly but not too thickly distributed on the sand. The seeds should then be covered very lightly with a layer of fine soil and, after being carefully watered in, the pots should be allowed to drain and then be placed in a sheltered position in the greenhouse.

During germination a temperature of from 60 to 65 degrees should be maintained, never allowing a rise above 70 degrees F. When the seedlings are large enough to handle, prick them off singly around the edges of small pans and keep them close for a few days until they are established, after which admit air in gradually increasing quantities until the plants will bear placing in their permanent quarters. Transfer to thumb pots and when these are filled with roots move the plants as requisite to larger pots. Expose freely to the air during the hot months of the year, always remembering to afford protection from draughts and to provide shade from the direct rays of the sun.

Throw away all sickly plants and always aim at producing robust growth, not forgetting that the *Primula* strongly resents any attempt at rapid forcing and the longer the period of growth the stronger the plants will be.

Always bear in mind that the art of the gardener consists not only in knowing what to grow or what to keep but also in what to throw away, and remem-

THE CZAR

very fastidious in its tastes, this is the most attention to details that can be expected to succeed.

WINTER AND WEDDING CARNATION SHOW

There was a very interesting display at the spring show of the Winter Flowering Carnation Society at the Royal Horticultural Hall, London, on April 1st. The Guernsey growers were again well to the fore in the prizes. H. Burnett had a meritorious collection, the best of which a gold medal was awarded. An award of merit was granted to Mr. Barnett for *Mexico* and a first-class certificate for *Marmion*. W. H. Lucas and another Guernsey grower took the first prize for 18 blooms of a variety not in common with *Pauline*, a variety of a deep rose tint. There was only a single entry in the class for varieties new to the market. The judges expressed a wish to see *Barnswell* show again in the winter. In the class for white blooms *White Perfection* carried off the premier prize. *Enchantress* was the winner in the blush section, and *Fiancee* was the winning pink. *Harlowarian* was able to beat its rival in the crimson section, whilst Robert Crair was the best scarlet. *Jessica* took the chief award in the fancy section. At the annual meeting a satisfactory report of the Society's progress was presented by Hayward Matthias, the Hon. Secretary, through whose zeal and energy the Society was brought into existence.

THE SUMMER SHOW

The National Carnation and Poinsettia Society, which is responsible for the summer show, has issued its annual report and schedule. Several new classes have been added and classes for undressed flowers. The object of the four new classes for dressed flowers is to encourage the cultivation of bizarres, and white-ground pinks, which to some extent have been neglected of late. Alterations have been made to the open section of the schedule, regarding the trade. A valuable challenge cup has been offered by R. C. Cartwright, a member of the committee. A class has been added for single flowers in a vase. It is stipulated that the flowers must be from plants that have bloomed at least the second year. The committee explain: "It is open to growers that seedlings blooming for the first time give flowers of fine excellence and great promise, but afterwards deteriorate to such a degree that render them useless for exhibition and unpleasing to the public."

A NEW CHERRY DISEASE

E. S. Salmon, biologist to the South-eastern Agricultural College, at Wye, has published some details of a fungus disease affecting cherries which made its appearance last summer in Kent. The disease causes the leaves of the cherry to curl, and at this period they become pinkish-red in color. A delicate whitish bloom is visible, spreading over the greater part of the under-surface of the leaf. Then the affected leaves turn brown, and quickly blacken and rot off. The name of the fungus causing the disease, Mr. Salmon states, is *Exosporium cerasi* Sacc. It is closely allied to *E. deformans* Eckh. which causes the leaf curl or blister of the peach, and also to *E. Cerasi*. It does not appear

that this disease has been recorded hitherto as occurring in this country. Possibly it has been confused with the "Witches Broom" disease caused by *E. Cerasi*, since in both cases the leaves on the affected shoots turn a pinkish red color. The cherry tree when attacked exhibits a curious malformation among the branches, so that at a distance it looks somewhat as though a bunch of mistletoe were growing there. The suggested remedy is as follows: "The disease can be cured by pruning. As the spawn of the fungus is perennial, living on from year to year, in the buds and young wood, it is absolutely necessary to cut off each affected branch well below the last diseased leaf. The spawn does not extend backwards, or downwards into the lower main branches or the stem, consequently the pruning will completely remove the disease. It is well, however, to spray during the first season with Bordeaux mixture (using 4 lbs. copper sulphate, 4 lbs. quicklime, 50 gallons water) at the time when the leaves are just expanded.

W. J. Adsett.

Bark Effect and Pussy Willows

I am delighted to learn that Mr. Rehder is to give us through HORTICULTURE notes from that greatest of all American horticultural repositories, the Arnold Arboretum. I have been advocating for a number of years the planting of shrubs and trees with colored bark in groups so as to be effective. To the list given by Mr. Rehder in your issue of April 4 for bark effect add *Salix Jeanne d'Arc*—intermediate between *Viminalis* and *Britzensis*—and *S. violacea purpurea*. To get the very best bark effects all the *salices* should be pollarded so as to produce long whip-like shoots. About six or eight of these are a delight and that's about as many as can be left on a stump. Thin 'em out the same as you do the cherry shoots.

In a group of shrubbery a day or two since I was impressed with the effect that the common buckthorn (*Rhamnus fraxinea*) with its coal-black bark made between the red *Cornus stolonifera* and the golden willow, *Viminalis*.

In Jackson Park there are some points where the common matrimony vine has been permitted to run free—and it certainly has rioted—mostly on corners, and to lay with its cream-colored withes from 4 to 6 feet long. It is beautiful—that's all. Remember this old matrimony vine all of you, and use it for banks, for hanging over walls or anywhere it can hang over.

I have never seen finer pussy-cat willows than there are in the neighborhood of Chicago. Every ditch in the prairies, where it is as wide as an ordinary bathtub, is furnished with them. I particularly wish to draw your attention to *Salix dasystyla*, a Japanese species. It has the largest, most brilliantly-colored catkins of all of the willows. Now, of course, you will not keep this a secret but I want to tell you, anyhow, that just as soon as this Japa. pussy-cat willow gets known it will be grown in pots by the thousand for Easter. Willows can be grown in pots as easily as chrysanthemums.

John Thorpe

A Fern Fed With Soluble Fertilizer

The fern pictured here (*Nephrolepis Barrowsii*) was fed entirely on soluble chemicals. These were free from soda, sulphates or chlorine, and were applied dissolved in water, which was also used on the general run of plants in the same house.

As pictured, the fern has already suffered the usual penalties incident to exhibition. At the recent show at Horticultural Hall, Boston, J. L. Smith, gardener at Mrs. Arthur W. Blake's Brookline establishment, received many compliments and a cultural award this being the second received for this specimen, which Mr. Barrows said was "the best ever."

Three years ago this coming June it was a little fellow in a two-inch pot fresh from the originator and now has a spread of nine feet or more, measured as a bird, from tip to tip. The fern tub is hidden, while the barrel upon which it is placed is twenty inches at the small end which is plainly visible.

This is yet another living demonstration of the truth that properly used soluble foods make plants just as fit for the long run as they may for the sprint, although many folks reason that because their action is rapid and immediate it must of necessity be also soon spent and the plant must "go back." This fern has had over thirty moons to "go back."

The strength of fertilizer used made the nitrogen strength one part in 13 thousand of water while the phosphate and potash were about the same strength, which figures about one part to 7 thousand of water making, it will be noticed, a "complete" fertilizer.

For nearly three years the fern has softly said to the nice clean fertilizer barrel across the walk in the corner, "Love me little, but please do love me long."

"Iron-Clad" Rhododendrons

In your issue of April 11 in the article on Rhododendrons is given a list of "sure hardy ones which are able to withstand our vigorous winters." I am quite surprised at the make-up of this list. It does not, with a few exceptions, accord with my experience.

My comment on the list would be as follows:

Everestianum, hardy. Alexander Dancer, hardy in some exceptional locations, and if protected in winter. Mrs. John Clutton, tender, unless the plants are so small that they are covered by snow in winter. Concessum, tender. Charles Bagley, possibly hardy; hardy in vicinity of New York city. Mrs. A. Waterer, tender. The Queen, tender; hardy at Philadelphia. August Van Geert, tender. John Waterer, tender. Mrs. R. S. Holford, tender. Hannibal, hardy. Lady Eleanor Cathcart, tender.

Of course any of the above sorts would probably come through the winter all right if covered clean out of sight each year with leaves, but the necessity of handling them in that manner would put them outside the hardy class. I am now speaking for the vicinity of Boston, not further south. Also during some winters all of the above varieties might come through all right without protection.

To repeat a more or less old story I give below a list of so-called "iron-clad" varieties. (There is no iron-clad list in the sense that that term can be applied to a common lilae.)

White, or substantially so:—Maximum, Delicatissimum, Album elegans, Album grandiflorum (in some locations).

Pink:—Hannibal, Roseum elegans, Lady Armstrong, James Macintosh.

Bright red:—Mrs. Milner, Charles Bagley (in some locations), Atrosanguineum (in some locations), H. W. Sargent, Gen. Grant, C. S. Sargent.

Lavender and lavender purple:—Everestianum, Purpureum elegans.

Dark red:—Caractacus, Chas. Dickens, Kettledrum, Old Port (perhaps).

There are undoubtedly others which might be added to the above list.

At the Arnold Arboretum may be found in addition to the above the following apparently hardy under the ideal conditions and care which prevail there. F. L. Ames, Norma, Charles Thorold, Milton, Marion, Mrs. Charles Sargent, R. S. Field, Henrietta Sargent, Mrs. Harry Ingersoll, Coriaceum (early blooming dwarf, probably a tall plant of it in an exposed situation would be tender).

Could Mr. Brown give us an account how he has handled the varieties he has mentioned and how long he has had them?

has been going on and some good results are already in evidence and from the viewpoint of the plantsman this would seem to be the most promising direction in which special effort might now be made. To combine in one type the massive, brilliant colored flowers of the Chinese with the loose habit and graceful poise of the stellata is an object well worth looking forward to although quite a simple proposition as compared with some of the mergers for which the ambitious primula hybridizer has for years been straining every nerve.

The fate of the staggard We understand that the Pekin Gazette has suspended and the reason given is that it "fell behind the times." Its age is given as 4000 years! We recall not a few florist, nursery and seed establishments that have fallen by the wayside for the same reason and there are others languishing along which are doomed to a like fate, to all intents and purposes as antiquated in their ways as the unfortunate Chinese newspaper. It is a bad sign of any business institution when younger rivals having little or no assets except their push and courage outdistance it in the race. It is then full time for the laggard to look about and see wherein he lacks; to adopt a more wide-awake policy; to investigate and get into direct touch with up-to-date goods and modern ways. What was good enough for the customers of a dozen years ago is not good enough today; take that fact to heart and instead of wasting time and temper in predicting disaster for your hustling young competitor, "get a move on" yourself before it is too late.

A superfluous commodity The time when American dealers and florists are accustomed to hand over to the importunate Dutchman their orders for bulbs for next season's use is now at hand. We do not think our friends from across the Atlantic are likely to go home this year in any very jubilant frame of mind over their American orders. The bulb forceer is pretty sure to hold fresh in his memory the experience of the past season which has proclaimed in unmistakable terms the decadence of this once flourishing and profitable industry, and the retail seed houses will not care to stock up heavily on bulbs which, as last year, are likely to be left on their hands, at the top-notch prices they are now asked to pay. Apart from the mere whims of fashion there are good practical reasons for the American flower buyers' neglect of the forced Dutch bulb. One reason is the great advance made by the American florist in the production of superb winter roses and carnations and the enterprise displayed in the growing of a wide variety of sweet and charming flowers for the winter trade which a few years ago were not thought of for this purpose. We are glad it is so. The rose, the carnation, violet, sweet pea, or other flowers of like character are of home production from root to tip and to those who grow them in such perfection as we now find them in the flower markets should the money go instead of into freight and duties and the pockets of foreign growers who have for a third of a century been getting rich on American business and have at every opportunity advanced prices on anything that developed popularity in our markets. We advise our bulb buyers to take their time about placing import orders this season. As soon as our visiting travelers come to realize that the bulb flower has lost its prestige with the American trade the imperial foreign authority which dictates the minimum price at which any Dutch bulb may be sold is destined to hear something drop.

The Chinese primrose We give especial prominence to the Chinese primrose in this issue. The development in this useful little plant within a few years, up to the superb standard shown in our frontispiece, is the result of patient, assiduous work on the part of the hybridist and seed grower. In color the advance has been little short of marvellous. Lately, crossing with the stellata and obconica sections

GARDENERS' AND FLORISTS' CLUB OF BOSTON

Members of the Boston club to the number of sixty visited on invitation the noted plant growing establishment of Thomas Roland at Nahant, Mass., on Saturday, April 11. The visit was not only a grand recreation but had, besides a distinctive educational value. Mr. Roland stands in the foremost rank as a plant grower, and something of value may be learned from every corner of his establishment. Here are a few things we learned on this occasion:

We saw a house partially filled with Van der Cruyssen and other azaleas, more profusely flowered than any we have ever seen, under any conditions, anywhere. Imported this year? No, sir! They were plants left over last Easter on the hands of another grower, which Mr. Roland purchased, planted out in the field in full sunlight, dug up in the fall before frost came, and there they are, actually with buds so thickly set that the flowers have not room in which to open. And the foliage is grand as well.

Plant buyers, in Boston at least, prefer their Rambler roses in moderate sizes, trained low so that when in bloom they give a bush effect. Among the single-flowered varieties Hiawatha takes the lead. As to color it is not easy to tell Lady Gay and Dorothy Perkins apart. Both develop a brighter pink if grown under a little shade, but in the full sun they are less likely

to grow soft. The habit of Lady Gay has the advantage in garden culture but Perkins is a better subject for pot use with its lighter growth and less massive flower clusters. Mr. Roland does not encourage big strong growth in these pot ramblers, light sprays making a more pleasing plant when in flower.

Baby Ramblers, one year old, home-raised from rooted cuttings, make a big show and are just the thing for the cheap trade at Easter. There is almost no limit to the demand. Catharine Zeimet, an imported Baby Rambler, bears semi-double white flowers, deliciously fragrant, but the petals drop too quickly to permit its having any value as an Easter subject.

Hydrangea Jean d'Arc, with dark red stems and pink perfects contrasting prettily with the pure white flowers, is a better grower than the old Thomas Hogg and makes a superior Easter plant.

A long line of cold frames filled with sturdy chrysanthemums attracted attention from the fact that these chrysanthemums had wintered over without any other protection than a banking of leaves and a covering of double sash. A new plant house, 34x140, recently finished, is filled with young candy tuft which will produce a crop for Memorial Day that will make a big hole in the bill for building the house. There are acacias in several

varieties, hundreds of Bougainvillea Sanderiana not bare-stemmed as usual but carrying the old foliage in perfection and loaded with bloom, ericas in rich variety but "too rich in price for Boston's purse" says Mr. Roland, thousands of cyclamens and tens of thousands of Lorraine begonias for next season. And why is it that everything looks so remarkably bright and healthy? Well, we can't answer the question in full; part of the explanation is in the man himself, no doubt, but it is worth recording that the ventilators were all wide open and a howling breeze from the Atlantic, which was strong enough to lift one of the sashes piled up outside and carry it a dozen feet to destruction, was tearing through the houses, and the roses, acacias, genistas, campanulas, azaleas, hydrangeas and ericas seemed to fairly revel in it! Again, we noticed that every individual plant had lots of room to itself.

President Westwood of the Boston Club voiced the gratitude of the visitors for the kind entertainment extended and three lusty cheers were given for the host of the occasion. Next the party was photographed and then proceeded on the homeward ride, little realizing as they heard the train man call out "Chelsea," as they passed through the quiet town, the awful destruction that was to visit it on the morrow.

"ENTIRE SATISFACTION."

Wm. J. Stewart, Esq.,

Boston, Mass.

Dear Sir:—

We find from the advertising already done that we shall be thus able to sell all the aster seed we have to spare and more, too, consequently shall not care to continue further this spring and will here enclose P. O. Order to balance account with you, besides thanking you for the favors you have shown us in the past few months.

We expect to have a much larger supply of our special Imperial aster seed for sale another fall and if so

shall patronize your journal more liberally.

You have in fact given us entire satisfaction; the results coming direct from your journal have been more than double our anticipation.

Respectfully yours,

(Signed) CHAS. A. KIRBEE.

Elmhurst, Ill., April 13, 1908.

PUBLICATION RECEIVED.

Board of Park Commissioners, City of Minneapolis, Minn., 25th Annual Report, 1907. A beautiful volume, finely illustrated and full of interesting facts concerning this rapidly developing metropolitan park system under the able management of Theodore Wirth as superintendent.

A TESTIMONIAL.

Horticulture Publishing Co:

Please discontinue our advt. of Grafted Roses, as we are in receipt of enough orders to clean out our own stock. Orders have come in fast this year. The first week our advt. appeared in your paper we sold over 6000 plants. I like HORTICULTURE for its original and valuable reading matter, apart from its value as an advertising medium, and have frequently heard it well spoken of.

Respectfully,

E. HOLMES.

Montrose Greenhouses.

News of the Clubs and Societies

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

The meeting of the club on April 7th had for its subject, "Easter Plants and Flowers," with a competitive exhibition, which drew a good attendance. The hall of the club being too small for the display and attendance, the meeting was held at 222 Oliver Ave. President Burki being absent on account of sickness, Vice-President Reineman took the chair.

As a committee to look after the exhibits and interests of the private gardeners for the period ending May, 1909, the chair appointed J. Hutchinson, David Fraser, Jas. Wiseman and H. S. Price, and as judges of the competitive exhibit, Jno. W. Jones, C. S. Crall and Jno. Bader.

There were many visitors present and among them Mr. Myers of Altoona, who called attention to Spirea Queen Alexandra. W. A. Clark spoke of his visit to the recent rose show at Chicago. He did not find as much enthusiasm in Chicago over the rose exhibition as he expected. The quality of the flowers shown was of a high order, but the varieties were few. Among the novelties Wyndmoor, with its bright deep pink attracted him. Mr. Wilson defended the enthusiasm and interest of Chicago, as a general rule, in flower exhibitions, and thought if it was lacking in the recent case it was owing to some special reason. Jno. Bader talked of lilies, and mourned the old days when the Harrisii was in its prime. He has success now only with giganteum. Mr. Matthebranc of Johnstown, who has 4,000 giganteum with a loss of only six, and who has had excellent success in growing lilies for many years, thought that many lilies were spoiled by over-watering, and that if greater care was exercised in the watering there would be many more lilies to send to market. He has better success with plants in 4 in. pots than 6 in. While he keeps his houses moist, he is careful to keep his plants on the dry side. Mr. Bader spoke again of the limitations that Pittsburg and vicinity labor under in the way of soot and smoke, and the atmospheric conditions they seem to bring about, which prevent the successful growing out-of-doors of tuberous begonias, asters, stocks and other flowers.

Exhibits and awards were as follows:

Private growers: N. C. Madsen, gardener for R. H. Boggs, special mention for well-grown Salpiglossis Emperor; Frank Crook, special mention for Nicotiana glauca and marguerites.

Commercial growers: Chas. Koenig, special mention for Begonia Vernon and first prize for longiflorum and giganteum lilies; H. L. Blind & Bros., first for azaleas and hyacinths and second for hydrangeas.

There were fine displays of carnations from Finleyville Floral Co. and yellow callas and variegated box elder from Phipps' Conservatories.

The subject for next meeting will be, "Bedding Plants," with speakers to be assigned by the president to certain topics, as geraniums, cannas, etc.

H. P. JOSLIN, Secretary.

PASADENA GARDENERS' ASSOCIATION.

The third annual spring flower show was held on April 2, 3, 4, under the auspices of the Pasadena Gardeners' Association, in a large tent on North Fair Oaks avenue, Pasadena. The show was said to be the finest of its kind ever held on the Pacific Coast. The new florist club of Los Angeles attended in a body (in a special car), bringing with them a magnificent bouquet of Chateaux roses which they presented to the management of the show. Among the visitors was Dr. Houghton who, representing Mayor Hooper of Los Angeles, extended his congratulations on the success of the show. Winners of prizes in the carnation classes were Hugh Thornton and J. Blake, private, and Redondo Improvement Co., and Whittlessey Floral Co., commercial. On stocks Geo. Dill, Redondo Im. Co., J. Blake. Pansies, M. Randall, A. Busch, R. J. Fraser, J. Macgilvray. Iris, T. Lambert, W. S. Laurie, Mrs. Ramsay. Bulbous flowers, C. H. Hovey and W. S. Laurie. Scabiosa, calendula, pentstemon, verbena, antirrhinum and other garden flowers were all provided for in the schedule, and prizes awarded for handsome exhibits in all these classes. In general cut flowers C. A. Campbell Johnstone and Redondo Im. Co. were first and second. A. K. Macomber on orchids. Park Nursery on palms, D. R. Cameron on begonias, cyclamens and Asparagus plumosus, and A. H. Fleming on ornamental plants were also among the first prize winners.

Edward Rust of Palm Nurseries received a certificate of merit from the Pasadena Gardeners' Association for a display of fancy caladiums and decorative plants. Robert Pegg of the Mentor Nurseries, Pasadena, had an exceptionally fine exhibit of decorative plants. Howard Smith had a magnificent display of new amaryllises, watsonias and ferns. Theodore Payne was awarded a special prize for collection of California wild flowers. J. H. Booreman was also awarded a special prize for fine group of cacti. Special prize was awarded to Mrs. C. C. Bragdon for cinerarias. There was also a fine display of water lilies in the middle of the tent beneath a large fountain.

Much of the success of the show is due to the efforts of the officers and directors of the Pasadena Gardeners' Association, who are Robert Pegg, chairman and manager; Richard Thomas, secretary; P. W. Janoek, G.

HORTICULTURAL SOCIETY OF NEW YORK.

For the purpose of encouraging the cultivation and the study of orchids and the formation of orchid collections a committee of the Horticultural Society of New York has been established for the purpose of forming an orchid section.

This action is the outcome of the recent gathering of a few orchid specialists in New York, as it was the unanimous feeling of those who took the initiative that the times were not propitious for the forming of an independent society. The Horticultural Society of New York in forming this orchid section gives perfect autonomy to the section which will be free to make its own rules and regulations for the exhibiting of orchids.

The first step is made in connection with the forthcoming announcements of the May exhibition to be held in the New York Botanical Garden on May 13th and 14th, when besides four cash prizes, two for amateurs and two open to all, there will be offered one gold medal, three silver medals and three bronze medals, these medals to be awarded at the discretion of the orchid committee, which is composed as follows: C. Moore, Hackensack, N. J., chairman, and J. E. Lager, J. A. Manda, G. V. Nash, H. A. Siebrecht, J. W. M. Kitchen and E. H. Roehrs, Rutherford, N. J., secretary.

NEW YORK FLORISTS' CLUB.

The monthly meeting of this club on Monday evening, 13th inst., was a rousing good one with 70 members present. There were addresses and committee reports galore, all of which drew out abundant oratory. One particularly wise innovation was the appointment of a committee to supply honest information to the Associated Press to help correct the misleading reports on matters of horticultural interest which so often find their way into the daily papers. Alex Wallace and C. H. Totty were given this duty. Resolutions of thanks were passed to the Agricultural Department at Washington and a committee to prepare resolutions of condolence on the death of the daughter of James Dean was appointed. Outing committee and transportation committee both reported satisfactory progress. News from the sporting contingent was inspiring. It was announced that Thum's Alleys, Broadway and 31st street, would be the scene of the practice games every Friday night henceforth. A Ladies' Night has been decided upon and the date fixed as Wednesday, May 27. Special attractions will be provided and the entire evening will be given up to festivities. S. A. F. President Traendly made a fine address on the duty of the members to the National Society and the importance of the work mapped out for this year by the S. A. F. executive board at its recent meeting in Niagara Falls. W. A. Manda also made an interesting talk on the approaching centennial at Ghent, Belgium, and the great exhibition which would signal-

ize that event. Timely remarks were also made by Secretary Young and Robert Simpson.

The exhibition comprised Roses Newport Fairy from Julius Roehrs Co., Apple Blossom from A. Schultheis, Cherokee from W. A. Manda, Richmond from K. M. Schultz, Mrs. Jardine from Rob't Scott & Son, My Maryland and seedling 267 from John Cook; carnations Lloyd and Jahn's Crimson from H. A. Jahn, New Bedford, and a new hardy pink from W. A. Manda.

A NOTED BULB GROWER.

Martial Bremond, Ollioules, France

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

April 11th was "Rose Night" with this society and it was the best we ever had in attendance, quantity and quality of flowers, and in interest shown, although short in novelties. Visitors were here from New York, Newark, Orange, Chatham, and Rutherford. James B. McArdle made an address giving his impressions of the show which was highly complimentary. Harry A. Punyard's special cash prize of \$5.00 for best plant in flower, went to H. B. Vyse, gardener to A. R. Whitney, for a grand plant of Calceolaria hybrida. A 10-ft. tall specimen fuchsia from A. R. Kennedy, gardener to Dr. Leslie D. Ward, was greatly admired and a special cash prize of \$3.00 was awarded. A tempting dish of Telegraph cucumber from same grower was there. C. H. Totty had some nice plants of Azalea Bernard Andrae alba. Otto Koch, Morris Plains, had six fine pots of Spiraea Gladstone,—a cultural certificate; and for Spiraea Queen Alexandra he got a certificate of merit. Cultural certificates were given to A. C. Van Gaasbeck, John Dervan, grower for roses and antirrhinum, Villa Lorraine Roseries, F. P. Brigham, grower, Bride roses, Robert M. Schultz, roses, Florham Farms, A. Herrington, Supt., roses and tulips in pots, William Duckham, Richmond roses, John R. Mitchell, roses, C. A. Work, Wm. Muhl-michel, grower, Richmond roses, L. A. Noe, Joseph Ruizicka, grower, roses, John Green, Morristown, carnation seedling No. 1, scored 85 points, and secured a certificate of merit. His white seedling No. 2 scored 75 points. C. H.

THE BOSTON VIOLET

The people today are looking for New Violets just as much as they are for new roses or carnations.

THE BOSTON VIOLET

For the past two years has been placed before the most sceptical buyers in America and they prefer it to any other.

THERE'S A REASON

The Boston Violet is the largest, the most fragrant, it has a very pleasing color, and it is a great keeper.

THE BOSTON VIOLET

Is a variety that is early grown, it is the strongest grower and is in crop from September to May.

THE BOSTON VIOLET

Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

Distribution will Commence in April. Order Now.

PRICES—\$2 per 12; \$12 per 100; \$100 per 1000.

WILLIAM SIM, : : CLIFTONDALE, MASS.

Totty had Azalea Bernard Andrae alba; vote of thanks.

John R. Mitchell read an essay on "The Rose" and received a rising vote of thanks therefor. A very interesting after discussion took place in which the following joined: Joseph Ruizicka, Wm. Muhlmichel, A. Herrington, R. M. Schultz, C. H. Totty, Wm. Duckham, J. A. Manda, A. R. Kennedy, and H. B. Vyse.

Next meeting May 13 will be devoted to flowering plants. Arthur Herrington will be essayist. This meeting will be "Ladies' Night." A refreshment committee has been appointed with Robert M. Schultz as chairman, which insures that the ladies will be well taken care of. Those wishing to remain during the entire session will participate in the spoils, for there will be then a general distribution of the flowers.

EDWARD REAGAN.

ST. LOUIS FLORIST CLUB.

The April meeting of the Florist Club took place in their new hall, eleventh and Locust streets, on last Thursday afternoon. The attendance was not as good as expected on account of the busy season being on.

Some important questions were to have come up but owing to the small attendance they were laid over until the next regular meeting in May.

The trustees on a full vote were instructed to report at the next meeting on the regular summer outing of the club, and the members present were all in favor of a boat picnic this year. This will be decided at the next meeting. There was a discussion on East-

ter stock. Reports from these present indicated that all were in good shape, some being afraid that stock would be too far advanced owing to Easter coming so late this year. Lilies are all in fair condition with 30 per cent. diseased.

President Young urged a better attendance for the May meeting, which takes place Thursday afternoon, May 14th, in the same hall.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of this society was held in County Building, Hartford, April 10, Pres. Huss occupying the chair. It was Carnation Night and as invariably happens on such an occasion there was a large attendance of members. The quality of the exhibits as a whole was of a high order and the awards made in each case were entirely merited. The judging committee, Messrs. Zuger, Roulber and Chambers, went over the exhibits carefully and made the following awards: John Coombs, diploma for vase of White Perfection; Carl Peterson, certificate of merit for collection of carnations; W. N. Shumway, honorable mention for pink seedling; C. Peterson was also given honorable mention for a vase of Kaiserin roses.

H. A. Pinney, carnation grower for John Coombs, read an able and instructive paper on the history of the carnation, and was tendered a hearty vote of thanks. Pres. Huss complimented Mr. Pinney by saying that the paper was the most interesting he had ever had the pleasure of listening to.

G. W. Smith, of Melrose Farm, dele-

gate from this society to the annual meeting of the Massachusetts Fruit Growers' Association, gave a very interesting account of his visit.

The society will hold a Pansy Exhibit May 27, and a paper on the Evolution of the Pansy will be read by John Gerard.

The special committee reported having engaged Unity Hall for Sept. 23 for the Dahlia Show. A committee was appointed to secure a hall for the Chrysanthemum Show on Nov. 5-6. There will be an exhibit of roses at the meeting of April 24.

ALEX. CUMMING, JR., Secy.

CLUB AND SOCIETY NOTES.

The annual banquet of the Florists' Club of Washington, tendered to the retiring and the incoming officers was held on April 7 at Freund's. The tables were lavishly decorated. Joseph R. Freeman was toastmaster. Prof. Charlemagne Koehler was elected honorary member. Retiring president Bisset was presented with a handsome silver fruit dish. W. F. Gude making the presentation speech.

The thirteenth annual dinner of the Dutchess County Horticultural Society was held on April 2 at the Nelson House, Poughkeepsie, N. Y., with over a hundred in attendance. The carnation was the flower of the evening, each guest wearing one. Popular songs followed the feast and an address by the president and witty responses to the toasts proposed by Frank Hasbrouck, toastmaster, by A. Lee Wager, M. Heermance, Walter Price and G. V. L. Spratt, made a delightful occasion.

PLANT NOTES.

Chicago growers complain that many of the Dutch bulbs have proven very poor this year.

Plant growers report a largely increased demand each season, of late, for *Euphorbia Jacquinæflora*. Its adaptability as a Christmas cut flower is beginning to get recognition.

The pretty little blue *Saintpaulia ionantha* is not difficult to handle unless it gets too much water or too much sun. Moderate doses of each are more to its liking. It should be grown in quantity for jardiniere use.

A few vines of *Solanum jasminoides* allowed to grow overhead in the show house add greatly to the attractiveness and its pendant clusters of pure white flowers will be found useful in such work as mirror or mantel decoration. Its growth is not heavy enough to obstruct the light to any injurious extent.

At Lincoln Park conservatories, gardener Frey has been doing some crossing between *Cineraria stellata* and *C. hybrida*, the progeny possessing intermediate characteristics, combining the tall growth and airy gracefulness of the *stellata* and the large full flowers of the florists' hybrid strains and eliminating the heavy coarse habit of the latter.

The E. G. Hill Company are so conspicuous in the production of roses that their work in zonal geraniums is thrown into the shade. The visitor to the Richmond greenhouses will find, however, some very handsome seedlings blooming and among them one of the highest order of merit, which has been named Lucille. Among the imported novelties Col. Porter looms up as decidedly the most pronounced yellow scarlet yet produced. The seedling carnations at Mr. Hill's include several eye-openers.

PLANT IMPORTS.

From Antwerp: H. F. Darrow, 2 cs. plants; J. Dunn, 1 cs. do.; Maltus & Ware, 10 cs. do.; 6 cs. trees; 6 tubs do.; L. Patterson, 1 cs. plants; August Rolker & Sons, 15 cs. do.; J. Ter-Kuile, 1 cs. do.; Henry P. Turner, 1 cs. do.; Sundry Forwarders, 11 cs. do., 16 cs. shrubs, 304 tubs laurel trees.

James Rust has left Roughwood, Chestnut Hill, Mass., and taken a position with Philip L. Saltonstall, Hyde Park, Mass.

FIRE RECORD.

An overturned lamp did considerable damage to the office of F. B. Fountain, Middletown, Conn., last week.

J. T. Temple of Davenport, Ia., recently sustained a loss of about \$300 from a fire that started in a brush heap.

B. B. Smalley and Mrs. C. B. Magee were both burned out, losing everything in the great fire at Chelsea, Mass., on April 12.

Allen Wheeler, Hutchinson, Minn., lost his greenhouse by fire and many of the plants that were saved were killed by the frost.

Greenhouses owned by James Weir & Son, Fifth Ave. and 68th St., Brooklyn, N. Y., were set on fire April 2, probably by boys. Loss \$50.

Looking for a leak in the gas pipe with a lighted match caused an explosion in the store of E. Feldman, 1147 Broadway, Brooklyn, N. Y., on April 10. Fortunately the damage was slight.

The office and workrooms of Clark Bros., Providence, R. I., were destroyed by fire which started near the stove, on April 4. The big greenhouses were saved by the valiant efforts of the firemen.

MISSOURI BOTANICAL GARDEN.

At a meeting of the board of directors and the trustees of the Henry Shaw estate the past week it was decided on an outlay of \$500,000 to erect seven buildings. The undertaking embraces the founding of the finest herbarium in the world. The idea was conceived by Prof. Wm. Trelease, director of the Missouri Botanical Garden ten years ago as set forth in his eighth annual report to the trustees. Prof. Trelease says the plan will be carried out. He declared that the collections were increasing at such a rate that the building would not be adequate within a few years. The collection which, soon after the death of Mr. Shaw in 1889, numbered 160 specimens, now has more than 500,000. The present buildings are overcrowded and sufficient space cannot be given for display.

DURING RECESS.

The bowlers of the New York Florists' Club, inspired by Mr. Traendly's tempting offer of free transportation to the Niagara Falls convention for the five making the highest record above a certain figure, have taken hold of the practice games in earnest. The following list, with their scores for two games as recorded last Friday evening tells the story.

Marshall	353	Young	289
Fenich	331	Traendly	272
Manda	329	A. Rickards	272
W. Rickards	319	Totty	256
Duckham	310	Shaw	216

OBITUARY.

Lawrence J. Stuppy of St. Joseph, Mo., died suddenly on March 30. He has lived in St. Joseph since 1851, and started in the flower business there in 1873. A widow and six children survive him.

BUSINESS CHANGES.

Fred Eberle has bought the business of Daniel Malie in the North Side market, Pittsburg, Pa.

I. P. Herzog succeeds R. A. Mason & Co., at Cadillac, Mich., he having bought out the business.

James M. King, 198 Tremont street, Bronx, New York, has taken C. H. Wainwright into partnership.

R. and H. Cook of New Orleans, have dissolved partnership and Reinhard will open a place on Scott street.

William Walker, Louisville, Ky., has opened a branch store on Jefferson street, between Third and Fourth streets.

Sidney Clark of Menlo Park, will soon remove to Elmhurst, Cal., where he has taken a lease of the Fromenweiler place.

Alfred G. Lozier, Des Moines, Iowa, has leased the store at 518 Walnut street, and will begin at once on the improvements necessary to make it a model flower establishment.

The Kemble Floral Co., has bought Lyons Park, Mason City, Iowa, and it is their intention to erect a range of houses and move from West Fourth street as soon as they are completed, which will probably be by September first. L. E. Flindt is local manager.

The Bell Floral Co., succeeds to the business of W. T. Bell & Sons, and among the changes contemplated will be the removal of the greenhouses from Franklin, Pa., to Niles, although a flower store and a stock of seeds will be maintained at Franklin. John, Edward and Philip Bell comprise the new firm.

KILLARNEY'S CHICAGO HOME.

Weiland & Reisch will build an addition to their range of houses. The work was begun this week and while it is not yet decided just how large the addition will be, it is certain that not less than one hundred thousand square feet of glass will be used. This extensive addition will be used for roses, Killarney leading.

Weiland & Reisch were the first western growers to cultivate Killarney. It was tried by American florists with many misgivings and very little success, but Weiland & Reisch had faith in it and today Killarney is its own witness to the foresight and perseverance of Weiland & Reisch. Today there are ten times as many Killarneys as Beauties sold in Chicago, though it never will take its place. It is a more generally becoming shade of pink than Bridesmaid for the corsage bouquet. Although exceedingly hard to propagate (being a very free bloomer it does not make hard enough wood for propagating), its cultivation is rapidly increasing and would even faster if stock could be secured. Mr. Weiland thinks it the greatest seller in Chicago today.

WIV send away for worthless dry bulbs when you can gain time and save money by buying at home. **Cannas all started for \$2.00 per 100.** Austria, Robusta, Pennsylvania, Italia, Chas. Henderson, Mille, Berat and Pres. Carnot.

J. B. SHURTLEFF & SON,
Cushman Ave., Revere, Mass.

ORCHIDS

We advise the growers and private places that our importations will begin to arrive in a few weeks time and we will have the following :

- C. gigas, C. Mendelii, C. Schroederae
- C. Aurea, Miltonia Vexillaria
- C. Trianae, C. gigas Sanderiana C. Mossiae, C. Speciosissima
- C. Gaskelliana, C. Percivaliana C. Labiata and others.

Therefore we give our customers the advantage of the special sale of two kinds of plants for fifteen days. Strong, healthy, established C. PERCIVALLIANA in blocks, 1 1-2 yds long and 20 ins. wide, containing no less than two doz. plants at \$6.00 each. Pots from 7 to 10 bulbs at 60c. Pots from 10 to 15 bulbs at 80c.

C. SPECIOSISSIMA, from 7 to 10 bulbs at 60c., from 10 to 15 bulbs at 80c.

We guarantee that our plants will be extra fine with no disease or Cattleya fly and will quote the lowest prices in America.

Of Interest to Retail Florists.

Caroline E. Scallen, florist, 1242 Broadway, New York, has filed a petition in bankruptcy; liabilities, \$8,303; assets, \$531.

F. L. Zeigler of Newport, R. I., held an opening of his Bellevue avenue store on April 9, and presented floral souvenirs to all patrons.

D. William Brainard, Thompsonville, Conn., held his annual Easter display from Wednesday to Saturday, April 5-18, with a fine array of tempting stock.

H. R. Hughes of Chicago, who is the most original and ingenious advertiser in the retail florist business, has issued a folder for Easter, 1908, showing illustrations of some of his unique window decorations.

We fail to see anything attractive or appropriate in the "Armadillo baskets" offered as a novelty for florists' use this season. With so much pretty material available for basket making as evidenced in the stock to be seen in an establishment such as Bayersdorfer's, for instance, there is no need to use such "creepy" things as flower receptacles.

No rose is better liked by the J. M. Gasser Company than Gen'l MacArthur and they carry it as a regular stock all winter. Grown as they grow it, with cool treatment, it is strong and healthy almost beyond belief and is a big producer. Its bright crimson color and unrivalled fragrance make this rose very popular and it deserves more general attention from the growers.

DETROIT Business is quiet, but considering the many bookings of Easter orders so far reported we can truly say it is the ominous quiet before the storm. May it storm good and hard, because many a cash drawer is parched badly and needs a heavy soaking. Most of the stores are beginning to put on the holiday dress.

NEW RETAIL FLOWER STORES.

A. F. LEWIS MFG. CO., E. Boston, Mass.

NEWS NOTES.

Reynolds & Struck have started in the florist business at Buechel, Ky. Mr. Reynolds was for a long time with the late C. H. Kunzman.

McHutchison & Co. have been appointed sole agents for United States and Canada for Royal Tottenham Nurseries, Deedemsvaart, Holland.

The Park Commission of Detroit is exhibiting a choice collection of some 2000 calceolaris in 6 in. and 7 in. pots which are greatly admired by the public.

Fred Schmidt has left his employment as foreman of the Newberry estate and will start greenhouses near the Woodlawn Cemetery, Detroit. Thos. Evans, of Marshalltown, Ia., has succeeded to his position.

Upon petition, Irwin W. Coy has been appointed receiver to close up the business of the Calla Cut Flower Co., Youngstown, O. C. W. Hendricks, the plaintiff, asks that the property be sold and the proceeds used to settle the indebtedness.

Carl Meier of Green Bay, Wis., is having a plate glass front put into his office, and the room remodelled so that there will be more display space for his stock. He will make more of a feature of the wholesale end of the business hereafter.

Joseph Fuller, of Leominster, Mass., recently found that glass had been broken in the rear door of his greenhouse and some carnations were missing. Lawrence Serio was arrested and made confession. He was sent to the House of Correction.

Florists who have found it difficult to get a reliable, durable greenhouse hose should try the "Sunnywoods" brand, offered by Frank L. Moore in our advertising columns. Mr. Moore is a florist himself, and knows the requirements for a serviceable hose.

J. W. Davis of the Davis Market Garden Co., has purchased the Hall farm at So. Meriden, Conn., and will

at once put it in condition for vegetable raising. A range of houses will be built for winter vegetable forcing and a house for growing violets and carnations.

DETROIT'S GOOD EXAMPLE.

A movement which will do much to bring the florist and nurseryman's services into more prominence has been started by the City Service League of Detroit, Mich. This is a new branch of the local Board of Commerce. Its principal aim is to interest the householder in the improving of his or her little yard. On the afternoon of April 11 a public meeting was called in the Detroit Opera House and the place was crowded with men and women. Several very prominent men spoke on the need of general improving and in particular of improving front and back yards. To further stimulate the work prizes of \$75, \$50 and \$25 respectively were offered for well arranged yards, as also a special prize of \$50 for the best appearing district.

FLOWER MARKET REPORTS

BOSTON The rising tide of the Easter trade finds everybody well prepared for the rush. Stores are well supplied with a stock of plants of quality never excelled and the prospects are for an equally high grade supply of all flowers. The movement of the latter to outside points has already begun and the situation promises well, three days before the holiday. There is a good demand for high-colored carnations and violets are especially in favor. Roses are moving slowly at very little or no advance over prices heretofore prevailing, and all the wholesalers are able to do is to keep the stock moving at normal rates. There is an overstock of greens; smilax is not going as in other years; lily of the valley and bulbous stock generally finds a very slow market; lilies cut and on plant are selling well and a sale for the entire product is already assured. It is generally accepted that Easter trade in New England territory will be no less in volume than that of a year ago. Considering the business depression of the past winter, weather not interfering, the prospects are exceedingly encouraging.

BUFFALO Market conditions have changed but slightly in the past two weeks; the supply has shortened so little as to be hardly noticeable, prices holding about the same as last reported. It has been a matter of forcing the stock upon buyers at prices exceedingly low. Beauties are plentiful as well as all other stock. The trade is in readiness for a good Easter rush, and it is hoped that this week's business will be a record breaker. The retailers' windows are full of blooming plants and the "Today only" bargain sign seems to have been laid away for the time being.

CHICAGO Easter trade so far is very gratifying to Chicago people. Conditions have proven about the same as they did at the holiday season. Everyone predicted in December that the financial depression would make trade very light, but when the holiday week was over the books showed satisfactory results. Many predicted one month ago that sales would be small for Easter. Some of the largest plant growers in Chicago had their benches empty two weeks before Easter or practically everything labelled "sold." Everywhere the stock is fine and brings in the much-coveted and necessary dollars.

Thousands of potted lilies, hydrangeas, rhododendrons, spirea and roses as well as ferns are being rapidly transferred from the growers' benches to the retail florists' counters. Azaleas are in good demand and the stock is very fine. Baby Ramblers are supplanting Crimson Ramblers as bush plants, though there are offered some fine trained specimens of the latter. In cut flowers stock is fine and just plentiful enough. Many of the retail stores are beautiful and business lively.

INDIANAPOLIS Business continues to be changeable. Some days stock is well cleaned up, then again trade drags. The rose and carnation crops have shortened up a bit, but the bulbous stock is coming in such large quantities that this is not noticed. The call for Beauties and long stemmed teas continues good. Carnations continue to bring a fair price. Stock everywhere is looking fine and the quantity denotes better than words can tell the expectations of a large Easter trade. Azaleas are very popular this year, especially the lighter shades. Certain sections report the lily crop light but probably no difficulty will be met with in securing ample supplies. Extensive supply of lily of the valley, sweet peas and orchids will be available and will be much used owing to the shortness of the violet crop. Boxwood and laurel trees are handled in large numbers by the leading retailers. There is quite a trade in smilax and other greens of which there is a good supply.

NEW YORK Trade is light in cut flowers, most of the interest, as usual previous to a holiday, being concentrated in plants, of which there is a splendid supply. Cut flower shipments are not so heavy as they have been. The lightening up may be due in part to the hoarding of the cut by some of the growers; time will tell. There is no disposition to unduly advance prices and those who need a supply for Easter use can be accommodated with excellent material at normal figures. The quality and extent of the flower demand will not be in evidence until Saturday afternoon.

PHILADELPHIA Tone of market slightly improved last week. Stocks moved out better and there were fewer losses. Price levels were not greatly changed. Sweet peas continue one of the healthiest stocks, with quality, quantity and demand in thorough harmony. Roses are in good supply and generally excellent as to quality. Kaiserins have now commenced from the dormant plants, and lead in whites as to size and quality. Carnations held a little firmer and cleared up in better shape. Southern daffodils are over and the market draws a big sigh of relief. There are some good local greenhouse flowers of these still com-

ing in. Double violets are fair—much better than the singles. The latter are nearly over for the season, locally. Lily of the valley is still sluggish. Orchids are on the short side. Lilies plentiful; enough for all Easter demands, but quality on an average is under standard. Gardenias plentiful and rather quiet. Plant market at this writing—Monday before Easter—seems to be dragging a little, except in fancy stocks, which have been pretty well picked up. Average stocks will no doubt have their innings as the days go by.

TWIN CITIES Prices have not varied any for the last week or two. Stock is plentiful, but not too much so. Violets are about gone. The Easter rush has commenced, at least with the wholesalers. Easter prices date from April 14. The prospects for a good Easter trade are very promising. Lilies, carnations, roses, azaleas, astilbes,—in fact almost everything is in splendid condition and ought to find a ready market.

EXHIBITION AT BALTIMORE.

The National Sculpture Show is in progress at the Fifth Regt. Armory. The exhibition is a great success in every way. The decorations consist of hundreds of large specimen palms and other exotics from the parks, private places and some of the local florists.

Messrs. E. A. Seidewitz and C. L. Seybold arranged the Italian parterre garden and the green effect is unquestionably the best that has yet been seen anywhere; this is the consensus of opinion of the sculptors and others that have seen the exhibition. Many wagon loads of palms, laurel, holly, spruce and cedar were used to complete the backing of the statuary. The Gardeners' Club of Baltimore had intended to hold a spring show in conjunction with this exhibition, but being in the midst of Easter it had to be abandoned. Some of the florists and nurserymen, however, expect to place additional exhibits after the Easter holidays are over, as the exhibition will last over three weeks.

C. L. SEYBOLD.
Carroll Park.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$12.50.

WHERE AVAILABLE SPACE COUNTS

Here is a range of U-Bar houses erected at Tuxedo Park. You can see that the available ground space is somewhat limited by the existing roads. In such a location, every bit of bench room must count to best possible advantage; each house be equally efficient. No other houses meet these demands like the U-Bar, because of its extreme lightness, giving to each house much more light than other constructions. Send for catalog, it shows you why

714 Chestnut St., Philadelphia, Pa.

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Kari Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, P. Ince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

The Present Importance of Hardy Perennials

When as far as fifty years ago an experienced gardener and general horticulturist in mature years frankly admitted that his days of learning never ceased his fellow craftsmen perhaps thought him a modest, unassuming gentleman. In our present age of specialization and consequent rapid development, when even the specialist, unless he is open-eyed and ever alert, is apt to become rusty, we consider such utterances as solely sensible and nothing more. A strong pretension as to practical mastery of the whole field arouses the reasonable doubts of the serious-thinking and is taken with indulgence by the optimistic listener. Professional training on a broad scale and subsequent practical experiences in the various branches of horticulture can not be valued too highly, still initiative power and innate capacity to quickly grasp the essentials of a new situation are equally important. The former are the main resources of the grower, while the success in the management of a large concern to a greater extent depends on the latter qualities. There are always a number of horticulturists who by virtue of extraordinary results have proven themselves in more than one department equal to the specialist; still human faculties are limited, while the present horticultural possibilities appear well nigh unlimited, hence the ever present necessity for the gardener to learn. One of the floricultural branches which today should be made a general object of study is the growing and the advantageous use of perennials. Not alone the fact that we have comparatively few specialists with thorough and comprehensive knowledge of the vast number of species of this class of plants, but also the frequent lack of effective

DELPHINIUMS
A Revelation of Beauty.

arrangement and the want of proper care are evidences for an urgent need of learning for many of us.

A COMMON MISCONCEPTION

It seems that in the opinion of quite a number of gardeners the hardy perennial is still a side issue of little or no consequence. I should be glad to hear I was mistaken, for indifference toward such an important branch is today, to say the least, untimely. How often is in the imagination of garden owner and even gardener the planting of a herbaceous border first and last a labor saving scheme. "Perennial flowers thrive in any sort of soil and need very little care. They come up and spread out year after year and save the bother of raising a lot of annuals needing watering and hoeing and constant looking after." When, then, this very border, after a prolonged drought, without ground cultivation and irrigation, turns to be an eyesore instead of an ornament the disappointment is complete. "It looks so unsightly, scrubby and shabby and is not fit for a garden at all."

Indeed the perennial flower border as a labor saving scheme had better never be planted, for it is detrimental to the interests of the firm that furnishes first-class plant material, it reflects badly on both garden and caretaker, and in the given shape, constitutes a serious obstacle in the path of our general horticultural advancement. More thoroughness in the preparation of the ground before planting and a liberal amount of care afterward is my advice—to those who wish to derive credit and pleasure out of their herbaceous plantations.

CARE IN GROUPING

Among the multitudes of patrons and visitors year after year a lady last summer, when placing her orders for a number of recent introductions of perennials asked

SPIRÆA FILIPENDULA

to have her goods shipped at a certain date. "I wish to be present at the planting. My gardener is in the habit of scattering everything singly over the whole garden and I like to have the species and varieties grouped together by themselves. They show to better advantage and it saves me walking all over the place when cutting flowers. This incident is not a singular one. Its frequency shows the lack of understanding of effective arrangement. One plant of delphinium is handsome, but a clump of them, their tall erect spikes standing out in vivid contrast against a dark evergreen background, is a revelation of floral beauty to the eye. Japanese irises when planted singly among other herbaceous plants are very attractive indeed; still associated in a mass by themselves their character of growth and their marvelous richness in form and hue is more impressive; their flowering season becomes a special feature of the floral display of a season.

In response to a summons of a cottage owner located on an island several miles off the coast the swift motor boat carried your correspondent to the place of his call. Climbing up the rock shore I crossed the front lawn flanked by the beautiful white and black spruces which abound in this region. Along those woods I noticed some spacious perennial flower plantations, which, at a fleeting glance, showed all the evidences of good care. "Yes, flowers grow very well on this island," said the amiable lady of the house, when later, in the course of conversation I congratulated her on her cultural success; "but just look at the colors and how they insult each other." True enough, there was the orange red of tiger lilies alongside a clump of purple aconitums; the bright scarlet of phloxes lay in dispute with the blue shades of larkspurs; the rose pink of incarnilleas was fighting with the sulphur yellow of hemerocallis. "Color dissonances of this nature are unbearable to my eyes. Let us establish harmony where discord now rules. Will you please make a plan for rearrangement, taking proper regard for colors and have this plan carried out for me when planting time arrives?"

This was one of those examples, demonstrating the absolute necessity for the ornamental horticulturist and the modern landscape gardener desiring to cater to the needs of our refined classes to make himself acquainted with the principles of color harmony and train his vision as to agreeable contrasts and gradations of hues.

When associating varieties together, we naturally accentuate color and character of flowers of a given plant species. The results are singularly stronger effects. In the composition of herbaceous plantations of this nature we therefore should be careful not to join clashing shades, but should, to a certain degree, adhere to sim-

HYACINTHUS CANDIDUS

ilar laws the floral designer as artist is guided by. Thus, to the cultured eye the enjoyment of the beauty of flowers is heightened, for a pleasing harmony in the total effect intensifies it.

OPPORTUNITY FOR CULTURAL SKILL

There is not a single branch of ornamental horticulture offering more opportunities for an exhibition of individual artistic taste and talent and cultural skill than the herbaceous flower garden does today. Still how few of the vast number of gardeners realize this fact. It is true not everyone can have a fifty thousand dollar range of modern greenhouses at his disposal but it is equally true that in our days even a perennial border of moderate size can be made a means by which to show ambition and ability.

The generally keen interest of our wealthy and refined social classes in hardy herbaceous plants is nowhere more plainly seen than in our northern summer resorts. Here the high standard of plant material and the ever-changing brilliancy of floral outdoor displays are a source of generally unreserved admiration for them; an admiration, which is not seldom followed up by expressions of regret over the seeming impossibility to produce and enjoy the same rich displays on their distant suburban homegrounds. I fear it is not at last the perennial border as a labor saving scheme and the herbaceous flower garden as a side issue of second or third class order that deprives country home owners yet of the color brilliancy they here so frankly admire.

By all means the continuous study of hardy perennials is for the present and will be more so in the future an urgent necessity for every landscape gardener and care taker of home grounds. Their free use in all ornamental gardening is to be encouraged by all those desiring to take part in the progressive development of American horticulture.

Richard Rothe

We are sorry to announce that Mr. Rehder has been ill for the past two weeks. This explains the absence of his interesting Arboretum notes from our columns. We are in hopes that by next week he may be able to resume.

Narcissi and Daffodils

(Continued)

Daffodils proper, the large single-trumpet section of Narcissi, have within recent years held the center of the stage, and have been by far more popular here than their next-smaller cousins to whom we have referred in a former article; consequently a larger varietal number of this section is generally better known.

Yet notwithstanding the greater favor in which the large trumpet section has been held here, there still exists a remissness on our part in not introducing larger numbers of later superior kinds. When I recall, as a personal observer for over the space of twenty years and as an exhibitor and competitor for most of that time, our Massachusetts Horticultural Society shows, I cannot without misgivings compare our status in this specific field with that of our English cousins, seeing that during that long period of time the same kinds still continue to lift the "blue ribbon and cash" from the showboards; only three recent worthy new comers having been added during that time to the "Royal galaxy of Standbys" comprised of Emperor, Empress, Horsfieldii, Henry Irving, Double Von Sion, Princeps, Trumpet Major, Ard Righ, Dean Herbert, Maximus, Sir Watkins and a few others. Of the three added, Bicolor Victoria has been added for a number of years and a splendid variety it is: Madame de Graaf somewhat sparingly and, last but not least, comes Glory of Leyden, a massive and glorified Emperor in fact, with straw shading in the perianth.

While not minimizing the effectiveness and usefulness of double Von Sion for general decorative purposes, I cannot help regarding it as rather coarse and inelegant in a stand alongside the others mentioned; its doubleness has a pronounced discordant bearing when grouped with the large single-trumpet daffodil, and therefore it should be eliminated from this class in the show arena.

To whet the appetite of the yet lukewarm daffodil enthusiast and to stimulate a love for them, as well as to show our comparatively low status as general narcissi enthusiasts, is in a large measure the reason for writing this article. I will mention a few of the very finest varieties that are scarcely known as yet except through catalogue or magazine mention.

Weardale perfection, enormous size, known to measure five inches across, not many years ago worth two hundred and fifty dollars apiece, now somewhere about three dollars apiece; King Alfred, now eight dollars or less apiece, considered by many to be among the very finest; Duke of Bedford, four dollars or less each; Monarch, four dollars or less each, a grand massive variety and now famous as one of the parents of the finest white large trumpet-daffodils to date, Peter Barr, Madame de Graaf being the other parent. Pearl of Kent, another white from the same parentage but raised by the Rev. G. P. Hayden, the former having been raised by the firm from which it derives its name. These, however, are comparatively new and therefore very expensive, no less than one hundred and fifty dollars being asked for a single bulb in 1906. Pearl of Kent, is adjudged to be the equal in merit if not likely yet to eclipse Peter Barr. Cleopatra and a host of other fine varieties could be added to this list.

H. Furber

Soluble Fertilizers

AN APPEAL TO THE BUREAU OF PLANT INDUSTRY

Dr. Galloway has honored us with a communication in which he has reiterated his views as presented before the Carnation Society, but has not given us one iota of real information on soluble fertilizers. He says: * * * "fully as good results could be secured by the use of good composts alone as where chemical manures were applied." Just so, but he does not divulge any information for those ignoramuses who might like to try a few experiments under their own peculiar conditions. Is it not apparent that if chemical manures can do as well as composts then the chemicals may be advantageous to use for other reasons?

He says: * * * "florists are prone to overestimate the value of chemical manures, especially bone." * * * They certainly are, but the Doctor should be careful about calling Bone names or the manufacturers of the same will be after his scalp as their proudest claim is that there are no chemicals in theirs. Now, will not the Bureau of Plant Industry please tell the folks how to estimate chemical manures?

He says: * * * "it was extremely difficult to properly gauge the handling of these materials." * * * This we have knocked into us every few minutes, but as the Doctor has already concluded experiments where chemicals were used and has the data why not at least outline the danger zone in the use of these?

He says: * * * "if we were in position to always get good well-decomposed stable manure." * * * Yes, but how many growers are in this position?

Now let nobody mistake our attitude, we do not claim that soluble fertilizers are the whole thing. We are not optimists like Dr. Hensens. This gentleman, while on the roof of his office building, wholly absorbed in the Precession of the Equinoxes walked over the edge, and started down without aid of elevator. Being an optimist and wishing to allay the fears of his friends at the open windows he airily waved his hands at the various stories exclaiming, "All right, fellows, so far." Neither are we pessimistic. The Bureau of Plant Industry is too late now to shoo off this dangerous chemical business. Along with the approved use of chemicals in the field, does anyone think that the greenhouse man has overlooked all this? We hope no one reasons that the mere possibility of injury to stock will dissuade all brave investigators. It will not.

Consider Cyanide of Potash (or same thing, Potassium Cyanide). This is no candy for plants, nay, not even for human beings or dogs, but we ask in all seriousness, Has this entirely or even largely eclipsed its wide use as an insecticide? Proper chemicals are not harmful to life or property or even to plants, when *dilute enough*, and many are now using them. More want to and more must. Can not the Bureau of Plant Industry, having already the available data, publish a few pertinent facts as to experiments already performed with soluble fertilizers? Please! Dr. Galloway.

foundation for the confidence of those who looked for a big, enthusiastic rally of old-fashioned Easter flower buying. On the whole, it would seem that we should be very grateful that the temporary interruption of full prosperity did not turn into a rout. It was a splendid demonstration of the courage of the common people—that great medium class to whom bonds and coupons are almost unknown—that they came to the rescue of the flower trade at a time when just this support was sorely needed and although disappointment is inevitable in some lines yet there is cause for congratulation that the outcome was so much better than there was good reason to expect it to be.

About
"lap seam"
boilers

Since the publication of the rules formulated by the Massachusetts Board of Boiler Rules wherein it appears that in all boilers installed after May 1, 1908, "the longitudinal joints of a boiler, the shell or drum of which exceeds 36 inches in diameter, shall be of butt and double strap construction," many florists have been under the impression that no lap seam boiler could be set, sold or made in Massachusetts after May 1 and have in some instances been worrying and hurrying to get boilers set before the day mentioned. A careful reading of the Act of 1907 relative to the operation and inspection of steam boilers, under which the state boiler committee works, convinces us, and our view is endorsed by the Hartford Steam Boiler Inspection and Insurance Co., that the rule in question applies *only to such boilers as are not exempt* under Chapter 465 of said Act. As a result of the agitation promoted by HORTICULTURE, aided and abetted by R. T. McGorum and other members of the Gardeners' and Florists' Club of Boston, at the time the Bill was under discussion by the State Legislature last year "*boilers used for horticultural purposes exclusively*" were exempted, in Section 1 of said Act, from inspection. Boilers exclusively for greenhouse use may, therefore, be constructed with lap or butt joints as may be preferred.

The early flowering
sweet pea

William Sim's endorsement of A. C. Zvolanek's claim to be the original producer of this valuable class of this popular flower, as expressed in his address before the Gardeners' and Florists' Club of Boston will carry gratification to many who have followed the arguments which have been going on from time to time as to where and how this winter-blooming section originated. We do not feel competent to have any decided views on this subject, our sympathies, however, being strongly on Mr. Zvolanek's side but Mr. Sim is in a position to speak with a conviction born of experience in a line in which he has few rivals and no equals in this country or possibly in the world. Moreover, Mr. Sim is a gentleman of unassuming character who would not think of taking so decided a stand in a matter of this kind without a full assurance that he was right and could maintain his position if assailed and his advocacy of Mr. Zvolanek's cause puts the latter gentleman in a place which, we think, will please all fair-minded people. With Mr. Zvolanek as the introducer and Mr. Sim as the great grower of these beautiful, free blooming-varieties the sweet pea is certainly well entrenched for the future. Its position "next to the violet" in popularity, as Mr. Sim modestly classifies it, may yet give the violet trouble. It is essentially a flower of the people with a fragrance equally pleasing and more lasting than that of the violet and a range of color excelled by no other flower. Evidently its career as an all-the-year-round favorite has only just begun.

Easter, 1908

The battle is over and it is our privilege to record that, from the accounts which have reached us, it appears to have been practically a "draw" between the forces of stability and demoralization. Very dubious, indeed, did the outlook seem for Easter, 1908. With the depression and inactivity generally prevalent in all lines of commercial enterprise and the curtailment of expenditures by the class of people whose free spending has been so strong a factor in the prosperity of the plant and flower business, it was not easy to find arguments to rebut the predictions of those who foretold disaster for the Easter business. It was equally difficult to see good

Obituary

Edwin Hoyt.

Mr. Edwin Hoyt of the firm of Stephen Hoyt's Sons Co. of New Canaan, Conn., died April 17, and was buried April 20. In the death of Mr. Hoyt, New England loses one of its oldest nurserymen. His age was 76 years. He died of pneumonia with other complications, having been taken ill on Sunday, the 12th day of April.

The nursery business of Stephen Hoyt's Sons Co. was started in 1849 by Stephen Hoyt, the father of the deceased. After Stephen Hoyt's demise, the business of this firm was carried on by his sons, James Hoyt and the deceased, under the firm name of Stephen Hoyt's Sons. In 1901, the business was incorporated under the name of Stephen Hoyt's Sons Co., of which Edwin Hoyt became president and manager, and remained so until the time of his death. He was uniformly courteous to the younger firms of nurserymen, to dealers in nursery stock and to all customers. Although at the ripe age of 76, he was as active in business and his intellect as clear as that of a man in the prime of life up to the time that he was forced to take to his bed.

He was a member of the Grange and of the Pomological Society of the State and was considered an authority on horticultural questions. In the nursery business to which he was strongly devoted, he was ambitious, energetic, far seeing, and a great worker. Under his management, the business grew to be one of the largest, if not the largest, nursery firm in New England, but with all his ambition, he was a just man and no mistakes were made in his business which he would not rectify if properly explained to him.

Mr. Hoyt was in 1888 a member of the State Legislature from New Canaan and a member of the State Board of Agriculture, Vice-President of the Board of Control of Connecticut Experiment Station and a member of the Connecticut Nurserymen Association, Chairman of the Board of Trustees in the First Congregational Church of New Canaan and a member of the Board of Deacons at the time of his death, and otherwise actively interested in the town in which he lived. He was President of the First National Bank of New Canaan, and had large property interests which will probably inventory from \$300,000 to \$400,000. He is survived by his brother James, a widow, three daughters, and one son. He was very devoted to his family. The funeral was held at his residence and was largely attended by people from different parts of the State and from New York as well as by his neighbors and friends. The sad and sacred duty of bearing the remains to the grave was performed by his foreman, Edward Kelley, and his brothers, Frank, James and Harry Kelley, all assistant foremen in the nursery for many years.

So ends the career on this earth of one of our best known Christian business men.

Franklin Pierce Davis.

F. P. Davis, a prominent florist of

Summerville, Ala., died suddenly on April 6. Col. Davis was born in Mobile on June 18, 1852, was manager of the Mobile Compress Co. for thirty years, until he started in the nursery and florist business some five years ago. He quickly built up an extensive business, his establishment being one of the largest in the South. He was a member of the Society of American Florists and held the position of State vice-president this year. Col. Davis was twice married, and a widow and seven children survive him.

Martha Blakeston Earl.

At Bryn Mawr, Pa., on April 16th, aged 66. Mrs. Earl was the widow of the late George W. Earl, a prominent Philadelphia business man, who was long well known as a keen amateur horticulturist. One of her sons, Howard M. Earl, is manager for W. Atlee Burpee & Co.

Robert T. Price.

R. T. Price, Lawrence, Mass., died on April 15 in his eighty-first year. Mr. Price was a native of Wales and was for many years a prominent florist in the city, but retired some time ago from active business.

Joseph Quinn.

Joseph Quinn, landscape gardener, died at East Ryegate, Vt., on April 12, at the advanced age of 111 years. He was born in County Cork, Ireland, and came to this country in 1817.

Mrs. Albert Dirwanger.

We regret to learn of the death, four weeks ago, of the wife of Albert Dirwanger of Portland, Me. Besides her husband she leaves one son and one daughter to mourn her loss.

Theodore E. Horn.

Theodore E., son of Anna W. and Julius Horn, died at Arlington Heights, Mass., on April 11, at the age of 22.

BUSINESS CHANGES.

Frank J. Prouty has leased I. W. Bigelow's greenhouse, Spencer, Mass.

M. B. Kingman, Amherst, Mass., has moved his florist store from Amity street to Hunt's block.

Mrs. G. C. Sanborn of Lakeport, N. H., has leased the Gilman greenhouse, and will devote it to early vegetables.

J. F. Ammann has purchased the business of Mrs. Albert Dietschy, Alton, Ill., and will retain Mrs. Dietschy as manager.

G. S. Crego of Maywood, Ill., has removed to Portland, Ore., where he will continue in the aster seed business that he has so successfully established.

The American Evergreen Company succeed the A. J. Fellouris Co., at 52 West 28th Street, New York. They will shortly remove to 103 West 28th Street.

NEWS NOTES.

Henry Riler of Torrington, Conn., opened his greenhouse just previous to Easter for retail business.

G. Fleischer, Pueblo, Colo., has recently completed additions to his range of houses, heating and ventilating apparatus, at a cost of \$15,000, making his plant one of the largest and best equipped in that section.

EUROPEAN SOCIETY DOINGS.

Ghent Quinquennial Show.

This great Belgian horticultural show held by the Royal Agricultural and Botanical Society of Ghent promises to be one of the most important events in the gardening world during the present year. The show coincides with the one hundredth anniversary of the foundation of the Society and every effort is being made to celebrate the occasion with becoming importance. The schedule comprises 760 classes and is a publication of 118 pages giving full details of prizes, etc., to be awarded. The show will be opened by the King of the Belgians on April 28 and close on May 3.

The international jury consists of 247 members who will represent Germany, England, Belgium, Brazil, Denmark, Egypt, Spain, France, Holland, Italy, Duchy of Luxembourg, Russia, Sweden, Switzerland. P. J. Berkman and Julius Roehrs have been invited to represent the United States.

A list of the festivities appears in a recent issue of the "Tribune Horticole" (March 21). Those who have experienced Belgian hospitality will have no need to be reminded of the generous and lavish manner in which it is bestowed upon the foreign guests on such occasions.

Paris Spring Show.

The annual spring show of the National Horticultural Society of France will be held in the greenhouses of the Cours la Reine, Paris, on May 22 to 29. A horticultural conference will also be held at the same time. There is a good schedule, varied in extent, affording ample justification for expecting a fine display. American visitors to the gay capital at that time should not miss so important a sight.

INFERIOR DUTCH BULBS.

Editor HORTICULTURE:

Dear Sir:—We beg to say that we heartily endorse the sentiments expressed in your editorial in issue of April 18, believing that same is a step in the right direction, fully convinced that the foreign bulb sellers have made America a dumping ground for their inferior bulbs, thereby causing growers to suffer considerably by such inferior bulbs producing blooms of little value, and believe the time is now ripe when growers should dictate to these Holland bulb houses that they must deliver the growers the right kind of bulbs, otherwise if they cannot deliver the goods that the growers should then get together and refuse to give orders to such houses that are supplying this country with a poor quality of bulbs.

Hoping that the growers throughout America will stand firm in matters pertaining to the above, we beg to remain,

Yours very truly,

J. A. BUDLONG.

Chicago, Ill.

President Roosevelt has directed that a memorial oak be sent to East Haven, Conn., and planted on the site of Gen. Lafayette's camp, which was occupied during the war with Great Britain. The oak will be planted on Arbor day.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS'
CLUB OF BOSTON.

The announcement that William Sim would address the club on the topic of Sweet Peas Under Glass served to attract a very large attendance of interested members to the meeting at Horticultural Hall, Boston, on the evening of April 21. The hall was fragrant with the odor of lilies and sweet peas which had been contributed for exhibition. Mr. Sim's paper, which we are pleased to be able to publish in part in this issue, was intently listened to and after its conclusion an interesting discussion ensued. Replying to questions, Mr. Sim said that it was his custom to apply bone meal or sheep manure to the beds two or three times after the peas have begun to flower. In connection with his plan of using the same soil for years in succession, he said that on the completion of the crop he does not pull out the plants, but cuts them down, leaving the roots in the soil. He reiterated his belief that planting peas in a trench and drawing the soil about the stems after the plants begin to grow is not advisable for indoor culture, and saw also some objections to this process in outdoor culture. For the latter his advice would be early sowing and using not over a pound of seed for a 300-foot row.

The principal attraction of the exhibition table was a display of about thirty seedling lilies in bloom—hybrids between longiflorum and Philippinense. James Farquhar gave an account of same, stating that cross fertilization had been done in June, 1906, seed sown February 17, 1907, and on Dec. 17, ten months later, the first flower had bloomed. The plant on which this flower had appeared was in the group exhibited and had two new growths, very strong, on which buds were in evidence; and in a number of the blooming plants shown, second growths were already well along, showing that the peculiar herbaceous character of the Philippine lily, with its disposition to continuous growth and blooming, is well established in the offspring, while the robust growth and luxuriant foliage of the longiflorum are also well perpetuated.

William Sim showed a dozen vases of the finest of the winter flowering sweet peas. A hybrid caecolaria, which has been named Stewartii, was shown by George Stewart. Its seed parent was the rugosa Golden Gem and a flower of one of James' strain of the common C. hybrida furnished the pollen. Other exhibits were Liliun candidum and larkspurs from W. N. Craig, mushrooms and Gerbera Jamesoni from Thomas Cotes, Marechal Niel and Chatenay roses from Mr. Page of Newton Highlands.

Members of the landscape gardening class had the result of their winter's work on exhibition in the form of plans and sketches for laying out and planting home grounds, which were a centre of prime attraction.

PENNSYLVANIA HORTICULTURAL
SOCIETY.

Prof. Stevenson Brown gave a talk on weeds illustrated with stereopti-

con, which was well received and proved interesting and instructive. A sport of Cattleya Schroederæ was exhibited by A. Pericat, and was awarded a certificate of merit. This is a highly colored Schroederæ—pink with purple lip. A similar sport appeared about three months ago, and Messrs. Sander's representative thought so well of it that he secured it for his firm. A certificate of merit was also given to William Kleinheinz for Cypripedium Curtisii newbillo. Arrangements were made for the Peony show, end of May or beginning of June—date to be announced later. The June Rose and Sweet Pea show is also under the care of the committee, with power to split dates if season compels. On account of business exigencies in the hall management, the dates of the Fall and Spring shows had to be fixed at this meeting. These will occur Nov. 10 and March 22 prox.

NEW ORLEANS HORTICULTURAL
SOCIETY.

The regular meeting of the above society was held April 19. The chrysanthemum show committee reported that the premium list would be distributed by the end of the week. Several prizes which it is hoped the public school children will compete for have been offered.

E. Baker, late in charge of the gardens in Audubon Park, who has been a member of this society for many years, sent in his resignation. He is going out of the flower business, and entering commercial life. By unanimous vote, he was elected an honorary member.

A communication was received from J. A. Newsham, now in British Honduras, stating that he had been on a still hunt for orchids, and had secured forty-three snakes, which were obtained after nine days' journey on mule-back, and that the load was carried to the seashore on the backs of fourteen mules.

A. Alost invited the members to call at his place on Gentilly Road on May 3, and enjoy the annual dinner which he tenders the Horticultural Society. It is proposed to invite Mayor Behrman and Congressman Broussard. Transportation will be furnished to the society by the Steckler Seed Co., and if there are not enough conveyances, Herman Doescher has offered all vehicles that may be needed.

The secretary reported that J. Verburgh had lost his son, age seven years, who was crushed by an electric car. The sympathy of the society was extended to him.

CHAS. R. PANTER, Secretary.

NEWPORT HORTICULTURAL
SOCIETY.

This society will hold its annual Rose and Strawberry Show on June 22 and 24, 1908. Anyone wishing premium list and entry blank may have same by applying to the secretary.

DANIEL J. COUGHLIN, Secretary.

SOCIETY OF AMERICAN FLORISTS
AND ORNAMENTAL HOR-
TICULTURISTS.

The Frank Cummings Bulb & Plant Co., of Meridian, Miss., apply for registration of a canna as follows:

Canna W. E. Cottrell, seedling of L. Patry, originated with us. Flower large dark salmon pink slightly flecked with red, petals large rounding, slightly recurved, large branching flower heads, very broad leaves slightly edged with bronze, thick and leathery, growth very vigorous, height 4 feet.

Public notice is hereby given of this application for registration and any persons objecting to the same or knowing of any reason why the registration should not be made as above, are requested to forward a statement of their objections to the undersigned at once.

No objection being received within twenty days from this date, the registry will be completed.

W. N. RUDD, Secretary.

April 27th, 1908.

CLUB AND SOCIETY NOTES.

The Minnesota State Horticultural Society, organized in 1866, has a membership of 2,430. As may be imagined, it is a real live society and is doing good work.

The Civic League, Beaufort, S. C., held its annual flower show on April 7. Every available space was filled with the exhibits, among which roses predominated, although many rare plants were contributed, all from private sources, as Beaufort has no commercial florist.

PERSONAL.

Patrick Burke has been reappointed forest warden of Clinton, Mass.

A. Marine of Chicago has taken a position with the Park Floral Co., Denver, Colo.

The wedding of A. E. Wohlert of Merion, Pa., to Elizabeth Olmes Crippen was celebrated on Monday, the 20th inst.

Mrs. Thomas Young, mother of Secretary John Young of the New York Florists' Club, is critically ill at her home in Passaic, N. J. Mrs. Young is 81 years of age.

Roy D. Underwood, secretary of the Jewell Nursery Co., Lake City, Minn., has just been elected mayor of that city. When he assumes his office he will be the youngest citizen ever elected to this position.

W. R. Smith has been quite ill for some time at his home in the Botanic Garden, Washington, and is not yet able to leave his room. A bad cold brought about a return of his old heart trouble and the necessity for absolute quiet has made it impossible for him to receive visitors.

WINTER-FLOWERING SWEET PEAS.

(Read before the Gardeners' and Florists' Club of Boston by Wm. Sim.)

The sweet pea is one of the staples in cut flowers, ranking in this respect next to the violet. I will not go into the ancient history of the sweet pea, but confine my remarks as much as possible to the winter or early flowering section, the advent of which I think is within the memory of the youngest member here. It is only within the past ten or twelve years that the sweet pea has been placed before the people in the winter months. By growing the old varieties under glass it was only possible to have them at the most five months of the year. With the advent of the early flowering section it was made possible to cut flowers all the year. The first sweet peas I grew under glass were such varieties as Blanche Ferry, Emily Henderson, Katherine Tracy, Countess of Radnor and Emily Eckford. These are of the late or summer flowering section. These varieties when sown under glass

January, 1892, he found some of the plants producing flowers which were small in size, and the plants only attained the height of two feet, but by crossing and re-crossing a strain producing large flowers on long stems, and growing six feet in height, was secured. At this time Mr. Zvolanek was not in business for himself, and raised them mainly for pleasure, and gave seed to any of his friends who wanted some. While in the employment of Mr. Thomas Young of New York in 1895-6 he had two houses of Christmas Pink. If this story is correct it shows that he must have had them about the time he states in order to get seed enough to plant two houses in 1895. This was three years before it was put into commerce by Burpee.

The origin is also claimed by Thomas Gould of Ventura, California. This is the variety sent out by Burpee as "Earliest of All" in 1898. If I am right, I think this strain of Mr. Gould's was first seen in bloom among plants of Blanche Ferry. In 1898 Mr. Zvolanek started with Emil Leuly of West Ho-

EARLY FLOWERING SWEET PEA, MRS. GEO. W. LEWIS
At Wm. Sim's, Cliftondale, Mass.

in August would not come into bloom until the end of the following April, and seed sown in January would flower as early as that sown in August. They have a season of flowering and will not flower before that time, no matter when the seed is sown. The early-flowering sweet peas are just the opposite in this respect, for in many cases they commence to flower when only a few inches above the soil, and if sown in July they will flower in August. They make a very poor growth in summer and do not do so well as the late varieties. In the winter months, however, they make a very strong growth, and while making this growth they bloom.

Origin.

The origin of the winter-flowering sweet pea is something that seems to be a mystery. A. C. Zvolanek of Bound Brook, New Jersey, is one of several who claim to have been the originator. He claims that he made his first experiments twenty-five years ago, but did not succeed until he made a cross with the European vetch. In

Hoboken and had at that time six houses of Christmas Pink and Florence Denzer. Now there is no difference between this Florence Denzer and Mont Blanc. They are the same in every respect. Benay of Erfurt, Germany, sent out Mont Blanc I think in 1902, or four years after Mr. Zvolanek was-raising it in Hoboken. If Mr. Zvolanek would again cross with the vetch the old varieties, and secure an early-flowering strain, his claim would be substantiated. He has promised to do this.

Sports.

Many claim that the varieties of this strain are habit sports; that they produce flowers identical to the late varieties from which they sported. I do not believe they do sport myself, for I have grown a great many both inside and outside, and have never had one sport with me. Mr. Zvolanek, who has raised practically all the winter-flowering varieties, says he has never had one sport with him. Mr. Zvolanek raised Christmas Captain as a result of a cross between Captain of the Blues and Christmas Pink. A grower in

is soliciting your patronage during the S. A. F. Convention.

Very truly yours,

M. J. HOENIG, Prop.

England claims Captain of the Blues sported with him from the late to the early type, but I believe this was only a stray seed of Christmas Captain which had in some way gotten among his Captain of the Blues, for he was growing seed of Mr. Zvolanek's at the time. I think the cause is apparent. It is also possible that if he were growing the two types side by side cross fertilization may have taken place, and the early flowering one may have been the result. It is claimed by some that sweet peas do not mix, but the more I grow of them the more convinced I am that they do mix more or less. There is not one variety I grow but what quite frequently exposes its pollen and pistil, so in this case what is there to prevent insects or flies from carrying the pollen? Some claim these are detormed flowers and would not go to seed anyhow, but this is not the case, for if they are left on the plants they go to seed every time and produce fine seed. I am told this is far more marked on the seed farms in California than in a greenhouse. I believe the early sweet is the result of a cross between the old type and some other species. I do not believe the late sweet pea can sport from the late to the early flowering, and will only believe so when I have conclusive proof that this is the case. Many growers on seeing some variety they imagined they sowed, without examination immediately call it a sport. They do not stop to consider that there are many ways for that seed to get there. The seedsman and seed grower cannot always prevent the seed getting mixed.

(To be Continued)

PHILADELPHIA NOTES.

David Rust, receiver of the William Graham Co., reports a fortunate deal on their left-over Easter lilies. Some two thousand pots with two to four flowers each were sold at ten cents a flower as souvenirs to the matinees of "The Time, the Place, and the Girl," running this week at the Walnut Street Theatre.

Edwin Lonsdale has accepted the office of correspondent for the "Florists' Exchange" in this locality. P. M. Read will look after the business end. Mr. Read, we understand, is an advertising agent with two or three other papers on his list, the principal one being a publication entitled "Novelties" (not horticultural novelties).

Chas. P. Poryzeas says concerning the Easter trade: "Cut flowers fine-plant trade very disappointing." As the days go by after Easter we hear more of left-over plant stock, confirming our judgment in our Easter plant review, which was written earlier and under difficulties. The special difficulty was refusal of those interested to give up information. We regret as much as anybody the unfortunate conditions; but we are here to report facts and not fairy tales. As a sample of the readiness of the trade to commit itself to definite statements, here is the Delphic utterance of Leo Nielsen: "Well! we were very busy. We are still getting enough to eat, and we can still pay our bills! How do you suppose a correspondent could write a market review on the hole of a doughnut?" The trouble with many is that they look on those serious things like market reviews as a joke—the same as Joe Cannon does with the Democrats when they call for the yeas and nays."

NEWS NOTES.

Shirley & Fowle, Danvers, Mass., opened their greenhouses to the public during Easter week, with an unusually attractive display.

Thaddeus N. Yates & Co. report nursery business very brisk and much better than expected. They are just commencing the shipment of a large order of trees for the Massachusetts Highway Commission.

NOTES FROM THE MASSACHUSETTS AGRICULTURAL COLLEGE.

A Carnation Show.

The department of floriculture have arranged for a carnation and rose exhibit in Wilder Hall Friday evening, April 24, and Saturday, April 25. It is felt that the students at the college should receive a better training in varieties of commercial crops than they can get from materials now grown in the vicinity. The students feel that they cannot afford to travel for this study, therefore this exhibit has been arranged. Professor E. A. White has written many of the most prominent rose and carnation growers, asking if they would send one or two dozen blooms of their standard varieties for exhibition at this time, and has received many cordial replies.

Proposed New Greenhouses.

The trustees of the college are asking for a legislative appropriation of \$34,000 for a new range of greenhouses of modern commercial type, with an attached teaching building for use of the floricultural department. It is not the intention of the college to engage in commercial floriculture, but a new range, adapted to giving the students up-to-date instruction in methods of growing cut flowers for the trade, is badly needed. It is expected to build an instruction building costing about \$15,000. This will contain a large laboratory and work room to accommodate at least fifty men at one time, a class room for one hundred men, smaller class rooms, office and a room for the exhibition of material used in greenhouse construction. The basement will contain a soil and fertilizer room, a cool room for bulbs and rooms for storage of pots and implements.

The greenhouse range as now planned will consist of a palm house 30x40 ft. on the east end of the general work-room. From the south side of this work-room a house 12 feet wide and about 180 feet long will run directly south. This will be used for propagation and for general plants. On the east and west sides of this low, narrow house the special houses of the range will be built. This will provide for a full southern exposure for each house. The range as planned includes a students' house for special student work, 30x50 ft.; violet house, 24x50 ft.; chrysanthemum and bedding-plant house, 24x50 ft.; lettuce house, 24x50 ft.; rose house 24x50 ft., a carnation house, cucumber house and tomato house, each of the same dimensions.

Seed Trade

Interest is now centered in the Mann Pure Seed bill, and the efforts of seedsmen to trim that measure into some shape that will not imperil nor outrage their rights are being watched with keen interest not unmixed with anxiety by the trade in general. An influential body of seedsmen had a hearing at Washington before the House Committee in charge of the bill, on the 21st, and it is pleasing to note that their efforts were not fruitless.

The past week as a whole has not furnished the sort of weather to boom the retail seed business, yet there has been little diminution in activity, with a very few exceptions, but the March-like weather of the early part of this week was well calculated to make people think of furs and furnace fires instead of gardening, yet if they would only recall the promise that "Seedtime and harvest shall not fail," they would order their seeds, bulbs, etc., and have them in readiness for the day when warmth and sunshine shall again give promise of the harvest. As to plants it is not surprising that people should not buy these until the moment arrives for putting them out into the ground. For the quality of its weather, April of this year shows but little improvement over its namesake of a year ago, but let us hope May has something more cheering for all.

The next Canners' Convention will not be held at Chicago, according to what seems to be reliable information just to hand. For several weeks this matter has been in the air, but now appears to be settled. It seems that the Chicago representative who at the Cincinnati Convention took the Canners up into a mountain and showed or promised them, not exactly kingdoms, but many alluring things which would cost them nothing, was indulging in super-heated air of the Chicago brand.

The Canners, to whom the promise of something for nothing appeals with quite irresistible force, eagerly accepted the proposals of the "Windy City" man, but in the light of investigation the whole affair appears as a money-making scheme, for which the Machinery and Supply Men's Association were expected to furnish the sinews of war. Space for their use was to be sold by the square foot at prohibition prices, and other conditions imposed which could not be patiently considered. It is also said that, in this beautiful scheme, only one member or employe of a firm was to be

furnished with a pass, others being compelled to pay each time they entered, and when it is recalled that some exhibitors have ten to fifteen men, it can be readily seen what this would mean. As to the Canners, it is said that the officers were to receive passes but the rank and file were to pay.

It is evident that whoever hatched this scheme was under the impression that only the Canners were to be considered, and that wherever they decided to go, the Machinery and Supply Men would feel compelled to acquiesce, hence the nicely-laid plan to make them pay the toll, but the schemers reckoned without their host, and no modification of their plans nor any overtures from them will receive serious consideration now.

Two places are prominently mentioned as likely to be chosen—Louisville and Atlantic City. A third—Denver, receives some consideration, but a possible dark horse about which little is said just now, but which may after all carry off the prize, is Rochester. Don't overlook Rochester, N. Y.

The catalogue register is the seedsmen's best general asset. Its loss would mean practically beginning business all over again. A. T. Boddington had this in mind when he installed a new six-ton safe in his store at 342 W. 14th street, New York, last week.

As we go to press we have news from Washington that the Mann Seed Bill has been laid aside for this session of Congress and perhaps for ever.

W. Atlee Burpee and family of Philadelphia sailed for Europe on the S.S. Adriatic April 22nd.

D. I. Bushnell of St. Louis sails from New York this week on a short European trip.

Boddington's Double Pink.

Boddington's Double Scarlet. A most striking color.

Boddington's Double Crimson.

Boddington's Double White.

Boddington's Double Mixed.

Each, ½ pkt. 60 cts., pkt. \$1. Collection of above 5 varieties, ½ pkt. each, for \$3.

BODDINGTON'S STAR PRIMULA

(*Primula stellata*)

We offer a greatly improved strain of these new and free-flowering Primulas, saved from named varieties only. They make excellent pot plants for decorative purposes.

Boddington's Giant White Star. Pure white.

Boddington's Giant Purple Star. Rosy purple.

Boddington's Giant Red Star. Intense carmine-red.

Boddington's Giant Blue Star. Heavenly blue.

Boddington's Giant Pink Star. Soft pink.

Boddington's Giant Salmon Star. Deep salmon.

Boddington's Star Choicest Mixture.

Each of above, ½ pkt. 60 cts., pkt. \$1. Collection of above 6 varieties, ½ pkt. each, for \$3.

Boddington's Giant Double Crimson Star. Very fine double form of the Stellata type. ½ pkt. 60 cts., pkt. \$1.

PRIMULA OBCONICA GIGANTEA

Primula obconica gigantea Kermesina. Beautiful deep crimson.

Primula obconica gigantea alba. The pure white flowers greatly enhance the beauty of the existing lilac, rose and crimson shades.

Primula obconica gigantea lilacina. Beautiful lilac.

Primula obconica gigantea rosea. Lovely rose.

Primula obconica gigantea grandiflora. Mixed varieties, containing pure white to deep crimson.

Each of above, ½ pkt. 30 cts., pkt. 50 cts.

PRIMULA floribunda grandiflora. Buttercup. Small yellow flowers, borne in great profusion, fine for pots. Pkt. 50 cts.

Forbesi (Baby Primrose). Pkt. 25 cts.

PRIMULA KEWENSIS

(*Giant Buttercup*)

This plant is a strong grower, with bright green leaves and numerous erect flower-scapes 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb nearly an inch in diameter. As a winter flowering decorative plant it is an acquisition; very floriferous when in a small state. ½ trade pkt. 50 cts., pkt. \$1.

GLEANINGS FROM THE CHICAGO PLANT GROWERS.

Tausendschon proved itself one of the best new roses for Easter trade. The beautiful pink flowers grow lighter with age and show different shades on the same plant. One of its best characteristics is its ability to stand handling without dropping its petals. Those who grow it this year will grow many more next year for, as a pot plant, it is a success. Pink Baby Rambler does not gain in popularity because the petals drop so easily. White Baby Rambler has the same defect. Dorothy Perkins and Lady Gay were fine for Easter pot plants and the large specimen plants sold readily for decorating the windows of the retail stores. Clothilde souvert came in nicely for Easter trade but is not quite satisfactory as it requires very careful handling. Richmond does not make a good pot plant.

Rhododendrons were fine for show plants but not much money in them for the grower. Azaleas brought good prices and with hydrangeas made a showy stock that nothing could surpass.

Additional orders showing trade was better than anticipated came in until Saturday night. The smaller and less perfect plants sold to the department stores and everything was cleaned up.

All around, the growers are pleased with the Easter trade. Though they had an immense stock they could have sold more. One of the largest growers said trade was the best he had ever enjoyed.

Chicago florists had something of a weather scare Easter week. The wind

was in the south and the thermometer on Tuesday registered 84 degrees. Many looked anxious as they realized what it would mean to the Easter stock if the temperature remained so high. Wednesday morning was still very warm when the wind suddenly changed to the north and the thermometer rapidly fell, dropping 17 degrees in one hour, and before night registered 54 degrees lower than in the morning. It was hard on the men who had left their overcoats at home but the Easter stock was saved. Easter Sunday the weather became warm and delightful.

PLANT IMPORTS.

From Glasgow: T. Meadows & Co., 1 cs. gooseberry bushes.

Via Southampton: C. C. Abel & Co., 16 cs. plants; H. F. Darrow, 21 pgs. seed; Sundry forwarders, 26 cs. plants

EASTER PLANT TRADE IN PHILADELPHIA.

Some say it was very good, some say only moderate, others very bad. It was good in spots but not up to standard even in the good spots. The moderate and poor spots hated to own up that they came under that category and the reviewer had to use his eyes and judgment rather than listen to the rose-colored accounts. No one wanted to admit that there was anything the matter with his particular spot. On the whole it may be put down as a settled and incontrovertible fact that there were more lilies, azaleas, spireas, hyacinths, cinerarias, and other Easter plants grown for this market than ever before. 1907, and the years immediately preceding, had been on the as ending scale as to consumption and the preparations for 1908 were for an even larger trade. Instead of that, the buying power of the public has been largely curtailed this year, and so we have had twice as much stock as the market could absorb, with consequent demoralization in prices. The regular flower stores did fairly well. The larger growers who supply the highest class trade also did well. But the enormous army of street vendors, druggists, grocers, butchers, and what not—as well as the outlying florists with a local trade—suffered severely. By Saturday afternoon, when the rain commenced, half the stocks were still unsold and then came a stampede. Prices went to pieces completely and many couldn't even give the stuff away. There was far too much of everything—but lilies were the worst! Many growers reported losses of 50

CATTLEYA TRIANAE

Just to hand in perfect condition, a large shipment which we offer in cases containing about 40 fine plants aggregating over 450 bulbs, for \$55 per case.

Also CATTLEYA LABIATA in cases of 400 bulbs, for \$55 per case.

Also ONCIDIUM VARICOSUM ROGERSII, at \$18 per dozen.

LAGER & HURRELL, - - Summit, N. J.

per cent. on their bulbs planted and even at that there were 50 per cent. more than the market needed. Even for a prospective good season the over-planting of lilies last fall, as indicated by this influx, must have been simply absurd. Now we will see everybody rushing to the other extreme in placing next season's order. Lilies will be wanted next year but it is best to be on the safe side and go slow. That is far from dropping them altogether and rushing off to something else in a panic—just because indiscreet over-planting has been indulged in. Among novelties that met favor was the new Rambler rose "Tansendschon" and the snow-white *Hydrangea aborescens*. Some large plants of *bougainvillea* were to be seen but we have not heard of any sales. Azaleas were never better as to quality. The miniature crimson azaleas *Hexe* and *Hinodegeri* were particular favorites for made-up baskets. *Ericas* were seen here and there in moderate quantity and *Farleyense* and *Amerpohli* and *Whitmani* ferns were used with fine effect. Square terra cotta vases of a rough finish and natural grey in color with raised ornaments were a novelty and sold well when filled with well-arranged plant combinations. The birch basket was seen in great variety. Some lovely Dorothy Perkins and Lady Gay roses were seen in the select stores. *Leutzia crenata* fl. pl. was in moderate supply while the more common *gracilis* was exceedingly plentiful. Hybrid roses such as *Brunner*, *American Beauty*, *Mrs. Laing* and *Paul Neyron* were in good supply but the demand was not particularly brisk. Pot gardenias and jasmines in meagre supply and with little call. *Genistas* less in evidence than ever this year. *Crimson Ramblers* were plentiful and in general very well done. These cleaned up better than many other stocks. *Rhododendrons* sold well especially the new one—*Pink Pearl*. Foliage plants were little called for separately, but many of the smaller sizes of palms, crotons, dracenas, and ferns, were used in made-up work.

The opening of the new establishment of J. H. Orth, McKeesport, Pa., on April 4, was a great success and throngs of people were in attendance. Several thousand carnations were presented as favors to the guests.

Of Interest to Retail Florists.

The retail stores were well stocked and presented a very attractive appearance. The cool weather during the latter part of the week made the stock in the best condition for handling. Many of the windows showed considerable originality. One was especially noted. The floor was covered with green moss and in the center was a little mound covered with Baby Rambler roses. A large specimen plant of Lady Gay very effectively covered the end of one window. Azaleas held the place of honor next to Easter lilies. One large retailer opened up a second store in anticipation of the Easter trade and reports his venture a great success. A few plants are left, some of them fine ones but it is impossible for the retailer to sell out as closely as the wholesaler and the left-overs are selling at half price to close out. The general opinion prevails among the retail men that the white flower was not a favorite for Easter except in the Easter lily. Among those who handle both the cut flowers and the pot plants the feeling is strong that pot plants are steadily gaining in favor as Easter offerings.

Primula obconicas were artistically arranged in baskets and fancy boxes and moved rapidly while specimen Lady Gay, Dorothy Perkins and Souper roses found ready sale. Like the wholesaler the retailer is glad Easter is over but rejoices in the hard earned dollars it has brought.

None of the retailers regret that Easter has become history. While it may take a few days yet to post up and ascertain the actual financial result, on one point all retailers agree. The fact seems to be that the quantity of business is ahead of last year but the quality is below. Prices averaged the same although somewhat lower in a few instances. This is borne out by the fact that large baskets, \$20 Beauties and other \$10 roses found very few buyers. Lilies, in pots as well as cut, and Baby Rambler roses found ready sales. Violets were not enough by far; one firm picked 48,000 and was completely sold out by 5 p. m., Saturday.

In Worcester, Mass., the Easter business among the retailers was fully equal to that of any previous year, and prices advanced but a trifle. The buying began practically a week before, when budded plants were given the preference. Violets were scarce and disappeared early, but primulas and pansies were abundant and proved great favorites. One dealer made a success of small roses arranged in a close, compact bunch with little foliage, for the corsage. The early buying, however, did not affect the final rush, for which the moderate prices, within the reach of all purses, may have been in a measure accountable.

Easter Market Reports

DETROIT Local wholesalers report a greatly increased Easter trade with an unprecedented demand for violets and roses. The former were sold out by Saturday noon; one firm alone had 125,000. A very strong demand cleaned lilies up rapidly; the supply was somewhat weakened by heavy shipments up-state of potted lilies. Of carnations there were about enough to go around, bringing mostly \$2.00 per 100, a comparatively small quantity selling at \$1.00 per 100. All bulbous stock was in good demand but the enormous supply on hand made it a drug after all. Greens of all descriptions found buyers readily. Prices averaged same as last year.

INDIANAPOLIS The Easter trade is reported as generally favorable with a clean-up in plants as well as cut flowers. There was an abundance of good stock in all lines. There was a slight advance in price of Beauties, teas and carnations, but the volume of stock was handled at conservative figures. The heaviest call was for Easter lilies, both cut and pot. There was a good supply of these, the largest proportion of which was rather short-stemmed. While there were no novelties in the plant line, a more complete list has never been shown with results most gratifying. An abundance of lily of the valley, sweet peas, some orchids and an unlimited supply of bulbous stock sold well. The amount of business totalled up about equal to previous years, notwithstanding the fact that no top-notch prices were received.

PHILADELPHIA Easter week trade, taking stocks all along the line was as good as last year in cut flowers as far as volume was concerned but prices were of course very much under the average. The only flower that did any soaring was the orchid. Orchids were quite scarce and in sharp demand with prices in sympathy. Roses were equal to requirements and showed no great change in prices. Fancy long stem American Beauty were in large supply, mediums were scarce, and shorts poor in quality

and too many. Red and pink roses went even better than the whites, which is unusual for Easter. Carnations were in good supply and moderate in price. Double violets are still fairly plentiful, the Rhinebecks now helping out the decreasing locals. Immense quantities of lily of the valley consumed and yet no upward movement in prices. More people have gone into growing this crop—not only locally but at distant shipping points that used to consume much of the surplus. Mignonette is a glut. White daisies ditto. Yellow daisies the best sellers. Sweet peas continue fine and went all right. Greens were in good supply and fair demand. As a catch crop for Easter, Brimmer and Druschki roses were welcome. The Druschki is not a very good carrier—bruises too easily. But no white can beat it for purity.

EASTER MARKET REPORTS

While it is true that some **BOSTON** growers were badly left on lilies and rambler roses and some retailers report a heavy left-over accumulation of both plants and flowers, and while it is also a fact the enormous avalanche of material brought to the wholesale markets on Saturday morning had, in many instances, to be unloaded at bargain-counter prices, yet our observation leads us to agree substantially with those who say that, as a whole, Boston's Easter was a satisfactory one. Nobody claims that it exceeded or equalled last year in amount of business done, but the truth is that nobody expected it would, and all were agreeably disappointed in getting as much as they did. The plants presented for the critical buyers of the Hub were, as a rule, the best ever offered in this market. They were of the usual Easter varieties, the only absolutely new subject coming to our notice being some handsome pots of crimson clover in bloom. In the plants left over on the hands of retailers, lilies, hydrangeas and azaleas predominated, yet the number of these specialties sold was so enormous that the unsold material was of comparatively little consequence, and the record of recent years to the effect that Easter is practically a plant holiday was not disturbed. The receipts of cut flowers were the largest ever. No previous Easter could show anything to compare with this. Under the circumstances it is not surprising that all kinds of expedients had to be resorted to in the struggle to keep the decks cleared on Saturday as shipment after shipment in inexhaustible supply came to hand. The best sellers were violets, red carnations and Richmond roses; the worst sellers were Bride and Bridesmaid roses, white carnations, stocks and white material generally and, worst of all, bulbous stock. Killarney, Beauty and any bright colored roses sold fairly well; of these, however, and of lilies there were considerable left in retailers' hands, the wholesalers having succeeded in unloading pretty clean on these items. Lilies at wholesale held at top-notch figures except where excessively short-stemmed, in which case they encountered trouble. There was less complaint concerning stale flowers than heretofore. The widespread conviction that prices would not advance for Easter was undoubtedly responsible for this pleasant experience.

Ideal spring weather **BUFFALO** opened up Easter week and continued until Thursday, giving all the plants in bud ample time to open for the expected rush, the real sale days being Friday and Saturday. The market was well supplied with plants as well as cut flowers. In the plant line, azaleas, Crimson and Baby Ramblers and lilies were the main features, while other stock also moved well. In the cut flower line there is much to be said. Violets had the best cleaning up in some time, the quality being good. All orders were filled complete, and in other stock such as carnations, roses

and bulbous flowers, there was plenty to be had and all of good quality, but prices not up to previous years. Beauties were in good supply, but demand not heavy. Richmonds sold out clean. Killarney, Kaiserin, Carnot and others were seen in quantity and up to Saturday were well moved. The man growing bulbous stock got very little in return; in this line there was no demand whatever. As for the lily of the valley it had the best cleanup in years for the wholesaler, but good portions of mignonette were unsold and carried over. Sweet peas, gardenias, snapdragon, lilacs and orchids sold well. Of carnations there were enough to be distributed and all of good quality; on this line the demand was good. The shipping trade was excellent both in cut stock and plants, but had not three days of rain come at the end of the week there would have been much less stock to carry over.

Wieland & Risch:
CHICAGO "Trade fine; too tired to even estimate it, but know it was good. White flowers a little slow."

E. H. Hunt: "Trade even better than we anticipated. Prices on cut flowers not up to last year but totals show up well."

Bassett & Washburn: "Easter trade in advance of last year. Demand for pot plants growing."

Poehlmann Bros. "Cleaned up on flowers but prices lower than last year."

Lloyd Vaughan: "Perfectly satisfied with results. Demand for pot plants growing."

Mr. Kruchten: "Flower sales not up to average. Pot plants sold well."

Mrs. Frank Ben: "Plant trade growing. Sales of cut flowers will not equal those of last year."

Mr. Bentley: "Easter trade satisfactory. Colored stock sold well but white flowers were a drag. Beauties scarce and in demand."

Peter Reinberg: "Big demand for Richmond roses. Could have sold many more. Also unusual demand for Beauties for Easter."

Mr. Weitor: "Up to my expectations."

Chas. McKeelar: "Easter trade very fair."

J. A. Budlong: "Easter trade very good."

E. F. Winterson: "Carnations too plentiful and made prices low but trade on the whole was fair, and better than anticipated."

J. B. Deamud: "Trade satisfactory."

New York's Easter **NEW YORK** was not much of a record breaker yet it did well, everything considered. The record breaking, such as it was, came on the wrong side, unfortunately. Never before has the Easter lily been so thoroughly knocked out. There was a slight apprehension in some quarters, beforehand, that trouble was in store, and that it would be the part of wisdom to unload stock as early as possible at moderate figures, but there were others, with equal opportunities for scanning the field, who insisted that lilies would make a good finish, in time-honored style, and scouted the idea of anything but top prices. Those growers and dealers who sold out early had good cause to congratulate themselves, even though they had been obliged to accept prices unprecedentedly low for first-class lilies. Saturday had not half gone when it became evident that a lily slaughter was imminent, and before night he who could get four or five dollars a hundred had reason to rejoice, while thousands of blooms were left over, on plants or cut, to be unloaded on Sunday and Monday for two dollars a hundred. It was certainly a great disappointment and also a great surprise and its full significance is not yet comprehended. The wonderful recuperative power of the New York flower market has often been commented upon, but one never knows what particular vein it will strike. This time the violet was the lucky item. After a month of degradation, hardly worth a dollar a thousand on the street the violet rebounded to old-fashioned Easter values and, although the shipments were heavy and the weather rather unpropitious for violet wearing, the prices held strong to the last and everything went. Roses were in reduced supply and this helped the rose market so that a reasonable record was made. Carnations were, perhaps, in lighter quantity than they had been, but there were lots of them and they cleaned up much better than seemed probable. Bulbous stock has a certain appropriateness for Easter and the sale of daffodils, tulips, hyacinths and lily of the valley was fairly good, but at low figures. There were but few orchids in sight, gardenias were also few in number, and among the choicest things offered were the crested moss rosebuds which brought \$1.50 per bunch of six or eight sprays, while the common moss buds went slowly at half that figure. The variety of unusual things—odds and ends, etc. was quite extensive and all the re-

(Continued on page 51)

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$17.50.

Wichita, Kan.—W. E. Bidleman, range of houses, 140x150.

FIRE RECORD.

The greenhouses of Paul F. Tauer, Lebanon, Ind., were destroyed by fire on April 9; loss, \$2,500; no insurance.

E. C. Ryman's greenhouses at Newark, N. J., were destroyed by fire on March 29; loss, \$2,500; insurance, \$1,500.

Herman Bowman, florist of White Plains, N. Y., was a loser in a fire which destroyed the Brandes Building, April 10.

Early on the morning of April 13 fire was discovered near the boiler in Napoleon Lemay's greenhouse, New Bedford, Mass. It was soon under control, but considerable glass was broken by the streams of water directed toward the blaze.

Mr. Knopf, of the B. K. & B. Floral Company, has in Ruby a phenomenal carnation, it being a sport from Harry Penn, with all the characteristics of that variety except flower and stem, which are magnified practically three-fold. The production of this mammoth bloom does not appear to exhaust the plant, however, and the crop seems to be equal in number of blooms to that of the parent variety.

EASTER MARKET REPORTS.

(Continued from page 573)

tailers seemed disposed to invest in a little of everything, including such items as snapdragons, which were of superb quality, corn flowers, obconica primroses, which were made into very attractive bunches bordered with dark galax leaves, stocks, yellow irises, heliotrope, swainsona, and so on. The first shipment of southern lilac were in evidence but excited no particular interest outside of the Greek street dealers who, as soon as this becomes abundant and cheap, handle large quantities of it. The plant trade was fairly satisfactory to the retail people and, of course, to the growers who, as usual, had everything well sold in advance. Azaleas were in greater preponderance than ever, but fortunately the popular fancy remained loyal to these showy things and the number left over was not seriously large. Rambler roses were also in good favor, the light pink sorts apparently robbing the old Crimson Rambler of some of its former prestige and adding greatly to the attractiveness of the florists' windows. It was noticeable that the average run of plants of all kinds in sight was much below former years, and the demand for large specimens of anything was very small. Made-up baskets and jardiniere were used quite largely in some of the more pretentious stores, but as a rule the single plant without much artificial adornment held sway and evidently the public, while bent on the time-honored custom of buying and giving Easter plants, was not disposed to squander any money on finery. About the majority of stores there was an absence of any disposition to present special window displays. Azaleas lilies, genistas, hydrangeas, roses, daisies, heaths and acacias were simply herded together in gaudy confusion. Weather conditions were not conducive to outside displays and most of the material was kept indoors, deliveries being made as a rule in covered vans, although the thermometer was not low enough to make elaborate wrapping necessary. To sum up—Easter weather and Easter business might have been better, but it also might have been very much worse.

WASHINGTON

ness was done this Easter, probably larger than for several years, but as there was a larger per cent. of cheap grade flowers sold, it is probable that the net proceeds about even up with that of other years. Washington has been more than blessed in the matter of weather. It has been perfect, although a little cold for the season. Prices were unusually good, carnations wholesaling at \$4.00 per hundred. The florists will have another week to be grateful for in that the present week is the convention of the D. A. R's. One of the most noticeable novelties are the armadillo baskets; they have nothing if not novelty to recommend them, for neither beauty nor artistic merit seem to be any factor in their composition. Outside lily of the valley is coming in and thanks to the seasonably cool weather it is of very fine and lasting quality. There is an absolute wilderness of fruit blossom of unusually good quality and we trust the promise may make good in the yield

HENRY A. DREER,

714 Chestnut St., Philadelphia, Pa.

A HOUSE OF LONGIFLORUM FORMOSUM GROWN BY E. LIEBER, LANSDOWNE, PA.

Bulbs supplied by Henry F. Michell Co., Philadelphia.

THE NEW EASTER LILY

(**FORMOSA** *Lilium Longiflorum*)

Originator's Stock

A decided improvement over any previous type of Japanese Easter Lily, having proven to be free from disease. During the past season we imported a limited quantity of these bulbs as an experiment, and distributed them among some of the largest Lily growers in this country, they were all very well pleased with it. One party to whom we sold 1500 had 1500 good plants when his house was examined before Easter. They were coming into bud splendidly, and showed not the slightest sign of disease. The height of this Lily with average culture is a little taller than the Multiflorum, being from 3 to 3½ feet. 6.8 inch bulbs produce about 3 to 4 blooms. 7-9 inch bulbs produce about 4 to 6 blooms. 9-10 inch bulbs produce about 6 to 8 blooms. The variety itself makes an especially good one for the Lily grower to handle, because it may be potted about the middle of August or beginning of September, which will allow the grower to handle it in all the different temperatures that he desires, without extreme forcing.

One Lily grower gave us his opinion as follows: "I have been growing Lilies in very large quantities for years, but must admit that the 'Formosa *Lilium Longiflorum*' that you supplied me is the best that I have ever handled." This party has already booked his order with us for a very large number for next year's delivery.

The Formosa *Lilium Longiflorum* is also reported as desirable for Christmas forcing, it can be had in flower just as easily, in fact it is more certain to be than *Lilium Harrisii*.

READY IN AUGUST

PRICES: 6.8 in. bulbs (400 bulbs per case) per 100, \$4.25; per 1000, \$40.00. 7-9 in. bulbs (300 bulbs per case) per 100, \$8.00; per 1000, \$75.00. 9-10 in. bulbs (200 bulbs per case) per 100, \$11.00; per 1000, \$105.00

Original Strain Procurable from

HENRY F. MICHELL CO., Seedsmen, Direct Importers of Highest Quality Bulbs, 1018 Market St., Philadelphia, Pa.

Stock Queen Alexandra

The Beauty of Nice stock has proved a most useful winter flowering variety and is finely grown in many establishments. The variety Queen Alexandra, however, surpasses it in every way by reason of its clear, bright, rosy lilac color. The illustration shows a typical plant of which we had a 100-foot bench during the past winter and nearly 90 per cent. were perfectly double; in fact this particular bench of Queen Alexandra when in flower was a beautiful picture and furnished an enormous quantity of cut flowers.

The plants were raised from seed sown in July and they were carried along in frames, being potted on into 4-inch pots and afterwards planted out upon a bench that had been cropped with Beatrice May and Soliel d'Octobre chrysanthemums. There was ample fertility in the old chrysanthemum soil to perfect the crop of stocks; in fact the plants grew to great size and were profusely branched.

Those who lack the facilities for planting out may still grow this stock and will find it a delightful subject for pot culture. With the roots confined in a pot the plant shows less disposition to branch but the individual main spike is larger in every way, with the flowers closely set thereon, and the plants come earlier into flower as a result of root confinement. In fact this stock is amenable to many uses, and another effective way of growing it is to put three plants in a larger-sized pot. It is certainly a good plant for the gardener who seeks to vary his cut flower productions during the winter months.

Arthur Herrington

Culture of the Calceolaria

The calceolaria should have a prominent place amongst our spring flowering plants; being so well adapted for either greenhouse or house decoration and having such a splendid variety of color. Having grown the calceolaria for some years with favorable results under the following methods I venture a few remarks on its culture.

The first thing to consider is the best variety to grow. There are several good strains on the market. The plants illustrated on the frontispiece of this paper were grown from seed procured from Arthur T. Boddington.

SOWING THE SEED

The soil for this purpose should consist of finely-sifted loam, leaf-soil, and a good proportion of sand. Fill some well drained 5 in. pots or shallow pans as the case may be to one inch from the top, then give a watering and let the pots stand for a time to drain. Be careful not to sow too thickly and cover the seed very lightly with some finely sifted sand. After sowing cover the pots or pans with a sheet of glass. In about twelve or fifteen days the seedlings should appear. Remove the glass to prevent damping and stand the pots in a good airy place keeping them free from direct draughts.

POTTING

As soon as the seedlings are large enough to handle they should be pricked off, five or six plants into 4 in. pots, still keeping them as cool as possible and well in the shade. When large enough they should be potted into 2 1-2 in. pots using the same kind of compost. When these pots are filled with roots the next shift will be into 4 in. pots using a richer compost, consisting of good loam, some well rooted cow manure, leaf soil and sand. Pot the plants moderately firm.

FINISHING OFF

When ready, which should be by the early part of January, they should be shifted into their flowering pots, when a good rich soil will be necessary to finish them off. This should consist of good loam, two parts; cow manure, well-rotted, one part, with a sprinkle of bone meal and sand well mixed. They should then be potted very firmly. Be very careful not to over-water the plants for the first few weeks. A slight spraying each day will be beneficial to them. Fumigate the plants once every two weeks to ward off the attacks of green fly and other insects that are injurious. Keep the temperature from 45 to 50 degrees which will suit them admirably.

A "tip" for the fall show

Now is the time to push along on the chrysanthemums for next fall's exhibitions. We hope the managers of the various shows will keep prominently in mind the growing interest of the trade and the public in the hardy pompons and the new single flowered varieties and make due provision for exhibiting these flowers, not simply in little labelled bunches in bottles, but in such manner as to bring to the attention of the public their best use for decorative effect both alone and in association with the big flowers. This is something which has not been done to any extent at any of our exhibitions thus far although it holds out perhaps the very best means for reviving the waning interest in chrysanthemum shows. There are in every community florists of exceptional artistic ability and

gardeners also who are blessed with the same talent. Fix the prize schedule so as to get them interested and do it early enough to give the necessary time for the growing of the stock required. The novelty has about gone from the showing of new varieties of chrysanthemums or the bestowal of names of prominent people thereon as far as the ticket-buying public is concerned. What can we provide to fill the gap?

A proposed insecticide bill

A bill has been introduced in the United States Senate by Senator Alfred B. Kittredge of South Dakota, entitled, "A Bill for preventing the manufacture, sale or transportation of adulterated or misbranded fungicides, Paris greens, lead arsenates and other insecticides and for regulating traffic therein, and for other purposes." This has been drafted at the instance of the Committee on Proprietary Insecticides of the Association of Economic Entomologists which includes all the official entomologists of the United States and has their hearty support. We understand it also has the support of many of the leading manufacturers of insecticides. As a measure in the interest of the manufacturer of and dealer in reputable insecticides and fungicides, we hope our readers, so many of whom are interested in having at their disposal reliable preparations for combatting the ever-increasing army of plant scourges, will give this bill a careful reading and, finding it worthy, write to their congressmen and senators in its support. The bill is very lengthy and we have not the space to present it in these columns but copies may be obtained on application to E. Dwight Sanderson, Entomologist, N. H. Agri. Exp. Station, Durham, N. H. While heartily approving the bill in its main features we think we can see where modifications of its provisions might wisely be made and would again recommend a careful reading.

The problem of the forcing bulb

We have received a number of letters and many verbal communications, most of them commendatory, on the Holland bulb problem, since the publication of our editorial note on that subject two weeks ago. The letters from Messrs. A. N. Pierson and Peter Reinberg, which appear in this issue fairly represent the sentiments of the large flower growers as same have come to our knowledge. No hostility to the Holland bulb-growing interests is expressed in any of the comments nor was any inherent in our editorial, but the method of sending annually to this country an army of travelling salesmen who penetrate every nook and cranny in quest of small orders, which our home houses are fully able to handle, and very often without due care in extending credits, is naturally looked upon by local wholesale and retail distributors as adverse to the best interests of American dealers and Holland exporters alike. The high-tension demand during the period of the bulb forcing prosperity in this country has tended also to cause more or less complaint from florists of inferior qualities and of exorbitant prices on the most popular forcing varieties and now the demoralization in a none-too-strong market for the flower growers' product, caused by the dumping thereon of large quantities of bulb stock for whatever price they will bring, is sure to have its effect on those who feel that they have suffered because of it. A certain amount of forcing bulbs will always be required but the present emergency calls for some deep thinking, as neither foreign producers nor exporters, nor American importers, forcers or flower dealers, can afford to repeat the experiences of the past season. And this applies with equal truth to material from places other than Holland.

Notes from the Arnold Arboretum

Among the shrubs blooming in these early spring days none make a more gorgeous display than the Forsythias with their golden yellow flowers. The large clump planted in the Arboretum on the slope opposite the Forest Hill entrance looks now like a sheet of gold spread out on the hillside and does not fail to attract the attention and admiration of every beholder. At the first glance there seems to be little difference between the several species and varieties of the Forsythias, or as they are also called in English, the Golden Bells, but on closer observation marked differences in color and profusion of the flowers and in habit will be noticed which ought to be taken into consideration in using these shrubs for certain purposes and effects. One of the best is the true *F. suspensa* (*F. Sieboldi*, *F. suspensa* var. *Sieboldi*), usually a rather low shrub with slender arching or drooping or sometimes trailing branches and solitary flowers of a rather deep yellow; it is well adapted for covering walls, fences, arbors and the like, as it can be treated like a low climber. For planting in shrubberies *Forsythia suspensa* var. *Fortunci* (*F. Fortunci*) is to be preferred; it is of more vigorous and more upright growth attaining to eight feet or sometimes more in height and the somewhat paler flowers appear in greater profusion. A species of more strictly upright habit is the well known *Forsythia viridissima*, which, however, is slightly inferior in its ornamental qualities to the var. *Fortunci* and is not quite as hardy at least in the neighborhood of Boston. Very similar to *F. viridissima* is *Forsythia europaea*, which is as yet little known in cultivation having been discovered only about twelve years ago in southeastern Europe; as far as can be judged from the young plants in the Arboretum, it will not surpass any of the other species in beauty. The most valuable of all Forsythias for horticultural purposes is *Forsythia intermedia* with its varieties, hybrids between *F. suspensa* and *F. viridissima*. They are more floriferous than their parents and generally of upright vigorous habit; the four following forms have been distinguished. The original *Forsythia intermedia* (*F. intermedia* var. *divaricata*) forms a somewhat spreading shrub with partly arching and pendulous branches and with solitary flowers of a rather light yellow color. *Forsythia intermedia* var. *densiflora* is of similar but more irregular habit and has the bright yellow flowers arranged in dense clusters at the base of last year's branches while on the upper part of the branches they are solitary. *Forsythia intermedia* var. *spectabilis* is of more upright habit with partly arching branches and the deep yellow flowers appear in great profusion along the entire length of the branches. *Forsythia intermedia* var. *vitellina* is of strictly upright habit with deep yellow flowers appearing in greatest profusion toward the base of the branches.

Another yellow flowering shrub or small tree now in bloom is *Cornus mas* which is also to be recommended for its lustrous dark green foliage, its compact habit and the bright scarlet fruits in autumn.

Magnolia stellata is particularly fine this year and is now in its full glory; it is certainly the most graceful of the early flowering Japanese species; a very handsome variety is the pinkish *M. stellata* var. *rosea*. *Magnolia Kobus* is also in bloom, but is far less beautiful than *M. stellata*, as its white flowers appear only rather sparingly even on older plants; it is, however, the hardiest of all the Japanese Magnolias and grows into a small tree of regular pyramidal habit.

Rhododendron mucronulatum besides the closely re-

lated *R. dahuricum* the earliest of all the Rhododendrons attracts attention by its beautiful rose-colored flowers appearing in great profusion; *R. mucronulatum* is of more vigorous and upright habit than the latter species and the deciduous foliage turns to a brilliant scarlet color in autumn.

Of the numerous species of *Prunus* the earliest of all, *Prunus Davidiana* is already past flowering, but *Prunus sibirica*, *P. Mume*, *P. Armeniaca*, *P. Amygdalus*, *P. platycarpa*, the peculiar Chinese Flat Peach, *P. triloba* and *P. tomentosa* are now in full bloom, the beautiful pink flowered *P. serrulata* and the graceful pinkish white *P. pendula* are beginning to flower and many others are soon to come. If the weather continues favorably the numerous ornamental flowering cherries, plums and apples will make a great display during this month.

Alfred Rehder.

British Horticulture

SIX GOOD ROSES

The new annual of the National Rose Society is replete with contributions from the leading rosarians. The Rev. J. H. Pemberton, one of the vice-presidents, has performed the difficult task of selecting half a dozen roses amongst the newest introductions which he considers are the very best for garden purposes. The list is as follows: Dean Hole, H. T. (A. Dickson and Sons); Earl of Warwick, H. T. (Wm. Paul and Son); George Laing Paul, H. T. (Souper & Notting); Hugh Dickson, H. P. (H. Dickson); Lady Ashtown, H. T. (A. Dickson & Sons); Trier, Cl. Poly. (P. Lambert). The latter is the offspring of a cross between *Aglaia* and Mrs. Sharman Crawford.

THE NATIONAL DAHLIA SOCIETY

Mr. H. H. Thomas, a contributor to HORTICULTURE, the new secretary to the National Dahlia Society, has issued the annual report. The past season, it is stated, must be regarded as an unfavorable one for dahlias. The summer was a very cold one, and although there were many dull and rainy days, the total rainfall was below the average. The plants were therefore quite three weeks late in blooming with the result that exhibitors had very few blooms to choose from on show day. The trial of garden cactus dahlias at Wisley by the Royal Horticultural Society in conjunction with this society was greatly marred owing to the cold season. Further trials are to be made this season at Wisley with garden cactus varieties. These are limited to the varieties which have been introduced since January 1st, 1905. The dahlia analysis, which is published by Mr. Edward Mawley, president of the society, shows that the number of entries last season in some of the sections was smaller than usual owing to the unfavorable season. In the cactus section, which is always the most popular and attractive in the show, there was a great falling off, as compared with previous years. The numbers were as follows: Cactus, number of bunches, 296; Cactus shown singly, 624; Shows, number of blooms, 478; Fancies, number of blooms, 181; Pompons, number of bunches, 210; Singles, number of bunches, 147. The society's annual show has been arranged to take place in the Royal Horticultural Hall, London, September 3rd.

W. H. Adsett.

NEWS OF THE CLUBS AND SOCIETIES.

AMERICAN ROSE SOCIETY.

It is said that the Chicago show held in March brought out the largest single assortment of cut rose specimens ever exhibited in America. The only pity was that so beautiful an exhibit had not a larger public patronage.

The settling of all the prizes is now a matter of interest—the total number of prizes is 61, of which 54 are in cash and 7 are cups, medals, books and bone.

The trade papers did much for the show by the excellent illustration which gave an idea to those who could not come, of what there was at the Art Institute. The American Rose Society has sent letters of thanks to the Chicago Florists' Club and to the president of the Art Museum for the cordial and courteous attention given to the society.

Five new life members joined the society and this brings the permanent fund now invested up to \$3,000.00. What the society now needs is that every flower grower and landscape gardener in America shall join us. We need the help. The membership now slightly exceeds that of 1907. "The Rose Journal" is to be started, but we want more support to be pledged to make it a success. Come and give assistance, you men and women who grow roses.

There is to be a June Rose Show in Bronx Park, New York, and all the growers of roses who can are invited to show. There will be no medals.

The certificates of life membership will shortly be forwarded to all new members. "A Rose for every Home, a Bush for every Garden."

BENJAMIN HAMMOND,
Secretary.

Fishkill-on-Hudson, N. Y.
May 1, 1908.

TWIN CITY FLORISTS' AND GARDENERS' CLUB.

Monthly meeting was held Tuesday, April 21, at the Minneapolis Park Greenhouses. A committee was appointed to consider the advisability of incorporating the Society as a State organization, so as to get better terms for exhibits and premiums at the State Fair.

A paper read by Mr. L. Boeglin was heartily applauded and copies will be sent to all the trade papers for publication. Theodore With confirmed the results of Mr. Boeglin's manner of raising bedding stock in frames, as being preferable to greenhouse-grown stock, the former being better hardened and growing right along, without being checked. The exhibit of the best bedding plants for this part of the country was very much appreciated.

At the meeting of the Rhode Island Horticultural Society held on April 9, in Providence, Alexander MacLellan, of Newport, presented an able paper on the dahlia which was listened to with great interest and elicited many questions.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

The names of the following winter-flowering Sweet Peas are submitted for registration by Ant. C. Zyzanek, Bound Brook, New Jersey.

Any persons objecting to these registrations or knowing of any reasons why they should not be made, are requested to communicate with the undersigned at once. Failing to receive any such communications within twenty days from this date, the registrations will be completed.

Greenbrook, seedling from Mrs. Geo. Lewis X unnamed seedling, height over 6ft., flower white, standard slightly lilac, very large, orchid flowering, up to four flowers to a stem, stems average 18 inches.

Blue Bird, seedling from Walter Wright X Wallace, height over 6ft., flowers blue, bearing up to four flowers on 20-inch stems, standard wavy.

Governor John Franklin Ford, seedling of Mrs. Wm. Sim X Spencer seedling, height over 6ft., foliage narrow, flower pink, when fully open changing to salmon pink, standard wavy, producing up to four flowers on 20 inch stems.

Notice of Withdrawal of Registry.

Learning that the name Mavourneen had previously been applied to a rose, Mr. Alexander Montgomery of Natick, Mass., withdraws the name Mavourneen and desires that the name White Killarney shall stand as previously registered.

W. N. RUDD, Secretary.
May 1, 1908.

TOLEDO FLORISTS' CLUB.

The meeting last Wednesday at Mr. Mills' residence was a very pleasant affair. Mrs. Mills had invited the ladies of the members and had a club for herself while the business was in progress, after which all enjoyed coffee and cakes.

A few weeks ago the club visited W. G. Hall of Clyde, who is undoubtedly one of the best carnation growers in Ohio. His plant is not very large, but what he lacks in size is made up in quality; he grows his own seedlings quite largely.

Another club visit was to Miller Bros. and Searles Bros., lettuce growers. At Miller's place cucumbers will now take the place of lettuce. Searles Bros.' new plant consists of 15 houses, 15 feet wide by 750 feet long, and the output of lettuce since October has been about two tons every day. Hot water is used, circulated by a rotary pump, and the entire plant is watered by the Skinner system. This new plant is in the near future to be enlarged until it covers 41 acres and all will be devoted to lettuce during the winter and cucumbers in summer. Besides this they have an old plant of about half the size, where cucumber picking has already commenced. The new plant used this season about 2,000 tons of coal.

J. L. SCHILLER.

NEWPORT HORTICULTURAL SOCIETY.

The premium list for the exhibition of June 23 and 24, to be held at Masonic Hall, Newport, R. I., has been issued. The prizes comprise \$125.00 for plants, \$150.00 for roses and other flowers, \$45.00 for fruit, \$30.00 for vegetables and \$50.00 for children's exhibits and school gardens. Copies of the schedule can be had on application to D. J. Coughlin, secretary.

CLUB AND SOCIETY NOTES.

Edwin Lonsdale will address the Florists' Club of Philadelphia on Tuesday evening, May 5th.

The annual meeting of the Horticultural Society of New York will be held at the Museum Building, N. Y. Botanical Garden, on May 13, at 4 P. M. An amendment to the constitution making dues of associate members \$1.00 a year will be voted on at that time, and election of officers will be held. The Foundations of Successful Violet Culture is the title of a lecture to be delivered by Dr. B. T. Galloway. The newly established orchid section will hold its first meeting on this occasion. An exhibition of plants and flowers will be held in connection with these events and will continue for two days.

PUBLICATIONS RECEIVED.

Chrysanthemum Society of America; Proceedings of the Sixth Annual Meeting, held at American Institute, New York, Nov. 6, 1907. A list of varieties disseminated in 1907 is included.

Bulletin No. 49, Vol. 6, of the New York Botanical Garden contains the reports of the Secretary and Director-in-Chief for the year 1907, also of the Gardener, Curator, Director of Laboratories, Librarian, Honorary Curator, Treasurer and Superintendent of Grounds, expenditures and other interesting information.

The schedule of prizes, annual report and financial statement for 1907 of the National Chrysanthemum Society of England has been received. This society was instituted in 1846, and during its sixty years' existence every leading grower and authority on chrysanthemums has been identified with the organization. Its membership now extends all over the United Kingdom and the remote British Dominions and includes many members in foreign countries.

In the settlement of a seven year street car fight in Cleveland, three cent fare has been established all over the city with universal transfers. The public were granted free car rides all over the city for a period of twenty-four hours to celebrate the event. In recognition of the jollification the J. M. Gasser Company sent out a box of roses to all their city customers with a card bearing the legend: "Free car fare, free roses, with the compliments of your florist." That's good advertising.

PITTSBURG EASTER SHOWS.

An exhibition of spring flowers, which in point of magnitude and excellence is said to be the finest ever seen in Pittsburg, and that is saying a good deal, was a magnet which drew a large crowd to the Schenley Park greenhouses on Easter Monday. Every exhibition held here has something over the previous years. It was estimated that over 25,000 people visited the conservatories on Sunday afternoon, many coming from surrounding towns by excursion trains. This yearly Easter exhibit is justly famous throughout western Pennsylvania and is one of the main features of these magnificent conservatories. Mr. J. W. Jones has this year excelled himself, and has provided a treat which could not be surpassed anywhere. Notwithstanding the somewhat unpropitious weather conditions a continuous stream of people passed through the greenhouses all the afternoon. Bulbous plants are shown by thousands, hyacinths, tulips, narcissi, etc., arranged in solid blocks of color. The arrangement is excellent, displaying a marvelous executive ability on the part of the management in growing plants and arranging for such a mammoth exhibition. Everything shown is creditable, certain features being worthy of special mention, chief amongst which is the rose house, which is gay with a large batch of particularly well-flowered Hybrid Perpetual roses, Cheshunt Hybrid being the favorite. The azalea house is brilliant with color. *Richardia Elliottiana* is used here to good advantage, also *Lilium tenuifolium*, *Staphylea colenica*, *Hippeastrum vittatum* wistarias, *Calceolaria hybrida*, *Cineraria stellata*, *Cannas Florence Vaughan* and *Tarrytown*.

A good effect is obtained on the side benches of the lily house by *Canna Black Beauty*, intermixed with *Lilium Harrisii* edged with *Astilbe Japonica*. Another pleasing effect is obtained by mixing *Nicotiana Sanderas* with *Hydrangea Otaksa*. *Hydrangea rosea*, usually considered difficult, is well grown.

The most pleasing feature of the whole exhibit and one which attracts considerable attention is a house devoted to old-fashioned flowers, amongst which are *Xanthocerus sorbifolia* *fritillaria*, *scillas Muscari botryoides*, *Celsia cretica*, *Dicentra spectabilis*, and many other old favorites, which, judging from the interest they arouse, are not by any means forgotten although seldom seen. In the nepenthes house is quite a creditable display of orchids.

At the A. R. Peacock greenhouses, Supt. T. P. Jenkinson again does himself credit with a wonderfully effective arrangement of bulbous plants, *calceolarias*, flowering crab, *gesnera*, *schizanthus*, etc., in one wing; in another a still more effective display is produced by a judicious blending of colors in such subjects as *Azalea mollis*, *A. indica*, *genistas*, *hydrangeas*, *Primula obconica* and many other things. In a small house, *Hippeastrum vittatum*, *Narcissus poeticus*, *ixias* and *Spirea Queen Alexandra* is used with charming results. This new *spirea*, which by many is considered a questionable acquisition, is counted a good thing here, and certainly shows

MASSACHUSETTS AGRICULTURAL COLLEGE.

The exhibition of flowers and plants at the Massachusetts Agricultural College, Friday, April 24, and Saturday, April 25, was the finest held in this vicinity for several years. The display of carnations was exceptionally good and the College feels deeply indebted to the many growers who cooperated in making this show so successful. The interest shown by the students and townspeople was very gratifying, Wilder Hall being crowded to its capacity during the hours the exhibit was open. At the close of the show Professor White sent the flowers so generously contributed by the growers to the hospitals in the vicinity of Amherst.

The following are the exhibitors and the varieties shown:

F. R. Pierson Company, Tarrytown, N. Y.: *White Enchantress*, *Victory*, *Melody*, *Winsor*, *White Perfection*, *Beacon*.

William Nicholson, Framingham, Mass.: 50 blooms *Afterglow*.

W. A. Manda, South Orange, N. J.: *Pearl Pink*, a new hardy seedling dianthus, also blooms of *Cherokee* and *Green roses*.

Peter Fisher, Ellis, Mass.: *Alma Ward*, *Winsor*, *Snowflake*, *Rose Enchantress*, *Beacon*, *Mrs. Tom Harvey*, *Evangeline*, *White Perfection*, *Mrs. C. W. Ward*, *Enchantress*; also four seedlings under number.

S. J. Goddard, Framingham, Mass.: *Helen Goddard*, *Winsor*, *Victory*, *Britannia*, *White Perfection*, *Octoroon*, *Lady Bountiful*, *Enchantress*.

Patten & Company, Tewkesbury, Mass.: *Helen Goddard*, *Harry Fenn*, *Octoroon*, *Victory*, *Manley*, *Winsor*, *Variegated Lawson*, *Beacon*, *Red Lawson*, *Pink Patten*, *White Lawson*,

itself to advantage. The exhibition remains open evenings until 10 P. M., many people seeing the show by artificial light.

At the H. J. Heinz greenhouses there is a floral display where the individuality of E. S. James, the able superintendent, is manifest. Large azaleas well flowered, lilliums, Dutch bulbs, primulas and many other things are arranged in a somewhat flat but effective style. This is the first spring show at the Heinz greenhouses and was patronized by a number of people on Sunday afternoon and evening.

J. HUTCHINSON.

IMPROVING THE MARGUERITES.

F. W. Fletcher, of Auburndale, Mass., has been making a specialty

White Perfection and *Enchantress*; also eight seedlings under number.

H. H. Rogers, South Sudbury, Mass.: *Mrs. T. W. Lawson*, *Fair Maid*, *Winsor*, *The Queen*, and three seedlings under number.

H. W. Field, Northampton, Mass.: *Viola Sinclair*, *Prosperity*, *Enchantress*, *President Selye* carnations; *Bride*, *Bridesmaid*, *Richmond* and *General MacArthur* roses; pansies, nasturtiums and sweet peas.

J. W. Adams & Company, Springfield, Mass.: *Fifty Prospector*.

Peirce Brothers, Waltham, Mass.: *Mrs. T. W. Lawson*, *Governor Guild* seedlings, *Enchantress*, *Rose-pink Enchantress*, *White Perfection*.

Cottage Gardens Co., Queens, N. Y.: *Mrs. C. W. Ward*, *President*, *Snowflake*, *Beacon*, *Alma Ward* and *Mrs. Harvey*.

A. N. Pierson, Cromwell, Conn.: *Bride*, *Bridesmaid*, *Richmond*, *Mme. Chatenay*, *Killarney* roses.

William Sim, Cliftondale, Mass.: Splendid specimens of sweet peas—*Mrs. William Sim*, *Le Marquis*, *Mrs. F. J. Dolansky*, *Mrs. Alexander Wallace*, *Jack Hunter*, *Christmas Captain*, *Christmas Pink*, *Mrs. W. W. Smalley* and *Florence Denzer*.

Especially admired was a vase of thirty magnificent long-stemmed American Beauties from the Waban Rose Conservatories, *Natick*, Mass.; also *Killarney* and *Richmond*.

The Massachusetts Agricultural College devoted one room to named specimens of decorative foliaged plants.

Friday afternoon, Mr. G. H. Sinclair of Northampton addressed the students of the horticultural seminar on the subject of "The Carnation: Its Culture and Development."

of Marguerites for a number of years and has by constant and patient selection of stock and intensive cultivation improved these flowers in a remarkable degree as to strength of stem and size of flower. We have seen some of his flowers in the market that measured 3 1/2 inches across and with stems nearly 2 feet in length. These were the popular lemon-colored variety. Mr. Fletcher has been trying to cross-fertilize these daisies, *Chrysanthemum frutescens*, for years but has thus far failed to get any seed. He would like to hear from any one who has experimented on the same lines or if anyone has been successful in pollinating any of the varieties. Mr. Fletcher is cutting now from 20,000 to 30,000 flowers.

PLANT FOODS.

If basic slag, bone meal, incinerated bones, etc., are used either in composting, ploughing in or surface application, it is of importance to know what quantity to use, what time they are to remain in the soil and what effect, immediate or future, is desired by their presence. Basic slag is soluble to the extent of 35 per cent. where there is free carbonic dioxide present in the soil water and an application of from 6 to 500 lbs. per acre show the effects of the application for from three to four years. If a quicker or greater result is needed an application in solution and suspension should be given either with clear water or liquid manure, constantly stirring while using. Superphosphate gives a quicker result than basic slag particularly where phosphates are present in the soil which is the case if any of the above have been applied, only it is much more dangerous in the hands of the inexperienced or careless user.

Bone meal used in the same proportion, i. e., 600 to 800 lbs. per acre, if steamed or finely ground is traceable for about two years, yet it is true that the important effect is exhausted in the first few months.

The grower in seeking a soil should try to get a good fibrous loam, or a soil with a good percentage of humus present and one that has also the greatest quantity of natural potash phosphoric acid and organic nitrogen. Any deficiency must be made up artificially, using material that will give dominant active and inactive plant food. I very much prefer using wood ashes for the potash, but do not object to using kainit, as it acts as an animal and vegetable organism destroyer and an accumulator of water; in fact, for this reason I really prefer to use in addition from one to two hundred-weight per acre applying it as a surface dressing after wood ashes have been either ploughed or harrowed in.

Basic slag I always prefer to bone meal or to superphosphate for the phosphoric acid because the bone meal always favors fungus growth and maggots, and the superphosphate readily becomes reconverted to the tricalcic phosphate state.

For nitrogen there is nothing that equals well decayed farm-yard manure, that which has been well made, its potash phosphoric acid and nitrogen conserved, the former two by providing a cesspool to receive the drainage which should be pumped over the manure heap again and again, and the latter by using small quantities of sulphate of iron either in solution or dry state. These applications of sulphate of iron will clean the manure heap of spurious organisms and form with ammonia present in the manure, ammonium sulphate.

I have gone far enough in this article to show it is of the utmost importance to get a soil that has present either naturally or artificially all the essential plant foods, also that they should be present in the three stages of active, dormant and inactive, and further that the soil should be free or rendered free from harmful organism.

GEORGE A. BISHOP.

A. LEUTHY.

Here we have a portrait of one of HORTICULTURE'S staunch friends, one of the pioneers, whose advertisement appeared in the first issue of the paper and has been conspicuous in every issue since that time. Here in Boston we count him as one of our

A. LEUTHY

had working, sagacious and enterprising trade plant growers. He is well known far and wide in this country and also abroad where he has the respect of the large exporting houses resulting from long and honorable business association. Our picture depicts him in a characteristic attitude alert for an order.

PERSONAL.

Robert Gonsalves, florist, of Waltham, Mass., is to be married to Miss Margaret T. Nolan of Newton.

Visitors in Boston: G. C. Eldering, Overveen, Haarlem, Holland; Ed. Roehrs, Rutherford, N. J.; E. J. Fan court, representing Pennock-Moehan Co., Philadelphia, Pa.

F. W. O. Schmitz has been appointed administrator of the affairs on behalf of the children of Fred Bendt and wife of Newark, N. J., both of whom died from typhoid caused by eating oysters.

Alfred Rehder, who had an attack of typhoid fever, is now able to take a short walk daily and hopes to be fully recovered in a short time. Our readers will be glad, we are sure, to welcome him back to the reading columns of HORTICULTURE.

P. Welch, the distinguished wholesale florist of Boston, has been serving on the jury ever since Easter. The effect on his contemporaries is not yet disclosed but a recent conference between this gentleman and Judge Hoitt of Nashua had so much of the cordiality and comradeship of the bar in its make-up that the friends of the first-named gentleman who were accustomed to meet him on even terms when he was simply a wholesale florist are now justified in feeling alarmed over his judicial mien and air of superiority and the future will only disclose the final outcome of this experience as an arbiter of the fates of his fellowmen who have had the misfortune to be haled before the august twelve of which he is one.

INFERIOR DUTCH BULBS.

Editor HORTICULTURE:

Dear Sir:—I heartily agree with the ideas expressed in your editorial on the bulb problem, and I have no doubt that it will have a beneficial effect.

Yours very truly,

PETER REINBERG.

Chicago, Ill.

Editor HORTICULTURE:

Dear Sir:—In reply to yours of recent date asking me how business has been during the past season, now that Easter is over will say that it has not been as good as usual in some respects, but on the whole we will call it a pretty good season.

We have handled the Holland and French bulbs at a great loss. We used to grow about half a million of these bulbs. Last fall we took in only about one-third of our usual supply, and that was one-third too many.

I believe the American people are sick and tired of bulb-stuff and it would do them good if they did not have any for a few years. That might give us a chance to sell more of the other flowers. When the market is glutted with bulb-stuff, it seems to demoralize everything else. I am

Very truly yours,

A. N. PIERSON.

Cromwell, Conn.

Mr. G. C. Eldering, of W. J. Eldering & Son, Overveen, Holland, lays much of the blame for the present plight of the forcing bulb industry in America on his countrymen. He asserts that this country has been made the dumping ground for low grade material for years, and it is not surprising that the American people have become wearied of it.

OBITUARY.

Mrs. Hurn, formerly Miss Sophie Fadden, who for many years conducted a flower store on Bellevue avenue, Newport, R. I., died on Sunday, April 25.

We learn with deep sorrow of the death at Quebec, P. Q., two weeks ago, of that lovable old plantsman, florist and writer, George Moore. We hope to be able to give a more extended notice in next week's issue.

Charles W. Kaber of La Porte, Ind., who since 1894 has carried on a florist's business, died on April 5, aged 75. Mr. Kaber was a native of Germany, but has been in this country since 1853, living in Chicago and South Bend previous to connecting himself with his children in the florist trade at La Porte. A widow and five children survive him.

MAY.

The vales shall laugh in flowers, the woods
Grow misty green with leaping buds,
And violets and windflowers sway
Against the throbbing heart of May.
—Whittier.

You will find something worth reading
on every page of HORTICULTURE.

THE BOSTON VIOLET

The people today are looking for New Violets just as much as they are for new roses or carnations.

THE BOSTON VIOLET

For the past two years has been placed before the most sceptical buyers in America and they prefer it to any other.

THERE'S A REASON

The Boston Violet is the largest, the most fragrant, it has a very pleasing color, and it is a great keeper.

THE BOSTON VIOLET

Is a variety that is early grown, it is the strongest grower and is in crop from September to May.

THE BOSTON VIOLET

Was awarded a First Class Certificate of Merit by the Massachusetts Horticultural Society and a Report of Superior Merit by the Gardeners' and Florists' Club of Boston.

Distribution will Commence in April. Order Now.

PRICES — \$2 per 12 ; \$12 per 100 ; \$100 per 1000.

WILLIAM SIM, : : CLIFTONDALE, MASS.

FOUR BEST ZONAL GERANIUMS.

H. L. Cameron, who has been growing geraniums at North Cambridge for the Boston market for the past twenty-four years and whose stock has high repute, gives as the best varieties for bedding and general use and for out-selling all others, S. A. Nutt dark scarlet, Alphonse Ricard vermilion scarlet, Beaute Poitevine salmon pink, and Mme. Jaulin apple blossom pink. These are all Bruants, semi-double, and although he has a great number of other sorts under cultivation these constitute the great bulk of his stock. Among the newer varieties he mentions Fleuve Blanc, a pure white Bruant of 1905, and Mrs. Lawrence, salmon and white, as likely to take a high position in the list as soon as their splendid qualities for bedding purposes become better known.

English-grown hybrid rhododendrons all the way from 1-2 feet high to 5 feet specimens that have been wintered here without protection for two years are offered by the Eastern Nurseries. See advertisement.

FORGET-ME-NOTS FOR SALE

\$3 per 1000, small plants that will bloom in a month. Can be shipped either by Express or Mail.

SHRUB CHAT.

Berberis Thunbergii is being used for hedge purposes in enormous quantities in and around Boston. The amount planted this year is far more than that of all other hedge plants combined.

Earliest of all to bloom, while the others are still in small bud, is a variety of *Amelanchier Canadense* with pendulous racemes of pure white flowers, which was found in Vermont. The stems also have a slightly pendulous character.

It now transpires that magnolias, wistarias, early blooming azaleas and similar precocious material suffered disastrously in the severe freeze during Easter week. Wistarias having a north exposure and which had not begun to push out their flower buds were the only ones that escaped in the vicinity of Boston. The flowering dogwoods, which usually succumb to such an experience, appear to have passed through safely.

For a few days past we have been experiencing record weather for April. With the thermometer at July elevation a few hours' time has sufficed to bring vegetation forward to an extent equal to what it would take several days of normal April weather to accomplish and the country is suddenly transformed into verdure and flowers. But it is a dangerous situation, and a sudden cold turn such as is always a possibility at this date, would inflict great damage to flowers and fruit crops.

NEWS NOTES.

The Eastern Nurseries have been given the contract for supplying the trees and shrubs, principally evergreens, for planting the grounds about the Boston Normal and Latin schools.

The red flag denoting the headquarters of the plant auction trade will float no more at 201 Fulton street, but may be found proudly waving every Tuesday and Friday over the entrance to 42 Vesey street, New York, where Wm. Elliott & Sons have fitted up a commodious building with all facilities for receiving and delivering goods and insuring the comfort and convenience of buyers.

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which, if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Kiliarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Teplitz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Muller (Pink Baby Rambler), Catherine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

Seed Trade

Information apparently authentic, is that Louisville has been decided on as the place for the next Canners' Convention, with the Hotel Seelbach as headquarters. It has been customary for the Machinery and Supply men to seek rooms at the headquarters hotel and this has caused some friction, confined mainly to the "bourbons" among the Canners who charge the Machinery and Supply men with pre-empting all of the best rooms. For two years the Machinery and Supply men have discussed the advisability of selecting an independent headquarters, and trying out the question of whether they are really inconveniencing the Canners, but, as in the case of Louisville, many of the towns selected have only one hotel of a class suitable as a headquarters. It was hoped this year that a town might be selected large enough to afford two hotels of sufficient size to make a square test of this issue, but as this has not been done the Canners must endure the presence of their allied association once more.

True to their instincts and traditions, the lawyers have succeeded in delaying a decision as to the future of the Erie Preserving Co. until it is almost too late for them to arrange with the farmers for the growing of the necessary crops to enable them to carry on their business the coming season, although it is only fair to say that it is doubtful if the company can make a showing that will justify the receivers in continuing the business. It is now stated positively that decisive action will be taken not later than the 28th. One result of the delay has been to greatly reduce the value of one of their important assets, namely, their seed, and particularly, peas. The season is now so far advanced that peas will not be wanted in large quantities and varieties which could have readily been sold six weeks ago at \$1 will now go begging at half that price. Space is given to this case because a number of seed growers and seedsmen are creditors of the concern.

In view of the weak vitality of much of the seed corn which will be used this spring, replanting on an extensive scale is quite probable, and particularly if the weather continues wet and cold. As medium early varieties are practically exhausted, especially Crosby's Early, which is a favorite, for "planting in" late sorts will have to be used which will greatly increase the dangers at the end of the season of frost killing or seriously damaging the crop. There is no desire to be pessimistic but these are the conditions that must be faced.

Counter trade is now at high tide east and west, and seedsmen everywhere express themselves as highly gratified with their business up to date. It is unfortunate that the same cannot be said of all other lines, but this great and glorious country cannot be held down long and recovery is certain, albeit somewhat slow.

The committee appointed at the

meeting of seedsmen held in Chicago, April 16th, and others accompanying them who went to Washington to attend the hearing before the Committee on Interstate and Foreign Commerce on April 21st, were granted an informal conference with Mr. Mann on April 20th, and at this conference seem to have made it clear that the bill would need revision before it could be made a just and practicable law. Various changes were urged and most of these were embodied in an amended copy of the bill, which was left with Mr. Mann.

At the public hearing, April 21st the seedsmen's case was fully presented before the Committee on Interstate and Foreign Commerce. Further Congressional action on the bill will be deferred until the next session, thus giving more time for careful consideration of all its features.

It is believed that much good will result from this hearing in the way of a better understanding between seedsmen and the parties having this proposed legislation in charge. It seems reasonably certain that some federal law will be enacted, and it is necessary to the interests of the seed trade that such legislation shall be just and practical. It is impossible at this time to say just what further action may be necessary to safeguard the trade against hasty legislation, or to aid in securing wise and helpful regulation, but this subject will no doubt receive due consideration at the meeting of the American Seed Trade Association at Detroit next June.

Wm. Elliott & Sons are removing from Fulton street to 42 Vesey street, New York, where they have fitted up a very commodious building for their plant auction and seed trade.

Henry F. Michell took title yesterday from Herman W. Fernberger and Oscar J. Bamberger to the five-story building known as Tower Hall, at No. 518 Market street, for a nominal consideration, subject to a \$100,000 mortgage. It stands on a lot 23 by 180 feet and is assessed for \$135,000.—Phila. Record.

Foley Manufacturing Company, Western Ave., Chicago, Ill.—1908 Catalogue of Materials for All Kinds of Greenhouse Construction. This comprises a superb series of greenhouse views, diagrams and plans which everyone interested in greenhouse building or equipment can peruse with profit.

The Long Island Railroad Company is issuing some good farm and market garden literature which should do much toward the development of the territory through which their line runs. To an outsider, however, it looks as though much of the good work was nullified by the almost prohibitive rates of fare charged on the road. Think of 28 cents (exclusive of ferry) from New York city to College Point (which is within the city limits), a trip which the trolley cars make for 5 cents.

Of Interest to Retail Florists.

TWIN CITIES

The Easter trade did not vary much from last year. St. Paul kept the prices up right along, but in Minneapolis some of the department stores and Greek flower dealers began to cut prices as early as Saturday noon. Lilies were cut down to 10 and 15 cts. a blossom, as much as the retailer had to pay for them, yet with very few exceptions the retail florists cleaned up pretty well in spite of the higher prices and the cheap competition. Flower baskets did not sell quite as well this year as they did last. A few stores, but very few, though, overstocked on them, and had considerable material left over.

CHICAGO JOTTINGS.

There is such a thing as having more going on in a florist's store than is desirable even at Easter time. As W. J. Smyth was getting his fine large retail store in Easter garb he was surprised to see an automobile suddenly leave the street and plunge through the window. Every one knows Mr. Smyth is a genial, hospitable man, but he does not want people to enter his store in that way. The damage to the contents of the store was fortunately light, but Mr. Smyth lost the use of one of his immense windows for Easter display.

Rhododendron Pink Pearl, is one of the novelties seen in the Chicago market this year. The immense clusters of large flowers are of the most beautiful shade of pink. It is a distinct improvement over the older varieties and is much admired. The present high price of the imported stock makes it very scarce and the growers have to sometimes place it on the prohibition list on account of the cost. Another fine novelty in Chicago is the pink spirea or Astilbe Queen Alexandra. It is a fine companion for the white Gladstone. When the price gets down closer to a commercial basis there seems to be no question but it will be in great demand.

NEW RETAIL FLOWER STORES.

H. H. Ritter, Dayton, O.; W. C. Stickel, Pres. Park St. Flower Market, Boston; Edw. Wood, Pres. Music Hall Flower Market, Boston; J. C. Hatcher, Amsterdam, N. Y.; F. S. Follwell, Pittsfield, Mass.; I. L. Powell, Millbrook, N. Y.; Kensington Flower Shop, Boston; T. F. Galvin, Boston, Mass.

50,000 In Use.

See Large Ad. Horticulture, page 504, April 11, 1908.

A. F. LEWIS MFG. CO., E. Boston, Mass.

A NEW FLOWER MARKET PROPOSED.

We have received from one of the gentlemen interested in the establishment of another co-operative cut flower market in New York city an interesting account of the purposes of this project and what it is proposed to do. The following extracts give the main points touched upon:

"A meeting of the proposed Co-operative Growers' Association was held at the Fruit Auction Company's building April 25th, which was well attended by rose, violet, carnation and other growers, representing over a million feet of glass devoted to cut flower growing, all shippers to New York market. This association is being formed with the object in view of operating a sales-room in New York city, with a competent manager, salesmen, bookkeeper, etc., under the direction of a board of directors elected by its members. Details of incorporation, amount of capitalization etc., are in the hands of a committee which will report at the next meeting.

"It is not the mission of this association to try to fix an arbitrary price on its goods, but by concentration to reduce the cost of selling and in all probability add a supply department. Similar concerns are successfully operated in other lines of business, perishable goods included, and it is claimed that the ability of many of limited capital to combine under efficient management and without incurring liability beyond the amount of their stock subscription has been one of the chief sources of the tremendous growth of this country.

"The next meeting will be held in the same place, Saturday, May the 9th, at 2 P. M. when all cut flower growers for the New York market are invited to attend, but no others will be admitted."

The artistic and useful vases manufactured by the Kramer Foundry Co. are specially adapted for cemetery, park and lawn use. Any florist who carries a line of samples or who has a catalogue at hand can make many profitable sales at this season of the year.

NEWS NOTES.

Maurice L. Belcher, florist, Whitman, Mass., has filed a petition in bankruptcy; liabilities, \$967; assets, \$40.

H. S. Morton has leased the store and greenhouses of the late Alfred Hildred, of Chicago, and will run them in connection with his former business.

J. H. Playdon, Andover, Mass., has secured the contract to supply the flowers for Memorial Day for Gen. W. F. Bartlett Post, G. A. R., of Andover, and Gen. Lawton Post, Lawrence, Mass.

Albert T. Hey, of Springfield, Ill., will become manager of Vaughan's greenhouses at Western Springs, July 1. He takes the place of J. S. Wilson, who will go to Des Moines, Ia., to operate the greenhouses he has recently purchased there.

INCORPORATED.

L. Boehmer & Co., New York city: Bulbs, plants, flowers, etc.; V. L. Outerbridge, E. Morrow, B. J. Tracy; capital, \$25,000.

FLOWER MARKET REPORTS

BOSTON Things are pretty dull in this market just now; in fact, it may be truthfully said that the grower and wholesale dealer are up against the worst kind of a problem—that of finding an outlet for the tremendous output. The situation looks gloomy from the viewpoint of these people, but from the position of the retail florist it is not so bad, for they can dictate prices on both sides. In other words, they buy at their own price and sell at their own price. And this is the ideal existence for an American tradesman, is it not?

BUFFALO Business showed little activity at end of last week and stock accumulated with prices very much on the decline. A vast amount of material was carried over Sunday in wholesalers' hands. Lily of the valley and greens were the only exception. These cleaned up all right. At present the market is in bad shape, especially on roses and carnations, both of which are coming in faster than they can be handled and bargain signs are again due.

CHICAGO The usual lull succeeding the Easter holiday has struck Chicago with unusual force. While Easter trade as a whole, both in plants and cut flowers, exceeded the most sanguine expectations, it was followed by a week of the greatest supply and the biggest slump the market has known for years. Everything that was not quite ready for Easter, especially Easter lilies and bulbous stock, opened up with the warm weather of Easter day and the first part of the week continuing warm the market was overstocked. Outside flowers came pouring in and did their share in demoralizing trade. A wave of cold weather is following and Chicago market will soon be normal again.

DETROIT Flowers of all kinds are more than can be used and we all have time to turn them into money at the slightest provocation of the purchaser. An unprejudiced perusal of general market conditions ought to satisfy all that nothing is wrong with the flower business although roses, carnations and every other plant cultivated for cut flowers are in full production, while the demand is naturally less than in midwinter. A very encouraging report comes from the real as well as the would-be nurserymen, all of whom report plenty of good orders and are hustling to fill them promptly. A great boom is given this branch of our business through the recently inaugurated civil service league of which I wrote in my last letter. Wm. Dilger is furnishing plans for laying out home gardens, while Frank Danzer treats the same subject in a series of plans showing the same lot as improved with an expenditure of \$2.00, \$5.00, \$10.00 and so on up to \$50.00. Follow this up in your city; it all helps. The people have the money and are willing to spend it. Show them how.

NEW YORK Our price quotations will, upon perusal, tell the story of market conditions as fully as we can in words describe it. The tendency of every-

thing is downward in price and upward in accumulation. There is far more of all kinds of stock than the market can possibly make any use of. Appearances are that the season is over so far as any standard of value for cut flowers is concerned.

PHILADELPHIA Some business last week but prices were 'way, 'way down. Left-over plants of all kinds in hands of retailers had to be pushed wherever possible. Naturally such conditions had their effect on the cut flower business. American Beauty roses cleaned up well but the prices were scandalous. Quality on all roses remains at high water mark—cut heavy. Carnations very satisfactory although some begin to show some stress under the warm weather and prices have dropped. Double violets are still a factor and lily of the valley moves a little better. Far too much of all small stock, such as mignonette, daffodils, daisies, Cattleyas scarce and in good demand. Outdoor shrub bloom sells freely. Good gardenias are in demand but much of the cut is not up to standard. Greens in fair demand with the exception of bunch plumosa.

TWIN CITIES Easter is gone, but most growers are as busy now as they were during or before Easter, for with a very few exceptions they cleaned out everything and are filling up the space again with bedding and spring plants for Decoration Day. All stock grown here was of the very best and plants as well as cut flowers sold at good prices, which did not vary much from last year's figures. Cut flowers brought in from Milwaukee and Chicago were all No. 1 stock. In St. Paul there were a few lilies left over, but Minneapolis made a clean sweep. While there were plenty of roses and carnations, etc., to supply the market, there was a shortage on violets. The beautiful weather, which commenced about ten days before Easter, did its share in the production of perfect stock.

TOLEDO In spite of the bad weather on Saturday before Easter, the business was very satisfactory to everyone. It all came in a rush in the afternoon and continued uninterrupted until Sunday morning. It was a "plant Easter"; everything sold which had a blossom. *Salvia Zarich* proved a fine thing for Easter, several hundred being disposed of. Prices ruled about the same as last year.

NEWS OF TWENTY-EIGHTH ST.

West Twenty-eight street, New York, the centre of the greatest of all wholesale flower districts in the world, is

undergoing a number of changes this spring. It is especially worthy of note that the theatrical and musical interests which have long made this block between Broadway and Sixth avenue a centre for their business are abandoning the locality and moving uptown. This leaves the wholesale florist trade in almost complete possession and the number of vacant premises at present would seem to indicate that the gradual advancement in rents which has been going on for some years has now reached its limit.

From the florists' standpoint the most notable movement is the acquiring of the lease of the large new store at No. 34 and removal thereto by Alex.

ALEX. J. GUTTMAN

J. Guttman. It has been said by a sagacious business man that the real conservative dealer is he who knows when it is time to adopt a new method or take hold and push a new line of goods. Since his advent on 28th street Mr. Guttman has in various ways demonstrated his abilities in this direction and we doubt not his present line of action will be equally successful.

F. S. Hicks & Co. are also making a move from No. 52 to the "parlor floor" at No. 39, following the example of A. H. Langjahr, W. S. Allen, James McManus and others, who have succeeded in drawing business satisfactorily up a flight of steps. The street floor establishments have one great advantage in the open areas in front and in some cases in the rear, but there are now very few street floor stores available and new comers will soon be obliged to go above or else locate in the block west of Sixth avenue where J. K. Allen, Jos. Fenrich and a number of others are already prospering.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$12.50.

IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

COURT DECISION IN CUSTOM HOUSE CASE.

United States vs. Ouwerkerk.

U. S. Circuit Court of Appeals, Second Circuit. April 14 1908. No. 128 (sup 4136).

Evergreen Seedlings—Laurels Rhododendrons—Nursery Stock.

Species of the laurel (*Aucuba japonica* and *Kalmia latifolia*) and of the rhododendron (*Rhododendron ponticum*), which retain their verdure throughout the year, are "evergreens" within the meaning of paragraph 252, tariff act of 1897; and under said paragraph seedlings of those plants are dutiable as "evergreen seedlings" rather than as nursery stock.

Appeal from the circuit court of the United States for the southern district of New York.

[Decision adverse to the Government.]

For decision below see 153 Federal Reporter, 916 (T. D. 28183), in which the circuit court affirmed a decision by the Board of United States General Appraisers, G. A. 6169 (T. D. 26772), which had sustained protests by P. Ouwerkerk against the assessment of duty by the collector of customs at the port of New York.

The merchandise in dispute consisted of three varieties of plants, designated as *Aucuba japonica* or Japanese laurel, *Rhododendron ponticum*, and *Kalmia latifolia* or American laurel. The Board held these plants to be dutiable under paragraph 152, tariff act of 1897, as "evergreen seedlings." The Government contended that they had been properly classified under the provision in the same paragraph for "nursery stock."

The theory of the Government's contention is that the term "evergreen" is restricted to such evergreen plants as the conifers and box. The Board of General Appraisers held, however—and its decision was affirmed by the circuit court without opinion—that the term is not so restricted, but applies to seedlings of all plants which retain their greenness throughout the year, and that it is sufficient if a plant fall within the general class of evergreens, irrespective of whether it is hardy in a particular locality or under different climatic conditions. The plants in question, being shown to be "evergreen" in this sense, were held to be "evergreen seedlings," as above set forth.

D. Frank Lloyd, assistant United States attorney, for the United States. Hatch & Chute (Walter F. Welch of counsel) for the importer.

Before Lacombe, Ward and Noyes, Circuit Judges.

Per Curiam: Decision of circuit court affirmed.

John P. Brown, editor of *Arboriculture*, is doing a commendable forestry work in Alabama. For the past four months he has been located at Carney, where he has converted a 250 acre tract of rough woods into a forest of *Catalpa speciosa*.

You will find something worth reading on every page of HORTICULTURE.

WANTS, FOR SALE, ETC.

NEWS NOTES.

R. Smith has purchased the greenhouses of Shirley Woner, Sandusky, O.

The Chicago office and salesrooms of A. H. Hews & Co., flower pot manufacturers, Cambridge, Mass., is located at 456 North Branch St., with M. F. Mooney in charge.

The interest which the McClures held in Suburban Life has been bought back by the Suburban Press and the publication office will be moved to Harrisburg, Pa., next week, thus concentrating editorial, circulation and manufacturing departments under one roof. An advertising office under the management of Frank A. Arnold will be maintained in New York city. Mr. Farrington, who has always been the managing editor, will be editor in toto.

A GARDENIA BLOOM. One-half actual size.

Gardenias

(Grandiflora Cape Jessamine Buds)

White, wax-like petals; dark, lustrous green leaf; fragrance retained for two weeks in perfect condition.

Our firm will fill orders for over a million buds this month. What advertising we have already done will sell all the stock we can furnish for Decoration Day. This is already indicated by orders received — but we can fill orders promptly between the dates of May 10 and 20 inclusive, which will make arrivals in the East May 14 to 25. We want new customers to try small lots of one to five hundred within these dates, so that they can be assured of receiving salable stock for the entire season in future, from our increased plantings.

ORCHIDS

Just Arrived in Fine Condition

ORCHIDS

ORCHIDS

ONE of the largest consignments of plants ever received in the United States at one time; namely, 100 cases Cattleya Trianae, 80 of Cattleya labiata, 40 of C. gigas Sanderiana. Fine importation of Cattleya Schroederiae, C. Harrisoniae, C. citrina, Laelia anceps, Oncidium varicosum Rogersii, O. tigrinum, O. ornithorhynchum, Odontoglossum Insleyii, Odonto. Rossii majus, Dendrobium formosum giganteum, D. Wardianum. To arrive shortly, D. Phalaenopsis, Cattleya Mossiae, C. Percivaliana, C. Gaskelliana, C. Mendelli, C. Warneri. Intending buyers of Orchids would do well to come and see this stock before buying elsewhere. Our prices are reasonably consistent with good stock. All our goods are collected by our own collectors, thereby assuring our customers the best stock the forests afford. Come and see them. These goods if potted at once will yield abundance of flowers the first year, paying for the cost of the plants in the fall.

We also carry a large stock of established Orchids. Also orchid peat, Sphagnum Moss, Baskets, etc. A trial will prove we carry the best stock that can be secured. Come and see for yourself and be convinced of these facts.

Carrillo & Baldwin SECAUCUS, N. J.

HOW TO REACH OUR PLACE—Take Erie R. R. to Homestead, N. J., 3 minutes by trolley to Secaucus; or by trolley from D. L. W. depot, Hoboken, 25 minutes get off post office Secaucus. From Penn. depot, Jersey City, take train on Susquehanna R. R. to Homestead.

CATTLEYA TRIANAE

Just to hand in perfect condition, a large shipment which we offer in cases containing about 40 fine plants aggregating over 450 bulbs, for \$55 per case. Also CATTLEYA LABIATA in cases of 400 bulbs, for \$55 per case. Also ONCIDIUM VARICOSUM ROGERSII, at \$18 per dozen. CATTLEYA MOSSIAE in fine condition in cases of 40 plants, \$55 per case.

Notes from the Arnold Arboretum

The most beautiful of the trees and shrubs now in bloom at the Arboretum are without doubt the different species and varieties of *Prunus*, particularly the Japanese cherries. One of the handsomest of them is the graceful *Prunus pendula*, the Japanese Weeping Cherry, whose slender pendulous branches are densely covered with pale pink flowers. A variety with upright branches is *P. pendula* var. *adscendens*, introduced into cultivation under the erroneous name *P. subhirtella*; its flowers are exactly like those of *P. pendula* and are produced in equal profusion. Much larger flowers of a deeper pink color has *Prunus serrulata*, usually confounded with *P. Pseudocerasus* which is easily distinguished by the pubescent leaves; the pink color of the flowers is enhanced by the purple tinge of the unfolding foliage and the tree is of vigorous growth much resembling in habit the Sweet Cherry. Of the numerous beautiful varieties cultivated in Japan of *P. serrulata* and of the true *P. Pseudocerasus* varying with single or double flowers and from pure white or yellowish white to deep pink there are only some small plants in the Arboretum; they do not seem to be as hardy as the single-flowered pink *P. serrulata*. Among the peaches and almonds with their large pink flowers *Prunus Persica* var. *albo-plena* attracts attention by its large pure white double flowers which as double-flowered varieties usually do flowers a little later than the type. As the first of the American plums *Prunus nigra* has begun to bloom; it is handsomer in flower and of more vigorous habit than the closely related *P. americana* and blooms about two weeks earlier; the white flowers have a slight reddish tinge owing to the red calyx. Of Old World species *Prunus cerasifera* (*P. Myrobolana*, *P. divaricata*), *P. dasycarpa* supposed to be a hybrid of *P. cerasifera* and *P. Armeniaco*, are now in bloom and also *P. avium* begins to flower.

Magnolia stellata and *M. Kobus* are now past their prime, but *M. Yulan* with its large and showy white flowers is now in full bloom and the many forms of *M. Soulangeana*, hybrids of *M. Yulan* and *M. obovata* are beginning to flower: their tulip-shaped flowers range in color from almost pure white to purple and the plants differ also in the time of flowering and in the degree of hardiness: as a rule they are less hardy than *M. Yulan*, but hardier than *M. obovata* (*M. purpurea*, *M. denudata*) which cannot be successfully grown in the neighborhood of Boston.

The earliest of the Shadbushes and also the handsomest is *Amelanchier canadensis*; the pendulous racemes of the feathery white flowers on the spreading slender branches with the white color softened by the reddish tinge of the unfolding leaves give the whole flowering tree the appearance of a white misty cloud hovering among the almost bare branches of the other trees; usually *A. canadensis* is a tree, but there are also some very fine shrubby forms at the Arboretum. Only a little later than *A. canadensis* the closely related *A.*

obovatis (*A. canadensis* var. *obovatis*, *A. Botryapium* Britt.) begins to flower; it is a roundheaded shrub planted rather extensively in the Arboretum. The grayish pubescent unfolding foliage give the flowering shrub a soft grayish white appearance by which it is easily distinguished at a distance from the hard pure white color of other white flowering trees and shrubs. *Amelanchier spicata* is an allied species of more strictly upright habit and flowers still later.

Spiraea arguta, a hybrid of *S. Thunbergii* and *S. multiflora*, is without doubt the most beautiful of all the early flowering Spiraeas with its graceful habit and its wealth of pure white flowers. *Spiraea Thunbergii* is much less free-flowering, but is handsomer in foliage which has a light green feathery appearance and turns a clear yellow in autumn.

The earliest of the Honeysuckles, *Lonicera fragrantissima*, has opened since some time its small, but deliciously fragrant pinkish white flowers. Its branches however are still almost leafless, while most of the Honeysuckles belong to the early leafing shrubs. *Lonicera tatarica*, *chrysantha*, *coerulea* and others clothed with their tender young foliage form now a conspicuous feature in the shrubberies. Of those which are now in bloom *L. gracilipes* is the most attractive with its red flowers, though the flowers are less showy than the scarlet pendulous cherry-like fruits which appear in June. *Lonicera coerulea*, *L. ciliata* and *L. Altmanni*, a species from Turkestan of recent introduction, have rather insignificant yellowish white flowers.

Besides the Honeysuckles most species of *Ribes* belong to the early leafing shrubs and are already densely clothed with bright green foliage; of those now in bloom as *Ribes cereum*, *R. divaricatum*, *R. setosum*, *R. burejaticum*, *R. stenocarpum*, *R. rubrum*, *R. alpinum* and *R. pinetorum* only the last named, a species from Arizona and New Mexico and still very rare in cultivation, is noteworthy for its flowers which are orange red, a color very unusual for a *Ribes*: the others have white or pinkish white to greenish, rather small flowers.

Alfred Rehder.

Notes from York Experiment Station, York, Nebraska

LILACS

One who has never seen a large collection of these beautiful shrubs in all their varieties of form and bloom can have no conception of their beauty. There are now one hundred and fifty named sorts. I had the privilege of seeing them all in the Arnold Arboretum at Boston.

We have about fifty varieties here and Professor Sargent, who has charge of the Arnold Arboretum, sent us about twenty-five new sorts, so that now we have the finest collection in all the West. Most of these are now in bloom and they present a splendid spectacle. They vary in the form of the foliage and also in the flower. Some are single and some are double. Prominent among the new sorts are the Rouen in two varieties, the purple and the white. All are acquainted with the old

Persian lilac, but we have succeeded in getting a lot of white Persians, and also a hundred or so of the Siberian white lilacs. These, of course, will be extremely hardy and they are now covered with bloom.

Among those that make a fine showing are Alba Grandiflora, very large, pure white; Charles X, a reddish purple; Frau Danmann, very large panicles, flowers pure white; Marie Legraye has also great clumps of pure white flowers. This variety is very valuable for forcing in the spring. Then there is Professor Sargent, with buds of cherry red and dark violet when fully open.

When we come to double varieties, we have Charles Joly, a very dark reddish purple, a superb flower. Emile Lemoine has very large rosy lilac blooms; Jean Bart is simply a magnificent flower of rosy carmine; Madame Lemoine is white; President Grevy is a beautiful blue with flowers very double, one of the finest; and there is Senateur Volland with a compact head of blossoms which are rosy red.

There is a family of summer-blooming lilacs. There is the Hungarian lilac called Josikaea, then the Emodi, next comes Dr. Brestschneider and then we have Villosa from Japan. These four varieties have a different system of leaves from other kinds. The leaves are very large, often as large as a lady's hand, the bushes often being crowned with great masses of flowers. This is especially true of Villosa. At first, you will not be particularly impressed with it, but some summers, the whole bush will be one vast bouquet of charming bloom, one of the most striking things in the ornamental family.

Added to these are two other summer bloomers which are the tree lilacs of Japan and China. Now, these are trees, not shrubs. We have some here, ten years old, large enough for fence posts, and fifteen feet tall. They grow almost as fast and nearly as large as our native ash tree. When you see a good sized tree covered with a great mantle of snowy, honey-scented flowers, you can have some conception of its magnificence. What a splendid show for lining a walk or driveway such a tree would be. This lilac has rather delicate stems, often taking a pendulous or drooping form and it has small and delicate leaves. The Japanese tree lilac is of a sturdy kind and the leaves are larger. It is more symmetrical in form than the Chinese. These six summer bloomers certainly make a great addition to our parks and private grounds.

We are now engaged in originating new sorts. That is done by saving seeds of those growing near together so that the bees will fertilize the blossoms and in this way we get new and striking varieties. We have now over one thousand plants on the way and we are sure of some fine varieties in the lot but nothing as yet to compare with what we hope to produce.

We of the West have not the variety of ornamental trees and shrubs which they have in the East, and yet there are over one hundred kinds of lilacs that are perfectly hardy here in Nebraska, so there is no lack whatever in material for fixing up our home grounds.

C. S. Hammond

"Dreadnaught" Rhododendrons

I am very much indebted to Mr. Koehler for his friendly criticisms under the heading, of "Iron Clad Rhododendrons," although I do not remember having used this particular expression. While Mr. Koehler's notes are interesting, and in a certain sense instructive, they are by no means convincing, because, it is obvious that most of the varieties which he lists in such a clear and concise manner, have been favored more by repute than by the actual experience of some of our best known rhododendron growers.

Mr. Koehler writes so convincingly concerning his subject that I almost find myself unable to treat him to any serious criticism. I can quite understand that when he penned his comments under the more or less imposing title of "Iron-Clad Rhododendrons," he was filled with a burning desire not only to correct what might be an error in the wording of the sentence quoted, but also to obliterate entirely the list of varieties which I gave. He has been singularly unfortunate in his attempt.

Now, I do not like to criticise those people who, it seems, are better learned than myself or even those who apparently possess a superabundance of superior knowledge, but really, Mr. Koehler, I must ask you a question, which you may digest and answer at your leisure.

In the first place I would ask what constitutes a hardy rhododendron? My answer would be that any variety which is given a suitable situation, and a fair amount of winter protection, and proves satisfactory after a five years' test, must be considered hardy. It does not necessarily follow that because a variety is considered hardy it can be planted in the middle of a ten-acre field. If this is Mr. Koehler's conception of a hardy rhododendron, then I withdraw my entire list and say that they are all very, very tender indeed, and I also put the word tender behind every variety in his own list. "There is no iron-clad list in the sense that that term can be applied to a common lilac." Quite so, Mr. Koehler. Then if this is the case in a nutshell, all rhododendrons must be more or less tender and none can be termed iron-clad varieties in the correct meaning of the word.

I am, however, digressing somewhat from my chief object in penning these lines. My principal object was to point out, and impress upon Mr. Koehler the important fact that the readers of HORTICULTURE are not limited by any means to "Boston and vicinity." This progressive journal, it is pleasing to know, has a very wide circulation, much wider than Mr. Koehler has been aware of when he constructed his fleet of iron-clads for Boston and vicinity.

In my previous article I did not mention Boston and vicinity; for Mr. Koehler's benefit, however, I will give a few notes on varieties which I have had experience with in this particular locality, confining myself to the varieties at present under discussion. I have found that in the vicinity of Boston the following varieties will survive an average winter, without any overhead protection: Alex Dancer, Charles Bagley, August Van Geert, Hannibal, Everestianum and Concessum. The remainder, namely Lady Eleanor Cathcart, Mrs. A. Waterer, The Queen, Mrs. R. S. Holford and Mrs. John Clifton have proved after a five years' test to be quite

hardly in most locations, "providing they are fairly well protected in winter." See concluding paragraph in previous article. At this period an account of how we handle certain varieties, is quite unnecessary where rhododendrons are concerned, we find the intelligent gardener, no matter whether he is in the vicinity of Boston or any other part of America, will set about to achieve his object unostentatiously and allow the result to prove so far as he is personally concerned, which varieties are hardy and which are tender. A list of iron-clad varieties is always a very interesting document to have beside one. There will always remain however a certain percentage of progressive and enterprising people who deviate from the beaten track of the printed

list, by importing direct from Europe varieties which though not iron-clads are yet in a practical meaning of the word perfectly hardy. Those people I have frequently noticed have been successful with some varieties, with which others, "even experts," have failed.

The title "Dreadnaught Rhododendrons," I most respectfully append to Mr. Koehler's list, for his kind consideration and valued approval.

Wm. W. Brown

North Easton, Mass.

A Practical Screen

Very frequently there is need of a screen, and in all such cases the need is urgent. If it were possible to advertise for such a thing ready made, and be sure of getting it, the "ad" would run something like this: "Wanted at once, a screen. Must be of shimmering green leaves from the ground to the top. Must be impenetrable; must be very cheap; must take care of itself; must be sightly in summer as well as in winter." That might read like the ravings of a crazy man but it is far from it as I have the solution of the subject in my back lot and it answers the requirements of the "ad" to a dot, and a little bit more.

I needed a screen and I wanted it badly. There were many things to use but I decided on the Carolina Poplar. I put in a row of these and cut them back well. In front of these I planted Viburnum Opulus. The poplars got very busy growing and after a few severe cuttings they kept sending out new wood down to the ground. In the second year they were ten feet high and densely leaved. As a screen it answered all requirements, but since that time the viburnums have been growing and during the

winter months they furnish a gorgeous decoration of vivid red berries that hang until the leaves again shoot out.

It may be objected that the poplars are undesirable for many obvious reasons. Sure they are under some treatment but if you want a screen of moderate height you must cut them hard to get the new wood and by this cutting you also fool the borers. A sharp spade will keep the roots at home but beyond this there is no work. If you let the trees have full swing they will in a short time get on very friendly terms with the family and walk right into the house too and later dump a ton of dead wood on the house when they have grown up a hundred feet. But if you want a screen, plant the Carolina Poplar and give it the knife good and hard. For an artistic proposition put the viburnums in front.

Amidst all the doubts and apprehension attendant upon the adverse business season through which we have been passing one encouraging fact which has stood out conspicuously is the unprecedented activity in the retail seed trade. We have yet to learn of a single instance of a well-managed seed house reporting a falling off in business as compared with one

year ago. Mail order houses have also enjoyed a tremendous demand which started early in the season and has continued without any slack and, as the weeks move along, it becomes more and more evident that the nursery trade as a whole has found things very much better than was expected. These facts must be accepted as reflecting the confidence prevalent in that section of the general public known as the middle classes. It is very plain that they find no special occasion in existing conditions for the exercise of exceptional frugality.

The electric van in horticultural trade

During the Easter season just past the plant dealer having an electric delivery van at his disposal enjoyed a great advantage. To maintain such an outfit is, however, quite expensive, and only the larger concerns with business enough to keep a chauffeur constantly occupied can afford to invest under present conditions. It is not alone their value as compared with horse power that makes these motors so desirable in horticulture but the fact that they afford a means of competition with the transportation companies. It is to be hoped that in the near future the cost of these machines and methods of operating them may be brought well within the reach of the small grower and the trade thus rendered independent of the railroads and their exactions. Complaints that have reached us from several suburban sources indicate that conditions as to express service are constantly growing more unsatisfactory.

An unequal struggle

One does not need to go far in the neighborhood of any of the larger cities in the older settled parts of the country to encounter greenhouse establishments which, a few years ago, were yielding a good income to their owners but are now totally inadequate for the purposes to which they were formerly devoted. At the time when these structures were erected money was easily made in rose growing, one or two wooden-frame houses often furnishing a livelihood for an industrious grower and his family. That, in time, competition and overproduction would bring market values down, down, down, that buildings would rapidly depreciate in efficiency from age and decay and demand a heavier repair expenditure each year, that enterprise and ingenuity would in time introduce structural improvements brought about through experience and better mechanical skill and thus put the later-built houses far ahead in efficiency and place the older establishments at a great disadvantage seems in many cases to have been overlooked; the forethought which would have laid aside a liberal percentage of each year's income for the inevitable reckoning day was not exercised and today the pathetic ruin tells the story. Bedding plants, small ferns, forcing bulbs, are still possible but one by one these places once conspicuous for rose growing must drop out of the unequal struggle in which they made so proud a start and the outlook for their owners is far from encouraging if nothing has been accumulated against this contingency. The big steel-ribbed factory with capital back of it seems to have taken the right of way.

Obituary

George Moore.

George Moore, whose death was briefly noticed in last week's issue of this paper, was born in Perry Barr, Staffordshire, England, about three miles from Birmingham, on June 5, 1826, in the house in which his ancestors had lived for over 100 years and where all his own children were also born. His father, John Moore, was a skilful nurseryman and farmer and George grew up in and followed the business, becoming partner in the firm of John Moore & Son. Both father and son were enthusiastic in the science of horticulture and people came miles to see their magnificent displays of standard roses, rhododendrons, etc. Mr. Moore was especially fond of the rhododendron and, in cooperation with his intimate friend when a young man—John Millmore, the raiser of *Erica Willmoreana*—raised many crosses between the Asi-

GEORGE MOORE

atic and American species, one of which, named *Mooreii*, won the first-class certificate of the Royal Botanic Society. This, with many thousands of other rhododendrons which he had, was killed on one terrible Christmas eve, about the year 1860, when the thermometer fell to 15 degrees below zero after an exceptionally warm season, and the resultant havoc involving the loss of the labors of many years was the direct cause of Mr. Moore's crossing the ocean with his family to make a new home in America. Soon after his arrival in Boston he followed the late C. M. Atkinson as superintendent of one of the departments at Hovey's nurseries at Cambridge, where he had as pupil and assistant Jackson Dawson, then a young man just returned from service in the war for the Union. Later he was employed at J. W. Manning's nurseries at Reading, Mass., and then as superintendent for E. M. Wood at the Waban Rose Conservatories, Natick. In 1879 he went to Montreal and for a time was in the florist business, but his heart was in the growth and culture rather than

sale of flowers, and in time he became English Lecturer to the Farmers in the province of Quebec, and later assistant editor of the *Journal of Agriculture* of this province, both of which positions he held until death.

Mr. Moore inherited his attachment for the science of horticulture through four generations. He loved his profession and those engaged in it, and the teaching of agriculture and horticulture in the public schools was a subject very dear to his heart. At the time of his death two books which he had written for use in the public schools were practically completed, and there is a strong sentiment in favor of their publication by the government. He was an occasional contributor to *HORTICULTURE*, as our readers know.

Mr. Moore possessed a wonderful memory. He never grew old though attaining the age of nearly 82. This was greatly due to the fact that he was always a student ready to give ear to any new scientific developments. An optimist he certainly was, and his geniality made him a great favorite with young and old. He married in 1849 Mary Ann, daughter of Captain Edward Moore of London, whom he survived but eighteen months. He leaves a family of five: Mr. John F. Moore of Allston, Mass., Miss M. C. Moore of Framingham Normal School, Mrs. Herbert Shattuck, Hopdale, Mass., Mrs. Herbert A. Baker and Mrs. Setimus Fraser of Montreal, P. Q. He died at his daughter's home in Montreal, and was buried at Hopdale, Mass.

August L. Ehrle.

We regret to have to report the death of August L. Ehrle, at Carlstadt, N. J., on April the 28th. Mr. Ehrle contracted a severe cold in his throat twelve months ago which caused his untimely death.

Mr. Ehrle had been employed by The Julius Roehrs Company in their orchid department for twelve years. Beginning when only a boy the love of orchids grew upon him until these charming flowers became a part of his existence. Being of a genial nature he was loved by all who knew him. He was 26 years old. He leaves a wife, who has the sympathy of all his friends.

John O'Brien.

John O'Brien, tree warden and florist, died in Lenox, Mass., on April 30. Mr. O'Brien was born in Kilworth, Ire., April 18, 1840, and came to Lenox forty years ago, being in charge of the Kneeland estate for many years. Later he established greenhouses on West Street where he conducted a successful business. Five sons and four daughters survive him.

Alonzo Henricks.

Alonzo Henricks, seventy-six years old, horticulturist at the Government Hospital for the Insane, Washington, D. C., for the past forty-five years, died on April 23. A wife, six sons and three daughters survive him.

Miss Nina Holton.

Miss Nina Holton of Newburyport, Mass., a member of the staff of the Bureau of Plant Industry, Department of Agriculture, died in Washington, D. C., on May 5.

A SINGULAR CARNATION FLOWER.

Editor *HORTICULTURE*:

I send herewith a few photographs of a red carnation seedling which made its appearance with me some time ago. It has a duplex calyx and flower, and perhaps will interest our brother florists and carnation breeders. With twenty-five years' experience in growing and breeding the carnation I never saw nor heard of one being produced like this one. Perhaps

Flower on 4 1-2 inch Measuring Card.

others have, and if so I hope this will bring out something interesting. Let it be a "freak" or not, grand, good Nature produces some wonderful things. The size of the flower across under the petals is 4 1-2 inches, which covers the outer line of the carnation measuring card, as can be seen in the photograph. The makeup of flower is not over-crowded with petals but it has 99 of them, full centre, round, fringed like a double poppy and measurement over the top of flower 7 1-2 inches. The outside calyx is 1x1 1-4 inches, inside calyx 5-8x1 1-4 inches. The lower half of stem is as large as an

Showing Double Calyx.

ordinary lead pencil. One peculiar characteristic is that the stamens come out of the inside calyx, and the anthers come out of the outside calyx. The inner calyx is not visible at any time, neither when the flower is opening nor when fully developed; the inner calyx serves to prevent this extra large flower from bursting. The flower with stem weighs 2 1-2 oz., more than double the weight, also double the number of petals, of the ordinary large carnation.

Very truly yours,

Clyde, O.

W. E. HALL.

NEWS OF THE CLUBS AND SOCIETIES.

NATIONAL FLOWER SHOW COMMITTEE.

About forty members attended the meeting of the Committee of Fifty in the Art Institute, Chicago, March 26. Chairman W. F. Kasting presided and reports showing that great interest prevails in the show and rapid progress is being made in preparing for it, were made by W. N. Rudd, chairman of the premiums committee; E. G. Hill, chairman of the foreign exhibits committee; Otto Koenig, chairman of the special features committee; Philip Breitmeyer, chairman of the American exhibits committee, and J. C. Vaughan, chairman of the local management committee. A report from the treasurer showed that a large number of the guarantors had paid a first assessment of 20 per cent. on their subscriptions. Chairman Kasting appointed Albert T. Hey of Springfield, Ill., a member of the committee in place of the late P. J. Hauswirth. The secretary reported that 1500 preliminary premium lists had been mailed, and more were on hand and ready to be sent to all who addressed a request to Room 1411, First National Bank building, Chicago. The American Carnation Society, the American Rose Society, the Chrysanthemum Society of America and the Horticultural Society of Chicago have offered their medals liberally as special prizes. W. N. Rudd, chairman of the premium committee, reported that \$2,336 in special premiums has been offered by various private persons and firms, together with about \$800 in medals and cups. The premium list offers a total of \$11,023 in prizes.

Committees have been appointed by the various chairmen as follows:

Executive and finance: W. F. Kasting, chairman; Philip Breitmeyer, E. G. Hill, W. N. Rudd, J. C. Vaughan, Otto Koenig, August Poehlmann, J. A. Valentine.

American Exhibits: Philip Breitmeyer, chairman; F. H. Traendly, George Asmus, S. S. Skidelsky, Elmer D. Smith, Robert Craig.

Special features: Otto Koenig, chairman; Theodore Wirth, Leonard Kill, S. S. Skidelsky, Harry Papworth, J. F. Sullivan, W. L. Rock, A. J. Guttman, John Bertermann.

Auditing: J. A. Valentine, chairman; E. B. George, Roy F. Wilcox, Otto Koenig.

Local management: J. C. Vaughan, chairman; August Poehlmann, J. B. Deamud, W. N. Rudd, C. Cropp, Elmer D. Smith, J. E. Hauswirth.

Exhibits, foreign: E. G. Hill, chairman; J. D. Eisele, Carl Cropp, E. B. George.

At a meeting of the executive committee held the following day Mr. Kasting appointed George Asmus chairman of the publicity committee. James H. Burdett was made permanent secretary and newspaper representative

of the committee. The question of manager was discussed and the local management committee was authorized to engage one.

It was determined, after a lengthy discussion, to give visiting florists, not members of the S. A. F., in good standing, the privilege of purchasing a season ticket to the National Flower Show for \$1. Several amendments to the rules were proposed to the premium committee, the most important being that in all classes where it is deemed permissible an entry fee of \$1 be exacted from each exhibitor.

J. H. BURDETT, Secretary.

FLORISTS' CLUB OF PHILADELPHIA.

At the Florists' Club meeting on Tuesday evening, May 5, Edwin Lonsdale exhibited *Schizanthus Wisetonensis compactus*, a seedling grown by him at the Girard College greenhouses. In speaking of these plants he considered them good for the conservatory. The plant on exhibition he called a "seed sport," there being about two dozen of these plants raised from seed saved from last year's plants. The seed was sown November 19 and the plants came into bloom April 20th. The new type is much dwarfer than the old *Wisetonensis*, very compact and floriferous.

On being asked a question about a new Dryden geranium, Mr. Lonsdale stated that he had obtained an improved Dryden, by crossing with a bright scarlet known around here as "Dennison's seedling." The Dryden, Jr., as he called it, was much brighter in color and a better plant than the old Dryden.

The smoker that was to have been given on May 14th has been postponed to the June meeting.

At the June meeting Arthur Niessen of the Leo Niessen Co. will read a paper on Co-operation between wholesaler and retailer in time of overproduction.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of the New Jersey Floricultural Society was held at their rooms on May 1st. The floral display consisted of orchids from the well-known houses of Lager & Hurrell of Summit, Thomas Jones of Short Hills and Joseph A. Manda of West Orange; carnations grown by William Read from the Colgate estate, Spanish iris grown by Max Schneider, Canterbury bells by Charles Ashmead, alameda by John Hayes and antirrhinum by John Derwin.

The address of the evening was by Joseph B. Davis upon Cartography applied to landscape work, illustrated by many maps and pictures from the speaker's collection, and included some rare india proofs by Alexander Anderson from *The Downing* publications. The sketch, the finished drawing, enlarged and reduced, the delineation of trees, grass and herbage, and foreign and domestic work as treated for the past hundred years, were touched upon during the evening. It was decided to hold a summer recess.

JOSEPH B. DAVIS.

NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

A meeting of this society was held on Tuesday, May 5th; a large attendance present. J. F. Huns read a very interesting and instructive paper on hardy ferns, of which he has under cultivation over 300 varieties. His paper was so instructive that the society voted to have it printed in full and distributed to the members. He was given a hearty vote of thanks. The society voted to hold a rose show in June. The preliminary schedules were distributed to the members present for the November exhibition. After business, the members adjourned to a smoker as guests of the bowling team, when the prizes were given to the winners as follows: High single, R. Watson; second single, Wm. Dickie; high average handicap, James Moore; second average handicap, W. Dickie; third average handicap, D. Ferguson; fourth average handicap, Wm. Symons; most marks, Jas. Bruce; second most marks, Wm. Dickie. After the distribution of the prizes, T. Pettit presented the captain, Thos. Nye, with a gold watch, fob and charm on behalf of the members of the bowling team.

TARRYTOWN HORTICULTURAL SOCIETY.

The monthly meeting of this society was held on April 24th. Three new nominations to membership were received, and James Stuart of Mamaronock and Wm. Brown of Ossining were elected active members. Donations to our prize fund are still coming, and to date five silver cups are offered for the November exhibition.

James W. Smith's prize for the best two flowering plants was won by Thomas Atchinson, gardener to Mr. Henry Segel, with a pelargonium and a calceolaria, both well grown specimens.

The feature of the evening was the talk on Water Gardens by Charles H. Tibbits. Mr. Tibbits is connected with the park department of White Plains, N. Y., and has had very satisfactory results with aquatic plants.

Subjects for next meeting will be Shrubs and Hardy Perennials.

L. A. MARTIN, Cor. Sec.

MAY FLOWER SHOW AT BOSTON.

The annual May exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Saturday and Sunday, May 9 and 10. A feature of the exhibition will be the displays of late-flowering bulbous plants, such as Darwin, Single, Bizarre and Rose tulips. There will be also exhibits of calceolarias, pelargoniums, pansies and other seasonable flowers.

Of interest in the display of vegetables will be the collections grown under glass the present year.

The exhibition, which is free to all, will be open Saturday from 12 to 6 and Sunday from 2 to 6 o'clock.

WAL. P. RICH, Secretary.

Evergreen, Ala.

CLUB AND SOCIETY NOTES.

The Wayland Floral Society of Wayland, N. Y., will hold its second annual exhibition on August 11-12. This is already attracting much attention from the fact that a large proportion of the proceeds will be devoted to beautifying the local cemetery.

The annual report of the Society of American Florists and Ornamental Horticulturists for 1907 has been received from Secretary Rudd. The report fills 240 pages and is a credit to Mr. Rudd, who, from the circumstances attending his assumption of the office of secretary, had an exceedingly difficult task in the compiling of this document. The membership as recorded for December 31, 1907, is given as 876, of whom 719 are annual and 157 life members. A portrait of President F. H. Traendly appears as a frontispiece.

At a meeting on April 25 of representative fruit and vegetable growers of Council Bluffs, Iowa, and vicinity, the National Horticultural Congress was organized with these officers:—

President, J. P. Hess of Council Bluffs; vice-presidents, J. M. Bechtel of Hamburg, W. S. Keeline and W. G. Rieh, Council Bluffs; J. R. McPherson, O. L. Barritt of McClelland; secretary-treasurer, George W. Reye of Council Bluffs.

While the association will have charge of all arrangements and plans for the horticultural congress proposed to be held in Council Bluffs on December 10 to 19, its object also will be to promote the horticultural and allied interests.

PERSONAL.

A. L. Knight has taken a position in the nursery of Herbert Jackson, So. Gorham, Me.

Eugene Barker of Peak's Island is now working for A. W. Dyer, florist, of Portland, Me.

R. A. Griffith, florist, Lowell, Mass., has been named by Mayor Farnham a trustee of public burial grounds for a term of five years. Mr. Griffith has already served one year on this commission.

RUBBERS 4 inch pots. \$20.00 per 100, \$2.50 per dozen.

ARAUCARIAS Nice 4 inch stock, 40c. Larger 50c, 75c, \$1.00

BEDDING PLANTS Geraniums, 4 inch Single and Double Dryden, \$8.00 per 100. Other varieties at \$7.00 per 100. Salvia Zurich and Bonfire, Lobelia Kathleen Mallard and all other new and standard bedding stock in best quality at lowest market rates.

COLD STORAGE LILIES

COLD STORAGE LILIES, means that you can have Lilies all the year round. What are more useful, or give more character to the funeral piece than the Lily.

We have, and can deliver at any time cold storage Lilies—and can refer you to hundreds that are growing them, why not you?

LILIUM LONGIFLORUM GIGANTEUM is the only longiflorum that gives satisfaction from cold storage—we offer them as follows:—**LILIUM LONGIFLORUM GIGANTEUM** (repacked 6 to 8 inch bulbs 400 in a case, \$8.50 per 100, \$75.00 per 1000, case of 400 for \$30.00. 7 to 9 inch bulbs, 300 in a case \$9.00 per 100, \$85.00 per 1000, \$25.50 per case of 300. 9 to 10 inch bulbs, 200 in a case, \$14.00 per 100, \$130.00 per 1000, \$26.00 per case of 200.

ARTHUR T. BODDINGTON, Seedsman,

342 WEST 14TH STREET, NEW YORK CITY

500,000 Pansies Best Market Strain Grown

Grown from seed of our own raising, this strain is the result of over 25 years' careful selection, and for size, form and substance and wide range of color in clear, brilliant selfs and novel shades and markings they will be found unsurpassed. The colors are very evenly assorted and the growth is very strong and stocky. Full transplanted plants ready to bud and bloom.

Price, \$10.00 per 1000. Larger sizes, \$15.00 and \$20.00 per 1000
EXPRESS ONLY. CASH WITH ORDER.

EVERETT, MASS.

TWIN CITIES PLANTING AND PARK NOTES.

The cleaning up in the parks and parkways is in full swing, Mr. Wirth doing his best to have them look in good shape for the Park Superintendents' Convention next summer. The operation of dredging Lake of the Isle—by the way, the most picturesque lake we have here—is drawing a good many spectators. The contractor is working three different dredges. The first one, which goes ahead, throws up the dirt to form the shore and at the same time act as a dam in halting the mud and water which is pumped in behind to fill up the swamps. The pump used for that is a suction dredge with a 12 inch discharge pipe. The dipper dredge follows behind to fix up the shore lines and give them the proper slope to the water.

The setting out of roses in the new rose gardens has commenced and the plants should do well, as the beds have been prepared the best way possible, and the whole garden is so situated as to get the sun all day, but all round there is a natural growth of trees that will keep the winds off from almost every direction. The setting out of the trees and shrubs in the parks and on private grounds is well under way and according to the different nurserymen business is very promising.

Bedding plants in frames have suffered some from the last cold spell, when the thermometer went down to 15 one night, but the loss, mostly in begonias, can be made good yet, as we do not plant out until about the first week in June.

BUSINESS CHANGES.

Henry Matz has purchased the greenhouses of Felix Mense, Glen Cove, N. Y.

Weigel & Ujfalussy, successors to Emil Steffens, florists' supplies, New

York, are now located at 138 West 23th St.

PUBLICATIONS RECEIVED.

Annual Report of the Trustees of the Pleasure Driveway and Park District of Springfield, Ill. The documents included in this report and the illustrations and maps showing existing and proposed development are good evidence that Springfield's 250 acres of parks and boulevards are being well cared for and liberally supported. The total expenditure in four years for construction and maintenance is \$141,971.22.

WINTER-FLOWERING SWEET PEAS.

(Read before the Gardeners' and Florists' Club of Boston by Wm. Slim.)

(Continued from page 411)

Types.

There are three types of the early sweet pea, the wavy or Spencer type, the common type with the broad, straight standard, and the incurved or hooded type. As yet the Spencer type seems to me a little soft for commercial purposes, but this fault may be remedied in new varieties. The standard which is wavy has not got the strength of the common type, and they fold together when they are bunched in such a way as to make them look small, although the flowers are larger than the common type. The common type although not so large as the Spencer type, is the best for commercial purposes; their stiff straight standards do not fold together, and the flowers remain open. The incurved or hooded are the least desirable; their flowers are incurved and look small beside the ordinary type. They, however, have very long, wiry stems, and some of the best fancy varieties are of this type. They also are very strong growers.

Hybridization.

Most of the varieties with the exception of the ones sent out first, are the results of crossing the early and late varieties. This is done at the time the two types are in bloom together. Mrs. Charles Totty, Mrs. Alexander Wallace, Mrs. George Lewis, Christmas Captain, W. W. Smalley and a number more are the results of crossing the two types. Varieties raised by crossing the early type with the same type are usually weak growers. It seems to take the blood of the late varieties to give them constitution. I noticed this the past winter on a batch of recessed Christmas; this was the Christmas crossed on the late flowering Blanche Ferry. There was about fifty per cent. of the old type among them, but the early flowering ones were very much stronger and produced stronger flowers on longer stems than Christmas and grew three feet higher.

Strains.

There are new strains of these peas in England, Germany and Algeria. I am unable to give much information about these as I have never managed to get any of the seed. I have seen the Algerian strain growing at Mr. Zvolanek's; they were not in flower then, but the growth and habit was identical to what we have here. He later sent me some of the flowers. They were of very poor color and variety; in fact they were certainly ten years behind what we have here now. Flowers of the English strain resemble the Algerian strain and Mr. Zvolanek says they are the same varieties or mixture he sold five years ago to the firms who are selling the seed. It is very hard for the raiser to hold the stock of any one variety, because it is sent to California to be grown along for seed, and while there the seed can be carried from one place to another.

Sweet Pea Society.

What we need here now is an American Sweet Pea Society for at the pres-

BAGSHOT, - - - ENGLAND

ent time there is nothing to prevent any one from selling sweet peas under any name he pleases. We have Earliest of All, Christmas Pink and Xmas Pink. These three varieties are the same in every particular. The selected Earliest of All is earlier than the other, but the flowers of all three are identical. There is Mont Blanc and Florence Denzer; these two are identical. There is also Zvolanek's Watchung, Burpee's Earliest White and White Bird; these are all identical. We have Flamingo and Christmas Red, which are identical and Sunbeams and Canary Bird which are also identical. Aside from keeping the names straight it would stimulate the growing of sweet peas, and no doubt many would go into the improving of them in the way the carnation men have done with the carnation. If a number would get together with this in view it would be hard to predict what the sweet pea would be like ten years from now. Just fancy what an exhibition you could have if a number got together and did as the carnation men have done. The sweet pea is everybody's flower, being within the reach of all. Thus far Mr. Zvolanek seems to be about the only one to improve this class. It is only a few years ago that the first of this type were seen; now he has practically all the colors found in the late varieties. I think great credit is due him for what he has accomplished. Putting aside Christmas Pink, Mont Blanc and Sunbeams he has raised practically all the other varieties in cultivation now. He is doing for this type of peas what Henry Eckford did for the late flowering section.

(To be Continued)

DAPHNE CNEORUM.

Walter Dunhardt in Moller's Deutsche Gartner Zeitung

This plant grows wild in the Schwabische Mountains, together with *Gentiana verna* and *Orchis militaris*,

and other Alpine plants. It grows in sterile soils, among pines and alders, making a patch of about twelve to fifteen feet. Cultivation is not difficult if rooted plants can be bought, but plants dug up in the wild woods and transplanted into the garden do not always give desired results.

The Daphne, like other shrubby Alpine plants, grows in a dry, stony location, but has roots that go very deep into the soil. The roots are pressed into the narrow spaces between the rocks, and it is therefore very difficult to dig up plants without breaking the roots.

HARDY ROSES FOR THE GARDEN

Strong Field-grown Plants

The roses here offered are extra strong two-year-old field-grown blooming plants, which, if planted early, will give a large number of flowers the first year. They can be planted as early in the spring as the frost is out of the ground, and from that time until about the first week in May. We offer a grand collection of the best and choicest varieties, as follows:

HYBRID PERPETUAL OR JUNE ROSES

Frau Karl Druschki, Marchioness of Londonderry, Capt. Hayward, Mrs. R. G. Sharman-Crawford, Ulrich Brunner, Margaret Dickson, Baron de Bonstetten, Paul Neyron, Gen. Jacqueminot, Magna Charta, Mrs. John Laing, Mme. Gabrielle Luizet, Marshall P. Wilder, Gloire de Paris, Baroness de Rothschild, Prince Camille de Rohan, Fisher Holmes, Alfred Colomb, Soleil d'Or, Persian Yellow, Moss Roses, Rugosa alba and rubra, etc.

MONTHLY AND HYBRID TEA ROSES

Etoile de France, Killarney, Mme. Abel Chatenay, Countess of Gosford, Koenigen Carola, Perle von Godesberg, Gruss an Tepiltz, Maman Cochet, White Maman Cochet, Belle Siebrecht, Hermosa, Mme. Caroline Testout, Souv. de Pres. Carnot, Kaiserin Augusta Victoria, American Beauty, La France, Clothilde Soupert, Prince de Bulgarie, Mme. Norbert Levavasseur (Baby Rambler), Anny Huiler (Pink Baby Rambler), Catherine Ziemet (White Baby Rambler), etc.

In Climbing Roses we have a nice stock of Crimson Rambler, Lady Gay, Dorothy Perkins, Dawson, Gardenia, Tausendschon, etc.

LET US KNOW THE QUANTITY YOU WANT AND VARIETIES, AND WE WILL BE GLAD TO QUOTE LOWEST PRICES ON SAME BY RETURN MAIL.

Seed Trade

Bulletin No. 121, from the Massachusetts Agricultural Experiment Station, entitled "Seed Separation and Germination," by Dr. George E. Stone, gives a brief account of the methods used in and the advantages to be derived from the separation of seed, together with some experimental data pertaining to seed separation.

The bulletin describes and illustrates the various devices for separating seed which have been employed at the Station. With large seed, sieves are recommended for separating the large from the small seed, and for smaller seed like onion a winnowing machine is used. The bulletin illustrates a new device for separating tobacco, celery and other similar very small seed by means of blasts of air, and this, as well as different kinds of sieves, etc., has been used extensively at the Massachusetts Experiment Station, and a great many samples of tobacco and onion seed are separated annually with it.

Tables are given in the bulletin showing the standard of germination of some of the most important seeds, and a brief review of the seed work at the Experiment Station. Four tables are also included which are for the purpose of illustrating the advantages of seed separation, and these are typical of a large number of experiments which have been carried on for some years, showing that in practically all cases the larger seeds are superior in their germinating capacity, and that from them much larger seedlings can be obtained.

Seed separation is especially applicable to tobacco and onion seed, and can be employed to good advantage with other seeds, more particularly lettuce, radishes and celery.

W. R. Paxson has opened a seed store at Crawfordsville, Ind.

THE SAN JOSE SCALE.

The Rhode Island College of Agriculture and Mechanic Arts has a bulletin now in press covering the subject of this dangerous pest very fully but it will not be ready for this spring's use and therefore an advance sheet is being distributed, from which we extract the following:

Its Dissemination.

The San Jose scale was imported from China into the San Jose Valley, California, about thirty-five years ago, and from there it has been carried over the country in nursery stock, almost before its dangerous character

was realized. Unlike the scurfy and oyster shell scales, which have troubled the fruit growers for a century or more, and which lay eggs in the fall of the year that hatch at some definite time the following summer, the San Jose scale lives over winter in the larval stage, and after maturing in the spring produces young which hatch from eggs inside the body of the female. This process may go on for five or six weeks before the insect dies. The larvae soon settle down, insert their sucking tubes into the bark and, in a few days, secrete a waxy covering or scale which protects them from injury. The young mature in about 35 or 40 days and then begin to give birth to a new generation.

The oyster shell and scurfy bark scales can be treated with an ordinary kerosene emulsion at the time when the eggs hatch in the early summer, and if thoroughly done, every one of the young scales will be destroyed. This method cannot be used for the San Jose scale. Solutions which would destroy the female scales would be too caustic for the foliage of the trees. It is possible to kill the young larvae with the same solutions as used for other scales, but it is evident from the life history already given that applications would have to be made once or twice a week throughout the summer in order to reach all that are born before they have time to form the protective covering.

Three Billion Descendants in One Season.

As the insect has few enemies, most of the young scale live to mature and reproduce, and with the several generations which appear during one season it is possible for one female which winters over to have more than three billion descendants at the end of the season. This illustrates the force of what we wish to impress upon all who expect to battle with this insect on fruit and ornamental stock, that spraying as ordinarily carried on, is inefficient and almost certain to lead to disappointment and the idea that the scale cannot be controlled. A very few scales which may escape a careless application of the spray remedy may have progeny enough to lead the fruit grower to think, when the fall comes, that the application of spray remedies the previous season was of absolutely no avail, when as a matter of fact he may have killed 95 per cent. of those wintering over.

The Best Spraying Outfit.

The precaution is obvious. Every portion of the tree must be covered with the spray to the very tips of the

twigs, and from all sides. This can only be accomplished with a good spraying outfit. The first requisite is a good spray pump with which a pressure of 75 to 125 pounds can be maintained at the nozzle. If the Vermorel type of nozzle is used, this pressure will produce a fine mist-like spray, which, if intelligently directed, will strike and adhere to all parts of the tree. As an illustration of the efficiency of a misty spray over a coarse one, notice how much more thoroughly a tree is damped by a heavy fog than by a brisk shower.

The best remedy today is the lime-sulphur wash prepared as follows: Slake 15 to 20 pounds of good lime in a small quantity of hot water. While the slaking is in progress, sift into the lime 15 lbs. of Flowers of Sulphur and mix the mass thoroughly. When the ebullition has ceased, add 20 to 25 gallons of hot water and boil from 40 to 50 minutes. Pour through a strainer having 20 to 24 meshes to the inch into a tank or barrel and add water, hot preferably, enough to make fifty gallons. The mixture should be applied while hot, and if any of it is left standing over night it should be heated before being applied.

When it is impracticable to make the lime-sulphur wash in any of these forms, good results can be obtained by the use of one of the miscible oil sprays now on the market. Scalecide and Trajet Brand Scale Emulsion are forms of these oil sprays which seem to give excellent results. They are handled by dealers in agricultural supplies in our cities. The oil sprays mix readily with cold water and are very easily applied. Directions for using are furnished by manufacturers.

Recapitulation.

To recapitulate: The spraying must be done with good spray mixtures and up-to-date apparatus. The work must be thorough. If a wind blows, only one side of the tree can be sprayed. The other side must be treated when the wind is from the other direction. Have pressure enough to produce a fine mist as the spray leaves the nozzle. Cover every spot on the tree to the very tip of the twigs. A good sprayer will do this without deluging the tree so that the liquid runs down the stem or drips from the branches. Use the boiled lime-sulphur wash if possible. If not, use one of the miscible oils. Spray as soon as the leaves have fallen in the autumn, or just before the leaves come out in the spring.

You will find something worth reading on every page of HORTICULTURE.

MARYLANDERS IN HOLLAND.
We have received from R. Vincent, Jr., of White Marsh, Md., who together with Mrs. Vincent, is accompanying the British Horticultural Press party on its tour through Holland, Belgium and France, the following interesting letter dated April 26 at Ghent, which will be read with pleasure, we are sure, by Mr. Vincent's many friends.
Editor HORTICULTURE:

Dear Sir,—We have arrived this far on our journey. The weather has been very cold and disagreeable, but we have had plenty of enjoyment on our trip through the bulb fields of Holland. The hyacinths were simply grand; the narcissi also. Tulips, except the early flowering kinds, were not in bloom, though showing fine growth. The extensive cultivation of every crop grown here shows the wonderful economic side of these people, who deserve all praise that they get, for their many and varied products.

At the banquet in Haarlem and also throughout that day's trip, the French buyers or dealers were also with us. At the banquet speeches were made in English, French and Dutch, about 250 plates being required for the visitors. The decorations both on the tables and stage were very elaborate, and a very enjoyable time was had.

I visited the Quinquennial Exhibition here today, and I must say that for size and beauty of decoration it beats anything that I ever dreamed of, both for quantity of various plants and blooms exhibited and the arrangement of same, which was simply marvellous, especially as to the color effect, a great many being so arranged as to show at their best.

I had always understood that this was the home of the azalea and rhododendron, but expected to find them smaller plants. It is true that there were a great many small plants exhibited, but the number of extra large ones of tremendous size was a surprise indeed, a large number of them being the flat or common round-head type, also of the espalier and pyramidal shaped. These plants were shown, some with two plants trained together so that a space or two of say a bright red one, would show out from a white base. All classes and varieties were shown, including several extra good blocks of Azalea mollis and pontica. Rhododendrons were certainly strongly in evidence, and gave color and enchantment to the exhibition of beauty. The main building was filled with palms, ferns, and stove and greenhouse

plants of all descriptions, making a scene long to be remembered. The collections of orchids, etc., was said to be one of the best exhibits ever put up. Ghent claims to have the largest and most extensive grower of these plants there is, and the money value of those exhibited is said to be something marvellous.

The grounds outside were filled with a choice assortment of bays, evergreens and all other plants that could stand to be planted out at this season.

Some fine beds of extra large daisies, pansies and other hardy flowering plants among the beds of specimen evergreens enlivened the scene. This vast show, with all the space covered was thronged continually with an admiring crowd, showing what a strong interest the people of Belgium take in beautiful flowers. In fact, all of the stores seem to think it necessary to decorate, some making their places of business look like a florist's shop. We leave tomorrow morning for Brussels and on Thursday for Paris.

Respectfully yours,
RICHARD VINCENT, JR.

BUDDLEIA VARIABILIS VEITCHIANA.

Emil Matzner, in Moller's Deutsche Garten Zeitung.

This plant was given into the trade, two or three years ago, by James Veitch & Sons, Chelsea, England. It is distinguished by a special strong growth, and has much larger flower stalks than the ordinary variety.

The Buddleia variabilis flowers on young wood and has to be cut back considerably. They are propagated easily by hardwood cuttings in October or November.

Of Interest to Retail Florists.

Chas. Limmer, florist, has moved to 321 State St., Schenectady, N. Y.

Easter trade at Franklin, Mass., was fully up to previous years. Prices were maintained and everything was in good demand.

The Colonial Flower Shop is to occupy the new building to be erected on the corner of Main and Jefferson streets, Goshen, Ind.

L. C. Margot, florist, of Jamaica Plain, Mass., has recovered from his recent severe illness and is again able to attend to his business.

Mrs. H. B. Magee, who was one of the heavy losers by the Chelsea fire, has opened a flower store at 243 Bunker Hill St., Charlestown, Mass. Mrs. Magee had been established in Chelsea fifteen years.

A DETROIT RETAILER'S VIEW.

At this season of the year when our cut flower resources are for natural reasons far ahead of the demand we see all those products of Dutch origin, i. e., tulips, hyacinths, etc., go to the waste box in enormous quantities. In view of the enormous cash outlay Dutch bulbs involve and the small margin which exists between that and the returns from the wholesaler, we are naturally inclined to speak discouragingly concerning the bulb forcing industry. We are, in short, convinced that there is "nothing in it." We feel that the energy which the many dollars we send to Holland can produce would be more profitably expended at home. What other flowers could we grow in place of narcissi, tulips, hyacinths, etc., that would be just as welcome to the public and not reduce the demand for our home product such as carnations and roses?

But we all must concede that the position which bulbous flowers hold in our trade today is not one of unjustified usurpation but rightfully belongs to them. If they overstep their position and crowd our home product into the background it is not their fault but solely our own. While the growing of too many bulbous flowers may suggest itself as the first and primary cause of overproduction, I decline to accept the consideration of this fact for the reason that Americans will overwork anything and everything. More important and of better permanent remedial effect seems to me an endeavor to place bulbous flowers where they belong. If we realize their proper position in our trade the question of quantity is solved.

As we stand today we provide for the public a comparatively small bill of fare. Carnations, for instance, are nice and justly well liked, but if we have fifty varieties and we supply Mrs. X. with fifty table decorations, using a different variety every time, she will be dissatisfied. Here is where the bulbous flowers assume their eminently important position in our trade. It is up to them to give us the means to stimulate the sale of our home product. To offer every prospective purchaser carnations is simply killing the

GEO. B. HART, 24 Stone St., Rochester, N. Y.

trade. Bulbous flowers range in the same category. Let our sales-people awake to the fact that variety creates appetite and that only through this appetite-creating system has the present high standing of our trade been achieved. Be original and go outside the line of carnations and roses and you will find the proper place for bulbous flowers where they are not only paying for themselves but also help to stimulate the sale of our home product.
FRANK DANZEL.

NEW RETAIL FLOWER STORES.

William Butler, Brunswick, Me.
A. H. Dailey, 511 Prince St., Knoxville, Tenn.
Mrs. Ennis, Caswell Building, Milwaukee, Wis.

NEWS NOTES.

A. Chandler Manning, landscape architect, has opened an office at Reading, Mass.

The name of the B. K. & B. Co. has been changed to the Charles Knopf Floral Co., Richmond, Ind.

Mrs. Tom Crawford opened the St. John greenhouses at Darien, Conn., in time to do a large Easter business.

Jos. P. Murray and Ira P. Hersey have acquired a place in Franklin, Mass., and have started in market gardening. They will also make a specialty of gladiolus bulbs and aster seed.

Edwin Lonsdale has a find in the shape of a dwarf form of Schizanthus Wisetonensis which has been thought worthy of a visit from the novelty committee of the Florists' Club of Philadelphia.

Jas. G. Hancock of La Grange, Ill., who is connected with Frank Oechslein's establishment, Chicago, lost his home and a large part of its contents by a fire which started from some unknown source in the early morning hours of May 5.

At a recent exhibition of the Royal Horticultural Society in London, Messrs. B. R. Cant & Co. exhibited a white sport from rose Dorothy Perkins, identical with that well-known variety except for the pure white flowers.

As announced in our advertising columns, A. Reper will disseminate his sensational carnation Bay State next season and is now booking orders. This carnation, which was the most noticed variety at the two last carnation conventions, is white with carmine markings in the way of Mrs. Patten; flower and stem very massive,

plant sturdy and free flowering. It is the progeny of two unnamed seedlings.

Detroit parks are all aglow with beautiful pansy beds. Some of the larger beds are planted with a dark blue variety bordered with a yellow variety. Beds of the old Primula auricula are also very effective, but we have to wait a few days for tulips, which only in the most favored positions show color.

The will of George W. Hammond of Yarmouth, Me., a copy of which has been filed in the Worcester county (Mass.) probate court, provides that after the death of his wife and sisters, from the principal of a trust fund there shall be paid to the president and fellows of Harvard College \$5000 for the use of the botanical garden and herbarium.

That the curtailment of business resulting from the money stringency last fall has not thus affected all industrial concerns is shown by the successful business of the American Nursery Company this spring, who report a material increase in orders over the combined business last year of the concerns now constituting the company, not only in wholesale trade all over the country but in furnishing private estates and public grounds, the latter exceeding all the anticipations formed earlier in the season from the general financial conditions.

INCORPORATED.

Northwest Nursery Co., Valley City, N. D.; E. A. Pray, E. C. Hilborn, P. A. Pickett, O. O. Wagley; capital, \$50,000.

Adam Pfeifer, father of Mrs. Fred Burki, of Gibsonsia, Pa., died on April 25 at the age of 88. Mr. Pfeifer was connected with the florist business in its early days.

FLOWER MARKET REPORTS

BOSTON Complaint is general as to the flower trade here ever since Easter. At present it is exceedingly dull. In short, it is not a question of price but how to get rid of the product which, notwithstanding the cool weather, is coming to the wholesale markets in quantities undecreased. Violets linger but find no takers, even the street trade having no use for them. The street business has amounted to almost nothing this spring owing to the cutting off of all permission to sell on the public streets since about the first of this year. The fakir business can now be carried on only from stands on private property. The growers and wholesalers have always found this element a great help in unloading spring surpluses in former years and the present restrictions are a great handicap.

BUFFALO A few warm days brought on a heavy supply of all kinds of stock and up to Thursday of last week the coolers were much on the overstocked list, but always looking ahead for a clean-up on Friday and Saturday. The weather conditions were much against the flower buyers, as Thursday and Friday regular March weather was had with plenty of rain and snow; in fact, it could not have been worse for the trade, therefore the wholesaler carried all the stock. Nevertheless, on Saturday, a good clean-up was had, but roses moved rather slowly. The carnation quality has been good, but roses have not been up to the mark, excepting Richmonds, which have not been better this season and sell more readily than others. Lily of the valley, peas, snapdragon, outdoor tulips and daffodils, southern peonies and other stock were in good supply. Speculative buying was rather light, but considering the amount of stock accumulated during the week, the wholesaler must be satisfied with the clean-up which was had and prices obtained.

CHICAGO Prices for cut flowers are a little in advance of last week. Demand is light and the influx of southern flowers does not help matters. The prices on roses are approaching normal again, and quantities of really superior stock are seen in the wholesale market. The price of carnations has advanced more than that of any other flowers. Callas are hard to move and the demand for them seems to have lagged to a certain extent during the entire season. Gardenias are coming in rapidly from the south. The stock is very good and brings from one to two dollars, while forced gardenias sell for two or three dollars per dozen. Lilaes are also coming from the south. Taking it all around, the wholesale market has plenty of stock to offer but would like more buyers.

DETROIT No change in general business conditions. Cold weather intermingled with snowstorms did not help business either, but reduced the cut on carnations and roses. This week will see the end of bulbous flowers.

INDIANAPOLIS The reopening of the social season Easter Monday was less marked than is customary. The present warm weather means increased supplies with prices cut in half on almost everything. Bulb stock is gradually disappearing but still there is enough to meet the present demand. Beauties and teas are first class and prices reasonable. Carnations are probably the greatest drug on the market; nearly impossible to move them at any price. Sweet peas are abundant with demand about normal. Some peonies, gladioli and irises are on the market. Lilies seem to be hard to move.

NEW YORK Business continues to sag all through the wholesale and retail lines and prices have gone still lower during the past week. Outdoor lilacs from south and gardenias from further south are pouring in now, and the violets which have already gone, and arbutus which are waning, are not missed. Quality on all staples still holds good but with the supply so greatly in excess of the needs of the market quality is no great temptation.

PHILADELPHIA Last week found the market in a more demoralized condition, if it were possible, than any week this season so far. The warm weather brought stock out very plentifully indeed, not only greenhouse flowers, but a lot of outdoor blooms. The last of the week out-door lilac was very abundant; the better varieties of lilac not nearly so plentiful. A great many of the retailers are still using left-over plants and not buying as many cut flowers on this account. What cut lilies were left over from Easter were mostly dumped, an act much to be deplored. Roses and carnations sell at a very low figure indeed, carnations particularly. Sweet peas have fared if anything worse than roses or carnations. Taking the week as a whole, it has been very unsatisfactory indeed. What business was done was done with a great deal of effort and then the buyers were overcritical, which is generally the case when stock is plentiful. One of the bright spots was cattleyas; these were not very plentiful and sold well. Double violets are about done and the last few shipments have been coming in poor. Gardenias have been fairly plentiful, and the demand comparatively better than for any other flowers. Greens still move in fair shape.

TWIN CITIES The cut flower business for the last week has been fairly good. American Beauties are getting scarce; violets are about gone; carnations are plentiful, but bring a pretty good price.

WASHINGTON The midsummer of the latter part of April has been succeeded for the past week by cold, raw rain, and business is proportionately dull. Carnations have gone tumbling down in price and both they and sweet peas are a drag on the market. Outside lily of the valley of very fine quality is coming in in quantity and sells well. All outside flowers are suffering by the present inclement spell and it is to be hoped that the law of compensation will continue to hold good and that the demand for indoor grown things will improve.

NOW IS THE TIME TO BUY

FRENCH OR AMERICAN GREENHOUSE GLASS

LOWEST PRICES ON REQUEST

26-30 Sudbury St.

BOSTON, MASS.

61-63 Portland St.

A PROSPEROUS BOILER MANUFACTURING CONCERN.

Kroeschell Bros. Co. of Chicago have at their works some forty odd hot-water greenhouse boilers all completed ready for shipment, all of which have been ordered and sold. Orders are coming in very rapidly and Mr. Kroeschell says it is barely possible that they may be quite busy at the end of the season, and therefore urges prospective buyers to place their orders at once; in which case they are very glad to build the boiler and hold it until such time when it is wanted, and do not ask for any payment until boiler is delivered.

Mr. Kroeschell states that the prospects are very good for this year's business, and if present sales are a criterion the sales this year will be fully double what they were last year. He finds that for greenhouse purposes the hot-water system of heating is becoming more and more popular not only for small ranges but also in the very largest ranges in the country. It would well repay any florist visiting Chicago to call at these works, and even though he may be no buyer or prospective buyer of a boiler, he will always find courteous treatment at the hands of Mr. Kroeschell.

GREENHOUSES BUILDING OR CONTEMPLATED.

- Monongahela, Pa.—I. S. Crall, one house.
- Lewiston, Me.—Ernest Saunders, additions.
- Calgary, Alta.—A. Terrill, range of houses.
- Phillipsburg, Pa.—George Parker, additions.

DAHLIA CHARLES LANIER

BEST NOVELTY OF THE YEAR

We shall not describe it ourselves—the Press has already done so.

... WHAT THE PRESS SAYS ...

From the New York Tribune, Sept. 26, 1907.
At the Dahlia Show at the American Institute Exhibit.

Probably the most striking of the new Dahlia specimens is a brilliant yellow, its round blossoms as large as the head of a baby, from the Charles Lanier Estate at Lenox.

Standing high and proud on their long stems in a huge yellow vase in the centre of a table, these magnificent blossoms caused audible exclamations as they caught the eyes of the visitors. This is their debut in New York, although they were recently shown in Boston.

From the New York Times, Sept. 27, 1907.
Newest Specimens at the Dahlia Show.

A large number of men and women visited the big dahlia show at the American Institute, 19 West Twenty-fourth St., yesterday afternoon. There were at least

200 varieties of the finest and newest specimens of this beautiful Fall flower, and it would be impossible to tell how many colors and shades.

The most noticeable blossom was a big Charles Lanier which is known as the "show" dahlia. It is the old-fashioned quilled flower, but of a mammoth size and beautiful yellow color. This was raised by A. H. Wingett, on the estate of Charles Lanier, Lenox, Mass., and named for the proprietor. Mr. Wingett has been at work developing the plant for the last three or four years, and it has now been awarded first prize and a certificate, which is a scientific sanction of it as a new flower.

The Charles Lanier dahlia probably will be sold before the exhibition closes and should bring a good price, for it stands alone in its class.

From Horticulture, Sept. 7, 1907.

Dahlia Show at Boston.

The dahlia show at Horticultural Hall,

Boston, this week is unquestionably the finest exhibition of dahlias ever given in America.

The sensation of the show is A. H. Wingett's Charles Lanier, a four-year-old, deep yellow in color, which may be appropriately described the Col. Appleton of the dahlias. The flowers, which came in excellent condition all the way from Lenox, are shown in one of the large vases occupying the centre of the stage in the lecture hall.

From "Dahlia News," September, 1907.
New Seedling Show Dahlia "Charles Lanier."

Twenty-four enormous perfect blooms of a bright yellow were exhibited in a large Japanese vase, and in effect it equalled the best vase of Chrysanthemum. The special merit of this variety is the extreme length of stem, three feet or over, which makes it a most desirable variety for cutting. In size it equals any exhibition variety of show.

Plants to be delivered in May. Special prices to the trade only, as follows: Per dozen plants, \$3.50; 25 plants \$6; 50 plants \$11; 100 plants \$20. Orders to be filled in rotation as received.

R. & J. FARQUHAR & CO., 6 and 7 South Market St., BOSTON, MASS.

Cypripedium Curtisii Nobile

Our picture is from a plant exhibited by Wm. Kleinheinz, and awarded a certificate of merit at the monthly meeting of the Pennsylvania Horticultural Society, April 21st. This is one of Sander's novelties and came from Sumatra. It is regarded as a decided improvement over the ordinary Curtisii type, the pouch being very large, the color very deep, foliage, stem and form being of the best.

Notes from the Arnold Arboretum

The Shadbushes and the Prunus are still the dominating flowering trees and shrubs at the Arboretum. *Prunus nigra* is now passing, but as the petals change in fading from white to a pale pink color, it is in this state even prettier than when it was in its prime, presenting now a pleasing variety of color among the white Shadbushes. *Prunus orthocarpa* and *P. Watsoni* (*P. angustifolia* var. *Watsoni*), densely branched shrubs with rather small flowers are now in bloom, but must be classed among the less beautiful species as regards the flowers. A handsome and interesting species and little known in cultivation is *Prunus humilis* which was raised from seeds brought by Professor Sargent four years ago from Manchuria where he found the fruits for sale at a railroad station. The shrub is widely distributed in Manchuria, Mongolia and northern China and the edible slightly acid cherry-like bright red fruits are gathered and sold at the markets. It is a low shrub with slender branches covered with white or in the bud pinkish white flowers. Possibly it may become a valuable shrub for its fruits, but as yet we know little about their qualities and whether they will be produced here as freely as in their native habitat; it seems, however, worth a trial, particularly in the northern region of the Middle West.

The Japanese Pear, *Pyrus sinensis*, is now conspic-

uous with its large white flowers; there are a number of varieties in cultivation with large edible fruits, but it is more to be valued as an ornamental tree than as a fruit tree. *Pyrus salicifolia* is a handsome small tree with white flowers and slender partly drooping branches clothed with willow-like silvery white foliage.

The Apples are now coming into bloom and as the first *Malus Niedwetzkyana* shows its rose-purple flowers in color similar to the Red-bud but of a deeper shade. It is a low tree in habit resembling and indeed closely related to the common apple-tree, but almost every part of it, bark, wood, flowers and fruits are red, even the leaves are reddish when unfolding and turn deep red again in fall. The fruit is edible, conical-ovoid and of medium size with deep crimson-purple skin and rose-purple flesh. It was introduced from Turkestan about 1891 by Dr. Dieck of Zoesehen, Germany, and is perfectly hardy. It is to be recommended as an ornamental tree for its peculiar shade of red, unlike any other apple-tree. One of the most beautiful of the Asiatic crab-apples is *Malus Halliana* (*Pyrus Parkmanii*) which is opening now its first flowers. It forms a graceful small tree, the slender branches loaded with large pink semidouble flowers nodding on dark-colored slender pedicels; it is also handsome in summer with its dark lustrous foliage changing late in fall to dark purple. It has a particular interest for Bostonians, as the original tree from which all the trees now in cultivation have been propagated stood until a few years ago when it died on the former Francis Parkman estate in Jamaica Plain now a part of the Boston park system; it was sent to this country from Japan about 1863 by Mr. G. R. Hall after whom it was subsequently named; it also had been distributed under the name *Pyrus Parkmanii* by some nurseries. Another very handsome ornamental Apple is *Malus floribunda*, a shrub or small tree with slender spreading branches. The peculiar charm of this species consists in the pleasing contrast the deep rose-carmine flower buds form with the pinkish white color of the fully open flower and in the delicate intergrading shades of pink. As the best effect is an effect of detail this crab-apple should be planted where it can be seen at close range. More showy perhaps is *Malus Scheideckeri*, supposed to be a hybrid between *M. floribunda* and *M. prunifolia*, which has larger semidouble flowers of a lighter pink color. *Malus Toringo* is also similar to *M. floribunda*, but the flowers are smaller and usually paler except in the variety *M. Toringo* var. *atrosanguinea* which has flower buds of deep carmine color similar to those of *M. floribunda*.

The earliest of the Lilacs, *Syringa oblata*, is beginning to bloom; in flower it is not as beautiful as most of the other Lilacs, as the panicles are comparatively small and the pale mauve lilac flowers often suffer from late frosts, but its broad foliage is handsome and turns to a deep vinous red in fall. Also *Syringa hyacinthiflora* with lilac-blue double flowers in rather small panicles is opening its first flowers; this hybrid has been the starting point of most of the double-flowered varieties. Many of the varieties of *S. vulgaris* showing already fully grown panicles will open during the first warm days and mark the beginning of glorious display during the latter part of May and the beginning of June. Also the Flowering Dogwood, the Red-bud and several Rhododendrons, of the Azalea group will be in bloom soon and will add their share to the display.

Memorial Day, day of all days that the florist and gardener should pay homage to, is once more on the threshold. Garden and greenhouse, field and thicket, will give up their fragrant product for the most sublime use to which flowers can be devoted, on this great floral festival of sweet remembrance. It is a pleasure to learn from innumerable sources that the observance of Memorial Day is rapidly growing in intensity throughout

the country. The more it grows the better it will be for the common weal. Its sentiments and its lessons are, to use a popular phrase, "all to the good." So plan to bring along your flowers in greatest profusion each year for this event. There is almost no limit to the quantity that will be taken.

We have no doubt that Mr. Long's plea in another column of this paper for a Sunday of rest for the florist will find a responsive echo generally throughout the trade. The exactions of the florists' business need not be enumerated for the enlightenment of the readers whom HORTICULTURE serves. That they are almost unbearable will not be denied. That they operate against the best advancement of the art by dissuading many capable and intelligent young men from taking up the florist's business as an avocation is a logical proposition. That the closing of stores on Sunday would entail no serious loss, provided the custom is made uniform throughout the community, will be generally admitted, we think. How to bring about the needed uniformity of compliance is the problem. Compulsory closing, wherever tried, has not been permanently successful so far as we are aware. Agitation through the clubs and trade papers with a view to developing the reform sentiment among the florists themselves might in time accomplish something. It is worth trying and HORTICULTURE's columns are open to any who have views to express on this or any other topic of interest to the profession.

Secretary Rudd's communication stating the position of the S. A. F. with regard to the registration of new plant names, which appears in this issue, is timely, to the point and eminently wise. By limiting the scope of the registration bureau as indicated he will save the society much possible embarrassment and accomplish practically all that such a department can accomplish under the auspices of a society equipped as the S. A. F. is at the present time. There is an old saying that will apply here—"Let well enough alone." The S. A. F. list of registrations since the bureau was established is the best monument to the practicability of the system as conducted hitherto. The horticultural profession has found it acceptable, the plant introducers have welcomed its help, and its operations have been singularly free from friction. During the time the system has been in operation botanical authorities have been burning the midnight oil overhauling genera and species, changing old names to new ones and new ones to old ones again. The S. A. F. does well to keep out of anything that will involve it in these scientific controversies. If any one doubts this let him peruse Nicholson's list of synonyms and cross references. At this juncture it is refreshing to read in Professor Bailey's thoughtful preface to the fourth edition of his Cyclopedia, these words: "Botany, however, has declined until recently, to extend its sphere to subjects that come too near to real human affairs, and therefore has left a very large part of its domain uncultivated. Horticulture has seized some of this territory. It should hold the territory. The S. A. F. has been doing business in a simple, sensible and unpretentious method and not trying to do impossible things. That method has served its purpose well and is good enough for the S. A. F. to stick to for twenty years to come."

Some Remembrances of Some Pot Roses

Since the exhibition of the Rose Society in Chicago my thoughts have bled back to 1859-63 when I had under my charge a famous collection, bought from E. P. Francis & Co., Hertford, E., by Archibald Turner of Leicester, England. These roses had been in many fights at the London shows with the Frasers, the Waltham Cross Pauls, John and Charles Lee, and Osborne of Fulham. None were in pots larger than 11 inches and many of the plants were over 5 feet high, pyramidal in shape as to their fronts, their backs being somewhat flatter. Some of the stems at the top of the soil were thicker than my wrist notably *Camp d'Hebe*, the most beautiful pink rose even today; *Paul Perras* H. C., *Paul Ricault*, 1845, no crimson more beautiful nor of finer shape; *General Jacqueminot*, H. C., 1846, and *Madame Zoetman*. These were all on their own roots and were ten or more years old. Worked on the dog rose were *Appoline*, *Silene* (no Bon to it then), *Devoniensis*, *Harrison's Yellow*, *Jules Margottin*, *Mme. de Vatry*, *La Reine*, *Mme. Falcot* budded all over an old plant of *Lamarque* (this was new then), *Safrano* on *Solfaterre*, *Triomphe de Rennes* on *Solfaterre*; *Souvenir de Malmaison* and *Sombreuil* were budded on *Chenedolle* as was *General Jacq.*, H. P. and *Geant des Batailles*; *Niphetos* on *White Banksian* and also on *Lamarque*; *Agrippina* double worked on *Appoline*.

Nine plants exhibited at the first spring shows in 1860 averaged over 75 flowers on each. *Niphetos* and *Mme. Falcot* had close to 100 flowers on each; the *Mme. Falcot* was a sensation. These were the best exhibits in the class for amateurs. There were classes for 24 plants in 6-inch pots which used to bring out great competition. It used to take lots of manoeuvring to time the different varieties but it was done. I wish I could go over the course once more.

Some of the best new H. P. roses about then and which are yet in cultivation are *Anna Alexieff* and *Anne de Diesbach*;—the first time Reynolds saw this he remarked it was as large as a tea saucer and a little more durable—*Baron Gonella*, *Chas. Lefebvre*, *Comtesse de Chabillant*, *Empereur de Maroc*, *Eugene Appert*, *Francois Arago*, *Francois Lacharme*, *Gen'l Washington*, *Louis XIV.*,—the color of *Richmond* comes near this for brilliancy—*Mme. Boll*, *Mme. Chas. Crapelet*, *Mme. Furtado*, *Mme. Chas. Wood*, *Marechal Vaillant*, *Maurice Bernardin* and some others. Other old roses that were in this collection were *Adam*, *Comte de Paris*, *John Thorpe*, *Jules Margottin* (then new) *Mme. Bray*, *Flavescens* and *Pio Ninth*.

John Thorpe

An Evil to be Remedied

The closing of flower shops on Sundays being almost unknown to the plodding clerk whose daily bread is earned on a seven-day basis, gives rise to the time-worn question, "Why is it so?"

Truly there is no necessity for such oppression of the clerk, whose hours of labor are at all times long and tedious, as exists in most of our large cities.

The clerk can do nothing for the betterment of his condition while his employer, whose hours for going and coming are his own, and who is not forced to submit to confinement at his place of business, allows the man at the counter to be forgotten and often neglected.

There are many exceptions to this particular brand of employers, it is true, but there is often nevertheless, unpardonable negligence on the part of these as well.

There is no doubt that an agreement might be brought about by the retailers whereby all stores may close at a given hour every evening, Sundays excepted, when all places shall be closed during the entire day.

Many may laugh and many have laughed at such a proposition, but scoffers have simply to look to the several cities where Sunday closing of flower shops prevails and where employer and employe alike enjoy the much needed rest after a week of as successful and profitable business as might have fallen to the fortune of the man of fourteen hours a day plus Sunday labor.

Whatever excuse may be made in extenuation of the ungodly use of all the hours of the week for the sale of flowers the "wise one" will please direct his attention to several department stores of Greater New York where flowers are sold between the hours of 8 A. M. and 6 P. M. on week days *only*, and be advised that either of said stores purchases and disposes of a far greater amount of flowers than any single flower shop in the city.

Will the retailer help his clerk by endeavoring to crush out the evil practice of all-hour opening?

Wm. H. Long

Baccharis halimifolia

(See Cover Design.)

The Groundsel Tree (*Baccharis halimifolia*, L.) is a native shrub growing from six to nine feet in height, and may be found on sea beaches from Connecticut southward. It forms a conspicuous object in the fall by reason of the long silky white pappus which the fertile plant carries in abundance, which forms a pleasing contrast with its foliage.

The shrub is well worthy of cultivation. It has been used with good effect by the Boston Park Commission together with tamarisks, asters and solidagos for planting the borders of the waterways to the Fens. In hard winters the *Baccharis* suffers somewhat in the latitude of Boston.

A Chat with Robert Simpson

Concerning Widths of Rose Houses. Their Ventilation and Heating. Along with Some Facts About Building Greenhouses.

The two Sectional Iron Frame, Shadeless Ridge houses were erected in 1907. They are 465 feet long and 30 feet wide.

It had seemed to some of us that about all that could be said on various widths of houses had been said, but when Mr. Elliott came out so decidedly with his point of view at the rose convention I became convinced that there was still another side which had not been thoroughly considered. There was room for argument yet. What of the house of medium width, and does it really pay the florist to do his own erecting?

With this end in view Mr. Simpson, whose greenhouse experience, as is well known, has been long and varied, kindly consented to give up an hour or so to being "pumped," as it were. I found him just coming out of his sunny office, and after locating me in

an easy chair by the window the discussion was on.

The Best Width.

"No," said Mr. Simpson, "I never have been in favor of the extremely wide house. By extremely wide, I mean from 40 feet up. Such widths may be a little cheaper to erect, but 30 feet is as wide as I want." The average quantity and quality of bloom is actually higher in a house of this width provided it is rightly constructed."

But, Mr. Simpson, is not the whole trend of building toward wider and longer houses?

"Yes, but that doesn't actually prove anything, for this is an age when no one feels he is doing anything unless

he is outdoing what has already been done. Sometimes this tendency of the American people is carried too far and they lose the sense of actual relative values.

"Now don't misunderstand me, or quote me as saying these large houses are not splendid examples of the sectional iron-frame construction, and greatly to the credit of the builders. But contrary to an increasing belief to the opposite, I believe roses do not thrive as well when a great distance from the glass, such as is the case with the center beds in extremely wide houses.

"Careful chemical experiments I know have been made in the wide houses, with light values at various

Gable view of the 30 foot Shadeless Ridge houses, with the old three-quarter span houses beyond.

distances from the glass, and there seems to be no appreciable difference, but nature is more subtle than the arts of man and to me there is such a difference in the stock produced on the center benches of wide houses that at the Chicago Convention I could readily select such cuts. On the other hand, this apparent difference may be due to the fact that there is still something to learn about their control and the handling of stock in them."

About Ventilation.

I see that you have the self-oiling style of gears, operating only fifty feet of sash. Aren't these gears designed to handle long runs with ease?

"Yes, they are; but it is not a question of the power of the gear, but the common sense of ventilation. You see temperatures vary in different parts of the house; the ends are apt to run cooler, or in cases where connecting passages are used, as in our houses, the winds seem to suck down between the houses, strike the passages and shoot up along the roof into the ventilators. Now you see what a disadvantage long runs are in either case, as it is not alone a question of opening so many sash, but one of being able to ventilate where, and only where, ventilation is needed."

A Double Heating System.

Your foreman tells me your heating system is a combination of hot water and steam; is it cheaper?

"Well, yes, cheaper and more easily controlled. It costs more to install, but pays. I learned my lesson the first year after buying the 18-foot houses, of which this range then consisted. In some way the expansion tank pipe

became plugged and just at sundown on the edge of a cold night, out went a boiler section. We managed to gather enough oil stoves to keep the stock from freezing, and the next day the boiler was repaired. That night, out went the boiler in another house, and it was then we located the real trouble, and I decided once for all that any building I did in the future would be equipped with both steam and hot water, so if one system was disabled, the other could temporarily carry the house. Then, again, one system supplements the other in such a satisfactory way. For example, with a sudden fall in the temperature, steam can be generated in short order, and hold the houses until the slower heat of the water system is thoroughly warmed up.

"But quite as valuable is the use of steam on the cool nights in mild weather when the continued radiation of the hot water during several hours of the day is objectionable."

Objections to Home-Built Houses.

Do you believe it pays the grower to do his own erection?

"In the long run, no; and I'll tell you why. Building time generally comes at just a period when very important work is on hand which demands the florist's careful attention, and should not be slighted for other things. The raising of young stock for new rose houses is not one of the least important. A division of time means a loss either way you figure, and what little may possibly be saved in doing your own erecting, you not only lose in decrease of produce, but a good deal more. If the work has been delayed and the house not ready for planting till August, just one-twelfth of the income from your house is lost; if September, fully one-sixth, or one-third for the two months. In

addition to all this is the finish of your house—the perfect way the greenhouse people make their joints, such as at the gables, or at passage connections. If these passages are not carefully handled they soon become weak spots.

"It is the doing right of just these little things that set a house off, so you can take a pride in it and show it to your friends without a single apology, just as you do with the stock. That is the kind of roses we grow and the kind of houses I want to grow them in.

Sectional Iron Frame the Best.

"What construction do I like best? The sectional iron frame, by all means; it stays where it is put and has all the advantages of increased light and reduced repair costs, on its side.

"You may depend on it that we went into the matter with greatest care before investing in those last Lord & Burnham shadeless ridge houses, 30 feet wide and 165 feet long. Throwing the ridge further to the north than is usual brings the ridge shade on the outside walk, always entirely free from the north bench.

"While the ground on which the houses are built is level, there is an inside grade toward the north side, of 18 inches, which together with the increased height of each bench gives a total elevation of 6 inches to each succeeding bench. In this way they can be worked without raised walks, and one bench shades the other less.

"The north side is double glazed and will pay for the extra cost many times over in the coal it saves.

"Yes, Lord & Burnham houses were here when I bought the place, and I recall coming out here with some growers eighteen years ago and looking at those wooden rafter houses with angle iron purlins and we considered them model houses. These last houses might well be said to be the model construction of today."

"Connecting passages if not carefully handled in the framing, make a weak spot in the houses."

The useful adoption of drain tile for a coal chute.

At the eye, the Patented Ice-Protecting plate, with sash bar clasp attached, is used.

Society of American Florists and Ornamental Horticulturists

THE QUESTION OF PLANT REGISTRATION.

So much matter has been published of late upon this subject, so much sharp criticism made, and so many have evidently failed to appreciate the purpose of plant registration that it seems desirable that the position of the Society upon this point, as understood by its officers, should be made plain.

Many of the recent writers seem to confuse the registration of a name with a certificate of merit. The writer's idea of the matter is that the act of registry has to do mainly with the ownership of the name, and in this connection the value of the plant is of no importance.

The registry of a name is an announcement to the public that a certain person has selected that name for a variety of some class of plants, and equitably vests the ownership of that name in the person registering it, always provided that some other person has not previously selected the same name for a variety of plant of the same class. The value of the plant to which he proposes to apply the name does not enter into the proposition at all. The publication of an application for registry is notice to the public at large, and the main purpose of making such publication is to cause any one having knowledge that the same name had previously been used for a variety of the same class of plants, to make that fact known.

The duplication of names, the writer ventures to assert, has been in ninety-nine cases out of one hundred, a matter of oversight or error and not an intentional deception, and while there have been many cases, since the Society first started to register varieties, in which application has been made to register a name previously used for another plant of the same class, the writer does not believe that there has been a single instance in which, when the facts were brought out by the publication of the application the duplicate name has not been promptly withdrawn and never subsequently made use of by the originator in any way. Everyone will recall numerous instances of this kind during the past few years.

We are not, of course, at this time discussing plant names from the point of euphony or utility. Setting this question aside, the only matters in which the horticulturist is interested regarding the name of a plant is first, that it shall not be a name which has previously been applied to another variety of the same class; second, that it shall not be a new name applied to a plant which has previously been given another name. The present system of registry which should comprise a scrutiny of names previously registered by this Society and a publication in all the trade papers, followed by a publication in the annual report of the Society, would seem to be about as far as it is feasible to go in guarding against the first error and has, the writer believes, proved very efficacious so far.

When the time comes that the Society has ample funds at hand, has

growing grounds to supplement them, greenhouses of sufficient extent and has in its employ and under its control a corps of expert growers and plantmen and a large collection of growing specimens, as well as a complete herbarium, it will then be in position to investigate matters pertaining to the identity of plants with a reasonable possibility of certainty in the results; but to undertake such investigations, attempt to do such work and assume to pronounce authoritatively upon such subjects now, it will inevitably be led into error, its work will be discredited and more harm will be done in the long run than any possible good which may be accomplished.

The publications of these applications for registry has brought cases of renaming to light in the past and will do so in the future. It is, of course, desirable and is the intent of the Society to require full information as to the origin of plants for which registry application is made, and to require a reasonable description of the same so there are not likely to be many cases in which a second use of the same name will escape the sharp eyes of the many shrewd plantmen who read the trade papers.

While registry is made after waiting a reasonable interval subsequent to publication, yet there is nothing to prevent complaints being filed at a later date, and while the writer is inclined to think that a registry once made and entered must stand unless properly withdrawn, yet in case of a proved error in which the person making the registry refuses to withdraw it, it would be the duty of the secretary to make public in the press and to print in the annual volume in connection with the registry, a full statement of the facts.

It is accepted in all matters of plant naming that priority of publication establishes the name. Registry by the S. A. F. fixes and records the date at which such name is selected, provides a way to authoritatively settle disputes in subsequent years, and gives notice to all persons subsequently desiring to name plants of the same class, that the name in question has been used and is to be avoided.

The foregoing sets forth so far as the writer understands it, the present intent of plant registry by this Society. Further than this under present conditions, it does not seem either feasible or desirable to go. The submission of all applications for registry to the nomenclature committee has been suggested. It might be well to state that the Society at the present time has no nomenclature committee, and it would seem a matter of great difficulty to get a committee of this kind, which would have to consist of men of great knowledge and be provided with facilities for growing, comparing and testing varieties. It would seem, I repeat, a matter of great difficulty to get such a committee, who would undertake and carry out the vast amount of work which it has been suggested should be loaded upon their shoulders, as they could be given no adequate compensation for their services.

Another question would be the long delay which would occur before any plant could be registered, and also the hostility of the introducers which would surely follow any attempt to put burdensome restrictions upon them.

It should be made easy to register plant names instead of difficult.

W. N. RUDD, Sec.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The May Exhibition.

At the May Exhibition which was held at Horticultural Hall, Boston, on Saturday and Sunday, May 9 and 10, calceolarias and pelargoniums held the foreground and the narcissi and late flowering tulips made up a large proportion of the display. The calceolarias shown by James Crosbie were very handsome plants, low, compact and shapely and well furnished with large flowers of choice strain. The pelargoniums came from William Whitman and were excellent examples of the cultural skill of Martin Sullivan, gardener. From the latter also came pansies of tall, stately, late-flowering tulips as well as an extensive group of cut tulips and narcissi.

Among the most notable exhibits was a display of the well-known hardy garden phlox Miss Lingard. We have never seen this brought forward under glass before and must say it was surprisingly handsome, the flower panicles being about fifteen inches long on two to three-foot stems. They were shown by W. N. Craig, who also staged a large variety of tulips and narcissi. A fine show of Spanish irises in a number of vases of distinct varieties from Mrs. F. Ayer attracted a great deal of attention. A first-class certificate of merit was awarded to J. T. Butterworth for a shapely heavily-flowered specimen *Cattleya Mossiae*, shown under the varietal name of Mrs. Butterworth. A display of about six hundred tulips in fifty named varieties, from R. & J. Fairbank & Co., was awarded honorable mention. Harvard Botanic Garden, by Robert Cameron, filled a long table with a brilliant showing of spring flowering bulbs and other garden bloom and W. S. Spaulding, gardener E. E. Cole, contributed a fine general display of greenhouse bloom. J. R. Leeson had a group of orchids, Mrs. A. N. Blake and Mrs. E. M. Gill, pansies; W. W. Rawson & Co., tulips and daffodils; Miss Ellen A. Mansfield antirrhinums, and there was an appetizing lay-out of early vegetables from several exhibitors.

A reader expresses regret that the practice adopted a year ago of opening the library at Horticultural Hall, Boston, every Sunday, has been discontinued. On inquiry we learn that the reason for closing was the lack of visitors. If half a dozen even should make request and agree to avail themselves of this opportunity for horticultural reading the librarian would be pleased to comply.

Memorial Day

BIGGEST FLORAL HOLIDAY OF THE YEAR

WE are now booking shipping orders and if you will place them early we will fill them.

We offer a splendid stock of **Beauty, Kaiserin, Carnot, Bridesmaid, Bride, Killarney, Richmond and Chatenay Roses. Carnations, Stocks, Spiræa. Lilies, Sweet Peas. Lily of the Valley, Late Tulips, Lilacs, Cape Jessamines, etc., etc.** Also **Hardy Ferns, New Crop.**

City Hall Cut Flower Market

226 Devonshire St., BOSTON

NEWS OF THE CLUBS AND SOCIETIES.

FLORISTS' CLUB OF WASHINGTON.

The business meeting on May 5 was followed by an entertainment. As usual Prof. Charlemagne Koehler was the chief attraction. Mr. Taylor, of the Department of Agriculture, also contributed to the evening's enjoyment. An entertainment is also planned for the next club meeting on June 2.

The Washington florists are to attend the benefit performance given at Rauscher's on May 19 for Prof. Koehler in a body. The program of this entertainment will be of a very high order, all the finest talent in Washington contributing to the evening's pleasure. The Florists' Bowling Team gives an excursion to Chesapeake Beach on June 19 for the benefit of the team. The team is to play thirty games within the next week with a view to professional work later on in the summer.

CHICAGO FLORISTS' CLUB.

The regular meeting of the Chicago Florists' Club took place Thursday, May 7. It was voted to have a picnic in July and Geo. Adams was made chairman of arrangements. There was a good attendance considering the weather. H. E. Philpot, of Winnipeg, was a welcome visitor. Out-of-town florists are invited to attend any of the meetings of the club. They are held the first Thursday of each month at the Union Restaurant.

NEW YORK FLORISTS' CLUB.

The meeting of this club on Monday evening, May 11, was attended by about forty members. Prosperity evidently prevails in the organization, for six new members were voted in and six more were proposed. The business of the evening was largely committee reports. Harry O. May read resolutions of sympathy with James Dean on the death of his daughter, which were adopted. Mr. O'Mara, on behalf of the committee on transportation to Niagara Falls, reported progress, as did Mr. Shaw for the outing committee. Mr. Riekards, for the house committee, appealed to the members to bring plenty of flowers for ladies' night, which is set for April 27. Mr. Marshall intimated that there is room in the bowling club for a few more bowlers who can score up to at least 90.

Mr. O'Mara informed the meeting that he has just accepted the appointment as chairman of a committee to be constituted by the president of the S. A. F. for the purpose of assisting and co-operating with the Census Bureau at Washington so that the next census may include comprehensive and truthful statistics of floriculture in the United States, which shall be of practical value and show the actual strength in numbers, capital and commercial influence of the florist and gardener industries. Mr. Beanlien showed vases of Mme. Peret pansies and mammoth daisies.

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

At the meeting on May 5 there was much interest and enthusiasm when the committee of the private gardeners announced that \$30 would be given as prizes at the June meeting to private gardeners only, as follows: For 12 roses (outdoor), 1st \$10, 2d \$5; for 12 peonies, 1st \$10, 2d \$5. As the regular June meeting will fall on the 2d, it will probably be early for outdoor roses to be at their best, and an effort will be made to hold the meeting at a later date. A letter was received from the gardener at Rock Springs, a famous picnic resort on the Ohio River, suggesting that the club select that place for its picnic. W. A. Clarke and J. W. Jones were appointed a committee to report at next meeting. The matter of delinquent dues was taken up. This comes up yearly and is always a delicate subject to handle. According to the rules of the club, dues are payable in advance, but if neglected, notices are sent for the two following years, after which if payment is not made the name is dropped. Considering the large membership of the club the loss on this account is comparatively small.

The subject of the meeting was bedding plants. N. C. Madsen, gardener for R. H. Boggs, showed an astonishingly large and fine plant of *Calceolaria hybrida*, so thickly set with large yellow blossoms as almost to hide the foliage. Had there been prizes offered this would surely have taken first

prize. Mr. Madsen is a Dane and a recent accession to the club, but his exhibits certainly cause the boys to sit up and take notice. Mr. Bartsch showed geraniums and sweet alyssum; Frank Crook, gardener for J. H. Parks, a fine specimen of *Dendrobium thyrsiflorum* and *Defiance mignonette*; Phipps Conservatories, colons and herbaceous plants.

For many years William Hamilton has been superintendent of parks at Allegheny—now Pittsburgh, North Side. Past his seventieth milestone he has tendered his resignation. He is an honored member of the club, and Messrs. Reineman, Clarke and Bader were appointed a committee to join with a committee of non-member friends in perfecting arrangements for a complimentary dinner to Mr. Hamilton.

Subject for June meeting: Outdoor roses and flowers. H. P. JOSLIN.

NEW ORLEANS HORTICULTURAL SOCIETY.

The annual banquet to members of this society was given by A. Alost at his home on Gentilly avenue, on May 3, and twenty-four members were in attendance. Mayor Behrman was the guest of honor and Secretary Panter made an admirable toastmaster. Prof. A. H. Rosenfeld, of the Crop Pest Commission, President Eble and Joseph Steckler were among the speakers. Singing followed the banquet and a vote of thanks was tendered the host for the regal reception. The chrysanthemum show which is scheduled for November 12-15 was discussed and a list of the prizes to be awarded distributed.

NEW BEDFORD HORTICULTURAL SOCIETY.

The members of this society at their meeting on Monday evening were treated to a very interesting address by Wm. N. Craig, of North Easton, on perennials. Mr. Craig considered that the herbaceous border gave more satisfaction than did the carpet beds of thirty years ago. Among a choice list of plants and bulbs recommended were *Anemone japonica*, *digitalis*, *aquilegia*, *clematis recta*, lupins of various colors, *delphiniums*, the Chinese varieties of which may be sown in June and will bloom the same year, and *phloxes*. He spoke highly of the useful character of Darwin tulips for Memorial Day and of their freedom from disease. Also of the German iris and narcissi. The *Shasta* daisy is valuable if properly and persistently culled. The broad petaled *Lilium canadense* excels in beauty and utility; if used for outdoor planting it should be planted one foot deep and if used for forcing should be well frozen before being placed inside.

Mr. Craig received a rising vote of thanks.

THOMAS WHITE.

THE NURSERYMEN'S CONVENTION.

The 33d annual convention of the

American Association of Nurserymen at Milwaukee, Wis., June 10-12, 1908, promises to be an event of unusual importance. No one interested in trees and shrubs and ornamental planting can afford to stay away. Send for membership blank to the secretary, George C. Seager, Rochester, N. Y.

CLUB AND SOCIETY NOTES.

At the meeting of the New London County Horticultural Society at Norwich, Conn., on May 4, Peter Zuger of Hartford gave an interesting talk on roses.

The Morris County (N. J.) Society held a ladies' night on Wednesday evening, May 13. Refreshments were served in the generous manner characteristic of this enterprising aggregation.

At the exhibition of the Worcester County Horticultural Society, Worcester, Mass., May 7, H. F. A. Lange exhibited *Salvia Zurich*, E. W. Breed hyacinths and tulips, and M. J. Whittall sweet peas and pelargoniums. There was a good showing of vegetables.

COLD STORAGE LILIES

COLD STORAGE LILIES, means that you can have Lilies all the year round. What are more useful, or give more character to the funeral piece than the Lily.

We have, and can deliver at any time cold storage Lilies—and can refer you to hundreds that are growing them, why not you?

LILIUM LONGIFLORUM GIGANTEUM is the only long-florum that gives satisfaction from cold storage—we offer them as follows:—**LILIUM LONGIFLORUM GIGANTEUM** (repacked 6 to 8 inch bulbs 400 in a case, \$8.50 per 100 \$75.00 per 1000, case of 400 for \$30.00. 7 to 9 inch bulbs, 300 in a case \$9.00 per 100, \$85.00 per 1000, \$25.50 per case of 300. 9 to 10 inch bulbs, 200 in a case, \$14.00 per 100, \$130.00 per 1000, \$26.00 per case of 200.

A BOON FOR CABBAGE GROWERS.

The growth of cabbage plants for late setting has been a very uncertain venture in parts of New York State for several years. Maggot-flies and flea-beetles have become so plentiful in cabbage sections that only small fractions of the seed sown give plants worth setting; so that many growers have had to import large numbers of plants from other States, with greatly increased expense and liability of introducing disease. A simple and, so far as tested, a feasible and cheap method for controlling insects on seed beds was tested, not originated, by the Geneva Station last year, and the details of the experiment are given in Bulletin No. 301. A small bed was covered with cheesecloth screening and the plants completely protected from maggots. From 1800 square feet of bed 50,000 sets were taken, while from a check plot intended to set 40 acres only plants enough for a little over 4 acres were secured. By taking off the cover for a week before setting, the plants were "hardened" so that there was no more wilting than with plants grown in the open air. The screening method is very inexpensive, and is apparently more promising than any spraying or soaking of the soil with insecticides. Cabbage growers should secure the bulletin by sending to the Station for it.

RECENT BUSINESS REVERSES.

J. D. Thompson Carnation Co., Joliet, Ill., was petitioned into bankruptcy May 5 by Gridley, Culver & King, New York.

J. W. Shadow, proprietor of the Cedar Hill Nursery and Orchard Co., Winchester, Tenn., has made an assignment to Hugh Morton, trustee.

E. L. Beard, doing a landscape gardening and nursery exchange business at 155 Milk street, Boston, made an assignment on April 28 to F. M. Smith.

P. J. Campbell, Oswego, N. Y., has added a seed department to his florist business.

Henry Richardson is in charge of the work of setting out 2000 3-year-old pine seedlings on the land recently purchased for water works at W. Concord, N. H.

ORCHIDS

Just Arrived in Fine Condition

ORCHIDS

ONE of the largest consignments of plants ever received in the United States at one time; namely, 100 cases Cattleya Trianae, 80 of Cattleya labiata, 40 of C. gigas Sanderiana. Fine importation of Cattleya Schroederiae, C. Harrisoniae, C. citrina, Laelia anceps, Oncidium varicosum Rogersii, O. tigrinum, O. ornithorhynchum, Odontoglossum Insleyii, Odonto. Rossii majus, Dendrobium formosum giganteum, D. Wardianum. To arrive shortly, D. Phalaenopsis, Cattleya Mossiae, C. Percivalhana, C. Gaskelliana, C. Mendelli, C. Warneri. Intending buyers of Orchids would do well to come and see this stock before buying elsewhere. Our prices are reasonably consistent with good stock. All our goods are collected by our own collectors, thereby assuring our customers the best stock the forests afford. Come and see them. These goods if potted at once will yield abundance of flowers the first year, paying for the cost of the plants in the fall.

We also carry a large stock of established Orchids. Also orchid peat, Sphagnum Moss, Baskets, etc. A trial will prove we carry the best stock that can be secured. Come and see for yourself and be convinced of these facts.

Carrillo & Baldwin SECAUCUS, N. J.

Of Interest to Retail Florists.

Bulbous stock is now
CHICAGO practically out of the
question. Azaleas also
are about gone, while rhododendrons
are to be had in limited quantity only.
Hydrangeas, too, are in short supply,
so it leaves the market comparatively
bare of blooming plants. The mar-
guerite Queen Alexandra is one good
plant that helps out at this time and
the growers consider it a fine thing.
The large flowers and branching habit
make it very distinct from the
ordinary marguerite. Geraniums,
heliotrope, mignonette and all bedding
and pot stock are beginning to put in
an appearance and will soon be in de-
mand with a good supply in sight.
Boston ferns, asparagus and other
greens in pots are in active demand.

NEW RETAIL FLOWER STORES.

Lewis R. Jackson, 14 Montvale
avenue, Woburn, Mass.

NEWS NOTES.

Mrs. C. M. Kerlin will act as agent
at Delhi, Ind., for F. Dornier & Sons
Co.

John Donaldson has been elected
president of the New York Cut Flower
Exchange.

W. H. Knowlton of East Hamilton,
Mass., has added plants and flowers to
his market gardening business.

George Gebhard, who sold out his
florist business several years ago, is
starting again at Mt. Airy, Philadel-
phia, Pa.

The J. H. Rebstock Co., Buffalo, N.
Y., have vacated their Main street
store and are now located at the
Elmwood Avenue Greenhouses.

The Florists' Supply Co., 20 Well-
ington St., West, Toronto, Can., is a
new wholesale cut flower house, started
by George J. and Fred C. Brown.

Rowland Cloudsley, formerly with
Wm. Scott Co., has leased the store
at 584 Main street, Buffalo, N. Y., and
expects to open it at an early date.

BUSINESS CHANGES.

The Athens Floral Co., Athens, Ga.,
has moved to Hazelton's Music Store,
College Ave.

The Floral Exchange has moved its
office from 335 N. Sixth St., Philadel-
phia, to North Wales, Pa.

Herman Wicking, Jr., succeeds
Wm. Trefinger as manager of the
Wicking Greenhouses, Bluffton, Ind.

Hiram McFeron has purchased the
interest of his partner and will con-
tinue the nursery business of Kelly
& McFeron at Columbus, Ind.

We read in the columns of two of
our esteemed contemporaries that the
dwarf Polyantha rose Apple Blossom
is a sport from Crimson Rambler?
Guess again.

OBITUARY.

Alfred Vick.
Alfred Vick, brother of C. H. and Fred W. Vick, died at his home in Mt. Carmel, Conn., on April 28.

* **Thomas Copeland.**
Thomas Copeland of Sewickley, Pa., died at his home in Leetdale on May 6. He was born in Scotland, and after coming to this country in 1871 was connected with the Northside parks. For 28 years he conducted a florist stand at the Fert Wayne station, Sewickley. Four sons and two daughters survive him.

Charles Smith.
Charles Smith, a well-known wholesale flower dealer at the New York Cut Flower Exchange, died at his home in Bound Brook, on April 30, after a week's illness with pneumonia. Mr. Smith was born in London. After coming to this country he followed the retail flower business for a time and then started as a grower at Long Island City and later at Woodside and two years ago started another establishment at Bound Brook, N. J. His age was 63. He leaves three sons and three daughters.

NEWS NOTES.

A miniature cyclone which swept over Keene, N. H., on May 5, lifted the roof from the greenhouse of W. M. Foley, wrenched seven ventilators from their places and destroyed about a hundred lights of glass besides injuring many of the plants on which the broken glass was thrown. The tempest came without warning and was over in a few moments.

Mt. Auburn Cemetery, Cambridge, Mass., has established recently a department of forestry and ornamental planting. Under G. Bleicken, who is in charge, 50,000 shrubs have been propagated this winter and heavy orders have been given for hybrid roses and rhododendrons. A U-Bar propagating house, 40 x 60, finished a short time ago, is giving great satisfaction.

PERSONAL.

Visitors in Buffalo: E. J. Fan-court, Philadelphia; C. E. Ford, Philadelphia.

Charles S. Grover has been chosen commissioner of Pine Grove Cemetery, Lynn, Mass.

Visitors in Boston: David Lumsden, Durham, N. H., H. R. Mitchell, Waterville, Me.

E. L. Bates has been appointed manager of Mrs. S. A. Moir's store, Brockton, Mass.

A. L. Rose, Boston, landscape architect, has taken a position with the Hoyt Nursery Co., Minneapolis, Minn.

The engagement is announced of Frank Edgar, of the W. W. Edgar Co., Waverley, Mass., and Miss Marguerite Burbeck.

W. Wilson, of Niagara Falls, Ont., who has been connected with Queen Victoria Park, has been appointed park commissioner of Toronto.

You will find something worth reading on every page of HORTICULTURE.

FLOWER MARKET REPORTS

BOSTON The pleasant weather of Monday gave quite a boom to the flower trade here, but the unsettled weather of the balance of the week put prices and conditions back to where they have been since Easter. Stock of all kinds is plentiful with but little demand.

BUFFALO The tone of the market was much better the past week as stock shortened in supply, especially carnations the demand brightened up and prices held firm throughout the week. Beauties, Richmonds, Kaiserins, etc., of excellent quality were in good supply and sold more briskly than on weeks previous, but there was too much of the ordinary stock and it was simply carried along. A good cleaning up was looked for on Saturday, but again the rain put a damper on sales. Lily of the valley, sweet peas, jasmine, daisies, mignonette and lilies moved readily. All greens were in good supply.

CHICAGO A week of almost continuous downpour has robbed the cut-flower market of most of the outdoor stock at this time and reduced the supply of carnations to a minimum. Prices have advanced accordingly. Colored carnations are in good demand; white ones move a little slowly. It is certain that colored flowers of all kinds are becoming more and more popular and the demand for white flowers growing steadily less. It looks now as if there might be a decided shortage on carnations for Decoration Day if the weather continues unfavorable, especially as many of the carnation places are off crop. Roses are doing well despite the weather and bringing fair prices. The Baby gladioli are appearing this week, and stock, lily of the valley, marguerites, a few pansies and an occasional vase of lilies give variety to select from. Jessamines are coming into the market by the thousands. A favorable outlook for Decoration Day trade seems to prevail among the Chicago florists.

DETROIT Business has been much better than during the previous week, and towards the week-end supply was actually scarce. A new opening for our product has been created by a local hospital which erected so-called sun parlors and furnished them with large palms, bay trees and hanging baskets.

INDIANAPOLIS Trade conditions the past two weeks have been very slow but there has been no over-stock of anything as the cool, rainy weather has put a decided crimp in the cut of all kinds of flowers. The quality of stock is of the best. Roses and carnations are up to the midwinter average. Lilies are in good supply but in little demand. Sweet peas are the best selling article on the list. The

cool weather has put a damper on outside bedding, there being nothing done in that line up to the present time. A big spring bedding trade is anticipated by the majority of the florists who are well stocked in that line.

NEW YORK The general condition of the market has not made any permanent improvement since last report, although there have been some intermittent periods that seemed to indicate the approach of the end of the inactivity which has continued almost uninterruptedly ever since Easter. The rose market is accentuated by the presence of Brunners and Richmonds of very fine quality in great abundance. Carnations begin to stiffen up a little owing to the departure of the bulb flowers and the approach of Memorial Day. Sweet peas are very fine and hold a position of prominence. Lily of the valley has experienced a decided improvement in demand.

PHILADELPHIA Cool weather and cloudy skies shortened up supplies last week and had much to do with the improved tone of the market. Carnations especially moved better, and towards the end of the week, when the so-called "Mothers' Day" took place, the clean-up in these was the best for the season. The Philadelphia North American is to be credited with this innovation—a white carnation worn by everybody having any respect for their best friend—and it we can now have "Fathers' Day," and some more, the daily press will go far to wipe out many of its most heinous offences against horticulture. Rose market in good, healthy condition. The presence of much mildewed stock of Killarney emphasizes our note of last year in regard to propagating only from outdoor grown stock. Plant no Killarney propagated from indoor stock if you would escape mildew. Lily of the valley supply has eased up a little with demand better. Cattleyas are in good supply with strong demand. A few tree peony blooms are to be seen. The officialis section will be in about the 15th. By the 25th we will have the grand burst of this glorious May beauty here—if the weather proves anything like reasonable.

WASHINGTON While the output of the market is still rather greater than the demand, there is not the stagna-

tion that might be expected at this season. There is still a great demand for decorations and it is to be hoped that business will move smoothly any way till after the commencements next month.

PHILADELPHIA NOTES.

P. T. Demas, Pittsburg Florist' Exchange, was a visitor in Philadelphia.

The club smoker arranged for May 14th had to be called off for lack of interest among the members.

Arthur Niessen, of the Leo Niessen Co., is the orator scheduled for the June meeting of the Florists' Club.

Chas. S. Price, the popular Lansdowne florist, takes his family in a few days to the Pocono mountains for the summer.

Commodore Westcott starts preliminaries at his club house, Waretown, next week, preparatory to the formal opening in June.

Howard M. Earl, manager for W. Atlee Burpee & Co., Philadelphia, will start next week for California on a crop inspection tour.

Herbert H. Johnson, of the Johnson Seed Co., has moved his summer residence to Bala, Pa. There is better golf ground there than in Jersey.

At the regular meeting of the Buffalo Florists' Club on Tuesday last much business of importance was transacted. A paper on orchids was read by one of the members which was heartily received. The committees are working hard, especially the sports and membership committees, the latter having a line on every florist in and around Buffalo.

MISCELLANEOUS

WANTED First-class gardener and florist to invest capital in greenhouses in growing city; ideal location. Write J. C. Hennessy, La Port, Ind

IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

Expressions from Men who Know

W. W. Allabaugh, Silverdale, Pa., writes:
 "Your boiler gives entire satisfaction. You will notice the No. 4 boiler is rated to warm 10,500 sq. ft. of glass and I have over 12,000 sq. ft. of glass."
 Wm. Pinchle, Ridgefield, Conn., writes:
 "I expect to enlarge my plant soon, and when I do I shall use another of your boilers. Now a few words about the boiler I bought of you in 1907. This is a No. 1 boiler, rated in your catalogue at 6,000 square feet. It is taking care of 7,000 square feet of glass in carnation houses and works to perfection. No trouble whatever in cold nights, no night fireman; easy to work and easy to coal. I consider this the best boiler on the market and I have used a good many different kinds."
 Theo. Hiedrich, Anacostia, Washington, D. C., writes:
 "No. 7 Boiler carries two houses, 20 x 172, and three houses 22 x 96, this is 3,200 square feet of glass more than its rating."
 Jacob Phillips, Rogers Park, Chicago, Ill., writes:
 "Has 2,000 square feet of glass. Can keep 60° in coldest weather. Had one boiler 15 years, only expense one set of flues. Kroeschell Boiler is so satisfactory that I do not care to try any other."
 Our No. 10 Boiler is rated at 19,500 square feet of glass
KROESCHELL BROS. CO., 35 ERIE ST., CHICAGO

The ELECTRIC CIRCULATOR

Is master of the situation.
 It **MAKES** the water circulate.
 It ensures uniform temperature.
 Its work is positive regardless of weather.
 It never gets out of order.
 It saves coal.
 It is serviceable in old houses.
 It is helpful in new houses.
 Its value has been fully demonstrated.
 Its economy is conceded.

Lower values on greenhouse products make necessary lower running expenses. Write to us today and we will send you full information as to what the Circulator can do for you, and what it will cost.

PATENT APPLIED FOR

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: **Result**, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

The Advance Ventilating Apparatus

Notes from the Arnold Arboretum

The Lilacs and more particularly the large group along the driveway leading up the Overlook Hill are at present the chief attraction at the Arboretum. About the middle of the month many of the varieties and hybrids of *Syringa vulgaris* had opened their first flowers. The earliest white Lilacs are the single-flowered *Alba Major*, *Virginalis* and *Marie Legraye*, one of the best whites. Of the single-flowered Lilacs with purplish or lilac flowers in different shades the earliest are *Princesse Marie*, *Croix de Brabry*, *Justii*, *C. S. Sargent* and *Fuerst Lichtenstein*, while of the double flowered varieties of the same color *Mathieu de Dombasle*, *Lemoinei*, *Jean Bart*, *Leon Simon*, *Madame Jules Finger* and *Renouance* must be named as the earliest. Besides *Syringa oblata* mentioned in the last issue there is another very early species introduced recently by Professor Sargent from Peking where he found it cultivated in gardens: this is the white flowered *Syringa affinis*. Another new Chinese Lilac was received recently from Europe under the name *S. Giraldii*, but that name really belongs to quite a different species related to *S. villosa* and not in cultivation, while our *S. Giraldii* in many respects greatly resembles *S. affinis*, of which it may possibly be the wild purple-flowered form. Both new Lilacs differ from *S. oblata* in the rather loose and straggling habit and the slender elongated racemes and will probably prove valuable in the hand of the plant-breeder for the creation of a new race of early blooming Lilacs.

A beautiful tree now in bloom and very striking on account of the light rosy-purple color of its flowers is the well known Red-bud, *Cercis canadensis*; of this exists also a white flowered variety still rare in cultivation, *Cercis canadensis* var. *alba*, which however, scarcely merits preference before the type. More beautiful than the common is the Chinese Red-bud, *Cercis chinensis* (*C. japonica*), which has larger flowers, but unfortunately is not perfectly hardy in our climate. The finest of all is *Cercis racemosa* with rosy-pink flowers in 10 to 30-flowered pendulous racemes; of this we possess only young seedlings raised from seeds sent last year by E. H. Wilson from Central China: its hardiness, of course, remains to be tested.

The first Rhododendrons are now in bloom. Of the Azalea-group the native Rhodora, *Rhododendron canadense*, is passing, while the southern *R. vaseji* with its delicate pale pink flowers is coming into bloom and an allied species from Japan, *R. rhombicum*, shows its beautiful pure purple flowers. *Rhododendron Kaempferi*, the only species of the Azalea indica-group hardy in this region, is making a great display with its masses of orange-red or brick-red flowers. The earliest of the true Rhododendrons are hybrids of *R. caucasicum*, of which the var. *Clio* with bluish flowers changing to nearly white and *R. caucasicum* var. *pictum* with pink flowers pale in the centre are now in bloom. *Rhododendron praecox*, a hybrid of *R. dahuricum* and *R. ciliatum*, has beautiful pale purple flowers but unfortunately is not perfectly hardy and the foliage is usually more or less injured during the winter which makes the plant unsightly in spring: its variety *Early Gem* has pale lilac flowers.

Fothergilla major and the smaller and lower *F. alnifolia* (*F. carolina*) are now objects of striking beauty with their feathery spikes of white flowers: they are still rarely seen in gardens and parks, though they certainly merit to be planted oftener.

To the Apples mentioned in the last issue should now be added *Malus Arnoldiana*, a small tree of excellent habit loaded with large pink flowers changing to white:

it is probably a hybrid of *M. floribunda* and certainly one of the most beautiful of the crab-apples. Another fine species is *Malus spectabilis*, an upright growing tree with semi-double pink flowers. A pretty shrubby species with pure white flowers is the Japanese *Malus Sargentii*.

Chaenomeles Maulei (*Cydonia Maulei*) is now covered with its bright orange-scarlet flowers. Of *Chaenomeles japonica* (*Cydonia japonica*) a large collection of its beautiful varieties has been planted, but the plants are yet too small to flower well.

Diervilla praecox shows its dull purple flowers much in advance of the other Diervillas, but on account of its dull color it is less effective than most of the later varieties. *Lonicera tatarica* and some other species are beginning to bloom and some Viburnums as *Viburnum alnifolium*, *V. Lantana* and *V. burjaticum*, a recently introduced Chinese species of little ornamental value, are now in flower.

Alfred Rehder.

Prunus Pendula (Maxim)

This picturesque and charming tree, the Japanese Weeping Rose-flowered Cherry, is the very finest of the flowering cherries. What is more to its credit, it takes high rank in our list of ornamental trees and shrubs. Indigenous to Japan, it is highly esteemed by the Japanese and is frequently depicted in their works of art. With us it is a small tree, attaining a height of twelve to fifteen feet. The branches are spreading and pendulous, and the form distinctly weeping. Yet in contrast to most of the weeping trees it is very graceful in habit. This natural charm is lost, however, if the plant is grafted standard-high. The union of the stock and scion should be close to the ground. Late in April, or perhaps more frequently during the first week in May, it is completely covered with its rosy pink flowers. These may tarry for a week, though often their charm departs in a shorter time. The flowers precede the leaves, are nearly an inch across and are borne on long, slender pedicels in two or four-flowered clusters. The foliage is somewhat thin and is of no particular merit. Perhaps the tree's most successful use is in a group which is composed of its congeners, the flowering cherries, almonds and peaches. Yet it is not to be despised in the shrubbery surrounded with such shrubs as are its equal in rank. Then it often proves most satisfactory as a specimen plant.

Very similar, except in habit of growth, is *Prunus subhirtella*, which is considered by some to be a distinct species and by others to be identical with *Prunus pendula*. Whatever we may think of its botanical position, it is certainly sufficiently distinct in habit to warrant planting. Instead of possessing the graceful weeping form, this little tree is erect, yet withal light and airy in appearance. Then the flowers are identical in beauty with those of the Japanese Weeping Rose-flowered Cherry. In many positions it might be more desirable than a weeping form as well as being always interesting for the additional variety which it affords.

These trees are vigorous and hardy and apparently free from diseases and insect pests. Nor are they difficult to grow, although for the best results they require a deep, loamy, well-drained soil, an abundance of plant food and good care.

Daniel A. Clarke.

surdities as chrysanthemums with many colors grafted on one plant are distasteful to most plant lovers and in the markets where the most refined people are served they find but few takers. Our observation in the past few years is that even the old-fashioned flat-topped azalea has been losing caste and that the more loosely branched specimens with somewhat informal, yet symmetrical, contour are usually preferred.

A wise and patriotic measure

The passage by the United States Senate of the bill providing for national control of the White Mountain and southern Appalachian forests, after a long and, at times, almost hopeless struggle will, we believe, be looked upon in coming time as one of the wisest and most patriotic acts of the law makers of our day. To anyone who has given the subject any attention and realized the menace to our industrial resources, not to mention the question of scenic beauty, which the deforestation of the watersheds of our streams means, the opposition to this bill seems almost inexplicable. The country owes a big debt of gratitude to President Roosevelt, the American Forestry Association and other organizations, and all those devoted men in public and private life who have labored for years on behalf of this project. Now let us have the duty taken off wood pulp and other forest products, the enormous demand for which has been stripping our country of one of its best assets.

The amplitude of salesmanship

“The art of selling,” which proved such an interesting topic in F. E. Palmer’s talk before the Boston club last Tuesday evening might easily furnish themes for a score of good essays. In the florists’ business, as compared with the art of growing, salesmanship has never been given its proper relative importance. It must have become very evident to those who listened to the brief and very superficial discussion which followed Mr. Palmer’s paper that the subject of selling covers a much wider field than many of them had realized. It has often been asserted by those who were familiar with the flower trade in a broad-gauge way that the marketing of a crop of flowers to good advantage demands the exercise of intelligence and ability fully equal to that required for the production of the crop. The word “marketing” is used as applying not only to the moving of the goods from the possession of the producer to the dealer but also to their further disposition until they have finally reached the consumer. For the retail dealer to accuse the grower of shortsighted methods, or vice versa, looks to the unprejudiced outsider as a case of “the pot calling the kettle black.” In seeking an explanation of the better conditions said to exist, for instance, in Chicago, as compared with certain other cities it might be well to consider how much may be due the wholesale shipping trade for this circumstance; also to ask where the responsibility lies for the decadence of the wholesale shipping trade in quarters where it formerly flourished; further, whether it is or is not good salesmanship for the producer to advance the price of his product as soon as a shipper approaches him with a call for a large quantity of stock to be distributed to other markets; and still further, how the street fakir outlet compares in net results with the shipping trade outlet, in the disposal of the surplus.

Referring to the comment by Mr. Haerens, elsewhere in this paper, relative to the lack of appreciation in America for the “fan-shaped” azaleas we think the tendency of taste among people in this country is away from stiff and unnatural shapes in plants and floral work. All these distortions—for that is what they are—such as fan-shaped azaleas or chrysanthemums, Crimson Ramblers trained into forms of automobiles, crowns and Teddy bears, also such ab-

The Chionodoxas

In a recent issue I mentioned these charming plants, but too much can't be said in their favor. In the very places one would expect to see large masses of these early flowering bulbous plants they are conspicuous by their absence. In our cemeteries and public gardens where very large sums of money are expended each year in raising the common run of bedding plants, those in charge of such places grudge to spend a few hundred dollars in these charming spring blooming plants.

HORTICULTURE will be doing good service if it will only point out and impress upon the owners of gardens and grounds the absurdity of not enjoying their gardens very much earlier than they do. *Chionodoxa Luciliae*, *C. gigantea*, and *C. Sardensis* can be bought for five dollars a thousand and in larger quantities they can be had for much less. What a feast for the eyes ten thousand *Chionodoxa gigantea* all in one bed would make! They can be bought for a little more than forty dollars. Can any one raise bedding plants as cheaply as this?

These early-flowering bulbous plants should not be put in beds that are to be filled up during the summer with geraniums, cannas or any deep-rooting plants, but should be planted where they can remain for several years without being disturbed. When the leaves begin to ripen the beds may be filled up for the summer months with shallow-rooting annuals. In the fall when the annuals are killed by frost the beds may be cleaned up and pointed over and given a coating of well-rotted manure. If given this little care the bulbs will keep on increasing and blooming stronger and more profusely each year.

You must not think I am prejudiced against bedding plants. I am not. I love all kinds of plants and there are places in our gardens for them all if we know how to use them properly. These notes are mainly to point out that many people do not get as much pleasure out of their gardens as they should if they knew the earliest reliable flowering plants and also the very latest flowering plants in the fall.

The best species and varieties of this most charming genus come to our gardens from the mountains of Asia Minor. We are very much indebted to Mr. Edward Whittall of Smyrna for first collecting and introducing the best varieties to cultivation. Indeed he not only collected *Chionodoxas* but many other useful plants from the high mountains of Asia Minor. A few of the choicest are *Sternbergia macrantha*, a variety of *Fritillaria aurea*, *Fritillaria Whittallii*, *Crocus Tauri*, and *Galanthus Ikaraci*.

The nomenclature of the species and varieties is rather mixed up. In an article Mr. Whittall wrote several years ago he says that *Chionodoxa Luciliae* is only found on the Nymph Dagh range of mountains beginning from the heights of Taliiti above Smyrna and ending with those above the village of Nymphio. In the wild state, he says, the pink and white varieties of *Luciliae* are charming plants.

The first variety Mr. Whittall discovered was *Sardensis*, finding it on the Mahmood Dagh, from which one can see by looking in an easterly direction the plains of Sardis. In its wild state the most distinctive features of this plant are its deeper and almost entirely porcelain blue petals and small white eye. There are white and pink forms in the wild state but not so pretty as those of *Luciliae*.

The variety *gigantea* was named by Mr. Whittall on account of the very large size of the flowers and it

also differs materially from *Luciliae* and *Sardensis* in color. The white and pink forms are very handsome.

Tmolusii is found on the Tmolus range of mountains and on that account received its name. It is dwarfer than *Luciliae* or *Sardensis* but more free flowering and more brilliant in color. Its white eye is larger than in *Luciliae* and the points of the petals more vivid than in *Sardensis*.

The variety *Alleni* was also discovered and introduced by Mr. Whittall and is said to be a natural hybrid of *Scilla bifolia* and *Chionodoxa Luciliae*.

In the Kew Hand-list of plants the nomenclature of *Luciliae* is given as follows:

<i>Chionodoxa Luciliae</i> ,	Boiss.
"	Var. <i>Alleni</i> .
"	Var. <i>gigantea</i> .
"	Var. <i>Sardensis</i> .
"	Var. <i>Tmolusii</i> .

These bulbs coming from the high mountains of Asia Minor are as hardy as any of our native plants and can be planted in any situation. They are low growing and clumps in the front of the herbaceous border are exceptionally fine now. In the rock garden they are perfectly at home and are a blaze of color. The two species *cretica* and *nana* are not as showy or yet as good garden plants as the above kinds.

Let us plant more of these spring harbingers and make this world better and happier to live in. Some one has said that flowers preach to us if we would only allow them. This is true; they preach most wonderful and interesting discourses to some of us.

British Horticulture

THE MIDLAND DAFFODIL SHOW

The unfavorable spring which has been experienced in this country militated against the complete success of the annual show of the Midland Daffodil Society as regards the number of exhibits. There was an interesting display of novelties, awards being made to the following: *Narcissus Buttercup*, a medium-sized deep self flower of the *magni-coronati* type; exhibited by C. Dawson. *N. Chloe*, another of the *magni-coronati* type, a shapely bloom, with a broad, cream colored perianth, and a soft canary or pale yellow cup; exhibited by T. Bateson. *Saxifraga*, Ditton seedling, a neat plant, with deep crimson flowers; exhibited by Messrs. Barr & Sons. *Viola gracilis*, bearing clusters of small, violet blue flowers; exhibited by R. Wallace & Co. The Cartwright Challenge Cup, which was offered for 12 varieties of daffodils which have not been in commerce for a longer period than four years, was won by E. M. Crofield, who staged some good specimens of *Malaga*, *Lolah*, *Tiara*, *Penguin*, *Arhelta*, *Stay Sail*, *Mrs. Ernest Crofield*, *Radiant*, *Giraffe*, *Phantasy*, *Makeshift* and *Potent*. The Bourne Memorial Challenge Cup was won by P. D. Williams. At the formal opening Robert Sydenham, who has labored so zealously in the interests of the society, was presented with a handsome illuminated album, Mrs. Sydenham receiving a massive silver candelabra. Mrs. H. Smith, one of the honorable Secretaries, was the recipient of a silver tea service and a purse of gold.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

A few thoughts on the art of selling was the topic of a thoughtful paper read at the meeting of this club on Tuesday evening, May 9. Out of the discussion of the paper was evolved a little shy at the old vexed question as to which of the two interests grower or retailer was responsible for the various grievances that afflict the cut-flower business such as surpluses, overstock, excessive prices and cut rates. As usual a large proportion of the members present were gardeners employed on private places, but they seemed to be as intensely interested in the subject as their commercial brothers and were enthusiastic in their applause when any of the contestants scored a point in the debate. Robert Cameron was responsible for the turn taken in the discussion by naively inquiring whether a business man is a truthful man. The fine points of difference between expediency and *bona fides* were skillfully covered by Mr. Palmer in his reply, and then W. H. Elliott, Eber Holmes, W. J. Kennedy, P. Welch and several others became severally involved in the problem of how far defective salesmanship might be held responsible for the periods of overstock that afflict the trade at times.

Mr. Palmer allowed that if a better feeling of co-operation existed between the grower and the retailer there would be no such thing as overproduction and no desire to corner the market or withhold stock for the purpose of advancing prices. Mr. Elliott thought the remedy for gluts would be found in giving the public better information as to prevailing conditions when heavy crops were on, and letting them have access to the low values. The policy of the retail trade as to prices was not conducive to the moving of the overstock, especially as it is carried on in Boston, and he instanced Chicago as handling this problem much better than Boston. Mr. Kennedy thought it might be a good thing to open the wholesale markets to retail trade after a certain hour each day.

Mr. Holmes voiced an appreciative tribute to Mr. Palmer whom he had in former years found to be the personification of an ideal employer.

The exhibits on the platform included four vases of seedling carnations from M. A. Patten, a "rose-pink" sport of Enchantress from Wm. Swan, a very pretty seedling marguerite from F. W. Fletcher, late single tulip Sara Bernhardt from W. W. Rawson & Co., and some roses, including two fuel-flowered pot plants of Liberty, from Eber Holmes.

NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

A meeting of the above society was held on May 19, with a large gathering present. John Girard of New Britain gave an instructive paper on pansies. He had about 100 fine blooms on exhibition, for which he was awarded a cultural certificate. The society will hold a Rose Show in their hall on June 16th.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Appointment of Vice-President.

President Traendly has appointed Mr. John L. Parker of Birmingham, Alabama, as State Vice-President for his State.

Census Committee.

President Traendly has appointed Messrs. P. O'Mara, Jersey City, New Jersey; J. A. Valentine, Denver, Colo., and Albert T. Hey, Springfield, Ill., as a committee to cooperate and advise with the Census Department regarding matters relating to ornamental horticulture in the approaching U. S. Census. W. N. RUDD, Secretary.

BUFFALO FLORISTS' CLUB.

At a special meeting of the Buffalo Florists' Club held May 20, the sad news of the death of Mr. Wm. Scott on May 19 was imparted to the members. A resolution was adopted conveying to the family its sincere sympathy in their loss, stating that whereas Mr. Scott was well known and highly esteemed by the florists of Buffalo and the surrounding country, it is with profound sorrow that we have learned of his death.

The country has lost a sincere lover of our profession and an enthusiast in his chosen field. Our heartfelt sympathy goes out to his bereaved widow and children in this hour of their sorrow. Words are of little avail in these days, but to the fatherless and widow it may be a ray of pleasure to be assured that through the length and breadth of this adopted country the name of William Scott commands only respect and affection.

Resolved that a copy of the resolutions be sent to the bereaved family and spread on the minutes of the society.

Signed:

CHAS. SANDFORD, Pres.
E. C. BRÜCKER, Fin. Sec'y.

ST. LOUIS FLORISTS' CLUB.

The regular monthly meeting of this club took place on last Thursday afternoon in Bowman Hall. The meeting was very poorly attended, the busy planting season being no doubt responsible. In the absence of President Young, Vice-President Augermüller opened the meeting and J. J. Benke acted for Secretary Bentzen. None of the potterly committee being on hand to make a report and the time being up in which to complete the \$10,000 subscription in which they failed the committee was discharged with thanks. In discussing a suitable place for the summer outing, the one most favorably received was the White City Amusement Garden near Belleville, Ill., and upon invitation of A. S. Halsted the trustees and Mr. Halsted will visit the place next week.

Most of the afternoon was taken up with a talk on Easter business and discussions on club matters. Next meeting takes place Thursday afternoon, June 11, at 2 o'clock.

PENNSYLVANIA HORTICULTURAL SOCIETY.

There was a fine display of flowering tulips at the monthly meeting of this society held on the 19th inst. Joseph Hurly, gardener for James W. Paul, Jr., took first with a choice collection. Samuel Batchelor, gardener to Clement B. Newbold, second. M. Batchelor also had a fine collection of perennials, for which he was awarded a special prize. The Michell prizes for lettuce seed went to Samuel Hammond and John McLeary. Joseph Hurley, Thos. Logan, Xavier Schmitt, W. Robertson, and Frank Gould were appointed a committee to fix the date of the rose and peony show, and will make final decision 8 P. M. 26th. Many valuable prizes are offered for this event. A discussion took place on peony nomenclature and a vote was passed instructing the judges to give preference to the most correctly named collections.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

The next annual meeting of this organization will be held at West Hotel, Minneapolis, Minn., on August 11, 12, 13 and 14. Visits to the park system of St. Paul and Minneapolis will occupy a good portion of the time and on the last day a trip to Lake Minnetonka is proposed. Valuable papers on practical topics will be presented by members.

CLUB AND SOCIETY NOTES.

The Florists' Club of Springfield, Ill., have decided to hold a flower show in November, but the date is not yet fixed.

The first flower show of the Woman's Club of Hollywood Cal., held on April 30, was a great success. Howard & Smith, J. M. Leibold, E. B. Sturtevant, E. H. Rust, John Murietta, the Arthur Leets and the Bartlett estates, all contributed liberally. Field-grown carnations were largely in evidence.

The preliminary schedule of the eighth annual exhibition of the New Haven County (Conn.) Horticultural Society has been issued. The dates of the exhibition are November 10, 11, 12, 1908. Copies of the schedule may be had on application to the secretary, Walter Koella, 58 Bishop street, New Haven, Conn.

A NEW ORNAMENTAL GRASS.

Paspalum distichum variegatum is mentioned in the Journal of Horticulture of Australasia as a new ornamental grass, valuable for use in hanging baskets, etc. According to Gray, *Paspalum distichum* is a native of Virginia and southward in the United States where it is found in wet fields and is known as "joint grass." The origin of this variegated form, which is an introduction of 1908, is not given in the note referred to but the plant is described as green and white or yellow with pink or red edge.

Memorial Day

BIGGEST FLORAL HOLIDAY OF THE YEAR

WE are now booking shipping orders and if you will place them early we will fill them.

We offer a splendid stock of **Beauty, Kaiserin, Carnot, Bridesmaid, Bride, Killarney, Richmond and Chatenay Roses. Carnations, Stocks, Spiræa, Lilies, Sweet Peas, Lily of the Valley, Late Tulips, Lilacs, Cape Jessamines, etc., etc.** Also **Hardy Ferns, New Crop.**

LOWEST PRICES ON Letters, Emblems, Inscriptions, Folding Boxes, Wire Frames, Ribbons and other Florists' Supplies in complete assortment.

Welch Brothers

City Hall Cut Flower Market

226 Devonshire St., BOSTON

A FEW THOUGHTS ON THE ART OF SELLING.

(A paper read before the Gardeners' and Florists' Club of Boston by F. E. Palmer.)

The important, in fact the fundamental element in a successful sale, is that it should be of advantage, or profit, to both parties. This simple proposition has, I fear, an unimportant place in the mind of the average salesman; it is nevertheless true and should be made the basis of every transaction between man and man. Any exchange of services which necessarily involves loss to either party cannot be called legitimate business.

A second basic principle in all commerce, and one that should be understood by both buyer and seller, is that demand precedes supply.

In the process of evolution from the simple barter of goods between our forefathers to the complexities of trade in modern civilization, the above two axiomatic truths have become somewhat obscured. Derangements have also crept into the body politic which have aggravated the confusion, and reversed the natural order of things until the man who sells has come to be looked upon as the obsequious servant of him who buys. This attitude has become by custom so much a second nature that we take it for granted the seller is always under obligation to the buyer, and that labor shall forever bow the knee to capital. Volumes have been written, and more doubtless will be, on this important phase of economics before the subject is exhausted, and no more fruitful study could possibly invite the consideration of business men, especially salesmen.

Consistently with the above principles, the relationship between buyer and seller should be entirely of a friendly nature, and the appreciation of this fact constitutes the primary lesson in the art of selling.

In some simple kinds of trade little is required of the salesman but to hand over the article called for and take the amount determined upon as payment. In such cases little special knowledge is required and certainly no determination of values. When, however, it comes to the selling of flowers, plants, seeds, shrubs and trees, the supplying of decorative schemes—from the simple bunch destined to cheer a sick friend to the elaborate display for ball room or dinner table—the simple potted plant or the varied collection for the garden, the mysterious seed package, or equally doubtful dormant tree and shrub, then the salesman comes in touch with one of the higher requirements of humanity and the satisfying of these aesthetic needs becomes indeed a fine art. In such cases how many elements can enter into a sale, possibly every one of which may have to be supplied by the intelligent salesman! Most likely the purchaser has a very vague picture in mind as to what he wants, also an equal uncertainty as to the amount to be expended. Imagine a customer in such a frame of mind, also somewhat fastidious of taste and exacting in requirements, and it will readily be seen that a very different problem is presented than in most other commercial transactions.

Perhaps the first requirement of a salesman will be that delicate tact which makes his patron feel at ease, and will so gracefully convey infor-

mation—or correct an error—that not the slightest sting of confusion or mortification will be felt. This trait in a salesman, or in fact in any man, is one of the rarest assets. Next to tact comes enthusiasm, that earnest spirit of service which quickly discovers the customer's needs, cheerfully gives information, evinces a willingness to show every flower in the place if necessary and is never tired out. This quality is as rare as tact and generally goes with it, perhaps being born in a man rather than acquired. Add to these the ability to arrange the flowers artistically so that a very common thing may become one of beauty, to deftly and rapidly pack and tie the box in order that the flowers may not suffer, and the time—which up to this point has been used to advantage—may not be wasted on mere details.

It is easy to conceive, as the customer is courteously dismissed, the satisfying effect that all this intelligent effort has upon him. Not only has he been educated and pleased, but the value of a simple dozen of roses has been enhanced in his eyes possibly one hundred fold. In this way a value has been created and credit has redounded both to the house and to the salesman.

Stress has been laid on the philosophical side of the art of selling rather than on its material and technical aspect. This is because of the firm belief that the qualities mentioned, besides conducing to the elevation of the florists' and other kindred businesses, have an immediate and cash value, and that higher ideals will ultimately prevail in trade relations. Indeed the day of the "Deaconing" of the apple barrel, the sanding of sugar, watering of milk, "salting down" of flowers, and

general misrepresenting of goods is happily passing away.

Perhaps the following epitome will serve to convey the writer's thoughts in a pointed and more easily remembered form:

It is not such a good practice to "sneak" a customer as to satisfy him.

It is better to size him up as to his needs rather than as to his ability to pay a big price.

It is more to the advantage of both parties that good, fresh stock be sold than to entertain the delusion that a customer will come oftener if the goods perish quickly.

Common decency dictates that equal courtesy be extended to every patron regardless of the size of his pocket-book.

Success depends more on absolute reliability than on glib tongue and a plausible story.

It is taken for granted that a salesman should be well informed on the technical and scientific details of his business, although this knowledge has been lamentably absent in the florist's trade.

Selling a certain line of goods at, or below, cost as a "leader" to attract the public is not legitimate business, the object being to mislead buyers into the belief that all other goods in the store are equally low-priced.

Any other action having as its prime object the ruin of a competitor is pernicious.

The giving away of flowers is no part of selling and should be charged up to advertising.

Finally, to one desirous of perfecting himself in the art of selling no better lesson can be learned than from a careful study of his own experiences as a buyer. It is safe to say that he will find himself attracted by the cordial friendly greeting, especially if his name be remembered, the prompt offer of service, and the manifest truthfulness of all information given.

SOME AZALEA AWARDS AT GHENT.

The following awards were received by August Haerens, of Somergem, Belgium, at the recent quinquennial exhibition in Ghent:

First prize for group of Azalea indica of all shapes and sizes, occupying 50 square meters, by acclamation of the jury. Over 300 plants were used in the group.

First prize (gold medal) for group of 50 azaleas, fan shape, with special commendation of the jury. Group was admired by everyone.

First prize (gilt medal) for 25 Azalea Vervaeckiana alba.

First prize (gilt medal) for the finest specimen azalea (plante de culture).

First prize (gold medal) for the 12 newest specimen azaleas.

Second prize (gold medal) for 100 new azaleas, and second prize (silver medal) for six new azaleas.

As to the fan-shaped azaleas, Messrs. Haerens think it is strange that they find so little favor in America, while on the Continent everyone likes them at sight. Naturally, they cannot be cheap, as they require too much care and labor, and take up as much house-room as do the pyramids. Mr. Haerens intends to go ahead with them and grow from 300 to 500 every year.

Obituary

William Scott.

Although not unexpected by the many friends who have followed the course of William Scott's long illness, the news of his death, at his home in Buffalo, N. Y., on Tuesday, May 19, will, we doubt not, come as a painful shock to every community where his genial personality was known. And it is no exaggeration to say that wherever there was a florist anywhere on this continent, William Scott was known.

Mr. Scott was born July 31st, 1844, at Leigh Park, Hampshire, England, the country home of Sir George Thomas Staunton, one of the finest gardens in Europe, where his father was head gardener for 27 years. He attended a private school in the neighboring town of Havant till he was 13 years of age, at which time the schoolmaster became insane, but Mr. Scott said this was not his fault. He began work in the garden shortly after this, and at 15 years of age he had the care

WILLIAM SCOTT

of a conservatory that had to be so scrupulously clean and neat that the petal of a carnation must not be seen on the snow-white paths or the trim kept border. When the subject of this sketch was 17 years of age, his father removed to Chichester, where he rented the Northgate Nurseries. Mr. Scott worked in the nursery, greenhouses and seed store of his father till the spring of 1868 except for two years, during which he was employed in the seed store of W. H. Rogers, of Southampton. In the spring of 1868 a spirit of adventure came over the young man, his brother and his friend, Mr. E. I. Mopsted, James Fleming, then in partnership with Peter Henderson, was one of the old Leigh Park men. Mr. Eust of Philadelphia, and Mr. Brackenridge of Baltimore, were old associates of the elder Scott in Edinboro. David Ferguson of Philadelphia was another Leigh Park man, and there were others in the United States. The watering pot was thrown down one night in March with the expectation that it was never to be handled again, and the trio were off for the

backwoods of Canada to trap and hunt and get in close communion with red men of the primeval forest. The look of the forest about three miles up Yonge Street, Toronto, was enough for the party, and through the kindness of George Leslie, a well-known nursery man, the party was quickly back at the old trade. The following winter Mr. Scott was in the employ of James Pape, who grew plants for the Toronto market. The summer of 1869 they tried market gardening and the seed business in Stratford, Ont. There were too many in the firm, and so Mr. Scott engaged with Mr. Geo. Bailey of Buffalo, crossing the Niagara river under conditions which would now be a direct violation of the contract labor law, but in this case low price was not the motive for importing a foreigner, for he received good wages. Two years later he rented this place for commercial use. Two years later he secured the property on Balcom street, which is still in the hands of his family.

What Mr. Scott has done for his fellow craftsmen through his contributions to the trade press is well known to most of our readers. He had the happy faculty of expressing himself readily in a most entertaining and graceful manner, and was never at a loss to secure eager listeners when he spoke or readers when he wrote. He took an active interest in the Society of American Florists and at the Pittsburgh convention in 1895 was elected president of that organization, presiding at the convention in Cleveland the following year.

Mr. Scott was married 39 years ago to Miss Christine Frick. He is survived by six sons and one daughter, Helen, Robert, Alexander, William, Jr., Oliver, David and Philip.

Thomas Green.

Thomas Green, who for many years was the only florist in Joplin, Mo., died on May 3 at the age of 87. He came to the United States in 1867 and has resided in Joplin for thirty-one years.

G. W. Spinney.

Gustavus W. Spinney, who for many years was engaged in the nursery business, died at his home in Georgetown, Mass., on May 12, at the age of 68. A widow and two daughters survive him.

LES BIBLIOTHEQUES HORTICOLES.

Under the above heading our correspondent, Mr. Harman Payne, makes some pertinent remarks in "La Tribune Horticole" of Brussels for the 28 March on the subject of Horticultural Libraries. Comparisons are made between the Lindley Library, attached to the Royal Horticultural Society of London, the Massachusetts Horticultural Society Library and the Library of the National Horticultural Society of France, to what is evidently the manifest advantage of the two latter. In spite of the great progress of the English Royal Horticultural Society there is evidently some room for advance to be made in connection with the Lindley Library which is not considered by our correspondent, himself a well known book collector, to be adequate to the requirements of horticultural library workers in England.

HENRY M. ROBINSON & CO., BOSTON
15 PROVINCE ST., and 9 CHAPMAN PL.

PARIS CHRYSANTHEMUM SHOW.

At the next November show of the National Horticultural Society of France an innovation of an interesting character will be attempted. A portion of the show will be set apart for exhibits relating to the library and artistic features of the chrysanthemums and a preliminary announcement to enable exhibitors to get ready has just been issued. The new section will be divided into two divisions, the first being for exhibits of books, publications, prints, engravings, pictures and old catalogues relating to the chrysanthemum, and the second being for old varieties in cultivation anterior to the year 1896.

This resolve is undoubtedly the outcome of a very interesting exhibit by the society's librarian at the last show when he staged in glass cases a series of colored engravings of old chrysanthemums and books from the society's library which excited no little interest on the part of members and visitors. It is probable too, that Mr. Harman Payne's recently published Bibliography of the Chrysanthemum, which was written for and at the request of the chrysanthemum committee of the French society, has also been a factor in the case. We shall look forward with some degree of curiosity to the result of this somewhat novel and educational attempt on the part of the great French Horticultural Society.

You will find something worth reading on every page of HORTICULTURE.

HARTFORD'S NEW SUPERINTENDENT OF STREETS.

In electing Alexander Cumming as superintendent of streets, the street board has obtained a man for the head of its working department who has had long experience in work best suiting him for his new position and

ALEXANDER CUMMING

which, it is believed, will have much influence on his success as superintendent.

Mr. Cumming is a native of Ayrshire, Scotland, and came to this country in 1890, locating in Toronto, where he had charge of extensive improve-

ments on the government lands, having complete direction of the construction of new roads, boulevards and walks, extensive planting of trees and the laying out and grading of the Military Cemetery. He was employed in the Toronto parks in similar work and still later went to Philadelphia, where he became superintendent of Stoke Pogis, a large suburban tract which was being developed. He came to Hartford four years ago to become park forester, an office which was changed to that of city forester a year ago and which he has continued to fill with great efficiency.—Hartford Courant, May 8th.

We congratulate the people of Hartford in getting so good a man as Mr. Cumming for their superintendent of streets. In this instance it is emphatically a case of the office seeking the man. Some friendly pressure and the higher salary were no doubt the temptations that induced Mr. Cumming to leave, for a time at least, his life-long profession of gardening and forestry.

ROCHEA FALCATA.

Paul Kuhne in Moller's Deutsche Gartner Zeitung.

Through long culture I have succeeded in reducing the height of this plant so much that it now has become a desirable market plant. Rocheas cannot stand the moist airs in autumn, sunlight and always sunlight is the main requirement for Rocheas. If we pay attention to sufficient nourishment during the flowering period the plant will give a glorious flower head, which will compare in beauty with any other market plant, and will last a long time.

Seed Trade

Counter trade continues active in most of the seed centers north of Mason and Dixon's line, and the weather has generally been wet and cold. It is a good season to test the hardiness and vitality of most seeds, and no doubt there will be many complaints on the latter point.

The season for planting peas for market is practically past and the acreage is much smaller than last year. Should green peas bring good prices, as now seems probable there will be the usual rush to plant peas next year, as always follows a season of high prices on any commodity. Of course this is not good business, but it is the farmer's way, and he never learns though he lives to be a hundred years old. On the contrary, he repeats the mistake with monotonous regularity as long as he lives. Because beans and potatoes brought high prices last year, the soil has been loaded with these two commodities, and if the general crop is good, prices are bound to rule very low.

That the season has been one of the best in the history of the seed trade, is very generally admitted, and excepting on a few varieties reserves are the lowest in many years. If there is any severe shortage on staple varieties this season prices are likely to rule much higher than last year, excepting possibly on yellow varieties of onion seed. Should there be a general failure of these it would prove a blessing.

The usual crop of rumors regarding damage to California seed crops are beginning to float in, but this is such an overworked issue that seedsmen take but a languid interest in it and for this reason are quite liable to be caught napping some time, for short crops are liable to occur in California as elsewhere.

The present cool, wet weather is excellent for grass, and a good hay crop seems to be assured in addition to clover and timothy seed. At any rate, prices on these two items are likely to suffer a severe sinking spell, particularly on clover, which has been selling at abnormally high figures the past winter.

Howard M. Earl of W. Alee Burpee & Co., and W. C. Langbridge of Jerome B. Rice Seed Co., have started for the Pacific coast but expect to get back to Detroit in time for the seedsmen's convention.

Wm. Elliott & Sons are well pleased with their new store at 42 Vesey street New York. They occupy the entire building, which is much more commodious than the one on Fulton which they formerly occupied and in every way better suited to their uses, and as a retail stand it is certainly much more desirable than Fulton street has heretofore been.

The Livingston Seed Co., Columbus, O., has purchased 150 acres of land at Kickerville, which will be devoted to onion raising, seed, sets, etc. A. Wilmer Livingston will be in charge.

PUBLICATIONS RECEIVED.

Some of the Best Hardy Climbing Roses, by Wm. C. Barry. Reprint from the Country Gentleman.

Report of the Park Commissioners of Haverhill, Massachusetts, 1907: Henry Frost is superintendent of this park system.

Bulletin 113, comprising notes on the Habits of Mice, Moles and Shrews, and Bulletin 116 on Starting Young Orchards are received from the West Virginia Agricultural Experiment Station, Morgantown, W. Va.

Bulletin No. 123 of the Massachusetts Agricultural Experiment Station gives formulae for the preparation of fungicides and insecticides with directions for preventing and controlling fungus diseases and insects, both outdoors and in the greenhouse. Dr. George E. Stone and Dr. H. T. Fernald are the authors.

The Care of Trees is the title of a neat little illustrated pocket pamphlet issued by H. L. Frost & Co., of Arlington, Mass., and White Plains, N. Y. The care and preservation of ornamental trees is daily becoming a more and more essential study for the home owner and the horticulturist. Messrs. Frost & Co. employ about 250 men in this work.

Proceedings of the Seventeenth Annual Meeting of the American Carnation Society, Washington, D. C., Jan. 28, 29, 30, 1908. This volume is a worthy addition to the line of interesting annual reports furnished by Secretary Herr. The discussions, reports and papers presented at the convention are given in full. Lists of carnations registered during the year and of members for 1908 are appended. Portraits of President F. H. Lemon and Chas. W. Ward are included, also five pages of illustrations explaining the text of Mr. Ward's paper on Carnation Breeding in America. The book comprises 144 pages.

Two books recently published by the Bobbs-Merrill Company, Indianapolis, Ind., deserve more than a passing notice, representing as they do the best popular literature on outdoor and indoor gardening respectively. This class of literature, while not intended to instruct florists, is, nevertheless, entitled to the respect of the florist trade for the effect of the dissemination of truthful, practical information on garden and floral matters among the people is directly to the interest and benefit of the plant and flower trade. Florists should keep these books on sale so that when customers ask for information on cultural topics their desires may be gratified. *Yard and Garden* is the title of the first book referred to. The author, Tarkington Baker, presents in a masterly manner the possibilities and pleasures in the planting of even the most restricted spaces and well defines the difference between "a house and lot" and "a

W. ELLIOTT & SONS
42 Vesey Near Church
NEW YORK, N. Y.

home." The basic principles of arrangement, the element of garden planning, the selection and planting, together with all the operations connected with successful gardening are presented in a truthful and lucid manner. There are several special chapters on roses, peonies, phloxes, etc. There are 135 illustrations.

The second book we would mention is "Window Gardening", by Herman B. Dorner. Here we have the plain, practical advice of a man brought up in contact with the things of which he writes, and the book should be on the table of every man, woman or child who seeks to brighten the home with growing plants and flowers. It is dedicated to the author's father, Mr. Fred Dorner, of Lafayette, Ind. If the directions given in this useful little book were more widely known and followed many more florists' plants, many more seeds and bulbs would be sold. All the operations of potting and repotting, propagating, watering, fertilizing and ventilation, are described and full information as to soils, light, heat and all diseases and pests that house plants are subject to are fully treated on.

BUSINESS CHANGES.

C. A. Benson has leased the Davis Greenhouses, Denver, Colo.

Joseph Carlton has purchased the greenhouses of A. W. Tweedie at Cadillac, Mich.

Joel Thomas, of Fitzgerald, Ga., reports splendid prospects for fruit of all kinds. The first and second crops of strawberries just gone. The crop of blackberries is large and is now ripe.

THE KENTUCKY TOBACCO PRODUCT CO.,

Louisville, Ky.

A METHOD OF PROPAGATION OF SCIADOPITYS VERTICILLATA.

By A. Kelech, Russia. Trans. from Moller's Deutsche Gartner Zeitung by G. Blecken.

Usually Sciadopitys verticillata is propagated by seeds; also in fact this is the only method mentioned in horticultural literature; but seeds are com-

paratively high priced and as they germinate much harder than seeds of other conifers, and require considerable time and attention, propagation by grafting is much more advantageous.

Grafted plants grow very easily and will in four months be much stronger than three-year old seedlings. Beginning the middle of March the tips of the branches are taken and simply grafted on the roots of the parent plant. These grafts are bound up with oiled woolen thread, and planted immediately in small pots, and placed in a house that is tightly closed up, in about 50 or 60 degrees heat. There they soon will unite and break into growth, when we can begin with the hardening off of the plants, and by the first of July the majority will be so far advanced that they can be planted in a nursery.

The closing up of the grafts with bees-wax, as is necessary with other conifers, is not essential at all, but Sciadopitys must be kept in a much warmer temperature. Plants grafted in this manner will yield ninety per cent., in results.

PERSONAL.

Visitor in Boston: T. Melstrom, representing Sander & Sons, St. Albans, Eng.

Thomas F. Galvin, of Boston, returned from his trip to Europe May 15 on the Ivernia.

Jackson Dawson, of the Arnold Arboretum, has been ill with bronchitis for the past week and pneumonia was feared but he is now happily recovering and will soon be all right once more.

Dr. W. M. Wheeler has been appointed for five years as instructor in economic entomology with the idea that he will build up that department in the Bussey Institution, Boston. Plans have been formed for the reorganization of the Bussey Institution, but nothing has yet been decided on.

NEWS NOTES.

Fred C. Smith is starting in the nursery business at Ashland, Wis.

Frank Fallon is to start in the nursery business at Winston-Salem, N. C.

W. J. & M. S. Vesey, Fort Wayne, Ind., will open a downtown store on July 1.

C. R. Shake and A. R. Troxell are to start in the florist business at Greencastle, Ind.

The barn and a portion of a greenhouse belonging to Grant Newport of Cedar Rapids, Iowa, were recently struck by lightning and destroyed. The loss is estimated at \$1500, partly covered by insurance.

Commodore Lutgen, partner in the banking house of Belmont & Co., New York, has purchased a plot of nine acres of land in Redding, Conn., in the Sunset Hill district and started to erect a summer home on it. According to the plans provided by Mr. D. Vaux, landscape engineer, almost all of the grounds will be converted into flower gardens, lawns and shrubberies and a range of greenhouses will be erected.

The A. E. Kunderd Gladiolus Gardens is the title of a new firm which has been organized in Kendallville, Ind. The members are M. E. Rice, proprietor of the Majestic Theatre, of Fort Wayne, and A. E. Kunderd, the introducer of the special strain of ruffled gladioli described in our issue of February 8, 1908. Besides the ruffled gladioli of which one or more varieties are to be sent out next fall, phloxes, irises, peonies and other hardy plants will be grown. The farm, which is located two and one-half miles from the city limits, consists of 91 1-2 acres, with excellent transportation facilities for visitors and shipments.

LA CHRYSANTHEME.
This periodical publication, the official organ of the French National Chrysanthemum Society, has just reached its one hundred and first number. The society was founded at Lyons thirteen years ago and has made extraordinary progress, due perhaps in a great measure to its policy of holding its annual convention and show in a different town every year. It now numbers 774 members, inclusive of 58 affiliated societies. Unfortunately its English prototype after 60 years existence in the capital of the British Empire, is a long way from such a numerical result. The issues of Le Chrysantheme are usually filled with readable matter to those interested in the golden flower and members living at a distance have thus an opportunity of knowing what the society is doing and get something for their money besides a ticket for a show which they cannot attend.

USEFUL BOOKS.
We can supply the following books, postpaid, at the prices listed:—
The Chrysanthemum. Herrington Price, 50 cts.
How to Make Money Growing Violets. Saltford. Price, 25 cts.

FLOWER MARKET REPORTS

BOSTON Business stiffened up in the first part of last week and gave some hope of better conditions for the balance of the season, but it proved unstable and activity sagged off again and the street fakir again resumed his throne and his discards again took up their movement direct to the dump. Roses are abundant and there is an awkward congestion on the better grades. Carnations are also plentiful and are selling under stress at figures entirely inadequate and no good purpose is served thereby. Daffodils are about finished but there are some excellent late tulips in market. Sweet peas are very fine. Pond lilies are showing up well but the price is out of all proportion, \$4.00 per hundred being about the high limit. Decoration Day prices will be lower than heretofore but the aggregate sales will probably exceed the record.

BUFFALO Trade was still on the quiet side up to last Saturday, with stock plentiful on all lines, especially on roses of poor quality. Selected quality roses sold well; lily of the valley and sweet peas moved more freely. Outdoor lilacs are in, also jonquils and poeticus narcissus but not in quantity. This week the market opened with a rush and stock moved at a clip reminiscent of the olden days. Shipping trade was lively and the market was once more relieved of its congestion. The outlook for Memorial Day is bright except as to carnations. Bride and Kaiserin roses are in better demand than of late.

CHICAGO Retail trade is rather quiet. Almost continual rain has reduced the number of buyers. Outdoor flowers are selling more readily than any others though roses are moving fairly well. Carnations are not bringing so good a price as a week ago and white ones are especially moving slowly. Red peonies are gone but good pink and white are seen in abundance. Jasmynes are not arriving from the South in very good condition, consequently sales are dropping off and the season which in Chicago lasts only two or three weeks is practically over. Sweet peas are good and ordinary varieties are selling readily at normal wholesale rates, while Butterfly is very fine and brings three dollars per hundred. Beauties are unusually good, and so are Brides, Bridesmaids and Kaiserin. An extraordinarily fine display of cattleyas are to be seen at McKellar's wholesale and at Mangel's retail store this week.

INDIANAPOLIS The past week has been one of the most satisfactory this season. Stock of all

kinds continues good, especially long-stemmed Beauties, which are in good demand. Lily of the valley is selling better than for a long time. Sweet peas are still in heavy demand. Peonies and iris sell reasonably well. Bedding business is in full sway now. All of the local florists are getting a share. With the advent of warm weather there is a good demand for laurels and box trees. Prospects for a good trade and big supply of stock for Memorial Day are bright. From present indications there will be considerable decorating for June weddings.

NEW YORK Trade is stagnant, and a plentiful supply of everything congests the market on all sides. Lilacs are already giving way to peonies and special outdoor spring stock, such as bulb flowers, gardenias, etc., are about finished. Among the conspicuous things during the past week have been the Spanish irises, which have been coming to this market in heavy shipments from southern sources and have been welcomed by the store trade because of their exquisitely brilliant colors. The price has been about fifty cents a hundred.

PHILADELPHIA For the week ending May 18th prices remained about normal, but most of the large influx of all kinds of stock was pretty well cleaned up. Considering previous conditions this may be put down as better than expected. Beauties are still in heavy supply and of fine quality. Liberty, Bride and Bridesmaid are showing the effects of the weather. Richmond, Kaiserin and Killarney are in fine form. Some varieties of carnations are running down, but many are holding their own splendidly. "School day" on the 18th helped considerably on the whites. Cattleyas are good stock and moving nicely. The improvement in the lily of the valley situation keeps up. Southern gardenias have commenced. The warm weather hurts the sweet pea crop a little but the demand keeps up surprisingly well. Lilies are not so plentiful—demand fair. The peony crop commenced arriving on the 15th. Officindis is now plentiful and goes well. By the 25th Festiva Maxima and other chinensis will be in, and promise to be unusually choice. The southern cut is already coming in sparingly.

PHILADELPHIA NOTES.

Visitors this week: James T. Gorman, of the Lord & Burnham Co.; Edwin A. Seidewitz, Baltimore.

Fred Rohlan, of Dreer's, has been laid up with a severe attack of muscular rheumatism for several weeks.

Burnet Landreth and F. W. Brugerhof have started on a trip to California, to occupy about seven weeks.

May 20th was "band day" for the return from a southern business trip of Tausendschon—known to fame also under his proper title of "Captain" Lynch of the Dingee & Conard Co.

"Gardenia Daffodils" are a novelty at Niessen's. This is the old-fashioned double white narcissus, but as we have not seen it in a flower store for ten years or more "old-fashioned" novelty may be a permissible phrase.

An interesting group of wild flowers is a feature of the Battles' display this week. Among those noted were Cynthia, Viola pedata, Viola blanda, Houstonia coerulea. This may not be business but it informs and pleases the passing crowd.

It was rumored that the H. F. Michell Co. intended to move to 5th and Market streets this season, but in a talk with H. F. Michell he informs us that the present intention is to remain at the old stand for two years and rent the new location in the meantime to other tenants.

SITUATIONS WANTED

GOOD MEN

When you need good men, skilled or unskilled, Write:

THOS. H. BAMBRICK

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

John A. Payne

Greenhouse Designer and Builder
260-274 Culver Ave., Jersey City, N. J.
Purlins

The PAYNE "Grip-tight Fitting"

Pipe Tee

Column

for purlins and columns, is the strongest and most secure fitting yet produced for this purpose, because it is held fast by two bolts where the greatest grip is required. They cannot break because the bolts are close to edge of pipe.

Iron and Wood Frame Greenhouses of every type. Material only or erected.

Let us estimate on your requirements.

Everything for the Greenhouse

BOSTON PLATE & WINDOW GLASS CO.

HELP WANTED

TRAVELLER WANTED

by leading import house handling all kinds of foreign nursery and florists' stock—excepting Dutch Bulbs. Splendid opening for young man (under 25) with energy, judgment, intelligence and a fair knowledge of the business.
State age, qualifications and salary expected to "Import," care of Horticulture.

FOR SALE

GREENHOUSE FOR SALE.

About 14,000 feet of glass, two steam boilers, one hot water; easy communication to Boston and New York, 1-4 mile to depot; trolley freight passes greenhouses. Three acres of land, large two-story dwelling house, large wholesale and retail business. Books open for inspection. Ill health reason for selling. Address Horticulturist, care of HORTICULTURE.

FOR SALE—On account of my husband's death, desirable greenhouse plant; large and increasing demand for funeral designs, bouquets and bedding stuff; a dwelling house, 10,000 feet of glass; a paying business; place is stocked. Mrs. Kathrine Tully, 47 Spring Forest Ave., Binghamton, N. Y.

FOR SALE Florist store, good paying business, good location for landscape gardening. Good reason for selling. Inquire, Florist, 1480 Flatbush Avenue, Brooklyn, N. Y.

WANTED To sell or rent a greenhouse property of 25,000 sq. ft. of glass. Or would consider taking a single man as partner. Must be an expert grower of Carnations and have some capital. Address Carnation, care HORTICULTURE.

FOR SALE Special—Glass for sale below cost, 16 x 24 double thick American A. & B. qualities, below cost, for immediate acceptance. Never such an opportunity offered before. Write Parshelsky Bros., 50 Montrose Ave., Brooklyn, N. Y.

Facts You Should Know

FUEL ECONOMY

depends first upon **PERFECT** boiler construction and **CLEAN** heating surfaces in the boiler. Every part is accessible in the

KROESCHELL BOILER

The tubes are cleaned from the front at any time and can be done as easily as firing the boiler. All the soot drops under the boiler in the rear, and out of the way, making no dirt in the boiler room. All the rest of the heating surface in the Kroeschell Boiler is **self cleaning**; this can be said of no other type of boiler.

The peculiar construction of our boiler causes many **thin water** ways in direct contact with the fire, making the most powerful and **rapid heater** and water circulator known. This means a **saving of fuel**; many of our customers claim a saving, from actual test, of from **one-fourth to one-third on their fuel bills**. Any kind or grade of fuel can be used in **The Kroeschell Boiler**, hard coal, soft coal, wood or gas. Fully 90% of our customers use the very **cheapest mine run soft coal**, with excellent results.

KROESCHELL BROS. CO., 35 ERIE ST., CHICAGO

The ELECTRIC CIRCULATOR

Is master of the situation.

It **MAKES** the water circulate.

It ensures uniform temperature.

Its work is positive regardless of weather.

It never gets out of order.

It saves coal.

It is serviceable in old houses.

It is helpful in new houses.

Its value has been fully demonstrated.

Its economy is conceded.

Lower values on greenhouse products make necessary lower running expenses. Write to us today and we will send you full information as to what the Circulator can do for you, and what it will cost.

PATENT APPLIED FOR

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

The Advance Ventilating Apparatus

A machine that does the work easily, that lasts a life time, that is very easily set up, is what makes our line so popular and what brings us the orders. Cost of a house ranges from \$13.00 upwards, depending upon the number of sash &c. Get our estimates. Give us a trial and know that we have the goods that do the work.

Don't forget our Greenhouse Building Catalogue. Every type of house erected complete, or material only.

THERE ARE SOME THINGS SO PERFECTLY EVIDENT THAT WHEN YOU TAKE THE TIME TO THINK THEM OVER

you can't see for the life of you why they hadn't occurred to you that way before—and that is exactly the way our boiler man feels about the merits of a cast iron boiler, over the wrought one. You see he has just returned from a three weeks trip, and found out some mighty interesting things, strongly favoring cast iron boilers. So if you are thinking of a wrought boiler, let him give you some points. If you want any kind of boiler write to him anyway. Send for the new catalog too.

Notes from the Arnold Arboretum

The Lilacs are now in full bloom and form the centre of attraction at the Arboretum. How much the beautiful display is appreciated by the public is shown by the great numbers of visitors who are coming daily to the Arboretum, particularly last Saturday and Sunday afternoon the driveway and the paths near the Lilacs were literally thronged with visitors afoot and in carriages. In the last issue the earliest varieties were noted and now, as all the varieties are in bloom, though the earlier are nearly past their prime, some of the best of all colors may be noted. Among the whites may be mentioned *Marie Legraye* with large panicles, one of the best single whites, early like *Alba major* and *Virginalis*, *Noisettiana*, *Madame Casimir Perier*, one of the best double whites, *Madame Lemoine*, double-flowered, late. Among the blue, lilac or pink varieties we note *Bleuetre*, almost pure pale blue, the best of the blue varieties, *Coccoloba superba*, bluish lilac, very free-flowering, *Rouen*, blue lilac, *President Grevy*, large panicles of blue lilac double flowers, *E. Lemoine*, lilac, double-flowered, *Geheimrat Heyder*, light lilac, free-flowering, and the similar *Eckholm*, *President Carnot*, pale lilac, double, late, *Pyramidalis*, lilac, double flowers in very large panicles, *Maxime Cornu*, lilac, large panicles of double flowers, *Beranger*, dark lilac flowers in large panicles, late, *Alphonse Lavalley*, pink lilac, free-flowering, *Croix de Brahy*, pink lilac, early, *Macrostachya*, large panicles of light pink flowers, *Fuerst Lichtenstein*, pale pink lilac, free-flowering, early, *Marechal de Bassompierre*, double pinkish lilac flowers in large panicles, *Comte de Kerchove*, similar to the preceding, *Gloire de Moulins*, pink flowers, one of the best pinks. Of the red and purple varieties the following are some of the best: *Congo*, dark purple, large flowers in dense, somewhat nodding panicles, late, *Andenken an L. Spaeth* (*Souvenir de Louis Spaeth*), dark purple, one of the darkest, late, *Charles Joly*, dark purple double flowers, the darkest of the double varieties, late, *Philemon*, dark purple, late, *President Massart*, purple, late, *Charles X. (Caroli)*, purple lilac, *Geheimrat Singelmann*, purplish lilac, large panicles, *Marie Kreuter*, purplish lilac, *Aline Mocqueris*, dark red, *Rubra insignis*, purplish red, *Professor Sargent*, purple lilac. Of the Persian Lilacs the red *Syringa chinensis* var. *rubra* is perhaps the best. The Lilacs of the Persica-group should never be planted together with varieties of the Vulgaris-group, as the two are too different in habit and the former with their spreading slender branches bearing nodding broad panicles would look out of place between the rather stiff upright Vulgaris-varieties. The single-flowered varieties are the best for general planting, they are more free-flowering and have not the disadvantage of the double-flowered forms that the faded individual flowers do not fall off, but remain on the panicle which gives the shrubs a very unsightly appearance, if the panicles are not removed.

Besides the Lilacs one of the showiest trees is *Cornus florida*, the Flowering Dogwood, now covered with its large white blossoms, but still more beautiful is its red variety, *C. florida* var. *rubra*, with bright pink flowers: its color effect in the landscape is about the same as that of the Red-bud, but the pink of the former is purer, more like that of the Peach; there are many fine trees of it in the shrubberies around the Jamaica Pond. Another striking tree is the Snowdrop-tree, *Halesia tetraptera* (*Mohrodendron carolinum*) covered now with its numerous bell-shaped white flowers which unfortunately do not last very long.

The flowering crab-apples take now their leave with *Malus coronaria*, the Fragrant Crab, and *M. ioensis*, the Iowa Crab, both very beautiful with their pink, fragrant flowers between the young foliage. Also Beechels Crab, *M. ioensis* var. *plena*, comes in for much admiration in account of its clusters of large double flowers looking like bunches of little pink Roses.

Most of the Bush Honeysuckles are in bloom. *Lonicera tatarica* with its varieties ranging in color from pure white to red and *L. bella* and *L. notha*, its hybrids with *L. Morrowii* and *L. Ruprechtiana*, which show the same variation in the color of their flowers, are now very attractive. A handsome species is *L. Morrowii* with pure white flowers changing to yellowish in fading: it is a rather low spreading bush of dense habit and keeps its scarlet fruits and its dark dull green foliage unchanged until late in fall: this advantage is also shown by the above named hybrids, while *L. tatarica* is apt to become unsightly earlier in fall. *Lonicera muscariensis* is a hybrid of *L. Ruprechtiana* and *L. Morrowii*, very similar to the latter, but of more upright habit. A striking variety of the western *Lonicera involucrata* with pale yellow rather insignificant flowers is *L. involucrata* var. *serotina* which has yellow flowers tinged with scarlet resembling in color and shape much those of *Manettia bicolor*. A graceful little shrub is *L. tangutica* with small but numerous pendulous pinkish white flowers and *L. syringantha* with upright pinkish white flowers; handsomer than the latter is its variety *L. syringantha* var. *Wolfii* with flowers of a deep lilac color and of a delicious fragrance reminding of Hyacinths. Both species are of recent introduction from eastern Siberia.

Of the many other shrubs which are flowering may be mentioned *Prunus maritima*, the last of the American plums to bloom, *Spiraea Vanhouttei* *Deutzia purviflora* and *D. Lemoinci* with large clusters of pure white flowers, *Rhodotypos tetrapetala* (*R. kerrioides*) with large white flowers at the end of the branches, *Xanthococcus sorbifolia* with numerous upright spikes of delicate white flowers marked yellow and red, *Viburnum prunifolium*, *Kerria japonica* with yellow single and double flowers, several species of *Berberis* with their showy golden racemes, and species of *Ribes*.

seem to have come down all at once and in every section where a progressive florist exists the orchid now receives a welcome. Mr. McClure's practical paper on this topic, which appears in this issue, is therefore very timely, selecting for consideration, as it does, the most conspicuous and useful class of orchids and imparting rational and undistorted instruction in their cultivation. The publication of the facts as to the simplicity of the requirements of this class of plants in this country should bring good results in extending their culture by the flower growers who have hitherto been deterred by the exaggerated notions heretofore disseminated as to their requirements. Indeed, it is a question whether more orchid plants have not reached the rubbish heap through the mystic coddling at the hands of the highly specialized expert than under the simple treatment of the ordinary unpretentious gardener. Our zealous growers have been too prone to base their practice with such subjects on the experience and methods in other countries, forgetting to take into account our very different climate. Instead of taking our lessons so literally from abroad American growers will do well to listen to men like Mr. McClure who have tried out our climatic conditions and, regardless of old traditions, adopted their methods accordingly.

Editor Myrick of the *New England Homestead* is out with a public address to the Governors of

the New England States calling for a development conference and urging co-operative effort to advance the material progress and development of Greater New England. He represents that these six States, isolated as they are to some extent, geographically, from the great bulk of United States territory, are so interlaced and interdependent that a closer union of sentiment and effort than has heretofore prevailed, is necessary if the land, markets, factories and other agricultural and industrial advantages which this section enjoys are to be adequately appreciated and used to best advantage. New England people have been so absorbed in the opening out and building up of the vast territory to the westward that they seem to have almost forgotten the great opportunities that lie at their own doors. The encouragement of wise forestry methods, the conservation of streams and lakes and their utilization for power or for recreation, the regulation of water and railroad transportation, the enlargement of industrial facilities, the development of better markets domestic and foreign—these are all questions to be approached in a patriotic and statesmanlike spirit. As an institution with a world-wide range and a New England headquarters, HORTICULTURE is pleased to give its endorsement and will endeavor to do its part in any movement which seeks to uplift this or any other section of our great country to the level of its highest possibilities. Horticulturally New England wields a wide influence; her institutions, her gardeners and florists, her gardens and parks, are second to none and Nature has here lavished shores, mountains, lakes and forests of sublime beauty, but the fame of all this can be vastly increased and New England's position in commercial horticulture greatly benefited by active intercity and interstate co-operation, with this specific purpose in view. Every horticultural society, every florists' club and every agricultural educational institution should be represented at the proposed conference.

Unfrilled orchid growing Commercial floriculture has made a well-defined stride within the past few years in its adoption of the orchid as its standard of highest quality and beauty in floral work. The movement was very slow to gain headway at first and it was only by the exercise of rare patience and tenacity that the pioneers in orchid introduction for commercial cut flower purposes made any advancement, but, at last, the barriers

The Hardy Rhododendron Question

Editor HORTICULTURE:

Replying to Mr. Brown's article in HORTICULTURE of May 9th, in which he takes issue with me, I will again say that my observations and experiences do not accord with his list of rhododendrons except in so far as mentioned in my former article. Now he may have had a different experience than I did with those kinds I list as tender. I will admit that my experience with these tenderer kinds has been confined mostly to Long Island, New York. In a general way if a plant is tender there it surely is so in Boston. Of course there may be exceptions.

As to what the term hardiness in the case of rhododendrons might reasonably be expected to mean my idea would be that in order to be termed hardy a rhododendron should come through an ordinary winter in a situation that is at least fairly well adapted to this class of plants with its buds and leaves as well as its wood practically uninjured, and this without any overhead protection of evergreen boughs, lath screens or the like. Under the foregoing conditions, and in some cases even with a winter overhead protection, I have seen on Long Island the varieties R. I. Halford, John Waterer, Mrs. John Clutton, Concessum, The Queen, and Lady Eleanor Cathcart, kill so badly that it would take them years to recover, while standing almost side by side with them was practically the entire list which I give under colors, and these latter came through in good shape.

Now if it can be shown that the varieties I have had my doubts about will in the vicinity of Boston, stand the above test I shall be glad to learn it, and would of course consider that they belonged in the "iron-clad" class for this neighborhood. Even if they fail of the above test but will come through an ordinary winter with a not unreasonably troublesome or expensive protection I should consider them hardy enough for use in many instances.

In New York city and vicinity it might not be unreasonable to demand, as a test for hardiness, that a rhododendron be able satisfactorily to withstand a winter without protection "in the middle of a ten-acre field," as I have seen rhododendrons there stand the winter without protection in some pretty exposed places, where I should hesitate about planting them.

Mr. Brown says that my list is "favored more by repute." In reply I would say that the list under colors given by me can be found fairly well represented in large sized plants in and around Boston, and in New York there are innumerable instances where this is so. Can as much be said of the list which I put down as tender? Also, most of the sorts listed (under colors) by me are carried by a number of nurserymen. Concerning the additional list of kinds which I give as doing well in the Arboretum I do not know just how widely these are distributed elsewhere, although, if I remember correctly, I have run across some of them outside of the Arboretum.

Mr. Brown states that he has proved part of his list by a five years' test. That would seem to be a pretty fair test. But is it? Would it be unreasonable to require a test of ten years, and to demand that at the end of that time the plants should still be shapely, not consisting of a few gawky shoots with perhaps a bunch of better growth at the base, as can sometimes be seen, and which in certain cases I have attributed to lack of hardiness, although this kind of development sometimes takes place, through abuse, in the case of hardy varieties.

Concerning what Mr. Brown has to say about the cir-

ulation of HORTICULTURE and my making a list for "Boston and vicinity," it seems to me that his point is not well taken. I do know, which Mr. Brown seems to think I do not, that the circulation of HORTICULTURE is not restricted to Boston and vicinity. I dare say its circulation takes in all the remote corners of the earth. This fact it seems to me is one of the many obvious reasons why in writing about the hardiness of rhododendrons it is best, or rather necessary, to mention localities, and to state what kinds will do in such and such localities, otherwise a mere list of rhododendrons, including all those kinds which are hardy somewhere, some here and some there, where HORTICULTURE circulates would quite likely include the whole existing catalogue of rhododendrons, and such a catalogue would be of no use whatever in this question of hardiness. Also, on the same principle of the ubiquitousness of HORTICULTURE any list of hardy rhododendrons would be useless in many places reached by this journal, simply because rhododendrons would not do there at all.

What I have just said in the foregoing sentences seems to me the logical conclusions of Mr. Brown's statement in the paragraph devoted to the "principal object" of his article. Admittedly many rhododendrons are hardy in localities in England which are not hardy in certain localities in New England. In Mr. Brown's article in the April 11th number there occurs this sentence, "There are a great many people who believe that the best of the English hybrids cannot be grown in the New England States, but one has only to consult any up-to-date catalogue of varieties to be astonished at the large number of sorts that have proved available for planting in New England." Here is no mention of locality except the very wide term "New England States." In his statement does Mr. Brown mean to include all of New England? Would he say, for instance, that his list of rhododendrons would survive under the winter treatment mentioned by him, say in Aroostook County, Maine? I have gone into this explanation in detail in an attempt to make clear what I had thought was obvious, viz.: why my list was intended for Boston and vicinity. Of course the fact that I am now living in Boston is an added reason for the selection of this particular locality.

I take it that Mr. Brown takes exception to the "imposing title, 'Iron-Clad Rhododendrons,'" appearing at the head of my article in the April 18th number. I did use the term, not a new one even in connection with rhododendrons, in the body of my article, but did not use it as a title for my manuscript or suggest that it appear as such when my article should be printed. The management of HORTICULTURE, I hope, will take no offense when I state that they, not I, are responsible for the use of this term as a title of my article.

I might state that the chief object of my criticism of Mr. Brown's previous article (as is also that of this article) was that I hoped by means of placing before the readers of HORTICULTURE the results of my own observation and experience to elicit the results of the experience and observations of others, thus perhaps leading to an interesting discussion and to the dissemination of valuable knowledge. I was quite aware that most of us, myself included, have quite a lot to learn regarding rhododendrons, not only as regards hardiness, but in other ways.

Samuel J. Kocher

NEWS OF THE CLUBS AND SOCIETIES.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of this society was held in County Building, May 22, President Huss in the chair. It was "Pansy night" and the display was by far the best ever offered in this locality. The attendance was so large as to tax the capacity of the hall until there was barely standing room. P. Zuger, H. A. Pinney and Carl Peterson were appointed judges and made awards as follows: T. B. Brown, for culture of pansies, diploma; John Gerard and O. F. Gritzmach, for collection of pansies, certificate of merit each. J. F. Huss, A. Reynolds and E. F. McDermott received a hearty vote of thanks for their exhibits.

The feature of the evening was a paper read by John Gerard on "The History and Culture of the Pansy," giving the history and origin of the various families and describing most entertainingly the improvement of this popular spring flower. Mr. Gerard has established an enviable reputation as a pansy specialist and in the course of his remarks gave many cultural hints which were highly appreciated by the members.

The show was not confined entirely to pansies and a magnificent collection of gloxinias was tabled by J. Chambers, gardener to Rev. F. Goodwin. This fine exhibit gave ample evidence of cultural skill and Mr. Chambers was awarded a certificate of merit. P. Zuger represented the Park Department with a display of *Silene pendula* which is being used most effectively for spring bedding in the various parks.

A. CUMMING, JR., Sec'y.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The monthly meeting, May 13th, of this society was devoted to Flowering Shrubs. Three large groups of flowers in vases artistically arranged graced the hall. A. Herrington, Wm. Duckham, and D. Reagan were the principal exhibitors. Honorable mention and vote of thanks was awarded to each. From 40 to 60 varieties were in each group.

F. & F. Nurseries had azaleas in pots to help out, and John Downing, gardener to Dr. D. H. McAlpin, had plants of *Begonia Lorraine* which after five months' continuous blooming, were still fine. Arthur Herrington's essay on Flowering Shrubs was well received.

At next meeting, Frank Eskesen will read a paper on fern decoration, and all are invited to bring arranged fern dishes. There will also be a display of hardy herbaceous flowers. Schedule for the next flower show Oct. 29 and 30 is ready for the printer. Quite a few changes for the better are made, and all must hustle from now on to make it a success. E. REAGAN.

AMERICAN PEONY SOCIETY.

The sixth annual meeting of the American Peony Society will be held on June 18, 19, 1908, at the State College of Agriculture, Cornell University, Ithaca, N. Y.

A. H. FEWKES, Sec'y.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Chas. H. Keitsch, superintendent of the trade exhibition to be held at Niagara Falls next August in connection with the annual convention, has sent out a circular calling attention to the excellent quarters secured by the Executive Board for the exhibition, comprising as it does the whole lower floor of one of the largest hotels—about 20,000 sq. ft. of floor space. Mr. Keitsch says that all indications now point to a very successful meeting from the exhibitors' point of view. The facilities for shipping to and receiving goods at Niagara Falls are of the best, and as the distance from the freight houses to the exhibition halls is very short, carting charges will not be excessive. The meetings of the S. A. F. will be held in one of the large rooms adjoining the exhibition halls, and all those who wish can secure lodging in the same building. Blank contracts, diagram of halls and all information as to rules and rates can be had by writing to Chas. H. Keitsch, 810 Main street, Buffalo, N. Y. The early applicant will fare best, of course.

NEW ORLEANS HORTICULTURAL SOCIETY.

Regular meeting of above society was held Thursday, p. m., May 21. The following business was transacted. A chrysanthemum and flower show will be given by the N. O. H. S. on Nov. 12, 13, 14 and 15, and over \$500 will be offered in prizes. No place has been secured for the exhibition as yet, but it is supposed that Lafayette Square or some other centrally located section of the city will be chosen. Prizes will be awarded for twenty-four different classes of chrysanthemums, fourteen classes of cut flowers, six of floral work with chrysanthemums, and four will be awarded to amateurs, in addition to which there will be premiums for plants or collections of plants. J. A. Newsham is chairman of the committee on arrangements with Chas. Eble ex-officio, and H. Papworth, J. Steckler, P. Abele, B. M. Wicher, M. M. de Lapouyade, C. W. Eichling, P. A. Chopin, R. Eichling, and Chas. A. Panter members.

The association indorsed the Crop Pest Commission. A communication on the black ant, the most destructive that gardeners have to deal with, from Prof. Newell, was read and very much appreciated.

Martin Behrman was elected an honorary member and Mr. and Mrs. Alost were thanked for their dinner some few weeks ago. The Steckler Seed Co., was also thanked for use of its wagons.

R. Eichling of U. J. Virgin exhibited coleuses, tuberous begonias, double petunias, lily of the valley. F. Calhounes exhibited some artemesia which has not been grown here to any extent.

CHAS. R. PANTER, Sec'y.

PENNSYLVANIA HORTICULTURAL SOCIETY.

At a meeting of the special committee held on the 26th inst. it was decided to hold the combined rose and peony exhibition on the afternoon and evening of Tuesday, June 2. Among the prizes offered are the following:

Peonies.

By Samuel T. Bodine, vase of six blooms, white, \$2.00, \$1.00; do. red, \$2.00, \$1.00; vase do. pink, \$2.00, \$1.00; vase of twelve blooms, mixed, \$3.00, \$2.00.

By Henry F. Michell Co., twelve varieties, named, six blooms of each, \$4.00, \$2.00.

By James W. Paul, Jr., twenty varieties, six blooms of each, \$10.00, \$5.00.

By George C. Watson, eight Japanese varieties, five blooms of each, \$10.00.

Peonies and Perennials.

By Henry A. Dreer, Inc.; peonies, collection of twelve varieties, three blooms of each, \$3.00, \$2.00; hardy perennials, display not less than twelve species (not varieties), \$3.00, \$2.00.

Outdoor Roses.

By Dr. Robert Huey, Hybrid Perpetuals, six varieties, six blooms of each, \$5.00, \$2.00, \$2.00; by Samuel T. Bodine, Hybrid Teas, three vases, three varieties, six blooms of each, \$3.00, \$2.00; Hybrid Tea, vase of twelve blooms of any variety, \$3.00, \$2.00; Hybrid Perpetual, vase of six blooms of any variety, \$2.00, \$1.00; by Henry F. Michell Co., best collection of outdoor grown flowers, \$3.00, \$2.00.

Flowers should be sent express prepaid in care David Rust, secretary, to arrive not later than 2 p. m., Tuesday, with a letter of entry by earliest possible mail in advance.

DETROIT FLORIST CLUB.

The Detroit Florist Club had a very large attendance at its regular meeting, principally caused by the announcement of the death of Wm. Scott in Buffalo, which was keenly felt by all. During its meeting the following resolutions were read by Secretary J. F. Sullivan and unanimously adopted:

Resolved, That in the death of Wm. Scott this club realizes that floriculture and horticulture has lost one of its best friends and most earnest advocates.

He was always foremost in all movements calculated to advance the floricultural and horticultural interests of the country and was a conspicuous contributor to the floricultural literature of his time; the great value of which is highly appreciated by thousands of persons engaged in the florist business.

His cheerful disposition and most enviable nature has endeared him to thousands of friends throughout the country by whom the news of his death will be received with the deepest sorrow; and.

Resolved, That this club send a floral offering to his funeral conveying its deepest sympathy with his widow and family, also a copy of these resolutions.

CLUB AND SOCIETY NOTES.

The date of the joint exhibition of the American Rose Society and the Horticultural Society of New York has been set for June 10 and 11.

Nassau County Horticultural Society (N. Y.) has selected June 10 as the date for their next exhibition in connection with the annual meeting.

The regular monthly meeting of Southampton Horticultural Society was held Thursday, May 21. It was decided to hold the summer exhibition on Wednesday and Thursday, August 19 and 20, instead of August 12 and 13 as originally agreed upon.

The Albany Florists' Club (N. Y.) met on May 7 with H. G. Eyres, Charles Sanders, foreman of the place, exhibited a scarlet seedling geranium with flowers of unusual size, and spoke of his work, which has covered nearly half a century, in a most interesting way.

The prize schedule for the June "Rose and Strawberry," the September "Fruit" and the November "Chrysanthemum" exhibitions of the Rhode Island Horticultural Society has been received. Copies may be had on application to C. W. Smith, Secretary, 27 Exchange St., Providence, R. I.

We have received regularly each week, copies of the bowling scores made by the ambitious members of the New York Florists' Club who are hoping to represent their club in the tournament next August at Niagara Falls. We have refrained from publishing them, however, out of compassion for the contestants whose scores, with one or two exceptions, are not exactly of the complexion to bring apprehension to the hearts of their rivals. We hope to get something more impressive in the near future.

Ladies' night was celebrated in joyous abandon by the members of the New York Florists' Club and their ladies on Wednesday Evening, May 27, at the club rooms on West Twenty-third street. About two hundred were present. Arrangements and catering were perfect in every detail and the affair was most enjoyable from start to finish. Bagpipes, violin and singing were all brought into requisition, the daughters of John Birnie taking a leading part in the entertainment and displaying musical talent of a high order.

At the last meeting of the Morris County (N. J.) Gardeners' and Florists' Society, Arthur Herrington delivered an interesting address on "Flowering Shrubs." It was an eloquent plea for a more general use of the vast fund of beauty afforded by this class of plants, the merits, attractiveness, permanence and cheapness of which are not sufficiently comprehended by the people.

Mr. Herrington gave as his selection of the twelve best spring-flowering shrubs, the following: Forsythia suspensa, Spiraea prunifolia flore pleno, Spiraea Van Houttei, Kerria Japonica, single type; Deutzia crenata, Pride of Rochester; Exochorda grandiflora, Pyrus (Cydonia) Japonica, Syringa (Lilac) any good colored variety; Syringa (Lilac) any good white variety; Viburnum plicatum Weigela amabilis or any other good variety, Philadelphus grandiflorus.

33RD ANNUAL CONVENTION AMERICAN ASSOCIATION OF NURSERYMEN.

At Plankinton House, Milwaukee, Wis.,
June 10-12, 1908.

For the thirty-third consecutive year the nurserymen of the United States will meet, June 10th, 11th and 12th, 1908. In looking after legislation; favoring good laws, opposing bad ones, and securing reasonable freight tariffs alone, the value of the work done by this Association cannot be over estimated. At a conservative figure the amount saved in freight rates during the past two years is \$100,000. Every nurseryman, be he grower, dealer or agent, shares in this benefit. About five hundred out of more than three thousand nurserymen do this work and pay the bills.

The income of the Association is derived from two sources—membership and advertising in the Badge Book.

Membership.

The annual fee is five dollars. It places your name on the roll of honor of the nursery industry. It's worth more than that to be in such company. It will help to secure a continuance of the advantages already gained. "Eternal vigilance" is the price of safety. Your representatives on the various committees work without compensation and at great personal sacrifice. Funds must be provided to pay actual expenses, to pay for testing unconstitutional legislation such as has been enacted in some states and will be followed in others if unchecked.

Send in your fee at once. Go to the convention if possible, but by all means if you cannot attend, have your name enrolled, lend the influence of your membership and contribute your financial support to the work being done in your behalf.

The Badge Book.

This barometer of the nursery industry will be issued as usual just previous to the convention.

It is, itself, worth more than the fee. It is probably the most prized nursery publication of the year. In it you will find a list of the best men in the business. If you want to know "who is who" in nursery lines the Badge Book is authority.

Railroad Rates.

The railroads after long consideration finally declined under date of April 29th, to grant the usual reduced fares on the certificate plan and suggested.

"That your people be referred to the summer tourist fares which will be in effect in Milwaukee at the time of your meeting. Full details of the Summer Tourist fares may be obtained upon application to the representatives of the several lines."

Arrangements have been made with the Chicago, Milwaukee and St. Paul Railway for special coaches and parlor cars on train leaving Chicago from Union Passenger Station, Canal and Adams St., at 11:30 A. M., June 9th, arriving at Milwaukee at 1:30 P. M. For those who wish to remain in Chicago for luncheon there will be special coaches and parlor cars on train leaving at 1:50 P. M., arriving at Milwaukee at 3:50 P. M.

Members should purchase tickets reading via Chicago, Milwaukee & St. Paul Railway from Chicago to Milwaukee and return.

Passengers holding through tickets and arriving Chicago on lines not entering Union Passenger Station will be transferred in rubber tired omnibuses free of charge.

Advise C. N. Souther, Gen. Agt., Pass'r Dept. C. M. St. P. Ry., 315 Marquette Bldg., what train you will leave Chicago on and also the number in your party.

The "Exhibits" will be in charge of the committee of which T. B. Meehan is chairman. This committee has secured two large rooms on the first floor of the Plankinton Hotel. In these rooms will be exhibited colored plates, lithographs, labels and all smaller exhibits. The heavier exhibits will be placed in a vacant store on the ground floor of the hotel. From present indications, there will be ample room for all exhibits. The committee desires entries for exhibits of everything that will interest nurserymen, including nursery stock tools of all descriptions and useful office appliances, records, etc. Applications for space must be made prior to the first of June, and same must be addressed to Thomas B. Meehan, Chairman of the Committee, Dreshertown, Pa.

Program.

WEDNESDAY, JUNE 10TH, 9:30 O'CLOCK
A. M.

Calling to order President J. W. Hill, Des Moines, Iowa.

Address of Welcome, Mayor D. S. Rose, Milwaukee, Wis.

Response, Geo. S. Josselyn, Fredonia, N. Y.

President's Annual Address, J. W. Hill, Des Moines, Iowa.

Announcement of arrangements for selection of State Vice-Presidents and for meeting of Vice-Presidents.

Report of Secretary; report of Treasurer.

Reports of Standing Committees. Transportation—E. H. Stannard Ottawa, Kas. Tariff—Irving Rouse, Rochester, N. Y. Legislation—Wm. Pitkin, Rochester, N. Y. National Inspection Law—Orlando Harrison, Berlin, Md. Publicity—J. M. Irvine, St. Joseph, Mo. Exhibits—Thomas B. Meehan, Dreshertown Pa. Editing Report—J. Horace McFarland, Harrisburg Pa. Mutual Fire Insurance—Peter Youngers, Geneva, Neb. Entomology—C. L. Watrous, Des Moines, Ia.

THURSDAY, JUNE 11TH, 9 O'CLOCK
A. M.

Roll Call of States. Naming Vice-Presidents. Report of Vice-Presidents. Election of Officers. Selection of Next Place of Meeting.

"How Can the Nurseryman Best Assist in the Civic Improvement Movement." J. Horace McFarland, Harrisburg, Pa.

"Is it Good Policy on the Part of the Nurseryman to Send Out Cheap Lists at the End of the Season?" J. M. Pitkin, Newark, N. Y.

"A Few Points on Improvements." Judge Eugene Stark, Louisiana, Mo.

(Subject not yet announced.) Prof. L. R. Taft, East Lansing, Mich.

"Semi-Tropical Thoughts for Nurserymen." H. B. Hume, Glen Saint Mary, Fla.

"The Great Southwest," Jno. S. Kerr, Sherman, Tex.

"Cost of Growing Stock." H. L. Bld, Benton Harbor, Mich.

"The Peony," H. D. Simpson, Vincennes, Ind.

"Elements of Success in the Nursery Business," J. B. Pilkington, Portland, Ore.

FRIDAY, JUNE 12TH, 9 O'CLOCK A. M.

"List of Desirable Fruits for My State and Are Recommended to the Plants" — C. M. Hobbs, Bridgeport, Ind.; J. Van Lindley, Pomona, N. C.; Geo. H. Whiting, Yankton, S. D.; C. J. Mahoy, Rochester, N. Y.; A. Willis, Ottawa, Kas.; E. W. Chittin, Winchester, Tenn.; W. F. Heikes,

Herts, M., Peter Youngers, Geney, Neb., F. A. Weber, Nursery, Mo.
Report of Committee on Final Resolutions.

The following list of questions has been prepared and will be taken up as the disposition of the program throughout the three days permits.

QUESTION BOX

Full and free discussion invited.
Question No. 1. Would it be advisable to have a law for the patenting or trademarking for various varieties of fruits?

Question No. 2. Does not the average nurseryman import nursery stock that can be grown at home? If so, why?

Question No. 3. Has any nurseryman succeeded in preventing apple crown gall and hairy root?

Question No. 4. Is there enough co-operation among nurserymen?

Question No. 5. Is the demand for ornamentals increasing?

Question No. 6. What class of nurserymen are able to manage a business and make a profit under present conditions?

Question No. 7. How should pecans be graded?

Question No. 8. Are the large orchardists still getting the benefit of wholesale prices?

Question No. 9. Are foreign houses careful enough in grading and sorting seedlings?

Question No. 10. The need of a better class of labor and how can we get it?

Question No. 11. Why should growing nursery stock be taxed as personal property any more than wheat, corn, etc.?

Question No. 12. Could not the apple orchard interests be improved by more stringent laws regarding the labelling of pure apple cider vinegar?

Question No. 13. Is the Kiefer pear responsible for the limited sale of pear trees at the present time?

Members are requested to avail themselves of gaining information by handing questions to the secretary at any time during the meeting.

In order to give members opportunity for ample social and business intercourse, the above program provides for one session daily. It is hoped that this arrangement will result in the attendance of every member at each of the three sessions.

Badges will be delivered to members by the secretary on registration at the convention.

Ladies in attendance will be supplied with badges on application to the secretary.

Announcement will be made during the first session of the time and place for meetings of the various Protective Associations, if information is placed in the hands of the secretary.

Prospectus and all other information may be had by addressing the Secretary of the Association, Geo. C. Seager, Rochester, N. Y.

A CORRECTION.

Editor HORTICULTURE:

Dear Sir,—In a report of Mr. Thos. White of some remarks made by me at a meeting of the New Bedford Horticultural Society in a recent issue of HORTICULTURE it is stated that I recommended the broad-petaled *Lilium canadense* for forcing. *L. candidum* was the variety referred to, and for outdoor culture I stated that it should be planted five inches deep. *L. canadense* and other varieties were better planted 9 to 12 inches deep and the first-named sort did well in rhododendron beds where it could have the advantage of some shade and a good mulching of leaves. No doubt the similarity of the names *candidum* and *canadense* was the cause of the trifling error.

W. N. CRAIG.

North Easton, Mass.

E. G. Hill left Richmond, Ind., on May 20, to attend the Paris international rose show, June 1 to 15, where he has been invited to officiate as a judge.

THE MOST USEFUL OF THE CATTLEYAS.

A paper read before the Buffalo Florists' Club by George E. McClure, Jr.

When the lay mind contemplates an orchid, a cattleya is what comes before his mental vision. In fact, we might say that the cattleya is the type of an orchid, not in a botanical sense, but as far as the public is concerned. Fully nine-tenths of the orchids sold in this country are cattleyas, and the genus cattleya will always hold first place as the most showy and useful of the family.

Among the 10,000 representatives of the natural order, Orchidaceae, there are few to surpass the cattleyas in beauty. The genus *Laelia* comes nearest to the cattleyas in point of beauty and usefulness; in fact, the uninitiated cannot discern between the two. The chief difference is an obscure botanical one. The cattleya has four tiny pollen masses, while the *laelia* has eight. This may be said to be the sole difference.

Two Classes of Cattleyas.

Cattleyas are divided into two fairly distinct classes, and although these classes are being bridged by incessant hybridization, yet in the majority of cases they are fairly distinct. The first is the monophyllous, or one-leaved class, which is restricted solely to what is known as the labiate, or large-lipped section, of which *C. labiata* is the type. Until quite recently this species was considered to be the sole representative of this group, and the other large-lipped forms as varieties and sub-varieties. Now all of these varieties are considered to be good species, which makes the labiate or, more properly speaking, monophyllous section quite formidable in point of numbers.

The other is the diphyllous, or two-leaved class, which includes a large number of species, which are chiefly characterized by smaller, more numerous and in some cases more fleshy flowers. The diphyllous cattleyas are not nearly as well known to the public as are the monophyllous or large-flowered forms, because they are not as showy and attractive, but some of the gems of the genus are to be found in the two-leaved class. The cattleya is an American orchid found growing from Mexico to South Brazil. Nearly all of the monophyllous cattleyas are natives of northern South America, while the diphyllous cattleyas are chiefly from South Brazil.

Culture of the Cattleya.

The idea generally prevails that cattleyas, and in fact all orchids, are difficult to cultivate. This idea is entirely without foundation. While it would be a mistake to say that the culture of a great many varieties in the same greenhouse would be easily accomplished, yet a little study and observation would enable any enthusiastic amateur to secure excellent results. Greenhouses specially built for cattleyas are not necessary; any light greenhouse, which is not too high, will prove suitable. The plants need not occupy valuable space on the benches, but may be suspended from the roofs

of greenhouses devoted to a mixed collection of plants, when a temperature of from 60 to 65 degrees Fahrenheit is maintained, and in this way will prove an acceptable by-product.

Location in the House.

The plants should never be more than four feet from the glass, and less than that is better. The only objection to the system of suspending cattleyas lies in the fact that they are often neglected and become too dry or too wet, at least when suspended high enough to be out of easy reach. Whenever bench room can be afforded it is well to raise the plants in this manner, as better oversight can be had over them. When the bench system is pursued, there should be a raised, or secondary bench placed upon the regular greenhouse bench. This bench should be made of wooden slats, from one and one-half to two inches wide, and from one-half to three-fourths inches thick. These slats should be made into frames four to six feet long, so as to be easily removed for the purpose of cleaning the lower bench. The upper, or slat bench should be raised about eight inches above the lower, on wooden or iron uprights. The uprights should stand in shallow pans of water to prevent snails or woodlice from reaching the plants. A layer of moss or fine gravel should be spread over the lower bench, which should be kept damp to insure a moist atmosphere, which is absolutely essential to the health of the plants.

Cattleyas cannot be successfully cultivated as window plants, no matter how bright the window may be, as the atmosphere in the living room is too dry. If the window is encased, after the fashion of a wardian case, and if sufficient light is afforded, a fair degree of success may be attained. This is a common practice in England, for the raising of cool orchids, and it would be worthy of a fair trial in this country for the culture of cattleyas, as our summers are hot enough to grow them without artificial heat. Any little greenhouse, heated by steam or hot water, could be utilized for cattleyas. A greenhouse heated by a flue would be of no value, because of the decimated atmosphere which is the inevitable result of this system of heating.

The Cattleya House.

If a greenhouse is to be built for the express purpose of raising cattleyas, it should be designed to be as low as possible, and if the greenhouse is narrow and built to accommodate two stages, the direction at which it is built is of no consequence, but if the house be high, with three stages and two walks, it should, if possible, run north and south, so that both sides have the benefit of equal light in the winter, which is very essential. The central bench in a three-bench house is usually broad and should be raised in the middle for economy of space. The raising of the plants in the centre stage would shade one-half of the plants in the winter, if the house ran east and west.

About Shading.

The matter of shading is an important one. With a small collection, in a small greenhouse, lath frames could

ORDONEZ BROS., - Madison, N. J.

be made about the size of hot-bed sash, or just large enough to reach from the ridge of the house to the eaves. The rough laths of the plasterers could be used, if strict economy is desired; otherwise, planed lumber would be more desirable, as it could be painted and be more sightly and durable. The laths should be spaced according to their width; there should be as much light as shadow. Laths wider than one and one-half inch should not be used. The frames should be merely laid on the glass but not fixed to the house, as they should be removed in the evening and on all dull days. During the early spring when such a shade would be too heavy, a temporary shade may be secured by spraying the glass with a lime wash to which a little salt has been added. This shading can be easily removed with a hose when the lath shading is to be used. No shade should be used in the full winter months. When cattleyas are extensively raised, the best shading is obtained by the use of large wooden shades fixed to the roof and made to work after the fashion of the Venetian blind, from the ridge of the house to the eaves. The slats in this should not meet. When closed there should be a space one-quarter of the width of the slat between each slat. The slats should be not more than two inches wide. Each slat should be attached to a wooden rod, which can be manipulated from the ground. This rod can be so regulated as to admit any degree of light required. In dull weather, the only light obstruction is the width of the slat, about one-quarter of an inch. This is a labor saving device and is far ahead of any shade which cannot be controlled, such as paint or whitewash. The Venetian blind can be made to order at any planing mill at moderate cost and, if properly cared for, painted and stored each winter, will last many years. This shade is also an insurance against hail.

Culture.

The failure of which so often attends the raising of cattleyas is nearly always due to ignorance of the conditions under which the plants grow in a state of nature. Every one knows that there is a wet and dry season in the tropics and many believe that the dry season is more rigorous than it really is. Although the rains cease, the condensing of the moisture in the humid atmosphere of the tropics results in a heavy dew which sustains

plant life during the resting season. This condition is quite different from that of a green house in the winter, where excessive firing dries up the atmospheric moisture and causes the pseudo-bulbs to shrivel and the plant to lose its vitality. The pseudo-bulbs should never be allowed to shrivel. Water should be given occasionally during the resting season and the plants should be syringed lightly on all bright days. The resting season of the cattleya begins after the flowering period, or after the growth is matured, at which time the temperature should be kept several degrees lower if possible. Retard the growth of the plants as much as possible and when the new growth appears at the base of the pseudo-bulbs, begin to water well and increase the temperature. As the new growths increase in length water should be given in increasing quantity but it is well to bear in mind that ten times as much water should be sprinkled over the benches and walks and under the stages, to create a moist atmosphere, as is given to the plants directly. Abundance of fresh air should be given but the plants should never be subjected to draughts.

(To be Continued)

NOTE—Potting fertilizers, enemies and a list of the best sorts for commercial culture will appear in the continuation of this paper in another issue.

COVER ILLUSTRATION.

Our cover illustration shows a characteristic view in Boston's park system, in which the preservation of sylvan beauty is made a chief feature and well explains the fame which this great system has attained as compared with public reservations of a more artificial character. The use of bridle paths, of which there are about eleven miles in the Boston parks, is rapidly increasing ever year, especially in the spring and fall. Sometimes they run parallel to the driveways and again they sweep through woodlands. The trail shown in the picture is the connecting link between the Arnold Arboretum and the Stony Brook Reservation in the Metropolitan Park System.

A SIXTY MILLION FLOWER SPIKE.

I went up to see Joseph Heacock the other day to get some palm growing hints from that expert. I got the usual also a bit or two about the palm family bordering on the wonderful. Here we think mostly of the palm as a lovely foliage plant and know little as to its full development in flower and fruit in its native soil. What would you say to a flower spike thirty or forty feet high, and estimated to contain sixty million blossoms? This, I am told, is well authenticated in the case of the Talipot Palm (*Corypha umbraculifera*). Can you imagine sixty millions of individual blossoms? I cannot. I can only hold up my hands like Dominic Sampson and say: "Prodigious!" I am also assured that although some of the seeds of palms are as small as a pea, others, like *Lodoicea sechellanum*, often weigh as much as forty pounds each. The average American seedsman would not have much trouble in getting 98 per cent purity in a cargo of *Lodoicea*. Of course these wonders of the palm world, and many others well known to botanists, are never seen with us where the palm is used only when small and for decorative purposes. In this connection its popularity is increasing yearly and another distinctive feature is the larger production of home-grown stock in the United States. The American growers, conspicuous among whom may be mentioned Heacock and Dreer, have far less dependence now on the European experts, and grow from seeds just as well, if not better, than the old-established growers on the other side. The most popular varieties at present are *Kentia Belmoreana* and *Forsteriana* (*Howea* botanically), *Areca lutescens* (*Chrysalidocarpus*), *Cocos Weddelliana*, *Livistona Chiensis*, *Caryota urens*, *Phoenix rupicola* and *P. canariensis*, and *Scaevortia elegans*. Mr. Heacock confines himself mostly to the first four.

The kentias are by far the most popular and satisfactory commercial varieties. The seeds are imported from Lord Howe's Island by way of Australia.

SPRING BULB BEDDING AT THE AGRICULTURAL DEPARTMENT, WASHINGTON, D. C.

Circular bed of Tulips; centre, *Proserpine*; inner row, *Rose Gris de Lin*; outer row, *Belle Alliance*.

They are sown broadcast on their arrival, on a side bench in light soil covering to a depth of one inch. With liberal watering and a bottom heat of about 80 per cent most of the seeds will come up in two months, if the vitality is good. When the first leaf is developed the seedlings are planted in small pots and in about four months are usually large enough for a shift into 3 inch. From this stage on a night temperature of 60 degrees is found to be most satisfactory. The soil used is a light loam one-fourth peat and a sparing amount of fertilizer.

A similar process is followed with the seeds of *Areca lutescens* but they are allowed to remain in the seed bench until two or three leaves are formed. This variety is even more graceful and beautiful than the Kentias, but does not stand severe conditions as well. In the south the demand for it is far

better than in the north, the mild climate there being much in its favor.

The seeds of *Cocos Weddelliana* come from Brazil. These are about 1-2 an inch in diameter, and are usually sown on benches, but Mr. Heacock prefers to plant one seed to a pot as it obviates shifting, and is safer—as a critical time in *cocos* culture is the first shift. As the *cocos* is used when very small for fern dishes and other table decorations, millions of them are consumed every year. The present is the best time for shifting most palms so as to get the advantage of the summer growth—root action being dormant from November to April—and growers are now busy re-potting.

Mr. Heacock is building one new Lord & Burnham house, 20x67, and is throwing 15 detached houses into one connected range. Two of the large long-and-short-span houses will be altered into even-span, taking in the small side houses and making a fine range 280x90. A house will be devoted to the new bright pink seedling carnation (No. 100) the coming season. The other chief item grown here is American Beauty roses; also Richmonds and Killarneys in smaller quantities and cypripediums and cattleyas. As an example of the life of an ordinary greenhouse, Mr. Heacock pointed to one rose house built twenty years ago and good for quite a number of years yet. Two new sets of posts in that time; first chestnut, but they soon rotted, then locust and they soon went also. The story was told here of the old florist who swore by locust and claimed that it would last for ever, and of the endorsement of the dutiful son, "Yes, sir, that's a fact; and we can prove it, for the posts have been renewed twice in the past ten years." Now it's cedar posts, and they are as good as new, and the best material so far tried.

In Mr. Heacock's practice a chief secret of success is abundance of water above and below. Insecticides are almost unknown here.

HYDROCYANIC GAS FOR WHITE FLY.

Editor of HORTICULTURE:—

My greenhouse is very badly infested with white fly and I would like to get rid of them before bedding out in the garden.

Can you through the medium of your reliable paper give me the formula for and instructions in the use of hydrocyanic gas for the extermination of this pest?

Canada.

W. T.

In answer to the above query we copy the following directions from Bulletin No. 123 of the Massachusetts Agricultural Experiment Station:

HYDROCYANIC ACID.

For Nursery Stock.

Potassic cyanid (98 or 99 per cent.). Sulfuric acid (1.83 sp. gr. commercial).

Water.

Multiply the number of cubic feet to be fumigated, by .2 or .25, giving the number of grams of cyanid needed for the house or box; divide the answer by 28.35, giving the weight of the cyanid in ounces. Take twice as many fluid ounces of acid and four times as many fluid ounces of water as was taken in ounces by weight of the cyanid. Mix the water and acid in an earthen or granite-ware jar, then by loose bag and string drop in the cyanid after tightly closing the place to be fumigated. Leave close 40 minutes, then open from the outside and air for at least ten minutes before entering.

White Fly in Greenhouse.

Fumigate as for Nursery Stock above, No. 25, except that instead of using .2 or .25 gram of cyanid per cubic foot, use .007 to .01 gram according to how tight the house is. Use the corresponding proportions of sulfuric acid and water, fumigate at night for three hours, and then ventilate. Repeat the fumigation two weeks later and a third time two weeks later. This treatment must be used with caution, as tender plants may under exceptional conditions be somewhat injured.

GREENHOUSES BUILDING OR CONTEMPLATED.

Melrose, Calif.—J. Groves, carnation house.

Geneseo, N. Y.—Charles Clapper, addition.

Sistersville, W. Va.—E. Huston & Son, one house.

Philadelphia, Pa.—C. Eisele, range of plant houses.

Elmhurst, Calif.—Hutchings & James, one house.

Victoria, B. C.—Fairview Greenhouses, two houses.

Fairfield, Conn.—N. S. Goulding, carnation house, 20x55.

Coffeyville, Kan.—Forest Park Floral Co., range of houses.

Glen St. Mary, Fla.—G. L. Taber, packing house, 70x116.

The park commissioner of Trenton, N. J., will receive sealed proposals for erecting a greenhouse at Cadwallader Park until June 5, 1908. Full particulars can be obtained by addressing the Board of Park Commissioners at the Mansion House.

SPRING PLANT TRADE IN CHICAGO.

After an almost unprecedented spell of rainy weather, Chicago is suddenly subjected to midsummer heat. The effect on the wholesale plant market has been little less than marvelous. One of the largest of the Chicago growers says there has probably been more trade in bedding plants crowded into the past few days than ever before in so short a time. Notwithstanding the fact that the late Easter and the long and unusual dark and rainy spell has had a tendency to weaken and retard trade, if the hot weather continues we will have a record breaker in the sale of bedding plants for Memorial Day. There seems to be nothing new in bedding stock but the old standby in geraniums, verbenas, pansies, etc., are holding their own and finding ready purchasers. Immense as the stocks of some of the Chicago growers has been it was pretty well sold out several days before Decoration Day.

In last week's issue of HORTICULTURE, page 698, we located the A. E. Kunderd Gladiolus Gardens at Kendallville, Ind. We should have said Fort Wayne.

Massachusetts has recently appropriated \$34,000 for a range of greenhouses of modern type and attached instruction building for use of the floricultural department of the agricultural college at Amherst.

Seed Trade

L. H. Fitch has purchased a large tract of land in the town of Columbus, O.

Henry Nungesser of New York City returned last week from his 15th voyage to Europe.

The doctor, Outerbridge of Sunningdale, Bermuda, has been a visitor in Boston the past week.

F. W. Wood & Sons, Richmond, Va., have purchased a large tract of land near Milton for a seed farm.

Hogg & Lytle, formerly at Port Hope, Ont., are now located at 413 Board of Trade Building, Toronto.

The Lohman Seed Co., Detroit, Mich., is now fully established in its new and convenient quarters. They report a largely increased counter trade.

L. P. Archias, of Archias Seed Store Corporation, and J. C. Archias with Batteldes Seed Co., Denver, will leave New York for a European trip on S. S. Aurifila, June 4.

John Fottler of Boston is home from the sanatorium after a dangerous illness. He is still very feeble but a full recovery is looked for within a few weeks.

F. W. Brungelhof, of J. M. Thoburn & Co., and Captain Burnett Landrath of the D. Landrath Seed Co., Bristol, Pa., are making a trip among the seed growers of the Pacific coast.

AMERICAN SEED TRADE ASSOCIATION.

The topics that will be discussed at the Convention at Detroit this year are of interest to all seedsmen.

There will be interesting reports from committees in regard to seed legislation both State and National.

Thousands of people annually pass through Detroit that do not know they have the right to a ten days' stop-over on their tickets without extra charge. This applies to all tickets to or from any point in the U. S. or Canada, provided same is within the final limit of said ticket. Passengers desiring this privilege will make application for same to conductor or train auditor, and latter will endorse coupon "Off at Detroit," date and sign same, and advise passengers that immediately upon arrival at Detroit the ticket must be deposited with the agent at the depot arrived at. The agent will furnish a receipt for ticket.

There will probably be very few rates offered to the Convention of the National Education Association at Cleveland, so any members wishing to attend the latter they can use the

upwards, without meals. Other hotels are near and eating houses numerous.

C. E. KENDEL, Sec'y.
Cleveland, O.

The program for the 26th annual convention has been issued in a neat little pocket pamphlet form. The meetings will be held on June 23, 24, 25, 1908, at the Hotel Pontchartrain Detroit, Mich.

NEWS NOTES.

Reginald Pratt and Frank Foss have started in the florist and nursery business at Wayne, Pa.

Denison, Tex., May 22.—The premium list for Denison's annual flower show and the catalogue will be ready for distribution soon. The show will be held under the auspices of the Denison Civic Improvement League, the catalogue will be a very neat booklet and the premium list will be large and attractive to amateur and professional florists. The ladies of the League are working enthusiastically in expectation of an even greater show than the splendid events of last year and the year before.

Robert S. and J. Frank Edgar, sons of the late W. W. Edgar, have formed a partnership, dated June 1, 1908, under the firm name of Edgar Brothers, and have acquired from the W. W. Edgar Company that portion of the property known as "The Farm," at Waverley, Mass. There are two fine new greenhouses comprising about 15,000 ft. of glass, and twenty-five acres of land, which will be devoted to the wholesale growing business. These two young men have had a thorough training under a strict father and are well equipped to make a success of their venture. Frank, who will attend to the selling department, has had a good experience in the Boston market. Robert has served as foreman in his father's business for two years. He had also two years' experience in plant growing in England and Belgium.

W. ELLIOTT & SONS
42 Vesey Near Church
NEW YORK, N. Y.

PUBLICATIONS RECEIVED.

Annual report of Philip C. Scanlan, Park Commissioner of the City of St. Louis. It appears from the details of this report that the administration of the various sections and departments is in every instance well within the limits of the several appropriations made for their maintenance. Economical and careful management is conspicuously evident in the itemized financial reports. The book is illustrated with a number of half-tone plates and a set of panoramic views of the site of the World's Fair before, during and after that memorable event.

"The Romance of the Reaper" has been received from the publishers, Doubleday, Page & Co. This book, by Herbert N. Casson, tells in a most absorbing way the story of the growth of the great agricultural machinery manufacturing industry in America and vividly portrays the tremendous industrial revolution and the emancipation of the agriculturist, which have been brought about by the introduction of American labor-saving agricultural inventions. To the average reader this remarkable story of amazing progress made and forecast of still greater progress yet to come will prove a veritable "eye opener" and he will, indeed, see things in a new light and be quite ready to admit, with the gifted author, that "the harvester is the best barometer of civilization."

VEGETABLE PLANTS

- CABBAGE** Wakefield, L. I. Second Early, Early Flat Dutch, Early Summer, Wimingstadt, and other late var. at \$1.00 per 1000, \$8.50 per 10,000.

Of Interest to Retail Florists

A DISTURBING PROBLEM.

It is unfortunate that the relationship of wholesale market to retailer in affairs of trade is of the unhappy nature that seems to exist in our great metropolis. Where the utmost harmony should prevail one finds much discontent and mistrust.

Not without just causes however, has the retailer been forced to complain of the burdensome handicap placed upon him. In all branches of trade it is the recognized right of a man to sell for the highest price obtainable, while a buyer is naturally desirous of purchasing at the lowest possible rates, but where goods are consigned as is the case with flowers, the consignee, whose sole profits are presumed to be his commissions, should in all fairness try to protect those of his daily patrons who are forced to pay the highest and not infrequently prohibitive prices. Men who have been loyal to the wholesaler, feel that discrimination has been exercised against them in the disposition of surplus stock to the street vender. While not presuming to advise as to the best method for disposing of unsold flowers, it seems hardly fair that the retailer be brought into direct competition with the street Arabs who peddle their wares for less than half the wholesale rates which the retailer is obliged to pay.

It may be claimed that there is no such thing as competition between shop-keepers and street peddlers. Let such a mind be disabused as speedily as possible. It would be refreshing to meet a retail florist who is not brought into daily contact with some customer who informs him that flowers equally good as those he may offer could be purchased in the streets for less than half the price he will ask. Is not this the natural outcome of a reckless output of overstock? Remonstrance availeth naught, for the wholesaler is ever ready with the question, "What are we to do with our surplus stock?"

Were flowers necessary for the preservation of human life the natural reply would be to sell for any price at all and be of service to those who are unable to afford better, but, of all luxuries, flowers can be most readily dispensed with; then why make them so exceedingly common as is found to be the case where they are peddled on street corners by most repulsive urchins at such ridiculously low prices as to fairly sicken passers by with the spectacle of too much bloom and too little decency?

Truly "the prize is light when too easily won," and as flowers are, or should be prizes, the adage holds well in their case. Why should not a minimum price be placed on all unsold stock thus giving the retailer a fair chance and forcing the street peddler to be a competitor on something like even terms, even though he be a shop within himself and without expense, save a 50c. license?

Under existing conditions a number of peddlers may band themselves together and purchase the entire un-

sold stock of a wholesale house at almost any price they may be pleased to offer. A retailer cannot obtain a fractional part of the same stock at these rates. Surely, no grower will willingly accept compensation for his product based upon returns from the sale of surplus material to street peddlers. Would it not be well then for him to suggest to his consignee the wisdom of disposing of his (the grower's) surplus stock at a price commensurate with the cost of production and without favor to any particular class?

To sum up the matter the grower is in truth the one to whom the retail shopkeeper looks for a remedy from this growing evil. Let him remember that the prices paid by the retail shopkeeper represent the profits with which he, the grower, appears to be satisfied, and not from the proceeds of the overplus sold at much less than the cost of production.

W. H. LONG.

New York City.

NEW RETAIL FLOWER STORES.

- J. J. Soper, Rockford, Ill.

PERSONAL.

C. E. Newton has taken a position with J. W. Beal at Hanover, Mass.

G. L. Taber, Glen St. Mary, Fla., is making a tour of the northern shore resorts.

Visitors in Boston: Theodore Outerbridge, Sunnyslads, Bermuda; Julius Roehrs, Jr., Rutherford, N. J.

George Smith, So. Framingham, Mass., will assume the duties of foreman for A. Mackay, Saxonville, Mass., about July 1.

Jackson Dawson, who has been quite sick for two weeks, is now sufficiently recovered so that his daughter Laura and son Walter think it safe to sail for England in a few days.

The friends of Charles L. Allen, the dean of Long Island horticulturists, are to celebrate his eightieth birthday at his residence at Queens, on June 13. Mr. Allen will read a paper on this occasion.

Announcement is made of the engagement of Miss Minnie M. Dawson, eldest daughter of Jackson Dawson, Arnold Arboretum, to Harold Hill Blossom of Newton Centre, Mass. The wedding will take place next fall.

NEWS NOTES.

The artist who sometime ago defrauded several Detroit florists by ordering floral designs and paying for them with bogus checks has been sentenced to imprisonment for a term of four years. He tried on the judge the scheme of arousing sympathy by shedding tears but the court was unsympathetic.

H. R. Hughes, the clever advertising florist of Chicago, is sending out a neat little folder entitled, "A Flower for Memory's Sake." It is a plea for a still greater floral observance of Memorial Day. A brief history of the beginning of the custom is given and the advertising end is cared for by the reproduction in picture of Memorial Day window displays by Mr. Hughes.

FLOWER MARKET REPORTS

OBITUARY.

Mrs. Thomas Young.

Mrs. Thomas Young, who has been in failing health for some weeks, died at Clifton, N. J., on Friday, May 22, aged 81 years. The funeral was held on Sunday the 24th inst.

George McRae.

George McRae, a native of Scotland, who came to this country eight years ago, and has conducted a florist business at Cheswick, Pa., for the past six years, died on May 16, aged 68 years.

F. B. Forbes.

Francis B. Forbes, of Boston, died suddenly at his home, 114 Commonwealth avenue, on May 21. Mr. Forbes was born in New York in 1819. While living in China as an attache of the American legation he became interested in botany, and his work on the flora of the country, one of the most complete published, secured for him election as a fellow of the Linnean society of London, and a collection of the flora he made is now in the British museum.

MEMORIAL DAY.

By the flow of the inland river,
Whence the fleets of Iron have fled,
Where the blades of the grave grass
quiver,

Asleep are the ranks of the dead;
Under the sod and the dew,
Waiting the judgment day;
Under the one, the blue,
Under the other, the gray.

These in the robings of glory,
Those in the gloom of defeat,
All with the battle blood gory,
In the dusk of eternity meet;
Under the sod and the dew,
Waiting the judgment day;
Under the laurel, the blue,
Under the willow, the gray.

From the silence of sorrowful hours
The desolate mourners go,
Lovingly laden with flowers
Alike for the friend and the foe;
Under the sod and the dew,
Waiting the judgment day;
Under the roses, the blue,
Under the lilies, the gray.
—Verses from "The Blue and the Gray,"
by Francis Miles Finch.

BOSTON

This market, largely owing to the vagaries of the weather, finds itself almost swamped with material for Memorial Day demands. Carnations—the most essential flowers for the bouquet work and other decorative needs of the holiday—are very plentiful but of very inferior quality as a rule. There was a disposition on the part of the carnation growers, as per custom, to hold back their cut in anticipation of higher prices, but they were caught napping by the weather boss, and the stock so carefully hoarded in cellars and sundry secluded caverns without the attention of the ice man, came out in awful condition after imprisonment during Tuesday and Wednesday nights when the versatile thermometer recorded anywhere from 70 to 85 degrees. The result is an enormous load of half decayed stock in market which will prove the curse of the wholesale dealer and the cross of the retailer who gets it. We are sorry for all.

CHICAGO

A very hopeful feeling prevails regarding the outlook for Memorial Day trade. The stock certainly was never better for the time of the year, notwithstanding the unpropitious weather. Carnations are fine, roses in good shape, and peonies, snow balls, baby gladioli and pansies help out with the outdoor blooms. Unlike the feeling that prevailed before Easter, there seems to be no doubt but that the Memorial holiday would see all good flowers sell rapidly and many florists will probably wish their stock larger.

NEW YORK

The story of the wholesale market here this week is one of unprecedented inactivity and surplus stock. On all lines the story is the same and at present writing there is no promise of salvation through Memorial Day demands. In our price quotation columns we reproduce last week's figures but growers may find, in the final reporting, even lower rates prevailing. Cooler weather and shortened supply may, however, help in the adjustment of values for the latter half of the week.

PHILADELPHIA

There has been but little change in market conditions but more stock is coming in

which makes conditions appear not so good. Prospects are very fair for Memorial Day. Local peonies are in quantity (25th) with plenty more coming during the next few days. Fragrans, Andre Lauris, Rubra Triumphans, Festiva Maxima, and several others are plentiful. The peony men are much more fortunate this year than last when they were too late for memorial week. American Beauty roses in large supply, good quality, excellent demand for the season. Others medium quality, demand fair. Carnations—prices weaker and quality waning—demand was good towards the end of last week. Cattleyas are in larger supply with demand normal. Lilies much scarcer but enough for the demand. Lily of the valley is moving better and prices hold firm. The June wedding season which is now almost on us will have a good effect on this crop. The recent muggy weather had a bad effect on sweet peas. The gardenia market is full of the southern cut and prices are away down; but quality all right. Outside stock of all kinds is in large supply and not moving very briskly.

WASHINGTON

There is a perfect glut of peonies and sweet peas on the market now, but it is to be hoped that the 30th of May will relieve the pressure. Pond lilies are coming in in large quantities and of fine quality. This is one of the few crops that neither an abundance of rain or a drought affects. The outdoor roses have been injured to a great extent by the recent rains and mildew is again attacking the Rambler roses. Prices of carnations and all house-grown stuff have gone tumbling down and after this month they will be hard to dispose of at any price.

Detroit reports an abundance of outdoor flowers. Gladiolus America is offered in beautiful large spikes which find a ready sale at \$4 per dozen.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$12.50.

Expressions From Men Who Know**Greenhouses and Residence Heated by One Kroeschell Boiler**

G. Pasler, Buffalo, writes:

"Had different kinds of cast iron boilers. I am assured that I can save about one-third fuel with your boiler. I started firing October 10th and the fire never went out up to this time, May 13, 1907. This boiler heats both my dwelling and greenhouses and gives the best of satisfaction. My dwelling is about 40 feet from the boiler. Can recommend your boiler to anybody. It is the only greenhouse boiler."

Wouldn't Give the Kroeschell Boiler for a Dozen of the Others

Chas. W. Unglaub, Springfield, O., writes:

"I had a cast iron sectional boiler before I got yours, would not give yours for a dozen of the others. Your boiler is the **quickest heating boiler I ever saw**. I hardly ever have the damper over half open and the draft shut most of the time. I wish I had gotten it four years ago, when I got the sectional boiler. I would be ahead now. In the four years I had to buy a new section and four heads that had cracked, and I had to be right with the cast iron boiler, and I would have to fire every twenty or thirty minutes. **It took more coal than your boiler**. The cast iron boiler took much more attention and more coal and would be leaking half the winter. I want no more cast iron sectional boilers."

KROESCHELL BROS. CO., 35 ERIE ST., CHICAGO

The ELECTRIC CIRCULATOR

Is master of the situation.

It **MAKES** the water circulate.

It ensures uniform temperature.

Its work is positive regardless of weather.

It never gets out of order.

It saves coal.

It is serviceable in old houses.

It is helpful in new houses.

Its value has been fully demonstrated.

Its economy is conceded.

Lower values on greenhouse products make necessary lower running expenses. Write to us today and we will send you full information as to what the Circulator can do for you, and what it will cost.

THE CASTLE COMPANY*Heating Engineers*

170 Summer St., Boston, Mass.

PATENT APPLIED FOR

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

The Advance Ventilating Apparatus

All we need, all we ask is a trial in order to convince you that we have a high grade, easily operated ventilating apparatus, the best on the market and this too at reasonable prices and profits. Get our free estimates and printed matter.

READ! READ! READ!

The Magazine Feed Does It

The Water-Jacketed Magazine Feed of the "Spencer" Heater holds coal in reserve and feeds it as needed so that the Heater requires attention only once a day in ordinary weather, or twice in severe. The "Spencer" has the only Water-Jacketed Feed.

"Spencer" grates are raised in the centre, having same pitch at which coal comes from magazine, giving an even thickness of coal over the grate, causing the fire to burn evenly and the coal to slide from magazine as required.

It will pay you to discard your old heater, and begin **Saving Money** with a "Spencer." Write for catalogue, also ask for our Greenhouse Catalogue "The House of Greatest Sunlight."

WEATHERED COMPANY

P. O. Address Box 789, NEW YORK

DRAUGHTS AND TEMPERATURE CONTROL IN WIDE HOUSES

NOT that there is any room for argument, but that argument still goes on: So when we saw in a recent issue of HORTICULTURE, Mr. Alexander Montgomery's expression over his signature, we to'd our Ad. man to print it again some time, because it struck the nail so square on the head. Here it is:

"If a house 40 feet wide and 700 feet long may be considered large, we can say, as far as our experience goes, that the fears of our critics are not well founded. In this structure the temperature and ventilation, both day and night, are under more perfect control than any other house on the place, and we are firmly convinced that, in this respect at least, it is very much superior to the eight small houses which it would require to cover the same amount of ground."

Our Section Iron Frame circular shows a 40 feet house along with several others. Send for this circular.

WE MAKE EVERY PART OF A GREENHOUSE BUT THE GLASS. WE SELL ANY PART.

Notes from the Arnold Arboretum

During the next weeks the Rhododendrons will be in full bloom and the large group on Hemlock Hill will then be the most beautiful spot in the Arboretum. This group is admirably situated with its background of sombre Hemlock Spruces which not only afford a good shelter, but also set off effectively the rich colors of the flowering Rhododendrons. Besides those mentioned in the issue of May 23, the earliest of the Catawbiense hybrids have opened their flowers: these are *Lady Armstrong* with pink lilac flowers paler in the centre, *Atrosanguineum*, rich blood red, *Prometheus*, deep crimson, *Morion*, carmine and *Coriaceum* with white flowers spotted greenish yellow, a low, free-flowering shrub. The last named is apparently no Catawbiense hybrid, but is so closely related to *Rhododendron caucasicum*, that it may be considered a variety of that species. Another Caucasian species is the beautiful *R. Smirnowii* with carmine pink flowers and very distinct foliage, whitish tomentose beneath; it has proved perfectly hardy, but appears to be more particular as to the situation than other Rhododendrons: it apparently prefers partial shade.

Of the Rhododendrons of the Azalea-group the Ghent hybrids are now very showy with their brilliant colors, varying from orange and yellow to white, pink and red, also *R. molle* with pink flowers and its hybrids. A beautiful native species is *Rhododendron canescens* with its pink, deliciously fragrant flowers; it is much finer than *R. nudiflorum* with which it has been often confounded and which has paler pinkish white flowers.

Another noteworthy member of the Ericaceous family now in bloom is *Enkianthus campanulatus*, a slender shrub with nodding corymbs of rather small bell-shaped flowers whitish suffused with pink and marked conspicuously with red veins; it is not a very showy shrub, but very attractive on account of the peculiar coloring of the flowers. In autumn the foliage turns beautifully red. *Enkianthus japonicus* has white flowers and is a lower shrub of less ornamental value.

In the last issue *Lonicera Korolkovii* was inadvertently omitted from the enumeration of the Honeysuckles; it is certainly one of the finest species bearing light pink flowers in great profusion; the whole shrub has on account of its slender branches and small grayish green foliage a very light and airy appearance enhanced by the flowers being borne on slender stalks well above the foliage. It is perfectly hardy and much to be recommended.

The earliest of all Diervillas the *Diervilla praecox* mentioned in the issue of May 23 has given rise to early flowering hybrids with showier flowers; one of them is *Graecus* with bluish flowers and another *Conquerant* with carmine flowers.

Deutzia Lemoinei, one of the most beautiful Deutzias is now well known and appreciated, but still prettier are its hybrids with *D. discolor purpurascens*, which have pinkish flowers at least in bud; to this group, designated as *D. myriantha*, belong the varieties *Boule rose* and *Fleur de Pommier*.

Viburnum Sargentii may be considered but little dif-

ferent from the common Highbush Cranberry, but in the flowering state it is certainly prettier on account of the more profusely produced flower clusters with sterile flowers of a purer white, their color enhanced by the darker hue of the central fertile flowers caused by the purple anthers, while the flowers of *V. Opulus* have a yellowish tinge and yellow anthers; besides *V. Sargentii* differs in the more compact habit and the darker and firmer foliage. Unfortunately it lacks the most ornamental feature of *V. Opulus*, the large clusters of scarlet fruits, which are produced but sparingly in *V. Sargentii*. A snowball form of this species which may be looked for in time would be superior to the common Snowball which is much troubled with aphids and therefore not so much planted as it used to be. Another handsome Asiatic species is *V. Wrightii* with rather large bright green foliage and conspicuous clusters of white flowers followed by scarlet fruits in autumn. The native *V. pubescens* is now very attractive covered all over with white flower clusters; it is a compact shrub rarely exceeding five feet in height and turning deep purple in fall. For larger shrubberies *V. Lentago* is a very desirable shrub, it is now very handsome with its numerous clusters of yellowish white flowers.

Many species of *Crataegus* are now in bloom. The large collection of American Hawthorns planted on Peter's Hill, now numbering about five hundred different species, will in time afford a splendid opportunity to find out by actual comparison the ornamental qualities of the different species and to make a selection of the most desirable. Though the Hawthorns show in their appearance a comparative uniformity, they vary greatly in habit, spinosity, time of flowering, color of fruits and their persistency on the tree. The earliest as *Crataegus Arnoldiana*, *C. arkansana*, *C. coccineoides* and the European *C. nigra* flowered about a fortnight ago, while *C. nitida* with handsome lustrous foliage, the graceful *C. aprica* and *C. apifolia* and many others are now in bloom. Of foreign species may be mentioned besides the well known varieties of *C. Oryanthia* the Siberian *C. pinnatifida* to be recommended particularly for its handsome deeply cut foliage, and the large red fruits in autumn.

Alfred Rehder

British Horticulture

A USEFUL REPORT

For some years past valuable experimental work has been carried on through the generosity of the Duke of Bedford at his fruit farm in Woburn, Bedfordshire. The Duke, in conjunction with Mr. Spencer V. Pickering, F. R. S., has lately issued the eighth report, detailing the results of the experiments with insecticides and fungicides. It is explained that the aim has been to substitute as far as possible exact quantitative measurements for those more crude and unsatisfactory methods usually adopted, in which the impression produced on the mind of the observer is the sole standard by which the success or failure of an insecticide is gauged. The principle adopted has been to ascertain what is the action of an insecticide when it is applied under the simplest and most perfect conditions possible, as in the laboratory, and then to ascertain the results when it is

applied in the plantation under ordinary conditions of practice. Besides investigations into the effect of certain insecticides, the report contains an account of an examination of the nature of the substances constituting some of these insecticides, which, in the case of emulsion has resulted in the introduction of a class of emulsifiers which may be substituted with great advantage for soap and such like substances, especially in cases where soap causes much trouble and inconvenience; whilst an investigation into the chemistry of Bordeaux mixture has resulted in showing how the cost of that substance may be reduced by three-fifths without in any way diminishing its effectiveness.

GARDENERS' BENEVOLENCE

A noble work has been accomplished amongst British gardeners in the various organizations on benevolent lines. The efforts of the working gardeners in subscribing funds for philanthropic purposes have been supplemented by the liberality of the wealthy owners of estates. The Royal Gardeners' Orphan Fund, which is one of the leading charities, has just celebrated its 21st birthday. At the festival dinner the Duke of Bedford, the owner of Covent Garden market, presided, and subscribed £250 to the funds. The total received in connection with the festival was £1,385. The fund is at present supporting 116 orphans, and last year £100 was distributed in excess of any previous year. In celebration of the 21st anniversary, Mr. Edward Sherwood, the treasurer, has in conjunction with his father and brother, decided to contribute a sum of £200 to provide a special section. The president, at the festival, eulogized the objects of the charity. No darker shadow, the Duke said, could hang over a man than the knowledge that he might at his death leave children for whom there was no provision. It was customary to regard the children of gardeners as encumbrances, simply because they did not tend to the convenience of the employer, but it was wrong to penalize a man because he was a husband and father. It was unwise from a national point of view to do anything that was calculated to encourage a low birth-rate. He explained that the cost of management of the fund is fully met by the income from the invested capital, all the revenue arising from the subscriptions being directly available for relief purposes. Most of the leading nurserymen are found amongst the society's supporters.

CARNATION CULTURE

Some interesting experiments have been carried out at Messrs. Hugh Low & Co.'s nurseries. Mr. Montagu C. Allwood reports in planting out perpetual-flowering carnations for summer blooming in the open. "We carried out rather extensive experiments in this direction," Mr. Allwood states, "and found that plants put out in early May produced an abundance of flowers during the summer, and were much more satisfactory than the ordinary border carnation. It is no small advantage in being able to plant out carnations in May for summer flowering, because with the ordinary border carnation autumn or very early spring planting has to be done to ensure summer bloom. The best class of plant

for summer flowering is that from a 5-inch pot, with from eight to ten growths, that which has produced an early winter crop of bloom or which has been wintered in a cold frame giving similar results. Early-rooted cuttings in 3-inch pots with four or five growths also give quite good results. During the last winter we had quite a large collection of perpetual-flowering carnations planted out in the open along with ordinary border varieties, and hardly a plant has succumbed to the severity of the season, and are now making good growth for flowering again. In an absolutely cold frame we wintered several thousands of perpetual-flowering carnations in 5-inch pots, and these withstood 15 degrees of frost and scarcely a plant has died." Mr. Allwood is an active member of the Perpetual Flowering Carnation Society, and the author of a valuable work on carnation culture.

W. H. Adsett.

Wood Preservation for Horticulturists

During the coming year the government will extend its experiments in wood preservation to cover an entirely new field—the work of treating greenhouse timbers.

Decay takes place rapidly under the conditions of high humidity always found in greenhouses and horticultural buildings. The timber at present employed in the construction of such buildings consists for the most part of the naturally durable and relatively expensive kinds, such as select cypress and white pine. By a preservation treatment other cheaper and less durable species can probably be successfully substituted for them, and this can be done at a low cost.

In the treatment of greenhouse timbers several problems must be solved. For instance, it is desirable that the wood used in greenhouse construction be painted white in order that it will reflect as much light as possible. Consequently, a preservation must be used which will allow the treated timbers to hold a coat of white paint. Again, no preservative can be used which will in any degree affect the growing plants. It is probable, however, that these difficulties can be overcome, and the completion of the investigation will be watched with interest.

The investigations in wood preservation by the use of creosote, which is nothing more than the dead oil of coal tar and of zinc chloride, is considered of such importance by the government that one branch of a bureau in the United States Department of Agriculture—the "Office of Wood Preservation" in the Forest Service—is given over entirely to the work of experiments in co-operation with railroad companies, mining corporations and individuals who desire to prolong the life of the timber which they use. Advice and practical assistance are furnished all who request it of the Forester at Washington.

The Misuse of Fertilizers and Manures in the Greenhouse

The article in HORTICULTURE of April 25, 1908, entitled "Soluble Fertilizers" was of interest to us, and since our experiments and observations have been for a number of years along this line we could not refrain from offering a few suggestions.

The statement attributed to Dr. Galloway that "fully as good results could be secured by the use of good composts alone as where chemical manures were applied" is in harmony with the views and practices of market gardeners who have grown lettuce in the same soil for many years without using fertilizers. Most market gardeners would not accept commercial fertilizers for greenhouse use if offered to them free of cost, and in this they are wise as more harm than good results from the use of fertilizers in a greenhouse as ordinarily applied. Not a single winter passes without our receiving at the Experiment Station inquiries from growers of greenhouse crops concerning certain peculiar diseases and abnormal growths with which they are unfamiliar, and which can be attributed to the injudicious use of fertilizers and manures, and it would seem that this type of injury is on the increase, for during the past winter we have received more complaints than ever before.

The effects of over-manuring on crops may be seen in many ways, as is evident from the pathological symptoms displayed; in short it may be stated that the stimulating effects of plant foods are specific as well as manifold. The writer has had occasion to examine a number of plants with symptoms characteristic of the misuse of fertilizers. We have also applied fertilizers at various times to greenhouse crops with little or no benefit, and as a matter of fact greenhouse soils, when properly prepared, contain a sufficient amount of plant food to carry the crop through. There are undoubtedly instances of fertilizers being applied to bring about certain definite reactions on the part of the plant which would be desirable, but there are many other cases where such reactions would prove undesirable, if not injurious. It is well known that rose-men who prepare their soil according to the standard formula and apply liquid manure throughout the season make a practice of changing the soil each year, and the question naturally arises, "Why do they change the soil?" This question was asked a few years ago in one of the leading florists' journals but none of the replies were satisfactory. Our investigations have shown that the constant application of manure to soil already well supplied with available plant food renders it unfit for growing roses a second year. On the other hand, horse manure can be applied to lettuce soils every year in liberal quantities, and the longer such soils are used the better they are, showing that there is much difference between the nature of the manure and the amount applied, and there is a difference in the manurial requirements of the crop.

One of the commercial fertilizers which has caused more trouble than any other in greenhouses is nitrate of

soda, but its effects on different plants are by no means the same. In some plants it causes a rupturing of the tissue adjacent to the vascular bundles or it may cause a curling or crinkling of the leaf, and this often results from a distorted growth of the vascular bundles. These peculiar pathological conditions have been noticed on a number of different plants. In other cases it inhibits root absorption, while transpiration may be active, causing a wilting of the tender parts of the leaves which will eventually turn brown and die (top-burn, tip-burn, sun scorch, etc.).

A few years ago the writer described a trouble called leaf and stem curl caused by over manuring, and this trouble can easily be produced experimentally and is often seen in greenhouses. It may also be brought about by an excess of nitrate of soda and a too liberal use of hen, pig and cow manure. The use of fertilizers may also force the plants to such an extent that they are rendered susceptible to certain pathological organisms, and they occasionally throw all their energies into the formation of vines and leaves, to the exclusion of flowers and fruit. There is a marked difference in the susceptibility of different crops to feeding. According to our investigations, the cucumber appears to suffer the most from the misuse of fertilizers and manures, although a soil which has been fertilized to such an extent that it is unsuited to cucumbers will grow a good tomato crop.

The normal requirements of greenhouse plants as regards plant food is a subject in need of investigation, and is being studied at the present time by my colleague, Mr. Haskins, whose article entitled "Chemical Study of Some Greenhouse Soils" accompanies this. The writer has observed the effects of over manuring and the injudicious use of fertilizers on the lily, cyclamen, celery, tomato, lettuce, cucumber, soya bean, etc. There are innumerable instances which might be mentioned where abnormal food relations exist which cause various pathological conditions in the organism, but a discussion of these individual cases would require too much space. It is not our purpose to contend at the present time that commercial fertilizers cannot be used in a greenhouse on certain crops to advantage by the cautious and skilled grower, but we are led to believe from the large number of cases of the misuse of fertilizers and manures which are constantly being brought to our attention that it is better for greenhouse men to follow the advice given in Bulletin No. 123 of the Massachusetts Agricultural Experiment Station, namely:

"Unless one has an extended knowledge of soil fertility, it is best to avoid the use of all commercial fertilizers in greenhouse culture. Greenhouse soils are as a rule provided with so much plant food that the addition of fertilizers is not absolutely necessary, and the formulas given for outdoor crops cannot be followed. If it is desired to use fertilizers on greenhouse crops, consult station or other authorities familiar with the subject of soil fertility."

conception formerly prevalent as to the difficulties attending the cultivation of this class of plants are now pretty well dissipated and it is generally understood that any grower intelligent enough to master the cultivation of any one of the other leading flower staples can achieve equal success in orchid growing.

Memorial Day business this year seems to have met with some hard jolts, brought about mainly by the unprecedented supply of garden and greenhouse product in many sections of the country.

Never since the holiday was instituted has there been such an overwhelming profusion of shrub and herbaceous bloom, all concentrated at one time, and we can hardly look for a repetition of the experience for many years to come. There seems to have been no trouble with the popular demand and the various reports as received indicate the distribution of a vastly larger quantity of flowers than ever before on any similar occasion, but so enormous was the crop that clearing out was an impossible task. Thus it was unavoidable that large stocks should go to waste under the circumstances. On reading that there were some exceptions to the general condition of overstock the question naturally presents itself as to why these needy people were not promptly supplied from the overburdened markets elsewhere. "And echo answers, why!" That such varying conditions should exist in these days of telephones and rapid transit seems to point to the urgent necessity of a better understanding and a greater facility of distribution as well as a closer heed to obvious market conditions and requirements by those who so ruthlessly spend their time in cutting and their money in shipping to wholesale centres material for which there is no outlet.

The paper on co-operation between the different interests in the plant and flower trade, by Mr. Niessen, which we publish in this issue treats on the same theme covered by Mr. Palmer's recent dissertation, under the more comprehensive text of "The Art of Selling," before the Gardeners' and Florists' Club of Boston, but from the opposite standpoint. Our editorial on salesmanship in issue of May 23, following upon Mr. Palmer's address, has elicited a number of comments from various sources, all agreeing that the subject is a very live one but none presenting any serious argument or purporting to suggest any remedy for the unsatisfactory phases which the flower trade has assumed in certain large distributing centres. While it is undoubtedly true that the general business depression, supplemented by the very unusual behavior of weather and crops, has been largely responsible for the predicament in which many growers and dealers have found themselves this spring, yet we are convinced that the time has now come for a remodeling of business methods which were good enough for the florist trade of a generation ago but antiquated and entirely unsuited to the needs of today. No business man can afford to remain oblivious to the improvement in merchandising methods continuously going on all around him. This touches directly upon what is the weakest feature in the whole structure of commercial floriculture. That it is the most disturbing element is evident to every one. The matter is not one to be passed upon lightly or disposed of off-hand by dogmatic assertion and we venture to affirm that there is no question that can be taken up by the florists' clubs and societies and dispassionately discussed, which more directly concerns the welfare of their members than this great problem—the disposal of the product.

During the past few weeks announcements of expected arrival of large consignments of orchids from tropical regions have been given wide publicity through the medium of the trade press. Not many years since, any dealer who would have undertaken any enterprise of the character and magnitude represented in any one of these shipments would have been simply foolish. The change in the relationship of these noble flowers to commercial floriculture which has come about in so short a time is most remarkable. A new and lucrative specialty business has been developed and the variety of material at the disposal of the flower lover or the decorator has in consequence, been marvelously enriched. As we have before remarked, the erroneous

Floriculture enriched

AFTER ADJOURNMENT.

If I were in the retail florist business and desirous of increasing my patronage during this month of weddings, graduations, steamer departures and glee, my first move this June morning would be to send to Bayersdorfer & Co. for a sample lot of those new and special flower baskets lately received. They are beauties and are sure to make an impression.

"Horticulture, an extremely interesting, high-grade publication issued in Boston, Mass.," is the way our esteemed contemporary, the "Long Island Agronomist," expresses its opinion of us. We appreciate the compliment, all the more so because the Long Island Agronomist is a practical little sheet with a mission and every line of its solid eight pages has a business purpose.

We are pleased to know that our British friends, having opened their hearts to the "winter flowering" or "perpetual" carnation as a florists' flower, are now beginning to look upon it with favor as a summer-blooming subject for the garden. This is a use to which it has not seriously been put in this country. We might return the compliment by giving some attention to the English dwarf border carnations, which are well worthy of a place in our American flower gardens.

Our correspondents, at all times ready to write about the weather on the slightest provocation, have regaled us with some very breezy accounts of how badly the uncertain elements treated them on Memorial Day. After all, James Whitcomb Riley's sentiments on this time-honored topic are about as sensible as anything ever advanced on the subject:

"It ain't no use to grumble and complain,
It's just as cheap and easy to rejoice;
When God sorts out the weather and sends rain,
Why, rain's my choice."

Our life-long friend, Thomas F. Galvin, of "Lawson pink" fame, has with characteristic enterprise been entertaining the local newspaper reporters and they, in turn, have been regaling the public with interesting data of his recent trip to Europe. Here are a few:

"From time to time prizes are produced over there, and one of these I have just succeeded in capturing. I have made four voyages with this end in view, and consider the victory worthy of the extended campaign. This prize is a new variety of carnation which I expect will make as great a sensation as did the famous Lawson pink a few years ago. The new one is pea green or Easter lavender in color, very delicate and beautiful. I have an option on 500 of the plants and shall grow them for three or four months longer near London and then go over to complete arrangements for transplanting them in this country."

"The Lawson pink of a few years ago, which I managed for the owner, cost him \$20,000, and yet he netted \$20,000 on his speculation in that little flower. We sold 650,000 of the cuttings in all parts of the world; at one time the Khedive of Egypt ordered 10,000 of them. My new variety is bound to eclipse it and the expense of securing the right to grow it is very little less than the earlier wonder cost Mr. Lawson."

"On this trip Mr. Galvin visited Amsterdam, Brussels, Paris and London, and purchased a quantity of palms, orchids and bay trees. These require so much space that he must charter two steamships to bring his cargo over."

AN INTERESTING ANNIVERSARY.

On June 12, C. L. Allen, one of the grand old men of horticulture, will celebrate his eightieth birthday anniversary at his home in Floral Park, N. Y. In a letter from the young old gentleman whom we are proud to have known as a friend for over thirty years, he tells us that "there is considerable satisfaction in growing old beautifully as I feel I am doing. Pneumonia tried hard recently to get the best of me, but it was no use. My strength is returning and my general

C. L. ALLEN

health has not been better, if as good, in the last twenty-five years." On his birthday Mr. Allen will read to his friends a paper which he has prepared, entitled "At Eighty." That it will be profoundly interesting and entertaining nobody who knows C. L. Allen's literary ability will question. All who read this will, we are sure, join us in wishing our friend an uninterrupted continuance of the good physical health and mental vigor which he now enjoys, for many, many years to come. May the sunset of his busy life be long, cloudless and serene.

MILDEW ON KILLARNEY.

I shall be glad to back up my statement as to the benefit of propagating Killarney from outdoor grown stock if Mr. Lonsdale really wants to know. If he only seeks to indulge in a controversy so as to interest people in the journal which is his new love, there is nothing doing. The statement that Mr. Lonsdale never had any mildew on any kind of propagation, old or young, indoor or outdoor, does not strengthen his case any. Let him go around the flower markets of his own city (Philadelphia) and he will find plenty of it! I simply suggested a method of prevention which has been tried and found good by competent people and in so doing followed the highest ideals of horticultural journalism. I stand ready and willing to help Mr. Lonsdale or any other florist as to any useful knowledge that comes under my observation, provided they ask for same in good faith and respectfully. To ask for a cure for mildew when one has not got any mildew shows that Mr. Lonsdale is hard up for a theme. Go to—my dear fellow! I'm not a lion—I'm a lion-slayer like yourself. Try Birnie; he looks something like a beast with horns—brownish gray in the dark of the woods; but you can't mistake me—I'm right at your elbow.

G. C. WATSON.

GLORY BE!

For some time there has been no spice in our horticultural journalism. When we look back on the glorious old gladiatorial days of fifteen years ago and think of the raciness and enthusiasm prevalent then and compare it with recent times we are compelled to admit that we have gone through a flat and commonplace few years. But things are brightening up some. There's the Koehler-Brown glory in HORTICULTURE over the rhododendron, the Birnie-Lonsdale illumination on the carnation situation; a hint of a fine educational campaign on salesmanship; and various other interesting things looming up. Rudd and McGorm and Stewart and Welch and Carmody and Crowe and Marquisee and many more good swordsmen are still above the sod, and if the game is worth while, can be counted on for a manly battle with their true names emblazoned on their shields and not masquerading in the cowardly garb of anonymity. Greeks bearing gifts and Trojan horses—not in their line. Let us all give thanks.

G. C. W.

As soon as the rhododendrons and garden azaleas have shed their flowers the seed pods should be promptly picked off. The plants will look much better and the strength which would have been wasted on the seed pods will be diverted to the young growths for next year's flowering.

"Like good wine your paper improves with age."—With best wishes,

W. H. CLARK,
New York, N. Y., May 23, 1908.

Enclosed please find money order One Dollar in payment of enclosed subscription bill. I appreciate your paper very much and wish you success.

VICTOR JOHANSEN,

NEWS OF THE CLUBS AND SOCIETIES.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on Friday evening, May 29, with President Angus in the chair. Three new members were elected.

For this meeting Mr. J. W. Lindsay had offered prizes for the best exhibits of cut flowers from shrubs and hardy herbaceous plants. Two fine lots were exhibited by John Woodcock, gardener to General McAlpin, Ossining, and Alexander Maitland, gardener to Mr. Carroll Dunham, Irvington, which were won in the order named.

The annual free June exhibition will be held in Music Hall, Tarrytown, on the afternoon and evening of June 12th, and we hope that every member will try to make an exhibit of flowers or plants and help to make this show a success. Schedules for this, also for the November exhibition, are ready, and will be sent to all interested. Apply to Secretary E. W. Neubrand, Tarrytown, N. Y.

Subject and exhibits for the next meeting will be shrubs and hardy perennials. L. A. MARTIN, Cor. Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

At the next meeting of this club, which will be held on Tuesday evening, June 16, at 8 P. M., A. H. Kirkland, State Superintendent for Suppressing the Gypsy and Brown-tail Moths, will lecture on the various pests that menace shade trees. The lecture will be illustrated with stereopticon views. The new parasites and Japanese wasp, which have been imported to use in the warfare on the moths, will be shown and described.

AMERICAN CARNATION SOCIETY. Carnations Registered.

By Wa-no-ka Greenhouses, Barneveld, N. Y.—"Apple Blossom." Parentage, Enchantress on white seedling; color, white delicately blended pink; size of flower, average 3-4 inches through season; habit, rapid upright grower; all growth coming from the base, good producer and good keeper on long stiff stems.

By A. E. Boyce, Wellsville, N. Y.—Claribel Worth. Parentage Estelle and Maceo; color, scarlet crimson, very rich; size of flower, average 3-4 inches; at its best about Christmas. Good stems, non-bursting calyx, foliage rich blue; resistant to disease and insects.

ALBERT M. HERR.

Lancaster, Pa.

ST. LOUIS HORTICULTURAL SOCIETY.

Gentlemen:—

The St. Louis Horticultural Society wishes through these columns to express their appreciation and thanks to the various growers, wholesalers and retailers, for their liberal contribution of choice and fresh cut flowers donated to the "Floral Booth" at the Charity Carnival, held May 16, 1908.

Respectfully,

OTTO G. KOENIG, Sec'y.

RHODODENDRON EXHIBITION AT BOSTON.

The annual Rhododendron Exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Saturday and Sunday, June 6 and 7.

The season has been very favorable for rhododendrons and azaleas and it is expected that there will be a magnificent display of these flowers.

There will be also exhibits of orchids, wistaria, irises, tree peonies and other seasonable flowers as well as vegetables.

The exhibition, which is free to all, will be open Saturday from 12 to 6, and Sunday from 2 to 6 o'clock.

WM. P. RICH, Sec'y.

SALEM CHERRY FAIR.

The third annual meeting of the Salem Cherry Fair will be held at Salem, Oregon, July 9 and 10, 1908.

At the convention last July of the

Paris, France, June 1-15, International Rose Show.

Milwaukee, Wis., June 10-12, Convention of American Association of Nurserymen.

New York, N. Y., June 10, 11, American Rose Society and Horticultural Society of N. Y., rose show.

Glen Cove, N. Y., June 10, Nassau County Horticultural Society, exhibition.

Boston, Mass., June 13, Massachusetts Horticultural Society, peony show. June 20, 21, rose and strawberry show.

Pacific Coast Association of Nurserymen, a resolution was adopted saying that the Second Annual Salem Cherry Fair was the greatest and finest display of cherries known to history, and Salem was christened the "Cherry City of the World," by the association.

That Salem is entitled to the name will be admitted by everyone visiting the Cherry Fair this year, as it will be much larger and better than ever.

In addition to the cherries (for which a large number of silver cups are offered as premiums), there will be premiums for and displays of other fruits, as well as roses, sweet peas, Shasta daisies and other flowers. A large number of handsome diplomas will also be offered as premiums.

Cherry growers from all sections are urged to be present and bring fruit for exhibition. Premium list and rules will be furnished to any interested, and also published in the press. All fruit growers, nurserymen and florists are invited to be present. Those desiring to attend the Pacific Coast Association of Nurserymen can do so, as the two meetings are held early in July.

F. W. POWER.

Chairman Cherry Fair Committee.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The annual June show of this society was held on the 2d inst. The chief exhibits consisted of outdoor roses, peonies and hardy perennials. The date was rather early for roses but just right for peonies and the latter showed up by far the best. The heavy rains of Saturday and the hot weather preceding were against a very high standard of excellence in either. Pepper, Penfield and Lippincott ranked in the order named for the best collection of six H. P. roses for the Huey prizes. No entries appeared in the hybrid teas worthy, except two lots of Pepper and Lippincott, which were nothing extra. These, and two lots of H. P.'s were for the Bodine prizes. The Mitchell prize for outdoor roses went to Penfield.

There was a very good showing of peonies notwithstanding all drawbacks. In the Bodine prizes, honors were divided between Penfield and Paul, Griscom coming in for a share. The Dreer prize also fell to Griscom, with a finely grown lot, for which Thos. A. Archfield, the gardener, deserves honorable mention. The George C. Watson prize for the best eight Japanese varieties went to Paul, for a very creditable lot of well grown flowers.

The keenest competition of all came in the collection of hardy perennials, twelve species, for the Dreer prize. Newbold had the best exhibit from a horticultural and educational standpoint with twenty-six distinct species but the Paul lot with twelve species filled the schedule requirement and so carried off first honors because they were much more showy and in better bloom. Pepper's collection was also very fine.

Julius Roehrs Co. exhibited their new white *Cattleya Mossiae* (unnamed as yet) which is shown in cover illustration of this paper. This is a white form with a faint blue tinge on the lip. It is larger than any other white *Mossiae* and experts declare it to be an extraordinary specimen for color, size and floriferousness. The eight-inch pan shown had five leads, four with three flowers and one with one. This variety appeared in an importation of common *Mossiae*, the exhibit and another piece in the possession of Mr. Clement Moore (acquired from Roehrs by purchase) being all that is known to exist at the present time.

Samuel Batchelor, gardener to Mr. Clement B. Newbold, exhibited a fine lot of gloxinias. We have seldom seen quite so magnificent a collection. The members of the Florists' Club were given an opportunity to view these at their monthly gathering and were much impressed.

It has been found necessary to change the dates of the meeting of the American Peony Society one day later, making them June 19 and 20.

A. H. FEWKES, Sec'y.

Co-operation Between Wholesaler and Retailer in Times of Overproduction

A PAPER READ BEFORE THE FLORISTS' CLUB OF PHILADELPHIA BY ARTHUR A. NIESSEN.

The title of this paper is "Co-operation Between Wholesaler and Retailer in Time of Overproduction." Why it has been added to the title "In Time of Overproduction" is more than I can understand. If we cannot work hand in hand when the market is about evenly balanced between supply and demand, we certainly cannot expect to do so when the commission man is at the mercy of the retailer. We always have had, and will have, at certain times of the season, a glut of some sort. This does not only apply to our trade, but to every other line as well. In our line it is due to unavoidable overproduction; in other lines, probably due to an overestimated demand. I would like to ask the retailers present, "Are you doing anything, or are you making any effort whatever to relieve the market of its overproduction?" Beyond finding fault with the manner in which the commission man is trying to meet this serious problem the majority are doing nothing.

A Problem Worthy of a Genius.

How to find a market for this overproduction is a problem worthy of a genius. It has been our experience that, although we offer flowers to the retailer at what would seem ridiculously low prices, he will not buy any more than he positively needs. The thought how he could handle this stock, and in some way increase his sales, never enters the minds of the majority of them. I am quite sure, if the retailer were situated the same as the commission man during a glut, that if he had to take the stock regardless of having an immediate outlet for it, he would find way and means to make it profitable for him to handle it. Necessity is the mother of invention, and it is wonderful what we can do when we must.

Progress is Slow.

It is very evident that to a certain degree the conditions of the market during a glut could be improved upon by co-operation, but in that direction progress seems extremely slow. The feeling towards the commission man by many of the retailers is decidedly antagonistic. It is indeed surprising that by many retailers the commission man is considered a necessary evil whose sole reason for existence is to oppress the retailer by extorting exorbitant prices and imposing all sorts of hardships. These retailers will without hesitation make the statement, that they will favor the grower who peddles his stock every time. The commission man is called upon only during a scarcity to supply that which the grower could not possibly supply. Coming to the commission man under such conditions, and being asked a fair price for the goods wanted, he assails the commission man for the seemingly unjust treatment and classes him with the pirates and daylight robbers. Just as soon as we can overcome the feeling of the retailer, as described above, towards the commis-

sion man, we are one point closer to co-operation.

The Street Outlet Indispensable.

We cannot dispose of our surplus to the five and ten cent stores; there is only one outlet left to us, and that is to put the flowers on the street. The street fakir by most retailers is looked upon as a demoralizer of the flower business. The commission man is solely blamed for his existence, but let me tell you, that for many of the growers who peddle their own stock, their last stopping place is the curb. He will take anything to relieve the load on his arm and will sell his ware at a price so low that the buyer is pledged to secrecy. He is ashamed to have the price known. Can you imagine what conditions would be if the growers were depending entirely on their own efforts to dispose of their products? Some of the fakirs undoubtedly have what may be termed "nerve." The fakir will buy five thousand carnations that are almost asleep, take them on the sunny side of Market street, in a temperature of about 90, and take what he calls a chance. How many retailers at the same price would take the same chance? I do not wish to be misunderstood, that I am here to speak for the fakir. There is not a commission man who would not gladly dispense with him, if there were any possible way of doing so. With few exceptions they are not a desirable lot.

Retail Stores Are Simply Sample Stores.

When you see the street fairly flooded with flowers you should always bear in mind the fact that the commission man has offered the stock to you first, that he has exhausted all the known science of salesmanship to induce you to buy them. Many retailers will advance the argument, that if there were no flowers on the street they could sell double the stock they are using. That is the very thing they should do, buy it and keep it off the street. "Give us the same chances you give the street fakir," is another time-worn saying. Let any of the retailers try it, and the results will startle them. Let them start out some morning and ask the commission man, "what will you take for the shelf," and if you mean business the shelf is yours. The tendency today is just in the opposite direction. Many of the retail stores may justly be called sample stores. They do not carry any stock, the commission man is carrying it for them. The demands are sometimes startling. Ten minutes after the goods are ordered they are supposed to be delivered. The excellent service brought about by live competition is sadly misused. In that direction co-operation would do much to overcome existing unpleasant conditions.

Harmony Between Grower and Commission Man.

The commission man has, after years of resistent efforts, gained the confidence of the growers. They are work-

ing hand in hand; the grower will consult the commission man about his crops for a coming season, he seeks his advice, and the trade has benefitted greatly by this "mutual interest" feeling existing between the grower and commission man. That feeling does not prevail as much between that retailers and commission man as it should.

Exorbitant Retail Prices.

There is one feature which in my estimation curtails the sale of flowers, and that is, many of the retailers do not keep their prices consistent with the prevailing wholesale prices. Beauties bought at \$1.50 per dozen are sold at three and four times the purchased price. For illustration I will cite an instance of a grower who entered a retail store and priced his own mignonette on sale there, and he was informed \$5.00 per dozen was the price. He then wondered why he was getting only 6.00 per hundred for it. To overcome a glut the retailers should aim to make large sales and small profits, instead of small sales and large profits. The ultimate results would be the same as far as profit is concerned, although a larger quantity of flowers has reached the consumer. There is too vast a difference in the price of flowers from the grower to the public. We should aim to reduce the cost of handling the stock from the time it leaves the greenhouses until it reaches the public. It seems some of the retail stores located on the main thoroughfares could dispose of large quantities of flowers by offering them at a reduced price. This they could do by eliminating all such expenses as deliveries of sales less than a certain amount, and by doing a cash business. This need not apply to all their trade, only to special sales, which may be called bargain for a certain day or time. The advertisement of bargains by the department stores is almost infallible bait to the public.

An Experiment.

A department store in a small town was selling carnations at twenty-five cents per dozen on Fridays and Saturdays. A retailer in the same town thought of meeting this price, and bought several thousand carnations to be put on sale the same days the department stores were offering theirs. The retailer did this, not expecting to make a profit on the sales, but principally to meet the price of the department store. Making inquiry, he was offered carnations at \$10.00 per thousand and he felt that he was being favored, but to put it more correctly, he was doing the commission man a great favor in buying the carnations. Selling them at twenty-five cents per dozen he disposed of as many as five thousand on Saturday. It is needless to say that beyond his expectation it turned out to be a very profitable business for him. There are ways and means of selling large quantities of flowers, and surely our retailers are energetic and enterprising enough to find them without having someone in

another line of business to show them how.

An Unwise Policy.

Ninety per cent of the public are lovers of flowers, and sixty per cent of them do not buy them because their means will not allow it. Why not, during a glut when flowers are cheap and plentiful, cater to the great masses, and give them all an opportunity to enjoy the beauties of nature? That would cultivate a public taste for flowers. Many prospective buyers hesitate to enter your store because they have only a small sum to spend. It is indeed a fact that by some retailers the twenty-five cent customer is considered a nuisance. That is a very sad mistake. Many retailers hesitate to reduce the prices of flowers for fear that they could not get a better price when the glut is over. They claim that their customers cannot understand why the prices of flowers should vary. I am sure we all know why the price of strawberries varies, and we know it simply because the public man has been educated along those lines. Not many of us can afford them in January, but there is a time in the year when we can buy them, no matter how humble our circumstances may be. The same can be said about flowers: during a glut sell them at a price so that they may find their way in every home. But don't let the street fakir do it for you.

Special Sales.

Another feature which is good for the business is to run special sales. There is hardly a time in the year when some stock is not more plentiful than others, which can be bought cheap. Advertise. How many florists do it? Some of the small local papers would be a good advertising medium in certain sections. A "special sale" will bring the crowd, the people will get into the habit of frequenting your store, you are advertising your business. In my estimation the flower business today has reached such large proportions that the advancement of the trade can only be accompanied by catering to the great masses, and not so much to the few.

True Co-operation.

Co-operation properly applied is indeed a fine thing; in fact, it is only practical when both or all parties concerned derive a benefit from their combined efforts. The definition of the word "co-operation," according to Webster, is "to operate jointly to the same end." The end in this case is mutual benefit, and without that there is no co-operation. Through co-operation is brought about a combined effort, which is much greater than the individual effort. Everyone concerned derives from such a combination, not a share of its strength and benefits, but all its force and good. If, in striving to advance our own position, we aim to advance that of the trade as well, we have true co-operation.

A man who toils solely for his own personal gain, who must make every transaction pay, regardless of the means to arrive at the point, is a menace to the trade in general. If each one of us would do a little something to better existing conditions, and do it with the feeling that the advancement of our profession is depending on our own individual effort, prompted by an

unselfish interest, we would soon arrive at a better understanding, which would reap its own reward.

There is only one way that a man can help his trade, and that is by having faith in it and confidence in those engaged in the same line of business. It is a terrible thing when we get so that we find fault with everything and everybody. We all know of some men who do this. "There is not an honest man anywhere." That is all wrong. Ours is a good profession to the man who is trying to better it. If we all had our shoulders to the wheel, lifting with all our might, there would be no time to see who else is lifting. It is all depending on individual effort to produce one great force. I would advocate co-operation, not only during the time for an over-production, but for every day in the year.

OBITUARY.

George F. Chandler.

George Frederick Chandler of South Lancaster, Mass., died on Memorial

GEORGE F. CHANDLER.

Day, May 30, 1908, at the advanced age of eighty-six years. Mr. Chandler was engaged in the florist business at the same location ever since the year 1842. For the past twenty years his son, F. L. Chandler, has been associated with him and will continue the business. Mr. Chandler was an upright and amiable gentleman, companionable, unassuming and well liked by all with whom he came in contact.

NEWS NOTES.

Henry L. Drummer, Bath, N. Y., filed a petition in bankruptcy on May 25; liabilities, \$1,110.32; assets, \$500.

The Fricker greenhouse, Poughkeepsie, N. Y., was sold at foreclosure sale May 23 and bought in by Conrad Gindra, the mortgagee.

Reports from Indianapolis are to the effect that this will undoubtedly prove to be the greatest spring season on record. The plantmen have been doing a thriving business the past two weeks with prices about the same as previous seasons.

During Recess

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The N. Y. & N. J. Association of Plant Growers held a well attended meeting at the Hotel St. Denis, New York city, on June 2. The committee appointed at the last meeting to arrange for an outing and which consisted of A. L. Miller, Herman C. Steinhoff, Herman Schoelzel and John Scott, made its report. The association will give its outing on June 25 at Terra Marine Inn, Huguenot Park, Staten Island, and the members will meet at the Staten Island Ferry, foot of Whitehall street, New York city, at 10:30 A. M. on that day and then proceed by boat, train and automobile to the place of the outing. The committee has made full arrangements for plenty to eat and drink, music, dancing, games, races, bowling and other spots and pastime. In order to evade the personal tax upon its capital, which has rapidly increased since its incorporation, the association has decided to furnish each of its members with tickets to the outing gratis. It is expected that all members with their families and friends will attend and thoroughly enjoy themselves.

FLORISTS' CLUB OF PHILADELPHIA.

After Arthur Niessen's paper on the relations that should exist between the wholesaler and retailer had been discussed by W. K. Harris, Jno. Westcott and other experts, business was rashed and an early adjournment called for the smoker. Many of us thought "smokers" were not germane to June; nevertheless there was a good turnout of members, and they seemed to heartily enjoy the varied program of story and dance provided by Messrs. William Graham, John Dunn, Jr., C. H. Grakelow and Frank Adelberger. The only club talent called on was Captain Lynch, who rendered "Ora pro Nobis" in masterly style and then spoiled everything by making a political speech. However, the crowd seemed to enjoy that, too. Bowling for convention team is now in order. Anyone who rolls fifteen games in June, and has an average 150 or over, is eligible to compete.

APPRAISERS' DECISIONS.

No. 19018.—Evergreen Seedlings—Nursery Stock.—Protests 272825, etc., of R. Ouwerkerk et al. (New York). Opinion by Waite, G. A.

The Board held that *Abies excelsa*, or Norway spruce, produced from seed, and *acubas* and *rhododendrons* were dutiable as evergreen seedlings under paragraph 252, tariff act of 1897, as claimed by the importers; also that azaleas were dutiable as nursery stock under the same paragraph. United States v. Ouwerkerk (T. D. 28353) followed.

I appreciate the good work your paper is doing and I would not be without it. Enclosed is my subscription. I am, Very truly yours,

JAMES J. SULLIVAN.

Newport, R. I., May 26, 1908.

Library Notes.

Judging from the inquiries that reach us concerning some of the books mentioned in this column, it is evident that there are readers of HORTICULTURE who appreciate the brief notices of the new European publications on gardening. We are therefore encouraged to continue our course in a path of horticultural knowledge and to disseminate information that might otherwise be difficult for those who are interested in gardening literature to obtain elsewhere.

The Journal of the Royal Horticultural Society, Part I of Vol. 33, has been issued; a bulky volume of more than 300 pages. The contents are too numerous to mention in detail, but among them are The True Darwinism by Prof. Henslow, Amateur and Horticultural Law by H. Morgan Veitch, Japanese Dwarf Trees by Albert Manmene (whose name is wrongly spelt "Maumerne", an unaccountable error to make considering he is one of the most eminent of modern French horticultural writers), Gesneraceae by Col Beddome, Natural Selection by C. T. Drewry, reports of trials at Wisley, etc. There are a few illustrations, some of them being reproductions of the original illustrations in M. Maumerne's work, Les Arbres Nains Japonais. Price \$1.85; free to members.

The Studio Year-Book of Decorative Art, 1908. We recently noticed the winter number of this fine art publication which dealt with the gardens of England. The present issue is not wholly devoted to gardening, but contains among other matter an important article entitled "On the Designing of Gardens" by Thomas H. Mawson, A. R. I. B. A., with illustrations of a very attractive character. The remainder of the work contains some charming examples of British country houses, German, French and Austrian architecture and decoration. Price \$1.25.

Color in the Flower Garden by Gertrude Jekyll. The most recent addition to the already well known Country Life Library and exhibiting all the high class features of typographical and artistic execution that characterizes these publications. Miss Jekyll is too well known an author to be summed up in a few lines and we must refer our readers to the book itself for the information given. There are plenty of fine process engravings illustrative of the text, besides plans for planting borders of decorative effect. The subject is dealt with in a very readable and instructive manner. Our only regret is that such a valuable addition to our garden library as this work undoubtedly is, does not contain a few illustrations in color. 148 pages, neatly bound and gilt lettered. Price \$3.00.

Cultivation of the Perpetual Flowering Carnation by C. H. Tandevin. This is a paper-covered booklet of 24 pages dealing in a concise manner

COLD STORAGE LILIES

COLD STORAGE LILIES, means that you can have Lilies all the year round. What are more useful, or give more character to the funeral piece than the Lily. We have, and can deliver at any time cold storage Lilies—and can refer you to hundreds that are growing them, why not you?

LILIUM LONGIFLORUM GIGANTEUM is the only longiflorum that gives satisfaction from cold storage—we offer them as follows:—**LILIUM LONGIFLORUM GIGANTEUM** (repacked) 6 to 8 inch bulbs, 400 in a case, \$8.50 per 100, \$75.00 per 1000, case of 400 for \$30.00. 7 to 9 inch bulbs, 300 in a case \$9.00 per 100, \$85.00 per 1000, \$25.50 per case of 300. 9 to 10 inch bulbs, 200 in a case, \$14.00 per 100, \$130.00 per 1000, \$26.00 per case of 200.

ARTHUR T. BODDINGTON, Seedsman, 342 WEST 14TH STREET, NEW YORK CITY

with a flower that is making rapid progress in this country. Price \$0.25.

Les Pois de Senteur par G. D. Clark. It is rare to find an English horticulturist writing a work in French, yet Mr. Clark in his enthusiasm for the sweet pea has accomplished the feat. His object is to promote its culture on the other side of the channel and in this little brochure of 32 pages he makes known to his French readers something of the flower which is but little grown in France as yet. A few illustrations are given. Price \$0.12.

How to Raise Daffodils from Seed by Cartwright and Goodwin. A neatly gotten-up little treatise, in paper wrappers, of about 60 pages. Early history. The first garden seedling, Miller on seed raising, Daffodils in the 17th century, Dean Herbert and his work, Edward Leeds and his work, the raiser of Horsfieldii, Wm. Backhouse and his work, the Rev. Geo. H. Englehart are subjects dealt with in the early part of the book. The remainder is then devoted to the purely practical part of daffodil raising in the various recognized sections. A little book that will be much sought after by the daffodil enthusiast.

Culture du Fraisier, et des Arbustes Fruitiers. Books on the strawberry, and especially French ones, are numerous. The most exhaustive in its day was undoubtedly the first, that by Duchesne published in 1766 and now very rare. Comte Lambertye was another author who published a very comprehensive treatise on this favorite fruit. The little book now before us runs into 233 pages and although as its main title implies it is on the strawberry chiefly, yet there are chapters dealing with the raspberry, the currant and the gooseberry. Besides the statistical, botanical, and cultural matter there is a good deal of attention paid to the commercial aspect of strawberry culture. A few illustrations of no particular merit are given. Price \$0.75.

National Dahlia Society. Supplement to Official Catalogue (H. H. Thomas, Sec., 68 Shakespeare Road, Hanwell, Middx). The Annual Supplement for 1908 to the Official Catalogue has been issued, a pamphlet of a dozen pages containing the latest novelties in Cactus, Show, Fancy, Pompon, Single and other selections. Free to members.

C. HARMAN PAYNE.

NEWS NOTES.

Wm. Elliott & Sons contemplate holding a big trade auction sale at their salesroom, 42 Vesey street, New York, on June 23. As this will be practically the "An revoir" sale for the season, Auctioneer Wm. J. is planning a pleasant surprise for his friends who attend on that day.

We have received pamphlets descriptive of the Perry pneumatic system from the United Pump & Power Co. of Chicago. The great advantages of the delivery of fresh water direct without the use of a tank or other storage supply are fully set forth and owners of greenhouses or grounds where abundant water of uniform temperature is a necessity will find this subject an interesting one.

INCORPORATED.

A. N. Pierson Company, Cromwell, Conn.; Andrew N., Wallace R. and Margaret G. Pierson; capital, \$200,000.

Mr. Ebbinge, of Ebbinge & Groos, Boskoop, Holland, was a visitor in Philadelphia this week. Mr. Ebbinge has a wide repute as an expert on new continental roses.

A Chemical Study of Some Greenhouse Soils

During the spring of 1907 the writer's attention was called to a sample of cucumber soil that was sent to Dr. George E. Stone, of the Department of Vegetable Pathology of the Massachusetts Experiment Station. An examination made of the plants grown on this soil revealed the fact that no fungus disease was present* —the plants were very vigorous, but turned yellow prematurely and failed to develop a crop of fruit. Some of the leaves were spotted and resembled the Mosaic troubles sometimes seen on other plants. As nearly as we could find out the treatment of the soil had been about as follows:

Two years previous to the trouble the soil had been prepared by adding an equal amount of horse manure to pasture sod; more manure was added when the soil was transferred to the house and when the crop was put in, for underground heat, a trench of manure and chopped straw was used. An application of lime was made to the surface of the soil before putting out the crop and during the growing season considerable nitrate of soda was used. We were not able to ascertain the treatment of the soil during the two succeeding years, but it is quite probable that it was similar to that already described.

It was the belief of the pathologist, Dr. Stone, that the soil was over-fertilized and in order to throw some light on the subject, the writer undertook the chemical analysis of the soil.

In order that the results may be more intelligently interpreted by the average reader, I have reported them in comparison with the average chemical analysis of thirty-eight samples of barn yard manure.

	Average analysis of barn-yard manure.	
	Cucumber soil.	Per cent.
Moisture	36.72	73.38
Nitrogen	.55	.42
Organic matter	9.92
Potassium oxide	.48	.53
Sodium oxide	.43
Calcium oxide	1.12
Magnesium oxide	.47
Phosphoric acid	.51	.31

The above results show the cucumber soil to be considerably richer in nitrogen and phosphoric acid than are the better grades of farm yard manure.

A further study of the soil was made in order to ascertain how much of the plant food was soluble in water, as no doubt it is the soluble or available portion of the saline constituents that is responsible for the injurious effect upon the growing crop. The results of this study will be found reported in comparison with other analyses in the subsequent tables.

During the spring of 1908 a sample of cucumber soil was received by Dr. Stone from Orange, Mass., and another from Baldwinsville, Mass. A description of the behavior of the plants indicated that the difficulty might be due to an accumulation of soluble saline constituents; in other words, an excess of plant food. In

order to make a systematic study of the whole problem it became necessary to obtain data as to the average composition of a normal cucumber soil giving excellent results. The writer, therefore, obtained three such soils from well-known growers in the state and subjected them to the same treatment as was given the abnormal soils.

A given weight of the samples was leached out with a definite volume of hot water, the resulting solution was evaporated to dryness on a water bath and a chemical analysis was made of the saline residue.

In the table Sample No. 1 represents the Baldwinsville soil, No. 2 represents the Orange soil and No. 3 represents the soil analyzed in 1907. Nos. 4, 5 and 6 represent normal cucumber soils procured from well-known growers from various localities in Massachusetts. The results in the first table have been calculated to 100 parts of dry soil for the sake of comparison.

TABLE NO. 1.
Showing the per cent. of water soluble constituents in 100 parts of dry soil.

	Abnormal Soils.			Normal Soils.		
	No. 1	No. 2	No. 3	No. 4	No. 5	No. 6
Total solids	1.84	1.68	1.136	.456	.294	.19
Soluble nitrogen	.05	.012	.102	.025	.0055	.025
Soluble potash	.50	.41	.238	.085	.055	.026
Soluble phosphoric acid	.04	.045	.020	.017	.0007	.002
Soluble calcium oxide	.064	.045	.057	.047	.031	.03
Soluble sodium oxide	.22	.21	.192	.068	.06	.075
Soluble magnesium oxide	.054	.036	.031	.022	.009	.009
Soluble Sulphates (So ₃)	.069	.036	.050	.049	.029	.008

In this table note the large amount of total solids representing saline constituents and humus matter, also the high potash phosphoric acid, sodium oxide, magnesium oxide, and sulphates in the first three samples as compared with the normal soils Nos. 4, 5 and 6.

In table No. 2 the results have been expressed in pounds of the various constituents per acre and are based on the usual estimate that an acre of soil 1 ft. deep weighs 3,000,000 pounds. The results in this table were all calculated to normal soil moisture which averages about 20 per cent.

TABLE NO. 2.
Showing the amount of water soluble constituents in an acre of the several soils with average moisture conditions (20 per cent).

	Pounds per Acre.					
	Abnormal Soils.			Normal Soils.		
	No. 1	No. 2	No. 3	No. 4	No. 5	No. 6
Total solids	44,160	40,320	27,300	10,944	7,056	4,500
Soluble nitrogen	1,200	288	2,457	600	132	600
Soluble potash	12,000	9,840	5,733	2,040	1,320	624
Soluble phosphoric acid	960	1,080	491	408	168	48
Soluble calcium oxide	1,536	1,080	1,365	1,128	744	720
Soluble sodium oxide	5,280	5,040	4,641	1,632	1,440	1,800
Soluble magnesium oxide	1,296	864	737	528	216	216
Soluble sulphates (So ₃)	1,636	864	1,201	1,296	696	192

In the above table observe the excessive amount of total solids, and the various constituents in the first three soils as compared with the last three soils. I would also call special attention to the composition of soil No. 6 which is a comparatively new soil, it having been used for growing cucumbers only two or three seasons, but with very flattering results. Note the comparatively small amount of total solids and soluble saline constituents.

To bring this matter out more strikingly, I have prepared a table showing the average composition of the three abnormal soils as compared with the three normal soils.

TABLE NO. 3.

Showing an average of the composition of the soluble constituents in the three abnormal soils as compared with the three normal soils. Results expressed in pounds per acre.

	Ab-normal No. 1	Normal No. 2
Total solids	37,260	7,520
Soluble nitrogen	1,315	444
Soluble potassium oxide	9,191	1,328
Soluble phosphoric acid	843	208
Soluble calcium oxide	1,327	864
Soluble sodium oxide	4,987	1,624
Soluble magnesium oxide	966	320
Soluble sulphates (So ₃)	1,240	727

To express in a more intelligent manner to the average reader the serious excess of water soluble plant food as shown in the abnormal column of table No. 3, a calculation has

been made which shows that it would take 41.4 tons of nitrate of soda to furnish the nitrogen; 91.4 tons of high-grade sulphate of potash analyzing 50 per cent. K₂O to furnish the potash; 2.34 tons of acid phosphate to furnish the phosphoric acid and 3.4 tons of burned lime to furnish the calcium oxide. Or, to express the results in terms of a mixed fertilizer it would require an application of 17 tons of mixed fertilizer made up of the highest grade of material and analyzing about 4 per cent nitrogen, 27 per cent actual potash and 21.2 per cent phosphoric acid.

When we consider that the above

figures only represent that portion of plant food present in the soil which is soluble in water and that the total amount of plant food in the several abnormal soils runs from 8 to 40 per cent higher in many cases, we begin to realize what an enormous accumulation of plant food has taken place and we only wonder that the plant can make a start in growth. It may be interesting in this connection to know that the results of some investigations on tobacco soils that the writer has

*For a more extended pathological description of the trouble see article by Dr. G. E. Stone, in this issue.

made have indicated that the growth of young tobacco plants has been stopped and the plants seriously injured by about one-eighth as much soluble salines as is shown in the above analyses.

The writer is not prepared to say how large an accumulation of soluble saline constituents may take place before a cucumber crop will be injuriously affected. The results of data at hand, however, would indicate that a relatively wide latitude may be allowed on at least some of the constituents. It is my belief that the combined effect of the *total soluble mineral constituents* in the soil is responsible for the injurious effect on growing plants rather than an accumulation of any one of the soluble elements; although a continued and excessive application of any one of the essential elements of plant food will produce characteristic abnormal conditions.

There seem to be reasonable grounds for the belief that many cucumber growers are using a too liberal amount of horse manure for general practice, especially when we take into consideration the relatively large amount of this material that is sometimes used in trenches to furnish underground heat to the soil. As this manure decomposes under the influence of heat and moisture the mineral constituents become soluble, and, by means of water which is added from time to time to the growing crop, are diffused throughout the soil. Much soluble plant food is added to the soil in this manner that is not taken into consideration by the average grower.

The above investigations bring out one fact of unusual interest, namely, the large amount of water soluble potash as compared with the total potash content of the soil. The total potash present in No. 3 soil on the basis of 100 parts of dry matter was .76 per cent. of

which .21 per cent. was present in the water soluble form. The writer has found the same condition to exist in case of tobacco soils which have been heavily fertilized for a term of years and has found as high as 511 lbs. of water soluble potash per acre in 8 inches of the surface soil. The writer is aware that these facts are not in accordance with the teachings of German scientists and other agricultural investigators who affirm that potash does not remain in solution for any great length of time but is soon fixed as basic compounds in the soil only to be liberated gradually by chemical action continually taking place during the growing season.

The phosphoric acid found present in the water solutions of the soils is another curious fact and is quite the exception to the general rule. The writer has found only two samples of tobacco soil which showed the presence of water soluble phosphoric acid.

The solution and diffusion of the soluble nitrogen compounds is what one might expect of this illusive element of plant food. The presence of the comparatively large amount of this element in the soil solutions was therefore not unexpected.

As a preventive measure might be recommended the more judicious use of manure and fertilizer. Upon the first indication of an accumulation of soluble saline constituents or over-feeding the soil should be leached out, preferably with hot water, as soon as the crop has been removed. The leaching may be accomplished with cold water and, in case of some crops, without their removal from the soil. In case a crop is suffering from an excessive application of manure and it is not advisable to leach out the soil, the best remedy would be to apply two or three inches of loam to the surface of the beds. This promotes the formation of new roots and has been known to save the crop.

In case the benches have been arranged for sub-irrigation, the leaching may be accomplished by allowing the drainage waters to pass off through the sub-irrigation pipes, arrangements being made so that the water may run off freely. Where it is not possible to leach the soil it should be replaced with new soil; or it might answer to remove one-half of the old soil and carefully and thoroughly mix an equal volume of new soil with the remainder.

The old soil removed from the benches, as well as the solution resulting from leaching the same, may be used as a fertilizer to good advantage on out-of-door crops and would probably not prove inferior to the average farm yard manure.

HENRI D. HASKINS.

Seed Trade

The McKay Seed Co. has opened at Jackson, Miss.

John A. Kepner has recently added seed departments to his two stores at Harrisburg and the store at Steelton, Pa.

One of the leading seed-growing concerns in Connecticut reports that the volume of its business this season has established a new high record, and the condition is attributed to the industrial depression. It is explained that, for purposes of economy, a great many householders are this year cultivating small gardens and are raising their own vegetables. This policy has created a great demand for seeds and has imparted unusual prosperity to the seed-growing industry hereabouts.—Boston Transcript.

FUNGICIDES, INSECTICIDES AND SPRAYING.

The Massachusetts Agricultural Experiment Station has recently issued Bulletin No. 123, Fungicides, Insecticides and Spraying Directions, giving formulas for the preparation of fungicides and insecticides with directions for preventing and controlling fungous diseases and insects. Serious injury from these causes is now so common that the plain directions given in this bulletin should prove of much value. This bulletin discusses not only the common crops of the field and garden, but shade trees as well. It includes also a brief article on the methods to be adopted for the destruction of weeds in mowings, cultivated fields, tennis courts and walks. It will be sent free to applicants, who should address Massachusetts Agricultural Experiment Station, Amherst, Mass.

Of Interest to Retail Florists

DETROIT Reports on hand from many retailers show very satisfactory business conditions for Memorial Day, and many retailers point delightedly to more and better sales this year than in former years. While this in itself is gratifying we find therein another point much more important, and this is the repeated proof that our product has become a staple and necessity of life instead of

being a luxury as it was in the past. As a nation advances in prosperity and many articles of luxury become articles of necessity, the producer of such articles finds that the least commercial disturbance causes a decided falling off in his cash receipts. We may have felt such a falling off during the recent money stringency, and if our receipts this year are smaller than last year it may have been caused by just such circumstances, but, nevertheless, the increase in trade for a celebration which in these days of waning idealism has become more of a day for excursions and ball games is a true sign that we are fully reaping the bene-

BUSINESS CHANGES.

Roepke & Rieman have purchased the Stratford place of the Smith & Young Co., Indianapolis, Ind.

The plant of the Terre Haute Rose & Carnation Co., Terre Haute, Ind., has been leased by Alex. Millar, Jr.

H. N. Wild has purchased the interest of his brother Frank in the Wild Bros. Nursery Co., Sarcoxie, Mo., and will retain the present name of the concern.

A. E. Boyce, Wellsville, N. Y., has disposed of his general stock to Mrs. D. S. McEwen, who will continue the business. Mr. Boyce will devote his time to his new carnation, Claribel Worth.

The Racine Floral Company has purchased the Fidler & Adams greenhouses, Racine, Wis., and after closing out the stock on hand will make extensive improvements and introduce modern equipments. Mrs. E. Miller, who has for several years had charge of the decorations at Hotel Pfister, Milwaukee, will be associated with the company.

The Denison (Texas) Civic Improvement League has offered quite a list of prizes to the school children for best results obtained through the planting of flower seeds distributed through the public schools in the spring for planting in the home yards of Denison. More than eight thousand packets of seed were distributed by the League this year and many home yards have been greatly beautified through the efforts of the children, who have also gained the interest and assistance of their elders.

A. E. Graves has started in the market gardening business at Gardner, Mass.

GEO. B. HART, 24 Stone St., Rochester, N. Y.

PERSONAL.

Visitor in Boston: W. E. Chappell, Providence, R. I.

O. C. Bassage of Rochester, N. Y., has taken a position with Burr's Nursery, Manchester Conn.

John Shields, florist, of Dalton, Mass., will sail from New York on July 1 for a two months' trip abroad.

Wayland F. Chase, Middleboro, Mass., has taken a position with the Oregon Nursery Co., Salem, Ore.

Alexander Coburn has been appointed head gardener at Queen Victoria Niagara Falls Park, Canada.

Simon Colitz, Woonsocket, R. I., of the Rustic Flower Store, and Mrs. Esther Caplan of Roxbury, Mass., are to be married on June 11.

R. G. Leavitt, for the past nine years botanist at the Ames laboratory, North Easton, Mass., has accepted a position as professor of botany at the State Normal School, Trenton, N. J.

NEWS NOTES.

The Beeville Nursery Co., Beeville, Texas, has been recently organized.

Leikens, the florist, has opened his Bellevue branch at Newport, R. I., for the season.

I. H. Anderson will carry on business at the Brookside Greenhouses, Reading, Pa.

Hatten & Bieberich have started in business at the East End Greenhouses, Huntington, Ind.

The Illinois Heater and Manufacturing Company, who have been advertising a very serviceable but low-priced window box for plants, will soon put on the market a cemetery vase of galvanized iron similar in form to the glass vases which are so apt to get broken by the lawn mowers.

FLOWER MARKET REPORTS

BOSTON Memorial Day business in Boston was a record-breaker in several respects. No such quantity of material has ever been available, the quantity sold was far beyond the record and it was physically impossible to do more than was done in the wholesale places. But the prices were badly cut down, there was a big surplus left over which turned out a complete loss and there have been many complaints from buyers concerning the poor quality of much of the stock. Since the holiday the situation is in no respect improved. Peonies are now coming in freely; carnations are abundant and cheap; roses, with the exception of Beauty, Kaiserin and Carnot, are badly mildewed; outdoor lily of the valley is gone and the forced product is doing better than for some time past; sweet peas are abundant and good. Demand is far behind supply in most lines.

The trade seem to be **BUFFALO** satisfied with the business which was had for Memorial week. Until the first part of the week stock of all kinds was over plentiful, with little or no outlet, and the only thing for the wholesaler was to fill up the coolers. The temperature ran up to 88 degrees in the shade and such out-door stock as tulips, spirea, narcissi, deutzia, lilac and lily of the valley all came in at one time, and at the end of the week when it could have been used to good advantage there was little to be had, as the hot weather had cleaned them up quickly. In the rose line there was plenty to be had and at good quality, including Beauties, but demand was not strong. Peonies helped out considerably, but would not move at high prices as in former years. Carnations were in demand as usual, and sold readily, the colored ones being preferred. Most of the carried-over stock was cleaned up by the cemetery florists. Shipping trade was excellent and equal to former years, but a good portion of stock would not stand shipping.

CHICAGO As was anticipated the Chicago cut flower market was affected by the excessive rains followed by intense heat preceding Memorial Day. The shipping trade especially suffered. Stock was soft and some of the growers had

held back the flowers till they were in no condition for sale anywhere, much less for shipping long distances. Buyers there were in abundance, though many report the individual sales not so large as usual, but an oversupply of flowers and an under-supply of quality helped to demoralize the market. At the beginning prices were very fair and in some localities remained so, but in the overstocked portions prices fell. Florists having a large shipping trade are fearing complaints from dissatisfied customers, for much of the stock was not in best of condition for sending out. Taken all in all, for an off year in business and with unfavorable weather to contend with, Chicago florists pronounce Memorial Day trade for 1908 "fair."

INDIANAPOLIS Memorial Day trade exceeded all expectations of the majority of the florists. All outside flowers, especially peonies, were in full swing. Warm weather has greatly reduced the size of roses and carnations. There seems to be a record breaking supply of everything at the present time with prospects for a big June trade. Weddings and school closings are next in order and already a great number of large advance orders have been booked. Green stock of all kinds is in good supply with an excellent demand.

NEW YORK The heavy influx of flowers has continued unabated and, as our price quotations show, prices on all lines are low and, with the exception of Cattleyas and choice white material for wedding adornment, demand lags badly. Last week was the culmination of an unusual conjunction of supply, weather, and other conditions affecting unfavorably the course of the flower market. Memorial Day was as usual a busy time among the suburban florists especially those located near the cemeteries, but the city proper retail trade

was not overworked and the wholesalers who might ordinarily have done well with the out-of-town trade were balked from start to finish by the tremendous shipments of stock sent to them, most of it in miserable condition and which they were glad to get off their hands at any figure. A rapid shortening up of supply may now be looked for.

PHILADELPHIA Black disaster and calamity is the story for Memorial week in Philadelphia, without a solitary redeeming feature anywhere. Even Memorial Day itself, which is usually good for the plant men at least, was ruined for them also by the tremendous downpour of rain which continued all day. Business was poor all the week and the influx of stock was enormous. Much of it was poor and was never taken out of the boxes. Such a deluge of everything was never seen here before. Roses of all kinds except American Beauty were inferior showing a bad slump for the week. Beauty was the only one that held its own as to quality. Good carnations were not looked for, so no one was disappointed. Sweet peas were no better, with the exception of a few from outdoors which showed a little more hardness, substance, color and finish. Peonies came in all the week with a rush and an immense lot were left over on Saturday night with no hope of moving them. These lovely, fragrant and showy flowers will be with us in quantity for the next ten days or two weeks, and prices until then will be low. We might extend the review to other flowers—but what's the use? The same sad story all along the line. The worst Memorial week on record.

Business in Minneapolis and St. Paul is reported as having been fairly satisfactory during the past week, considering that it has rained steadily a good part of the time.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$12.50.

Other Business Men May "Ease Up"

during the heated term but the florist does not. His greenhouses must be repaired and it takes Glass and Pipes and Lumber to do it.

Now Is The Time To Advertise If You Want His Trade.

His Boiler must be made right now: if you sell heating apparatus get him to buy a new one. Perhaps the time has come for a new watering system. You can reach him most effectually through an advertisement in these pages,

JUST NOW.

RATINGS

Mean Boiler Capacity -- There are Two Kinds of Ratings, Nominal and Actual Capacities

In considering our boiler, please bear in mind that the Kroeschell Boiler is absolutely the only boiler which is constructed exclusively for Greenhouse heating.

The Kroeschell Boiler is rated differently from any other type of boiler. In our ratings we consider greenhouse heating only and on a basis of pipe radiation.

You may not be aware of this fact, but it is true nevertheless, that pipe radiation contains a much greater volume of water than do cast iron radiators.

Since all other boiler manufacturers figure their ratings on cast iron radiation in compact buildings, residences, etc., their rating is much too high for greenhouse heating, and it is for this reason that the salesmen of other boilers will invariably insist upon your purchasing a boiler with a rated capacity of 25% to 35% greater than your requirements would indicate.

Our ratings are actual net capacity based on greenhouse pipe radiation, that is, the boiler will carry the rated amount in your greenhouses exclusive of the mains.

Therefore, in comparing the price of our boiler with those of other makes, and in order to put us on the same basis, you must compare ours with boilers of rated capacity, at least 25% to 35% higher than our rating, and even then we know that our boiler will do the work easier than the other.

"THE KROESCHELL BOILER is the quickest heating boiler I ever saw, and so easy to fire," write hundreds of our customers.

PATENT APPLIED FOR

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: **Result**, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder

READ! READ! READ!

Every Particle of Heat

is absorbed from the gases in the "Spencer" Heater owing to its superior combustion travel. The numerous tubes passing through the intense heat, split the water up into thin small streams instead of holding it in one large body of water over the crown sheet. These tubes are made of knobbed wrought charcoal iron, the highest price tubes in the market.

The "Spencer" has the most thorough combustion, is the quickest heater and gets more heat out of less coal than any other heater made.

Investigate it before laying in your coal supply and save money.

Send for Catalogue, also ask for our Greenhouse Catalogue "The House of Greatest Sunlight."

WEATHERED COMPANY

P. O. ADDRESS BDX 789, NEW YORK CITY

Of Interest To Gardeners and Superintendents

REALLY complete and satisfactory greenhouse information for private places, institutions and parks, covering not alone construction but valuable points on location, plans, additions, and the innumerable other things you want to refer to so often, has up to the present time been next to impossible to obtain.

To meet just this want of yours, we have published a book called, "Greenhouses As We Build Them," which covers all these points besides many others of interest.

We shall be glad to send you this book with our compliments. Drop us a postal and just mention that you saw the offer in Horticulture.

WE MAKE EVERY PART OF A GREENHOUSE

Notes from the Arnold Arboretum

The Rhododendrons are now in full bloom and the group at the foot of the Hemlock Hill presents a beautiful picture. A few of the earliest have already dropped their flowers and the latest are just starting to bloom, while the great mass is in its prime. As there have been often published lists arranged according to the color of the flowers, but not according to the time of flowering, which is certainly a point also to be taken into consideration in forming effective groups of Rhododendrons, the following lists attempts to give an arrangement according to the time of flowering, beginning with those which are already out of bloom: *Coriacum*, *Lady Armstrong*, *Prometheus*, *Alosanguineum*, *Kettle drum*, *R. S. Field*, *Smicrorhiz*, *Charles Dickens*, *Everestianum*, *James Macintosh*, *Purpureum crispum*, *Mrs. H. S. Hannerwell*, *Caracacus*, *Alexander Dancer*, *Roscum elegans*, *Edward S. Rand*, *Mrs. Hardy Ingersoll*, *Charles S. Sargent*, *Hannibal*, *F. L. Ames*, *Purpureum elegans*, *Roscum elegans*, *Milton*, *Lady Gray Egerton*, *F. D. Codman*, *Henrietta Sargent*, *Album elegans*, *Album grandiflorum*, *Charles Thorold*, *Delicatissimum*, *H. W. Sargent*.

The native *Rhododendron calendulaceum* is now very beautiful with its rich flame-red or orange-red and orange-yellow flower and is hardly surpassed by any of the Ghent Azaleas with flowers ranging in color from pure white to deep crimson. They are chiefly hybrids of *Rhododendron flavum* (*Azalea pontica*) and the American species, partly also with an infusion of *Rhododendron sinense* (*R. molle*). The following is a list of the best now in bloom arranged according to colors. White: *Auguste Mechelyuk*, *Mme. M. Singer*, *Daviesii*, *Souvenir de Louis van Honth*; yellow: *Anthony Koster*, *J. A. Koster*, *Nancy Waterer*, *Gaelder Rose*; pink: *General Trauff*, *Aurora de Ronghom*, *Jan van Tol*, *Grandeur triomphant*, *Mme. Moser*, *Julius Caesar*, *Queen Victoria*, *Cardinal*; red, crimson or purple: *Ghent des bahilles*, *Comte de Flandre*, *Agneurnora*, *Roi des Belges*, *Fania* and *Beauz*; unique with deep crimson flowers, one of the darkest.

A shrub of striking beauty is the Golden Chain with its drooping racemes of golden yellow flowers: it seems to have fallen somewhat in disfavor because *Laburnum vulgare*, the species commonly planted is not perfectly hardy in this section of the country, but there is another species, *L. alpinum*, which has proved much hardier and is equally handsome. The individual flowers are somewhat smaller, but the racemes are usually longer and the lustrous foliage is even prettier: its habit is more upright and it grows in its native country into a small tree up to 30 feet in height, but remains more often shrubby. Another very effective Leguminous shrub is *Cytisus scoparius*, the Scotch Broom, now covered with its large golden yellow flowers: it is well suited for planting on sandy dry slopes, but is apt

to suffer in severe winters: it has become naturalized at several places, particularly along the coast.

Syringa villosa and *S. Josikaea* are now the only Lilaes in bloom: both are closely related and very similar. The former grows into a broad and bushy shrub and produces its rather dense panicle of pale pink flowers in great profusion, while *S. Josikaea* is a slenderer shrub with violet narrower and looser panicles. Particularly *S. villosa* (*S. Bretschneideri*) is to be recommended for its good habit and profusion of flowers.

Some of the Mock Oranges are now in bloom: the earliest is *Philadelphus hirsutus*, a native species, but less ornamental than most other kinds on account of its smaller and scentless flowers: this is followed by the popular strongly scented *P. coronarius* and by two less known species from eastern Siberia, *P. tenuifolius* and *P. Schrenkii*, with only slightly fragrant flowers of a purer white color. Among the handsomest Mock Oranges are certainly the numerous forms derived from *P. Lemouinei*, of which the exceedingly pretty *Boule de neige* and *Manteau d'hermine* are the first to bloom: both are low, graceful shrubs with their slender branches curving under the weight of comparatively small double flowers exhaling a delicate perfume.

One of the last of the Bush Honeysuckles to flower and one of the finest is *Lonicera Maackii* which grows into a rather tall shrub with the spreading branches densely covered with rather large white, slightly fragrant flowers: it is a native of eastern Asia and has proved perfectly hardy, but is still little known, though it certainly deserves a place in ornamental shrubberies. While this species is in bloom, *Lonicera gracilipes* and *L. canadensis* (*L. ciliata*) show already their handsome scarlet berries.

The many varieties of *Dicrilla* are now in full bloom exhibiting a profusion of flowers mostly in different shades of pink and carmine, one of the most beautiful of the pink varieties being *Abel Carriere*: a handsome pure white variety is *Dame Blanche*, while one of the darkest is *D. floribunda* var. *Lowei*, but the darkest of all and one of the latest to bloom is *Eva Rathke*.

Several species of the wild Roses are showing their flowers. One of the most beautiful is the *Rosa rugosa* with its large purple flowers and its handsome foliage, of which there is also a variety with double flowers and one with pure white flowers. Of *Rosa spinosissima* which forms a low shrub with very small foliage, the var. *albaica* with rather large flowers, is one of the prettiest. One of the earliest among the native species is *Rosa blanda* which now brightens up the borders of shrubberies with its pink flowers.

Alfred Rehder.

Our Cover Illustration

Peonies fill the public eye at present and the present week finds them in full glory from the latitude of Philadelphia north to Buffalo. The variety *Duchesse de Nemours* (Guérin), which forms the subject of our cover illustration, is one of the finest of the pinks a sturdy growing, free flowering, effective flower. There is another *Duchesse de Nemours* in the market raised by Calot, which is white.

class interests to continue to suffer as they have, in increasing degree during recent years, through lack of organization and co-operation according to modern business custom. The primitive policy of "every man for himself" has been a serious obstacle to the progress commercially of the flower business. The growing of flowers has made phenomenal advancement as compared with other interests because growers have been disposed to meet and discuss freely on topics of mutual concern. It is refreshing to see at last, that others are coming to realize their great need and that men who have been deaf hitherto to any and all appeal for their support of organizations existing for the express purpose of helping the individual through the strength of union, are now beginning to see a new light. But while HORTICULTURE is and always has been a consistent believer in a multiplicity of societies, we do feel that as much harm as good may come from movements within the profession which tend to isolate interests which are interdependent and to aggravate any distrust which may already exist between the different sections. Segregation of this sort is certain to be detrimental to the best growth and development of the business as a whole and any policy which tends in that direction has in it elements of far-reaching mischief.

In most cases where a new organization is started in the same field in which a like body already exists it may be

argued with some show of reason that neglect on the part of the older body to properly fulfil its legitimate mission makes it responsible for the disaffections thus crystallized. Unfortunately, wise diplomacy is not an overabundant quality in the councils of any association, particularly if it be a strong one, and statesmen, even in Congress as we have good reason to know are not easily found when most needed but that all reasonable and available means for conciliation and the establishment of harmonious co-operation between closely related interests should be exhausted before any step is taken which may tend to split the profession into factions and array one section against another is a proposition that should appeal to every intelligent man. It must be plain to all who stop to consider the situation that the horticultural industries as they exist today are only a fraction in extent and commercial importance as compared with what they are destined to rapidly grow to, and this without regard to any slight set-back that may have been sustained through the influence of the recent financial disturbances. We are surely getting ready for a great development all along the line in the near future and it is a first duty to ourselves individually and to our profession in its broadest definition, to get together wherever, however and whenever we can for the purpose of building up and cementing together with the strongest ties possible all departments of the industry. What the business now needs more than anything else are better business methods and closer cohesion between individuals and between all departments. "Let us reason *together*."

Evidence is not lacking to indicate that the flower trade people are donning their thinking caps and that a strong sentiment exists in the ranks of the growers, wholesale dealers and retailers against allowing their several

Co-operative sentiment should be encouraged

British Horticulture

THE TEMPLE SHOW.

The absorbing event of the week has been the great show of the Royal Horticultural Society in the old-world Temple Gardens, in the centre of the busy metropolis. The best which can be produced by leading specialists in all branches of the floral art was brought together to form the finest horticultural display which is seen in this country. It was a cosmopolitan crowd one encountered in the congested tents. Here one rubbed shoulders with the owners of priceless orchids, as well as the leading British nurserymen and amateurs, who were augmented by florists from France, Belgium and Germany and by growers from the leading bulb centres in Holland. Visitors who had attended the recent Ghent exhibition were able to make comparisons. It was generally admitted that the quality of the exhibit could not be surpassed but there seemed to be a consensus of opinion that the Ghent exhibition was superior as regards the originality and effectiveness of the displays. There is something stereotyped and conventional in the methods adopted in arranging the groups and collections. The exigencies of the site were in some measure responsible for this. Although splendidly situated as regards convenience of access, the Temple Gardens in the midst of the seat of legal learning, are restricted in area. The Society has to exercise economy in allotting space to the 125 exhibitors, and even then it is impossible to comply with all the demands. A large amount of space was devoted to the orchids, the treasures of the leading orchidists being on view. The Veitchian gold cup was awarded in this section, this being taken by Mr. F. Monteith Ogilvie. Messrs. Sander & Sons had a pleasing arrangement of orchids intermixed with graceful ferns.

Roses were, of course, to the front and formed a magnetic attraction to countless admirers. The old favorites were well represented. Mr. G. Mount, of Canterbury, showed Joseph Lowe, a new H. T., which is a sport from Mrs. W. J. Grant. English and Channel Island growers of carnations vied with one another in the splendor of their displays; the American introductions being well to the fore. Rhododendrons and azaleas added a wealth of color to the show. A grand selection was sent by the noted firm of John Waterer & Sons, Ltd., of Bagshot, Surrey, whose productions are well known on both sides of the Atlantic. Pink Pearl was seen at its best, the other varieties comprising Marquis of Waterford, Francis B. Hayes, Gomer Waterer, Mrs. Holford, etc. The whole collection was of a very meritorious character and well deserved the silver cup awarded. A notable exhibit was the group of extra fine hippeastrums shown by Messrs. R. P. Ker & Sons, of Liverpool, the plants being very effectively arranged. Fruits and vegetables formed a somewhat small section.

SOME NEW INTRODUCTIONS.

In the orchid section first class certificates were given to the undermentioned exhibits:—*Laelio-Cattleya* Elva Westonbirt variety, shown by Major G. L. Holford, Westonbirt; *Cattleya Mendelli* His Majesty, shown by Mr. Francis Wellesley, Woking; *Odontioda Charlesworthii*, shown by Charlesworth & Co.; *Odontoglossum illustre* luxurians, and *O. eximium* Queen Alexandra, shown by M. Chas. Vuytstake, Ghent; *Cypripedium ventricosum*, shown by W. Cutbush and Son. A striking new dracaena (D. Bonetti var. De Grooti) shown by Veitch & Co., gained a first-class certificate. This has long, narrow leaves, margined and striped

with yellow, with a red mid-rib. A golden-orange May-flowering tulip, Walter T. Ware, shown by Mr. Walter T. Ware, and Barr & Sons, awarded a first-class certificate. In addition awards of merit were granted to the undermentioned exhibits: R. and G. Cutbush showed *Azalea occidentalis graciosa*, with white blooms and blotchings of yellow on the upper petals. Begonias were displayed in profusion by Blackmore and Langdon, amongst them being Empress Marie, a graceful white bloom of the tuberous-rooting section. Codium (Croton) Fred Sander, who was included in Sander & Sons' group at Ghent, is a valuable addition to this section. The leaves of the handsome plant are golden yellow in the upper half and bright green in the lower part. There were three rose novelties. Rose Elaine, shown by W. Paul and Sons, is a dwarf habited H. T., white with a faint trace of rose. White Dorothy, is a sport of the well-known Dorothy Perkins, this being seen in the exhibit of Paul & Son, and A. Cant & Sons. *Dimorphotheca aurantiaca* is an introduction from the Cape which Barr & Sons are distributing. This is of an orange-gold hue, with a dark-tinted disc. Tulips were displayed in all their grandeur by Alex. M. Wilson, the most notable being Duchess of Westminster, a shapely rose-colored Darwin variety. G. Wallace & Co. showed *Paeonia decorata* alba, of a pleasing form and tint. These are but a sample of the many interesting exhibits. To give a complete list would fill the pages of a week's issue of HORTICULTURE.

W. H. Adsett.

Superfluous Bulb Flowers

Editor HORTICULTURE:—

I noticed your editorial in your issue of April 18, referring to Dutch bulbs as a superfluous commodity in the cut flower market. You certainly express the situation pretty clearly and I heartily endorse those sentiments.

No doubt Dutch bulbs have a place in gardens and in pots and pans, but as cut flowers they are no longer a necessity but a detriment to the general florist business except to a few who find good use for them in design work, etc.

From a grower's standpoint, the primary fact for you to consider is how does the cut product of bulbs affect the sale of his own grown products. Why not foster home productions? Look at the grand varieties of roses and carnations, for instance, which we now have in abundance to take the place of cut bulbous blooms.

Times have changed. It goes without question that one-third of the Dutch bulbs forced during the season 1907 to 1908 would have netted a larger profit than was realized on the total, showing conclusively that something is radically wrong. The quicker it is righted the better for everyone in the business.

Yours truly,

Aug. Palmers

Chicago.

AMERICAN ASSOCIATION OF NURSERYMEN

Great Convention at Milwaukee, Wis.—Rochester, N. Y. Chosen as Next Meeting Place—Charles J. Brown of Brown Bros., Rochester, N. Y., Elected President.

The third annual convention of the American Association of Nurserymen was a great success, some three hundred being in attendance. The wind was off the lake and weather very chilly though sunny.

OPENING SESSION.

The meeting was called to order at 9:30 by President Hill, introducing Mayor David S. Rose, who spoke of Milwaukee as a most beautiful home city and the best convention place in the Union. It is a city of lowest percentage of crime of any great city, also lowest percentage of drunkenness, and only one city surpasses it in the percentage of people owning their homes. It also has the lowest mortality of any large city. He spoke at length of the efforts to beautify the city by parks and lawn spaces throughout the streets, and ended by welcoming the city's guests.

Response was made by Geo. S. Joselyn, who was humorously introduced to the audience by President Hill. His sallies of wit kept the audience in good humor and at times he was interrupted by roars of laughter.

He was followed by President C. W. Hill, who delivered his annual address, which was listened to in silence and fondly applauded at its close. The president was followed by Secretary Sager, who in a short report spoke of the work of his office and was followed by Treasurer Yates.

PRESIDENT HILL'S ADDRESS.

Gentlemen of the American Association of Nurserymen:

Another cycle of three hundred and sixty-five days has passed since we bade each other farewell in Detroit at the close of one of the most interesting and profitable meetings of this Association, and today we stand upon the threshold of the 34th year of our existence.

The Association.

Little did the few faithful men who met a third of a century ago realize the scope, magnitude, influence and glory of the organization on which they at that time brought into existence. The character of the Association since that time has been varied. Its path way has not always led through rose beds and flowers, but indeed more frequently over the stony and hard places of existence, the latter of which has given to it stability, influence and importance, and today it is regarded as the most complete organization of the best men on the American continent, men whose lives are wholly devoted to that noble vocation which has for its object the betterment and uplifting of mankind.

for what class of men does more toward beautifying the home and providing for its occupants, the luscious and healthful fruits of the orchard, vineyard and garden.

If I could with a single wand wipe from the face of this beautiful land of ours, all the effects, benefits and beauties heretofore produced by the nurserymen, what a desolate, forlorn and distressing picture would be presented to you. You can scarcely conceive of a greater calamity. The members of this Association have contributed largely to the existing condition of affairs as we see them today and each one should feel justly proud of his high vocation.

There are represented in our membership the leading men of this country: judges, lawyers, legislators, bankers, congressmen, mayors, doctors and others, who find time to devote to the delightful occupation of the horticulturist and nurseryman. Few of us likely realize the magnitude to which this business has attained. There are today invested in the nursery business of the United States more than sixty millions of dollars, and employment given to about fifty-five thousand men and three thousand women. The use of 18,300 horses and mules is required to cultivate a little over 200,000 acres of land, upon which are annually reproduced 4,200,000,000 plants and shrubs, and 622,000,000 trees. Thus you can imagine something of the importance of this organization of business men.

Absent Members.

Upon looking over the audience, our hearts are made sad, for we miss the familiar faces of some whom it has been our pleasure to meet annually for more than a score of years. The great reaper with his sickle has made inroads upon our Association during the past year and removed from us some of our best-known members and wisest councillors. They now peacefully sleep upon the hillside amid the flowers they loved so well, and know not if the day or night, know not if the birds shall sing and the flowers bloom, or if the storms shall rage, and over their graves, unheeded drift the winter's snow. They are gone from among us for ever, but the membership of this organization will ever hold in fond remembrance their valued service and wise counsel, and your President would recommend the appointment of a special committee to draft suitable resolutions to be presented at a later session of this convention.

The Panic.

During the past year, we, like all

other business men of the country, were brought face to face with a financial depression which resulted in what ex-Secretary Shaw claims to be "the worst panic the world has ever known." This condition of affairs arose last fall at the time the retail nurseryman was making his shipments, and in many places poor deliveries were made, or clearing house certificates, notes and other evidences of indebtedness were taken in payment for trees, but with the readjustment of affairs, these have been promptly met. Congress has just passed the compromise currency bill, and we are now, I trust, over the roughest places, with nobody badly hurt.

The Past Year.

The season just closed is generally regarded as one of the best we have had for many years. All stock, with the possible exception of Kieffer pears and some varieties of plums, have commanded unusually strong prices, and stocks were well cleaned up. In consequence of this, I am inclined to think every man here today is happy, and I see no reason why we should not have an enjoyable and profitable convention.

The present conditions of the affairs of the Association, with a membership of more than four hundred and annual receipts about three thousand, are in the whole, quite satisfactory. Some aggressive action however, is needed along certain lines, which I think would inure to our best interests and which I shall mention a little later.

As far as I am able to learn, the outlook for future business is good with such indications as to justify us in thinking that the present satisfactory wholesale prices will be maintained, but the practice of our wholesale men in placing surplus stock on the market late in the season, at greatly reduced prices, I think is demoralizing and should be discontinued.

I am inclined to the opinion, however, that the retail nurserymen who constitute a large portion of the membership of this Association, are not getting from the planter prices commensurate with the total cost of stock handled. These prices should be advanced and can be gradually brought about by handling only first-class trees of the grades specified and consigning the inferior stock to the brush pile rather than disposing of it to department stores and unreliable mail-order concerns, which dump it on the market at ridiculously low prices, in competition with dealers of first-class trees. Tell your customer the truth, furnish him first-class

stock, charge him good prices for it, and you will soon find him taking care of it and willing to pay you the right prices for good trees.

Inspection Law.

The kindest feeling exists between the American Association of Nurserymen and the organization of Economic Entomologists and Horticultural Inspectors, as was manifested by the hearty co-operation of committees from these societies with that from our Association at Chicago last winter. The report of ex-President Orlando Harrison, chairman of Committee on Uniform Inspection Law, will no doubt set forth the resolutions unanimously agreed upon by these organizations, which were to be the basis of the proposed Uniform Inspection Law. It was greatly desired that this proposed bill be introduced and be made a law by the session of Congress which has just adjourned, but Mr. Harrison deemed it not advisable to present it at that session.

I am personally of the opinion that the enactment of the law proposed would do much to obviate the many vexatious and annoying conditions which arise under the present situation, and advise that it be vigorously pushed by this or a similar committee before the next session of Congress or else the matter be dropped entirely and further expense avoided.

Transportation Committee.

We cannot over-estimate the importance of the transportation committee, and while nothing requiring special attention has occurred during the past year, yet I am inclined to think there may be much to look after in the near future. A recent movement on the part of the railroads has been inaugurated for the advance of freight rates. The Industrial Traffic League at its meeting in Chicago a short time since, carefully considered the matter from the standpoint of large shippers, and it was estimated that the proposed increase would aggregate the enormous sum of \$17,000,000 annually. If the proposed advance is permitted, the nurserymen will, of course, have to bear his share of the additional burden.

The adoption by the Western Classification Association of what is known as "Rule 4," by which Western railroads are to be released from liability for loss or damage to goods in transit, unless 20 per cent, is added to the tariff rates, is one which if enforced will result in a great hardship upon the members of this Association. This rule, I am informed, became effective on May 20th, but one of the leading western roads notified the Interstate Commerce Commission of its refusal to concur therein. Mr. Stannard, chairman of the Transportation Committee, inaugurated a plan by which I think the remaining roads may be induced to regard the matter in the same light. Your committee in this and all other matters should receive your hearty co-operation, and every nurseryman should respond promptly to suggestions made by it. I feel that the chairman of this committee should have an emergency fund placed at his disposal to permit his attending the meetings of the classification committees whenever matters

of importance are liable to come up in which we are interested.

Legislative Department.

In this department some good results have been accomplished during the past year in the modification of the South Dakota law, as you will learn from the report of Mr. Titkin, chairman of that committee. The states of Wisconsin and Wyoming, however, have enacted unreasonable laws which have given members of this Association much annoyance and unnecessary expense during the past year. I am advised that the Secretary of Agriculture in one of these states has been unusually arrogant and overbearing in his dealings with outside nurserymen making shipments within his territory during the past season.

I recommend that the proper committee be authorized to investigate as to the constitutionality of the laws in these states and Oklahoma, and proceed at once to test the same with the least possible delay. It has been suggested that the Executive Committee be given discretionary power to appropriate funds and to proceed through the Legislative or through their own committee to test these or any other laws which in their judgment are a menace to the interests of the nurseryman. I shall be pleased to have you give this matter your consideration, thus avoiding unnecessary delay on account of no appropriation of funds, except for specified cases, which confronted your committee during the past year.

I personally wrote the various vice-presidents this year, requesting that they keep a sharp lookout for proposed adverse legislation in their respective states during the sessions of their general assemblies last winter, and promptly report same to the legislative committee. Few of the states held any session last year, but I urge upon these gentlemen the great importance of watching this matter during the coming winter. The passage of many of these laws can be prevented if proper action be taken beforehand.

Advertising.

I want to repeat, with greater emphasis if possible, what my predecessor stated at our last session regarding the necessity of giving greater publicity to our products through the medium of newspaper advertising. We are living in the greatest advertising age the country has ever known, as may be easily ascertained by closely examining the columns of our leading papers and magazines. The live, up-to-date nurseryman can ill afford to listlessly follow in beaten paths because they led his father to success, or to continue the methods that he himself even adopted ten years ago. We must adapt ourselves to new methods and the changed conditions brought about by this era of advertising.

Select some good advertising mediums, which publish the truth, and which have the confidence of their readers; send them honest, truthful ads, and let them know what you have to offer.

Furnish your customer just what you agree to furnish, thus upholding the respectability and truthfulness of the journal or magazine, and at the same time realize the consciousness of having treated your patron right, and

just as you stated you would in your advertisement.

Honesty and truthfulness in advertising is the only policy which will endure.

Exhibits.

I desire in this connection to especially call your attention to that feature of our convention known as "Exhibits" under the skillful management of Mr. Meehan of Pennsylvania, Mr. Earnard of Kansas and Mr. Kelsey of New York. This feature of our annual meeting has been developed until it has become one of the most interesting departments of the Association work. You will find here not only a display of nursery stock, fruits, flowers, etc., which will interest you, but machinery and labor-saving devices which will appeal to every "wide-awake, up-to-date" nurseryman in attendance. It has required the expenditure of much time and labor on the part of the gentlemen which is greatly appreciated. The exhibition rooms are located on the floor below and in an adjoining room on this floor, in which you can spend much of your time with profit to yourselves.

Insurance.

The question of mutual insurance among the members of this Association has been given much thought and investigation by the committee to which it was referred last June at Detroit.

On account of the varied exposure in the different plants and the constantly changing contents of the buildings, it would necessitate a personal examination by a representative of the insurance department. And on account of the widely scattered patronage which must necessarily be secured, it would be almost impossible for this personal examination to be made without great expense, hence this proposition is deemed impracticable, and we recommend that it be dropped for the present.

Editing Annual Report.

I recommend that the task of editing the minutes of the Association be placed in the hands of a committee of which the Secretary of the Association shall be chairman.

My reasons for so doing are from the simple fact that he is always present at each session of the convention, and knows more about the proceeding than any other member. In the second place he is compensated for his services, and in my judgment this is a part of his work. He can take a portion of his manuscript and edit it at his leisure, thus saving time in completing the work, with the result that the reports will be mailed to the members upon a much earlier date.

Program.

You will note by the printed program in the Pledge Book that arrangements have been made to hold but one business session of the Association proper, each day. The thought being that a session of nine o'clock to one daily would be more largely attended and prove more interesting than more frequent daily meetings. This will give the members an opportunity of spending more time in a social way, sight-seeing, in the exhibition room, etc.

This will give more time also for holding the annual meetings of associate or-

ganizations to which most of us belong, if it is desired, however, to hold an afternoon or evening session, the Program Committee will gladly consider your wishes in the matter.

National Council of Horticulture.

No one regrets more than I that through an oversight the call for a report from Mr. Maloy, Chairman of the Committee on National Council of Horticulture, was omitted from the printed program.

Indeed, I am personally more responsible for this than anyone else, but am pleased to state that a correction in the program has been made and Mr. Maloy's report will be forthcoming.

Forest Preserve.

The subject of Forest Preservation is one of the most important questions confronting the people of the United States today and one in which we as nurserymen should be vitally interested. If the ruthless devastation of our forests, coupled with the natural demands for lumber and railroad ties, is continued, we shall within another decade be confronted by a very grave problem.

We are forest builders and should give every encouragement possible to forest preservation.

There is a branch of the Department of Agriculture formerly known as the "Bureau of Forestry," but now called "Forest Service," under the direction of the Secretary of Agriculture and of which Hon. Gifford Pinchot is the head, which stands ready to co-operate with the different states, organizations or individuals whose object is the planting or preservation of forests.

In addition to this some of the states have enacted laws for the preservation of their forests and for the encouragement of forest tree planting, but there are many other states largely in the middle west and south, which have taken no action whatever in the matter, and it has suggested itself to me that we as an association should delegate to our various Vice-Presidents the duty of investigating, arousing interest, and if possible bring about the enactment of laws along this line, in their states.

I am inclined to think that it might be well to have a "Forest Preserve Committee," or a "Forestry Committee," whose duty it shall be to co-operate with the "National Forest Service" as well as the individuals having the matter in charge in the respective states, and render every assistance possible to bring about the desired result.

Committees.

All committees the past year have performed faithful and efficient work, and I desire to take this opportunity of expressing my appreciation of the same.

And finally, friends, I entertain the hope that the thirty-third annual meeting of this Association may be one of profit and pleasure. I know something of the vexatious and annoying things with which you have to contend during the year and it is well that you take a few days off about this time every summer and meet your fellow nurserymen and old friends who will buoy you up and send you back home much better fitted by having attended the meeting.

SECRETARY'S REPORT.

The president was followed by

Secretary Seager, who in a short report spoke of the work of his office and was followed by Treasurer Yates.

THE TREASURER'S REPORT.

The report of Treasurer Yates showed receipts for the year to be \$2905.22 and disbursements \$3309.20, leaving a balance in the treasury at the present time of \$2913.27.

COMMITTEE REPORTS.

Irving Kouse reported that as Congress had taken no action on the tariff his committee had found no occupation but were prepared for more work at the next session.

Wm. Pitkin reported that the main work of the committee on legislation had been with South Dakota laws as instructed at the Detroit meeting. The litigation was successful and nurserymen can now do business in that state by filing inspection certificate of their own state and paying a moderate license. Attention was also called to the illegal features of the laws of Wisconsin, Wyoming and Oklahoma, but no action had been taken. The committee feels that the laws can be defeated in these states and it would be wise to undertake it.

The report of C. L. Watrous on entomology led to a lengthy discussion which was joined in by several members of the National Society of Entomologists. The resolutions were read which had been passed by this society in relation to safeguarding this country against insect pests or plant diseases in imported plants, and also to have Congress empower the Secretary of Agriculture to stamp out such pests when introduced and threatening to become dangerous or migratory. Also in resolutions looking to uniform inspection of nursery stock for interstate shipment.

Orlando Harrison's report on national inspection law followed. He had asked for the opinion of eighty leading nurserymen by mail and read extracts from answers received, most of them favoring a national law and national inspection of nurseries. The question as stated by Mr. Harrison is, "Who is to be supreme, the state or nation?" States prove very jealous of their rights, and he thinks the attainment of uniformity is hopeless. He recommended that some definite system be established for inspecting imported goods, but aside from that advised dropping the subject or as C. L. Watrous put it, "Bury and forget to erect a headstone." A lively discussion followed, joined in by many members and also by Prof. Symonds of Maryland and Prof. Burgess of Washington, formerly of Ohio. Prof. Symonds recommended inspection of imported stock at point of delivery, and thought arrangements to do this could be made with the state authorities. Some of the members, notably Mr. Kirkpatrick of Texas, opposed inspection of imported nursery stock when the pests were liable to be introduced as readily in hay, fruit or by other means, or even by scientists, as witness the gypsy moth. It was unanimously voted to dispense with further action looking to a national inspection law.

Thos. W. Meehan reported on the exhibits, thanking the exhibitors for promptness in making exhibits and

spoke of the popularity this feature of the meetings had attained.

Wm. Pitkin reported that previous committees on transportation had done their work so well that the present committee has found it wise to confine itself to an effort not to allow any changes to be made. The nurserymen are now, however, threatened with an attempt to change rule 1, releasing the carriers from all liability for loss of freight due to causes beyond the carriers' control, such as fires or wrecks, even when due to the carriers' negligence, unless 20 per cent. additional to the regular rate of freight is paid. Nurserymen were advised to take steps to prevent this consummation.

Peter Youngers of the Committee on Mutual Insurance had taken up the subject with the insurance commissioners of most of the states and found such conflicting and impossible requirements that the project appeared impractical and he advised dropping it, which was concurred in.

AFTERNOON SESSION.

To allow the members to have all of Friday for an excursion to Oconomowoc to accept the hospitality of the Citizens' Association of that place and of Mr. Fred Pabst, who invited the association to visit his magnificent home and farm, it was decided to hold an afternoon session, and the first business of the afternoon session was the report made by the vice-presidents. They recommended Seattle as the place of next meeting, and fully one-third of the members present voted for Seattle. After some oratorical pyrotechnics glorifying the land where cherries requiring two or three bites to a cherry are produced, the eloquence of Pitkin, the able champion of Rochester, N. Y., finally prevailed, and that city was chosen for next meeting.

The ticket nominated by the Vice-Presidents was headed by J. W. Hill, who, however, declined re-election, and it required a division of the house to decide as to whether the association would allow him to retire and lose the best presiding officer the society has had. This being decided, the following were elected: President, Charles J. Brown; vice-president, C. M. Hobbs; secretary, George C. Seager; treasurer, C. L. Yates. Chairman executive committee, J. H. Dayton; executive committee, E. M. Sherman, W. B. Chase, J. W. Hill, George C. Seager.

J. M. Pitkin next reported on the question of sending out cheap lists at end of the season. He started by excusing himself for not preparing beforehand and so had attempted to abstract from his colleague Josselyn all the information he could. To gain possession of him he proposed buying him a drink and questioning him. Josselyn was not averse to giving information but refused the drink. When pressed for his reason he said that since he had undergone an operation he was unable to indulge. Pitkin sympathetically wanted to know all about the operation and was ruefully informed that his informant had had a severe attack of rheumatism, and the doctor had cut out the booze. Other humorous anecdotes enlivened his talk but as to cheap lists his conclusions were that they were an injury to the trade and to the customers of

the nurserymen, and that more care should be used in deciding what stock to grow and thus have less stock left to carry over, and that stock to be utilized for a bonfire. He was followed by an exhaustive and valuable paper by Judge Eugene Stark on "A Few Points of Improvement." (This paper is so valuable that we will reserve its publication for future issue.)

A resolution was introduced by F. W. Kelsey thanking members of the Society of Economic Entomologists for co-operation with the aims of the Association and asking the state vice-presidents to use efforts to have the laws of their states amended to conform to laws in those states where they have proven least burdensome to nurserymen. In speaking on the motion, Mr. Kerr of Texas spoke at length on the subject of inspection laws and said that this is a burning question and would become more drastic as time went on. In illustration, he gave an instance of a nursery company in Texas being sued for trees in several orchards which had been attacked by crown gall, although other orchards from the same block of trees are sound. Trees were sold at four cents and the damages claimed in suits for imagined crops were now called worth from one to several dollars per tree.

THURSDAY FORENOON SESSION.

The meeting opened at 10 a. m. The first paper read was on the Pecan by H. D. Simpson of Vincennes, Ind. He described their culture and spoke of the enormous profits to be made. C. J. Malloy referred approvingly to the educational work being done by the National Council of Horticulture, and C. L. Watrous made a motion, which was adopted, providing that the committee having this work in hand should be composed of three members. J. S. Kerr of Texas followed with a paper dwelling in glowing language on the magnificent horticultural and other advantages of the great Southwest. A paper by Mr. Pickington on the elements of success in the nursery business came next. Too many varieties and too loose credits were his text. Prof. J. B. Phillips of Virginia sent in a paper on Peach Yellows, which was read by Prof. E. L. Worsham of Georgia.

Mr. Waters read a feeling obituary tribute to the late M. A. Albaugh. F. W. Kelsey presented resolutions empowering the transportation committee to confer with the Interstate Commission to prevent increase in freight rates and delays of shipments, and commending the reduction in foreign mail rates. Prof. L. R. Taft delivered an able lecture on spraying, and J. Horace McFarland talked eloquently on the nurseryman's duty in the civic improvement movement.

THURSDAY AFTERNOON SESSION.

This session was devoted to the Question Box and minor committee reports. When HORTICULTURE went to press the session was still going on and the members were looking forward with eager anticipation to the promised excursion to Oconomowoc, Wis., on the morrow. Detailed account of the remaining proceedings will appear in our issue of next week.

THE TEMPLE SHOW.

JOHN WATERER & SON'S EXHIBIT OF HARDY RHODODENDRONS.

In favorable weather and graced by the presence of Her Majesty the Queen on the opening day, the Temple Show was more choice and beautiful than ever. There is an atmosphere of rarity and richness not noted in more spacious exhibitions; limitation of space here, has tended to give a decided gain in quality, and this year there was no suffocating sense of overcrowding. The orchids were in glorious array. These aristocrats of the floral kingdom greeted and appealed to the elite society who thronged and richly enjoyed the rare feast of color and form displayed in the orchid groups. Sander's gold medal exhibit was full of choice things, notably of fine *Odontoglossum crispum*; two deep-spotted forms, *Mauritania* and *Lusitania*, will be familiar names on both sides of the Atlantic. *Dendrobium Bronckhardtii*, an imported species and lately in flower at Kew, is a glorified thrysi-florum with more graceful and lengthy racemes than that variety; flowers of a soft pale purple tinge.

The Veitchian cup, this year offered for orchids, was won by F. Monteith Ogilvie, Esq., of Oxford, with a grand group of plants which also received the gold Lindley medal for high cultivation. Charlesworth & Co. had a distinguished gold medal group which included their new hybrid *Odontioda Charlesworthiana*, *Cochlioda Noetzeliana* x *Odontoglossum Harryanum*. The flower is a vivid scarlet; the influence of *Harryanum* is not strongly

noted except in giving size to the flower.

Hugh Low & Co. well deserved a gold medal for a most beautiful effect with American carnations, so deservedly popular now in this country. Arranged in pillar form with a background of mirrors festooned with smilax, it was an object lesson in light and graceful grouping. Roses were finely shown. The new ramblers, *Paradise* and *White Dorothy*, were leading features in the groups of all the main growers. Paul's new hybrid tea, *Elaine*, received an award of merit.

Begonias in great quantity and quality show a marked advance yearly in compactness and size. *Blackmore* & *Langdon*, the pioneers of the fringed singles, had a fine stand of these increasingly popular bedding and greenhouse plants. The new American *Nephrolepis Amerpohlii*, was represented by a single plant and deserves to be better known here. New plants worth noting were Sander's foliage plants lately shown at Ghent; *Pereskia Godseffiana* makes a pretty basket plant. *Croton Fred Sander*, of a rich gold and green color, secured an award of merit.

Ivy dentata variegata, a rich clear creamy sport from the type, is an acquisition. The hardy plant groups arranged on the lawns, the pretty rock garden effects, the choice variety of herbaceous flowers, secured much attention and point to a great revival in outdoor stock in recent years, especially in perennial herbaceous plants.

EDGAR ELVIN.

LONGIFLORUM VERSUS MULTIFLORUM.

Can any one of our readers specify the difference between the longiflorum and the multiflorum lily, so called? The distinction exists, on paper, when bulb orders are given, but, according to some of our correspondents, is a very intangible quality in the bulbs as they grow. If anybody can explain where the dividing line is between the two forms he will confer a favor on many interested inquirers.

PRIMULA OBCONICA AS A BEDDING PLANT.

As a reader of HORTICULTURE I would like to inquire whether any one has ever tried or known *Primula obconica* being used as a bedding plant.

C. H. F.

You will find something worth reading on every page of HORTICULTURE.

NEWS OF THE CLUBS AND SOCIETIES.

NEW JERSEY FLORICULTURAL SOCIETY.

The last meeting prior to the summer recess was held on the fifth instant at the Society's rooms in Orange, when the floral display of the season's flowers from the border and greenhouse filled the tables.

Peonies from S. & A. Colgate, gardener William Read, Charles A. Munn, gardener John Hayes, Stewart Harts-horne, gardener Arthur T. Caparn, and Charles Hathaway, gardener Max Schneider, delphinium and digitalis from Thomas Jones of Short Hills and cattleyas, helio-cattleyas, cyripediums, lycastes from Lager & Hurvell and Orson A. Miller.

The topic for the evening, "Flowers for Commercial Uses," was introduced by John E. Lager, and George Smith, A. T. Caparn, John Hayes, Orson A. Miller and President Malcolm MacRorie took part in the discussion. Mr. Lager stated that the demand at the present time was for soft colors and delicate tints; that the popular taste showed a leaning for any form of loveliness; that prices were influenced by the desire for something out of the common run and that this sentiment had a tendency to attract trade to metropolitan centres where \$2.00 was frequently paid for an article commanding only 75 cents outside. Mr. Miller declared that in his experience as a salesman he had found that a woman never knows what she wants, and when the clerk had torn down a whole shelf of goods she would return to first article shown which she had previously declared she did not want. He reverted to the time-worn maxim that the ability of the salesman lay in disposing of what he was most anxious to get rid of, and that the prevailing taste was dominated by woman's vanity. Upon a call for named varieties of peonies by the chair most of those present stated that the most striking flowers present had been cultivated for a long time by themselves - so long as to have lost their identity.

George Smith was appointed to visit A. D. Rose who is lying seriously ill at his residence in Montclair.

JOSEPH B. DAVIS.

RETAIL FLORIST ASSOCIATION.

I wish to enlighten the wholesale as well as the general florist associates of the city of New York, also your valuable paper, that the so-called Retail Florist Association of the Borough of Brooklyn, city of New York, is an association formed for the purpose of bettering the trade, sociability and a standard time for closing, and not to do harm or cause any bitter feeling to any one.

Every retailer doing a legitimate retail florist business in the Borough of Brooklyn, city of New York, is cordially invited to become a member and assured of a square deal.

Our next regular meeting will be held at our rooms in the Imperial, on June 22nd at 9 p. m. sharp.

WM. A. PHILLIPS, Sec'y.

NEW YORK FLORISTS' CLUB.

The June meeting of this club, the last for the season, was held on Monday evening, June 8, with a rather light attendance. The various active committees which made reports were those on transportation, P. O'Mara, chairman, outing, W. E. Marshall, chairman, and ladies' night, W. Rickards, chairman. Mr. O'Mara's recommendation of the Lackawanna route to the Niagara Falls convention next August was adopted by a unanimous vote. Mr. Marshall distributed copies of the complete program for the annual outing and games to take place at Witzel's Point Grove, July 1. Mr. Rickards received a vote of thanks for his committee in recognition of the success of ladies' night last month. Mr. Marshall's report on the progress being made by the bowling team seemed to indicate that F. H. Traerdy will not be called upon to pay for many, if any,

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington met on June 2nd, at Scottish Rite Hall. There was a very poor attendance and but little business transacted. This hall not being suitable for the meetings a committee was appointed to look up a better one. Wm. F. Gale was appointed chairman of the committee on "Sunday Law." It is desired to have a special meeting so that the opinion of each member of the club can be ascertained on this subject. It is understood that C. H. Mehan has shipped to F. H. Kramer of Washington, D. C., the pink seedling "No. 26," also "No. 27" and "No. 28." These roses will be grown for Mr. Mehan to be exhibited at the chrysanthemum show this fall.

AMERICAN APPLE GROWERS' CONGRESS.

The executive committee of the American Apple Growers' Congress held a meeting at the Southern Hotel, St. Louis, last week to make arrangements for their sixth annual convention which is to meet in that city in August next when topics of interest to apple men will be discussed. The speakers for this occasion have not yet been selected. Several reports were received on the apple crop, which were of a somewhat discouraging character.

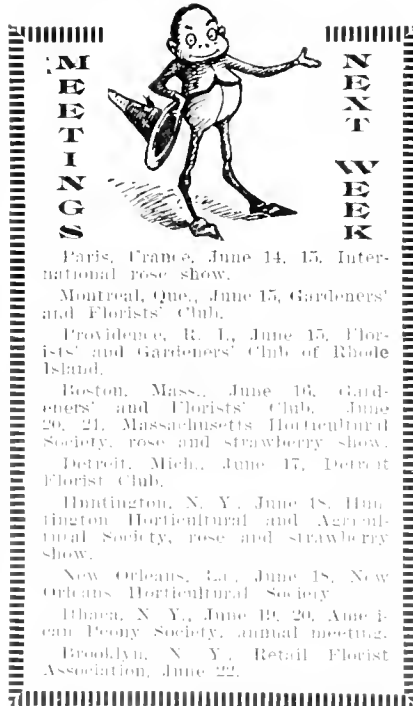

Among the gentlemen present were Prof. H. C. Irish, Senator H. M. Dunlap, W. R. Wilkinson, T. C. Wilson and T. H. Todd. A large attendance at the convention has been promised.

ALBANY FLORISTS' CLUB.

The meeting on June 4 was with W. C. King and forty members, the largest number in some time, were present. Fred A. Danker, representing a committee who are preparing a circular upon the care of plants, for distribution among customers, asked for an extension of time. H. G. Eyres was unable to be present and deliver an address upon the cultivation of the amaryllis, with which he has been very successful, but W. C. King reviewed the spring trade in happy fashion and spoke optimistically of the future. Lewis Schaefer entertained with recitations, refreshments were served and the evening was altogether enjoyable.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club held their regular meeting on the first Thursday of the month. W. O. Johnston of the Foley Manufacturing Co. was elected a member and W. A. Arnold, foreman for Geo. Reinberg, was proposed for membership. It was decided to hold the annual picnic on Sunday, July 13th, at Morton's Grove. This place was again selected because of its fine grounds and excellent shade. The program has not yet been decided upon.

Paris, France, June 14, 15, International rose show.

Montreal, Que., June 15, Gardeners' and Florists' Club.

Providence, R. I., June 15, Florists' and Gardeners' Club of Rhode Island.

Boston, Mass., June 19, Gardeners' and Florists' Club; June 20, 21, Massachusetts Horticultural Society, rose and strawberry show.

Detroit, Mich., June 17, Detroit Florist Club.

Huntington, N. Y., June 18, Huntington Horticultural and Agricultural Society, rose and strawberry show.

New Orleans, La., June 18, New Orleans Horticultural Society.

Ithaca, N. Y., June 19, 20, American Peony Society, annual meeting.

Brooklyn, N. Y., Retail Florist Association, June 22.

Free tickets to the convention tournament on account of scores made in the practice games. Jos. Manda and John Donaldson had won the first and second prizes offered by Mr. Marshall. Special committees as appointed presented resolutions of condolence on the death of Secretary John Young's mother, William Scott and James Shanley, severally.

Harry Turner, gardener for Howard Gould at Port Washington, showed two vases of English carnations, Mrs. Trelawney and Calypso, for which a cultural certificate was awarded. Mr. Nash of the New York Botanical Garden then entertained the members with a series of beautiful stereoscopic pictures, in color, of hardy flowering and trailing shrubs and trees for which, in the case of a hearty vote of thanks was accorded.

The next meeting of the New York Florists' Club will be on the second Monday in September.

HORTICULTURAL SOCIETY OF NEW YORK.

The meeting of the Horticultural Society of New York and the American Rose Society, held in Bronx Park on June 10 and 11, was chiefly remarkable for the complete absence of the Rose Society members from the exhibition boards. There were but few exhibits of roses anyway, and they were all from the local society's membership. The most meritorious display, which filled the entire center of the hall, was made by J. H. Troy of New Rochelle; it was in every respect a remarkable display. Each variety was shown separately, and they were arranged in fancy baskets of all kinds. The whole display was an artistic triumph and illustrated quite novel ideas in showing roses. The Pierson cup for the most meritorious exhibit of the show went to this.

W. A. Manda staged a large group of *Wichuraiana* hybrids. F. R. Pierson had a group representative of the different races of roses.

Dr. W. Van Fleet had some entirely new *Wichuraiana* hybrids of exceptional merit. One (with the Cherokee) had semi-double, flatly expanded flowers four inches across, cream white; another (with *Souv. du Pres. Carnot*) was a glorious pale pink, double, three inches across. Both received the Horticultural Society's silver medal.

Variety was added by geraniums by R. Vincent & Sons Co.; sweet peas and a great display of peonies from F. R. Pierson Co.; orchids from Lager & Hurrell and Julius Roehrs Co.

Much attention was given to the vase of carnations of the *Malmaison* type from H. Turner, superintendent for Howard Gould, Port Washington.

At the formal meeting Leonard Barron gave an illustrated address in which the Rose family was reviewed in detail. The speaker praised the *Wichuraiana* and multiflora hybrids in particular and showed by a chart how rich was the material in the family as yet untouched by the horticulturist.

It was announced that a committee had been named for the fall show to take place in the American Museum of Natural History, Nov. 17, 18 and 19.

RHODODENDRON SHOW AT BOSTON.

The annual rhododendron show of the Massachusetts Horticultural Society was held at Horticultural Hall on Saturday and Sunday, June 6 and 7. As on previous occasions, while the display of rhododendrons was very liberal, a large proportion of the show was made up of other fine products of the garden and the effect of the rich exuberance of spring color was gorgeous in the extreme. The largest display of rhododendrons came from Walter Funnexell, gardener T. D. Hatfield, about 300 vases being filled. Mrs. J. L. Gardner, gardener Wm. Thatcher, was also a large contributor of rhododendrons. Irises from Mrs. F. Ayer, gardener Geo. Page, T. C.

Thurlow, W. W. Rawson & Co., Blue Hill Nurseries, F. J. Rea and others were in great profusion and made a glorious showing. Among the most notable attractions was a group of large fuchsias from Harvard Botanic Garden, gardener Robert Cameron. Rhododendrons and kalmias in pots and a very extensive collection of aquilegias, irises, campanulas, etc., were contributed by R. & J. Farquhar & Co. E. J. Shaylor was on hand with a group of choice peonies including some handsome seedlings. J. E. Rothwell, gardener E. Johansson, was represented by a table of orchid bloom among which were many rare gems. Mrs. Gardner also showed orchids. Among the vegetable exhibits that from the Spaulding estate, gardener F. E. Cole, attracted especial notice for the great variety of hot house vegetables which it comprised.

Following are the prize awards: Orchids.—25 plants, arranged for effect with foliage plants: 1st, Mrs. J. L. Gardner. Rhododendrons.—1st, Walter Hunnewell; 2d, Mrs. J. L. Gardner. German Irises.—1st, F. C. Thurlow & Co.; 2d, F. J. Rea. Hardy Herbaceous Flowers.—1st, Blue Hill Nurseries; 2d, ditto. Collection of Vegetables, grown in 1908. 1st, Spaulding Estate; 2d, W. J. Clemson. Silver Gilt Medal to R. & J. Farquhar & Co., for display of Rhododendrons and Kalmias. First Class Certificates of Merit to Harvard Botanic Gardens, for culture of *Cereus speciosus*, and Julius Heurlin for *Lupinus Moerheimii*. Honorable Mention to Harry S. Rand, for *Magnolia Watsoni*.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Reduced Rates for the Niagara Convention.

The Trunk Line Association covering points in the states of New York, Pennsylvania, New Jersey, Delaware, Maryland and part of Virginia and West Virginia has granted a rate of one fare and three-fifths for the round trip on the certificate plan to those desiring to attend the convention. Other associations have not as yet granted any concessions.

Other particulars will be announced later. W. N. RUDD,
Secretary.

MISSOURI STATE BOARD OF HORTICULTURE.

The Missouri State Board of Horticulture held a three-days' session at Mountain Grove, Mo., the past week.

Twenty prominent horticulturists were present during the session. On Friday, the last day of the meeting, the following officers were elected: President, W. P. Stark; Vice President, R. L. Hill; 2nd Vice President, J. J. Chastin; Treasurer, T. H. Todd; Secretary, L. C. Howard.

The Tarrytown Horticultural Society have issued their prize schedule for the annual exhibition, November 4, 5, 6, and same can be had on application to E. W. Neubrand, secretary, Tarrytown, N. Y.

During Recess

Last Friday afternoon the Detroit contingent had a welcome excuse for a half-holiday because the local wholesale houses fought out a battle on the diamond at Belle Isle. The result was a score of 20 to 15 in favor of the Michigan Cut Flower Exchange. Andrew Ferguson, their pitcher, did splendid work. The Detroit Florist Supply House was their opponent. L. Charoat pitched for them.

The program for the eighth annual outing of the New York Florists' Club has been received and is in line with its predecessors as a most enticing list of prizes devoted largely to giving the young people a good time. There are 23 classes of three prizes each in the printed list, and it is understood that several others have been added since printing. No doubt the assemblage on board the steamer Isabel at starting time, 10 a. m., July 1, will be a large and happy one. We hope the weather clerk will take due notice and be agreeable.

The St. Louis Florist Club's annual outing has been arranged for by the club's trustees, Chas. Scoenle, W. C. Smith and Carl Beyer. Normandy Grove has been selected and the date is July 15th and the club members with their families and friends will enjoy the exclusive right to the grounds. This is a new location with more shelter and better dancing pavilion, bowling alleys and base ball grounds. The trustees are now engaged in making up the program for the day. A number of fine prizes have already been donated for all the events and the club's best outing in years is looked for.

CLUB AND SOCIETY NOTES.

J. Horace McFarland of Harrisburg, Pa., gave an illustrated lecture on June 8, on "Crusade Against Ugliness," under the auspices of the Publicity Club of Minneapolis, Minn.

The Gardeners' Club of Baltimore, organized in 1887, has appointed a committee to revise the by-laws and change the name to the Gardeners' and Florists' Club of Baltimore.

The Massachusetts Horticultural Society will hold their rose and strawberry show on June 20, 21, in Horticultural Hall, Boston; open Saturday from 12 to 6 p. m., Sunday, from 2 to 6 p. m.

The premium list of the American Peony Society's fifth annual exhibition, to be held at the State College of Agriculture, Ithaca, N. Y., has been issued. The dates of the exhibition are June 19 and 20. Copies may be had from the secretary, A. H. Fewkes, Newton Highlands, Mass., and entries should be addressed to the manager, L. D. Batchelor, Cornell University, Ithaca, N. Y. Prof. Whetzel will report as chairman of the committee on diseases of the peony. The business meeting will be held at 3 p. m., June 19.

Obituary

James Shanley.

In the death of this well-known florist of Brooklyn, N. Y., the florist trade loses a man who in all his dealings was an honor to the fraternity. He was beloved by his fellows for his straightforward integrity and kindly disposition. He was long a faithful member of the Society of American Florists and the New York Florists' Club.

Mr. Shanley was born in County Louth, Ireland, and came to this country as a young man, soon identifying himself with the florist trade in a humble way in New York City. He was employed by C. L. Allen at Queens and afterwards by John Condon in Brooklyn, working for the latter for fifteen or sixteen years, and then went into business for himself about seventeen years ago at the greenhouses

JAMES SHANLEY.

which he has conducted ever since, near the entrance to Greenwood Cemetery.

He had been a sufferer from rheumatism for some months, and this with other complications necessitated his going to St. Mary's Hospital two weeks ago, where three operations were performed which were not successful, and he died on Thursday, June 4, at the age of 62. He leaves a widow and one son, who will continue the business.

The portrait which appears herewith was taken 26 years ago, but it was the only one we could obtain. To Mr. Shanley's older friends it will, perhaps, appear familiar.

Mrs. Jerome Jones.

Mrs. Jerome Jones, wife of the head of the Jones, McDuffee & Stratton Company, died on June 3, at her home in Brookline, Mass. Mrs. Jones' name became familiar all over the world wherever chrysanthemums are known through the beautiful flower named for her by her father who originated it, the late H. A. Gane, of West Newton, Mass. Mrs. Jones was an ardent lover of flowers and a generous patron of the Massachusetts Horticultural Society.

Robert B. Graves.

Robert B. Graves, for the past thirty years identified with the florist business in Northampton, Mass., died at his home in that town on June 6,

ROBERT B. GRAVES.

at the age of eighty-eight. A few years ago he celebrated his golden wedding, and his wife now survives him, together with a daughter and two sons, one of whom, A. B. Graves, will continue the business.

George Roy.

George Roy, a well-known and suc-

GEORGE ROY.

cessful old-time gardener, died suddenly of apoplexy at his home in Bel-

videre, N. J., where he has been living in quiet retirement for the past twenty years. His age was 79. Mr. Roy was a native of Forchabers, Morayshire, Scotland, and served his gardener apprenticeship at Gordon Castle. He went to England, where he had charge of several large estates successively, and in 1858 came to America where he also held positions of large responsibility, the last being as superintendent of Etenbach, near Belvidere, N. J., where he remained for 19 years, after which he retired from active service. He leaves a widow, four sons and one daughter, the daughter and two sons being the offspring of a former marriage, one of whom is the well-known D. F. Roy, superintendent of Col. Converse's estate, "The Moorings," at Marion, Mass. One of the younger sons is John B. Roy, who has charge at the J. Sherman Hoyt place, Rowayton, Conn.

George H. Linsdale.

George Linsdale has been a familiar figure in the wholesale flower district of New York City for a quarter of a

GEORGE H. LINDALE.

century. In fact, it is nearly thirty years since, as a mere boy, he began peddling flowers from a basket, and by industrious application soon established a stand on 23rd street, afterwards opening a store at 23rd and Lexington avenue, which he conducted for many years. For the past three years he has been located on East 34th street, during the greater part of which time his health has failed continuously and his death, long expected, came on June 7.

Mr. Linsdale was 43 years of age and a native of Yorkshire, England. He leaves a widow and two daughters.

A Sad Fatality.

Miss Smith, the efficient superintendent of the horticultural department of the Griswold Seed Co., of Lincoln, Nebraska, was run over and killed by a reckless automobilist in that city. Miss Smith was a most estimable lady, very proficient in her department; an intelligent, Christian woman. Her loss is severely felt by the company, there are so few in the West with horticultural knowledge who can take her place.

C. S. HARRISON.

News Notes

Mrs. Russell Sage has donated a large plantation of rhododendrons to Central Park, New York.

J. L. Johnson, DeKalb, Ill., has bought the Irish greenhouses and will add them to his present range.

Among recent improvements on the estate of Joseph P. Bass at Bar Harbor, Me., is a large rose garden.

Charles P. Muller, florist, of Chester, Pa., has donated some 500 plants to the city for beautifying the public grounds.

Franks & Co., of Champagne, Ill., are making extensive additions to their greenhouse plant in the university town.

Wm. Hagemann & Co. are about to remove their offices from 55 Dey street, New York, to the new Hudson Terminal building.

Nurserymen report an increasing interest in small fruits among the farmers of Maine, who are this season buying largely of this stock.

A terrific hail storm visited Meadville, Pa., on May 29, lasting twenty minutes. Over 400 lights of glass were broken in the greenhouses of August Krueger.

The four wholesale houses in St. Louis will close, as last year, during the months of July and August at 5 P. M. each day and noon on Saturday.

Jas. G. Hancock, for twenty years of the firm of Geo. Hancock & Son of Grand Haven, Mich., now of La Grange, Ill., is rebuilding his residence lately destroyed by fire.

F. H. Kramer, Washington, D. C., has purchased the florist business of Walter Gorden, of 722 9th St., N. W., and after making extensive improvements he will conduct it as a branch store.

Hubert Hanson, for many years a grower of carnations at 4016 N. Clark St., Chicago, is about to retire from business and is offering his fine range of houses for sale. His plant is in what is known as Edgewater.

George Saltford is well settled into his new location at 42 West 28th street, New York, and his plans as confided to us indicate that he proposes to be strongly in evidence in the wholesale flower trade of the next season.

F. A. Greenlaw, who about a year ago leased the Piety Corner Greenhouses, Waltham, Mass., has been absent from home for more than a week, and anxiety is felt regarding him. J. T. Silman, on behalf of a creditor, is in charge of the place.

W. J. Elliott, the renowned plant auctioneer, will complete his labors for the season on Tuesday, June 23, with a sale of unprecedented magnitude and the celebration thereof at the headquarters, 42 Vesey street, New York, on that day will be something gorgeous.

Prof. Waugh of Massachusetts Agricultural College is giving the senior class in landscape gardening a week

ORCHIDS

We beg to announce the following fresh arrivals of Orchids all in finest condition.

CATTLEYA LABIATA. This is the third and last lot this season.
CATTLEYA TRIANE. The second lot to arrive in perfect condition.
CATTLEYA PERCIVALIANA in perfect shape.
CATTLEYA GASKELLIANA in best of condition, and
CATTLEYA MOSSIE.

Also Dendrobiums such as **D. THYRSIFLORUM, D. FORMOSUM, VANDA COERULEA, ONCIDIUM SPLENDIDUM,** etc., etc.

Write us for prices and we can assure you that you will be well pleased both as to quality of plants and price of same.

We also have a full line of supplies such as peat, live sphagnum and orchid baskets in all sizes.

LAGER & HURRELL, Summit, N. J.

of practical work in the Boston Park System. A schedule for each day is mapped out; they have brought their drawing and surveying instruments with them, and will have a taste of what work in the field actually means.

PROPAGATION OF SCIADOPITYS VERTICILLATA.

Editor HORTICULTURE:

I was much interested in looking over HORTICULTURE for May 23. The item which caught my attention, and that interested me most, was on the propagation of *Sciadopitys verticillata* by graft. I should like to know whether any one has propagated it after this manner in this country, and, if so, who? Shall be glad to hear from any reader of HORTICULTURE who has information on this point.

I think that it would be very interesting to know at just what time of the year this work should be done over here, and whether it is successful outside of the old country. P. T. B.

USEFUL BOOKS.

We can supply the following books, postpaid, at the prices listed:—

The Chrysanthemum. Herrington. Price, 50 cts.

How to Make Money Growing Violets. Saltford. Price, 25 cts.

A NOTABLE SOCIETY FETE.

The Charity Bazaar at Holm Lea, Professor C. S. Sargent's beautiful estate at Brookline, Mass., on Saturday, June 6, attracted an attendance of not less than 20,000 people representing the elite of Boston, New York and Newport society. It is asserted that in the social history of America probably nothing has ever been achieved which equaled this affair. Amidst all the dress and show, peerless beyond all else that nature and art could produce to adorn this great spring festival were the rhododendrons, always glorious at Holm Lea, better this season than for many years before.

NEWS NOTES.

The grounds of Mrs. Nathaniel Thayer, So. Lancaster, Mass., were opened to the public last week while the rhododendrons were in bloom.

June 7th was Confederate Decoration Day at Arlington and fully 5000 people gathered there to do honors to those who wore the grey. After impressive exercises hundreds of bunches of flowers were scattered on the graves.

A Rhododendron Carnival was held at Florence, Oregon, on May 20, in which a naval parade was the chief feature and the crowning of the Queen Rhododendra by Joaquin Miller, "the Poet of the Sierras," was the important event. The affair was so successful that it bids fair to be repeated another year on a larger scale.

VEGETABLE PLANTS

CABBAGE Wakefield, Early Flat Dutch, and other early varieties. Surehead, Late Flat Dutch, Danish Round and Ballhead and other late varieties at 20c per 100, \$1.00 per 1,000, \$8.50 per 10,000.

R. VINCENT JR. & SONS CO. WHITE MARSH, MD.

SPRING PLANT TRADE IN CHICAGO.

Chicago bedding out trade is growing to a close for the season of 1908 and the usual shortage of good bedding geraniums is developing. Though the prices in general were not as high as last season and the quantity grown considerably larger, the shortage is just as apparent. The greatest call is for S. A. Nutt with Beaute Poitevine for salmon pink and Jean Viaud for clear pink supplemented by a heavy call for Madame Sulleroi, coleuses and alyssum for borders and edgings. There has also been an unusually heavy demand for salvias and the new dwarf flowering variety Zurich is selling rapidly and bids fair to become very popular here in Chicago. As a rule, the growers of bedding plants have found a market for all their stock and as they could have sold more had they had it they will make arrangements to grow more extensively next year.

INCORPORATED.

The La Crosse Floral Co., La Crosse, Wis., C. E. Shaefer, W. R. Eilers; capital, \$10,000.

The Hickory Seed Co., Hickory, N. C., R. O. Abernathy, W. J. Shuford, A. L. Shuford, A. R. Sticker; capital \$20,000.

The Wilson Plant Oil and Fertilizer Company has been incorporated at Summit, N. J., for the purpose of manufacturing and selling fertilizers and other florists' supplies. Andrew Wilson is president and W. G. Badgley, secretary and treasurer.

The Brant-Hentz Flower Company has been incorporated under the laws of New Jersey to deal in cut flowers, plants and nursery trees and do decorating and landscape gardening. The company will pay special attention to the wholesale flower trade. Henry Hentz, Jr., will be president of the new company and Elwood Brant, treasurer. The principal office and greenhouses will be at Madison, New Jersey. Mr. Hentz is well known for his success as a grower of roses. Mr. Brant is also a successful florist and is the present owner of the property and greenhouses on Shunpike road to be acquired and extensively improved by the company.

Seed Trade

Hard times have not hurt the seed trade in Chicago. The leading houses report an excellent season and even the unfavorable weather has not materially interfered with their sales.

Mr. Gary, who has been putting out some of the acreage of beans for the Leonard Seed Co. of Chicago, has returned to the city and will soon be looking after some of the trade on the road again.

R. & J. Farquhar & Co., of Boston, report that the spring trade is holding longer and steadier than in any previous season in their experience. All classes of goods have had an unprecedented demand, but for a spraying material, spray pumps, etc., the call has been and still continues most remarkable.

Onion set crops in the middle west are backward on account of the wet weather of the past thirty days. Some of the large seed houses are awaiting developments of the next two or three weeks before taking on many more contracts than they have already made, as the prospects are now as favorable as could be wished for a large crop. Any further unfavorable weather conditions might lead to a heavy shortage in onion set crop in this section.

MISSOURI BOTANICAL GARDENS.

The first Sunday opening this year, of Shaw's Garden, St. Louis, took place Sunday, May 7th and the gate keeper counted 16,559 persons who entered the gates. The crowd was not as large as usual owing to the threatening weather and intense heat. Superintendent Irish with a large force was on hand to receive and show the visitors through the garden which surely looked beautiful. All the points of interest were visited but the orchid and cacti houses received special attention. The next Sunday opening will be the first Sunday in September.

NEWS NOTES.

L. Bauman & Co., 76 Wabash Ave., Chicago, will be found in their new quarters, 118 E. Chicago Ave., about July 1st.

The florists' supply business is holding up well in the West. Some of the Chicago houses report an unusually good year.

The florists of Belleville, Ill., enjoyed a great business last week. The Egyptian Drummers held its annual meeting there and the floral parade was one of the features a number of very attractive floats being made up by the florists.

Visitors in Chicago: A. L. Glasser, of Dubuque, Ia.; Mr. Kaber, of La Porte, Ind.

S. Carlquist of Lenox, Mass., sailed from New York for a European visit on June 10.

Mrs. S. Hefele, New York, is at the St. Francis Hospital slowly recovering from a severe illness.

Alexander McConnell, of New York City, is recuperating at Norfolk, Conn., after his recent illness.

George H. Bartlett, formerly of Suncook, is now manager of an extensive plant in Franklin, N. H.

Philip Einsman of Astoria, N. Y., is about to start for his home in Darmstadt, where his father is very sick.

Mayor Hibbard has reappointed Superintendent Sullivan of the public grounds department of Boston for the coming year.

Harry Balslev, representative of the Detroit Pot Manufactory, has been calling on his Chicago patrons this week.

B. S. Slinn, Jr., wholesale florist, New York, sailed on June 3 for a summer tour in France and other parts of Europe.

Arthur Rogers, assistant salesman for E. A. Asmus at the New York Cut Flower Company, is reported as dangerously ill.

J. R. Shields, gardener for F. G. Crane, of Dalton, Mass., will sail on the S.S. Manretania June 24 for a two months' trip abroad.

William H. Kuebler, Brooklyn's commission florist, sailed with Mrs. Kuebler and two children, on June 3, on a visit to Norway.

A. I. Simmons, florist, on 63rd street, Chicago, who has been very ill, is now convalescing and is contemplating taking a trip soon.

J. H. Colman, at one time a well-known salesman for the Cleveland Seed Co., has taken a position with the Leonard Seed Co. of Chicago.

Paul Beyers of A. F. Beyers of South Bend, Ind., was a Chicago visitor this week.

HART'S HANDY HANDLE

"At Easter-time, with a little chiffon decoration, and the Handle, we were able to increase the value of plants from 50% to 100%."— H. E. WILSON.

Write for descriptive circular and prices

GEO. B. HART, 24 Stone St., Rochester, N. Y.

Mr. Beyers reports trade as good, and was looking up stock.

C. Willard Smith, who handles a large share of the jobbing and canning trade for the Leonard Seed Co. of Chicago, is able to again resume his duties after a short illness.

Among the passengers sailing on the Ryndam, Wednesday, June 10, were John Kemper, Brooklyn N. Y., Mr. Ebdinge, of Ebdinge & Van Goos, Mr. Kester, of Koster & Co., Buskoop, Holland.

Mr. and Mrs. George M. Stumpp, of New York, sailed June 9 on the Kronprinzessin Cecile. They will take an automobile trip in Europe and expect to meet M. O. Jordan, of the J. M. Keller Co. and Mrs. Jordan in Cologne. Mr. and Mrs. Jordan sailed last week on the New Amsterdam.

J. H. Wilson has resigned his position with Vaughan's Seed Store, Chicago, and has gone on the road for the Leonard Seed Company. Mr. Wilson came from Boston a little over a year ago. He has made a great many friends in Chicago and proved himself a very capable and energetic business man.

Mr. and Mrs. Fred C. Weber and their daughter, Adele, in company of Miss Tillie and Linnie Meinhardt, all of St. Louis, will leave, the latter part of this month, for a trip to Denver, Colorado Springs, Yellowstone Park and other points of interest in the far west. This pleasure trip will consume a month.

Weigel & Ujfalussy, who succeed to the business of Emil Steffens as manufacturers of florists' wire designs and sundries, have taken a well-advised course in establishing their ware rooms at 136-138 West 28th street, close to the centre of the wholesale florist trade of New York. The Steffens' business has been in existence for over forty years and under aggressive management offers an excellent opportunity for development.

FLOWER MARKET REPORTS

BOSTON Market conditions here are unchanged from last week except in the increased receipts of peonies and the reduced values of roses and carnations. Peonies are in large supply and are selling fairly well. Lily of the valley and sweet peas also seem to move a little better, but business is very slow, taken as a whole. There are quantities of lilies around and they are very difficult to dispose of. The barometer of the flower business, otherwise known as the street fakir, is proclaiming loudly his offer of "fine large roses a dozen for 5 cents." That tells the story.

CHICAGO The cut flower market is still suffering somewhat from an over-supply of stock. Flowers are, however, of better quality than a week ago, and with commencements near at hand, the surplus will soon disappear. Weddings, too, as the month advances, are using up some of the best flowers, particularly roses. Peonies are coming in faster than they can be used to advantage and the retailer and the wholesaler are both having their troubles trying to satisfy the grower, who in turn cannot see where his profits are to come from. Pansies are looking fine, and the blooming plants put up in baskets are very attractive, selling more readily than the cut blooms. Roses are plentiful, and good stock is bringing fair prices. A few good lilies are seen, and gladioli are more in evidence each day. Sweet peas, especially in white and light pink, are plentiful in the market. Surely purchasers since the Memorial holiday have had everything to choose from and could buy at decidedly low prices, considering the quality of the stock.

DETROIT It is very difficult just now to quote prices on anything reliably. The two controlling factors, quality and demand, are both absent. This year's crop of large June weddings is very small and all the other work does not compare at all with the enormous quantity of flowers shipped in. In this connection it might be well to mention that express companies are not in need of our special assistance. If the growers would more closely scrutinize what they do send it would reduce ex-

press charges quite a little and save the commission men the trouble of culling out. The Michigan Cut Flower Exchange have received their first lot of fresh fancy ferns; this firm has so far 3000 peonies put into cold storage.

NEW YORK Steadily shrinking in activity day by day the flower market in the metropolis is rapidly assuming its mid-summer character. Already are seen large quantities of small roses cut from young stock. Thus far, as usual, Bride and Bridesmaid predominate, but Richmond and Killarney make up most of the balance. Peonies are at their height this week and almost monopolize the market and demand. Carnations are very abundant and so are lilies, the former showing the wear and tear of the season unmistakably. Cattleyas, mainly Gigas, as now coming in are simply superb. Among the promiscuous stock in evidence at present are gladioli, centaureas, pyrethrums, irises and moss roses. Sweet peas are of excellent quality.

PHILADELPHIA Conditions have improved slightly, not up to former Junes but as good as was expected. Many of the Beauty growers are now throwing out and replanting which has had an appreciable effect on prices. The quality still keeps good. Fancy quality in Brides and Bridesmaids was in good demand but the bulk of the stock was mediocre. Killarneys are showing the effect of the weather more than any other rose at present, and mildew is very prevalent. Kaisers are poorer than usual at this season. As for carnations one-half the stock coming in is so poor that even the fakirs will not look at it. There is excellent demand for the few fancies available. Orchids are scarcer, Cattleya Mossie mostly. Lily of the valley selling better; quality very good. Sweet peas also better and demand excellent. Peonies are coming in plenti-

fully and are now finding a ready market. Among the minor items conspicuous at present are Coreopsis grandiflora, Lupinus polyphyllus, Centaurea imperialis, snapdragons, and yellow daisies. Greens plentiful and good. Gardenias have shortened up considerably and this market is now in healthier condition.

WASHINGTON There is but little doing in the flower trade here except in the matter of weddings and commencements. The sweet pea market is demoralized, it being next to impossible to get rid of them at any price. There is some very fine phlox in the various stores and it seems to find better sale than the other cheap flowers. Roses hold their own remarkably well, especially Beauties, there being a good demand for them for most of the commencements.

PHILADELPHIA NOTES.

William Palek, with the Pennock Bros., sails June 25th for a well-earned vacation to his native land, Denmark.

Jno. Burton's two new truss houses of the King Construction pattern are now almost complete and only await the company's inspection for the final touches and the planting.

It is rumored that Joseph Heacock will cut out several of his Beauty houses the coming season and devote them to other crops.

We hear the highest praise on all sides for Arthur Niessen's philosophical paper in modern methods in flower raising and distribution. We must diagnose the trouble correctly before we can cure. Now what is the cure? Shoot the fellow who dares to build the next greenhouse? Or what?

Beloit, Wis., June 1 (Special).—Frank T. Mahan, a florist, was fined \$25 today for employing children under 14 years of age.—Milwaukee (Wis.) Sentinel.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$12.50.

John A. Payne

Greenhouse Designer and Builder
260-274 Culver Ave., Jersey City, N. J.

The PAYNE "Grip - tight Fitting" Pipe Tie

for purlins and columns, is the strongest and most secure fitting yet produced for this purpose, because it is held fast by two bolts where the greatest grip is required. They cannot break because the bolts are close to edge of pipe.

Iron and Wood Frame Greenhouses of every type. Material only or erected.

Let us estimate on your requirements.

Is Your Name In The Above List? If Not, Why Not?

Expressions from Men Who Know

Mr. J. G. Frisz, of Vincennes, Ind., writes as follows:
 "Your No. 14 Boiler is carrying 25,000 square feet of glass and I can keep it at 100° in the coldest weather without any trouble. I have three other types of boilers also heating a range of 25,000 square feet of glass, but the **No. 13 Kroeschell boiler only takes half the coal and half the work**, to get the same results."

P. S.—Mr. J. G. Frisz, of Vincennes, Indiana, has the largest range of glass in Indiana devoted to vegetable forcing."

Damm Bros., Chicago, Ill., write:
 "In 1884 we bought one of your No. 12 boilers to take the place of four smaller boilers of another make. Your boiler has done the entire work to the highest satisfaction, **saving labor** and about **one-third of the fuel** we used to burn before. We had that boiler up to 1906, that is 12 years, having no repairs on it whatever, except one set of flues we put in in 1900. Last fall we installed one of your No. 14 boilers, having enlarged our plant. It takes care of 35,000 square feet of glass very easy. When firing we keep the ash door open only about one inch. We think your No. 14 boiler could carry 40,000 square feet of glass."

Mr. Nic Zweifel, North Milwaukee, Wis., writes:
 "I have a range of 200 foot houses with a total of 27,000 square feet of glass. **I can get all the pipes warm in 30 minutes** with one of your No. 14 Greenhouse Boilers and it is very easy firing. Can fire just as easy with screenings as with lump coal."

KROESCHELL BROS. CO., 35 ERIE ST., CHICAGO

PATENT APPLIED FOR

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: **Result**, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

The Advance Ventilating Apparatus

"Your machine is the best we have ever used" is what an Ohio florist writes us in remitting for his machine. It is not good only in one part but it is the best in all parts—the results of experience, of careful study, of mechanical construction, best material and backed by moderate prices that makes our line so popular. Give us a trial.

Notes from the Arnold Arboretum

As the last of the showy Ericaceous shrubs the Mountain Laurel is now in bloom and the large group on Hemlock Hill is a mass of pink flowers shown off to the greatest advantage by the dark background. The Mountain Laurel must certainly be considered as one of our most beautiful native shrubs and is as effective when massed in large groups as when planted singly as undergrowth on the borders of woods. A very fine variety is *Kalmia latifolia* var. *rubra* with deep pink flowers, while the white variety var. *alba* is perhaps less handsome than the common light pink form. Very peculiar is *K. latifolia* var. *monstruosa* which has the corolla divided into five narrow petals; the flower clusters have therefore a feathery appearance and the whole shrub looks very distinct from the ordinary Mountain Laurel. There is also a low small leaved variety called var. *myrtifolia* which is pretty as a small evergreen shrub but flowers not at all or very sparingly.

The brilliant *Rhododendron calendulaceum* is now passing and the less showy *R. arborescens* with pure white, very fragrant flowers is beginning to bloom and this species will be followed soon by the similar *R. viscosum*, the Swamp Honeysuckle.

Most of the Mock Oranges are now in bloom and particularly attractive are the many varieties of *Philadelphus Lemnii*. One of the best is *Avalanche* with gracefully spreading and arching branches covered their whole length with showy white flowers; it is one of the latest to bloom. *Gerbe de neige* is similar, but less graceful with larger flowers opening earlier. Handsome varieties with upright branches and single flowers are *Candelabra*, *Mont Blanc* and the somewhat later blooming *Parillon Blanc*, while *Bouquet Blanc* has large semidouble flowers. *Philadelphus microphyllus*, one of the parents of *P. Lemnii*, is an attractive little shrub with small myrtle-like foliage and small but deliciously fragrant flowers; it flowers later than the hybrids. Perhaps the most beautiful of the native species is *P. inodorus*, a compact shrub with lustrous foliage and large cup-shaped flowers solitary along the branches. *Philadelphus grandiflorus* which is often confounded with the preceding species, is a higher shrub with duller and larger foliage and flowers apparently less profusely.

The tree-like Japanese Lilac, *Syringa Japonica*, is now in full bloom and the two trees in the Arboretum are very conspicuous objects studded with their immense panicles of creamy white flowers. The similar but shrubby *S. amurensis* flowers somewhat earlier and is already fading.

The Yellow-wood, *Cladrastis tinctoria*, flowers this year profusely; with its large drooping panicles of white fragrant flowers it looks very charming and is particularly suited for planting as a solitary tree on the lawn; its chief drawback is that it does not flower every year.

A shrub of striking beauty is *Styrax japonica* when its spreading branches are loaded with the drooping white flowers; it is the hardiest of the *Styrax*, but requires here a sheltered position.

The handsomest of the Privets hardy in this vicinity is certainly *Ligustrum Itoya* with its gracefully arching branches covered their whole length with small droop-

ing clusters of white flowers. Also *L. acuminatum* (*L. ciliatum*, *L. medium*) is an attractive shrub when in bloom, though not as handsome as *L. Itoya*; it is of more upright habit with spreading branches bearing numerous small panicles of white flowers.

Among the later flowering Dogwoods *Cornus paniculata* (*C. caudidissima*) is one of the prettiest in bloom; it is a clean shrub of graceful habit and well adapted for borders of shrubberies. Another good Dogwood is *Cornus circinnata* which is now conspicuous with its numerous clusters of creamy white flowers.

Similar to the latter in habit is *Viburnum dentatum*, also a native shrub, but showier than this is the Japanese *V. dilatatum* which has much larger corymbs of white flowers followed in autumn by scarlet fruits. An interesting native species is *V. molle* which is now flowering for the first time in the Arboretum; it was first discovered more than 100 years ago by the elder Michaux, but was not found again until fifteen years ago and described then as a new species, *V. Demetrioides*, because the name *V. molle* had been in the meanwhile applied erroneously to another more common species; the true *V. molle* is still very rare in cultivation and as our plants are yet small, nothing definite can be said about its ornamental qualities.

Alfred Rehder.

Arnold Arboretum, Jamaica Plain, Mass.

The Hardy Rhododendron Question

I was delighted to read Mr. Koehler's interesting communication in HORTICULTURE on the above topic. I naturally differ from him in many of his remarks, but this I am sure is pardonable, as gardeners have oft found that their experience, scientific deductions, and "logical conclusions" have not always been unanimous. But then criticism is an essential feature in all things pertaining to the improvement and enlightenment of our profession, or in other words, it is the separator which takes the impossible from the possible and leaves us the workable idea.

When Mr. Koehler writes about Rhododendrons I receive what he says with interest and respect, because I feel certain that he has given the subject his careful attention for many years, and accordingly writes exactly what his experience has led him to believe as being correct. But when Mr. Koehler gets behind a rhododendron bush and fires a few illogical deductions at me I am tempted to again take up my pen in an effort to bring him back to the point. The point when examined closely has rather the appearance of two points—horn points of a dilemma.

Here then is the dilemma. A list of twelve Rhododendrons were given by me as being suitable for planting, under suitable conditions in New England. Those varieties, I may say, are all at the present time doing well at various establishments, to my knowledge, both in the vicinity of Boston and New York. Mr. Koehler on the other hand, with dogmatic assurance, and the true tontonic spirit of finality, classed my list as an undesirable mixture of facts and terminological inexactitudes. The question, therefore, devolves into one of individuals, and must be treated accordingly. I shall therefore endeavor to show Mr. Koehler a reason why

part of my list at least, should be included in his ironclad contingent.

Mr. Koehler remarks that it would not be unreasonable to demand as a test for hardiness, that a Rhododendron be able to satisfactorily withstand a winter without protection in the middle of a ten-acre field. I have thoroughly digested this interesting statement, and at once compare it with the following: "There is no ironclad list in the sense that that term can be applied to a common lilac." "Enough said." Surely a Rhododendron which planted in the middle of a ten-acre field "would survive a test of ten years, and at the end of that time still be shapely" must be classed as a most desirable variety. Would Mr. Koehler name, say, half a dozen varieties which would stand this treatment for ten years?

Regarding that part of Mr. Koehler's article where with a brilliant rhetorical flourish, he goes globe trotting, and takes in all the remote corners of the earth, these, I suppose, were what I might call his irrepressible digressions. Mr. Koehler's comparisons were ostensibly intended to illustrate his remarks, to enlighten readers as to his philosophy, to add something to the soundness and effectiveness of his logic. I think it did nothing of the kind. His remarks in this respect were perfectly obvious, and call for no reply from me, inasmuch as the remote parts of the earth are in the present instance quite outside my province, and have no part in the present discussion.

Mr. Koehler in the course of his remarks says, "Admittedly many Rhododendrons are hardy in localities in England, which are not hardy in New England." It appears to me that he has got a trifle mixed in this part of his article. I did not mention England, except as referring to that country as being the principal source from which we get our varieties, and I still think that the sentence quoted by Mr. Koehler is quite in order, and could not possibly be taken to mean anything other than what I intended it to mean.

It seems that Mr. Koehler is displeased with my using the very wide term New England States; why he should be, I am at a loss to understand. I should like to inform him that this term when used in a limited sense, is perfectly legitimate, and for this purpose I will give him a precedent where this very wide term has been used. In Bailey's *Cyclopedia of American Horticulture*, I find the following sentence in an article dealing with Rhododendrons, which was written by our esteemed and learned friend, Mr. Alfred Rehder: "Formerly it was considered impossible to grow the beautiful hardy hybrids in the New England States, but now it has been shown by such splendid collections as those of Mr. H. H. Hunnewell at Wellesley, Mass., that even in a trying climate they can be grown to perfection if the right situations are selected and the right way of cultivation is followed." Now, personally, I cannot see anything wrong in those words, contributed to a great horticultural work by one of the most brilliant writers in this country, and I still think that the term New England States, as I used it, is perfectly correct.

I feel sure Mr. Koehler will agree with me when I say that Mr. Rehder is one of the leading authorities on Rhododendrons in this country and that if he states that any particular variety is hardy in the New England States (or Boston and vicinity to suit Mr. Koehler's residential convenience) we should at once accept it as being the outcome of his careful observations. In Mr. Rehder's list of hardy varieties, suitable for planting in the vicinity of Boston, I find the following: Alex. Dancer, August Van Geert, Charles Bagley, Ever-

estium, and Hammbal. Mr. Koehler informs us that only two of those sorts are hardy. So much for those varieties. Now I will deal with The Queen. I can assure Mr. Koehler that this variety has been planted quite extensively throughout New England, and has invariably given satisfaction. I have before me a list of Rhododendrons (ironclads by the way) which was issued this year by a well-known firm in the vicinity of New York. This firm makes special reference to the fact that all of their stock have been grown for many years past in the open without the slightest protection whatever. Incidentally I may say that The Queen is included in their list of ironclads. How do you account for this, Mr. Koehler?

Mr. Koehler mentions R. S. Halford in his article. I am sorry I have not had the pleasure of seeing this variety in my travels; perhaps he meant Mrs. R. S. Halford. Regarding this variety and also Mrs. John Clutton, I can only emphasize what I have already stated, that they are both perfectly hardy if they are planted in the right situation, and a slight winter protection is given them. It appears, however, that one person at least, classed those two varieties as being ironclads, and recommended them as being most desirable varieties for Boston and vicinity. I refer to the late Mr. F. L. Harris, Wellesley, Mass. Mr. Harris so far back as 1897 recommended Mrs. John Clutton and Mrs. R. S. Halford as being absolutely hardy in the vicinity of Boston. (See *Gardening*, Vol. 5, No. 120, page 370.)

Much that Mr. Koehler has written in his concluding remarks I entirely agree with, and I make haste to say that I also have much to learn about Rhododendrons, and would be delighted to have the experience of other people on this subject provided the various points are met with solid facts and irrefragable logic.

When discussing as to whether a Rhododendron is hardy or not, one of the most important facts is often overlooked, namely, site. By far the largest number of Rhododendrons are planted on happy-go-lucky sites, that is, sites which are quite unsuited for giving good results. Hence arises the need of artificial protection for many varieties, which might safely be dispensed with in a less exposed location. Intelligent and systematic management may of course greatly lessen the disadvantages imposed by faulty environment, but say what we will, it is "site" first and last which is the most essential factor in successful Rhododendron culture.

What then is the crux of the whole question when we consider in this connection a few remaining points, such as the climatic conditions peculiar to the New England States, oscillating as it does between the extremes, there remains such a preponderance of ignorance in relation to essential factors, that the most vital question of all, site, is too often neglected.

In conclusion I would say to those who intend going in for Rhododendrons,—find out what varieties do best in your locality; keep strictly on those lines at the start; and then when you feel that you would like to add to your collection, try experiments. There are never two seasons quite alike, so that you can always count upon surprises, but never condemn a variety as not being hardy, unless you have given it the situation and careful attention which its constitution demands.

Wm. W. Brown.

North Easton, Mass.

Roses Under Glass

PLANTING.

The wretched condition of the rose market has doubtless caused many of the eastern growers to abandon all hopes of raising a return trip ticket to Europe on the old plants this season, therefore the general movement seems to be toward emptying and refilling the benches and planting the young stock with a view to being in line for the early fall market.

The work of planting is at any time tedious, to say the least, but when performed under the full glare of the June sun it is peculiarly enervating. Much of the physical discomfort attending re-planting may be overcome by shading the roof with a mixture of soil and water which may easily be applied with an ordinary spray pump.

Of great advantage to the men engaged in emptying and refilling the benches is a good and safe runway. It is at once pitiable and ludicrous to see a heavy man trying to walk bow-legged in order to maintain his equilibrium and that of his wheel-barrow on a 4-inch board; a 12-inch plank affords ample accommodation for the pedal extremities of an ordinary workman and is less likely to warp under the influence of the sun than the thin boards, the ends of which are genuine traps for the toes of the man with the wheel-barrow.

As soon as they are emptied and repaired, the benches, if wooden, should be thoroughly washed with a good force of water and then given an application of hot lime wash. This adds to the life of the wood and destroys fungous growth, insects, etc. The cracks in the bottom of the bench may be covered with old straw from the barnyard.

When the benches have been filled a sprinkling of bone meal may be added in the proportion of about twenty-five pounds to 500 square feet of soil surface. The planting should then be pushed forward as rapidly as possible, as the soil quickly dries and, aside from being disagreeable to handle, absorbs the moisture contained in the ball of the plant and often administers a severe check to the young aspirant for commercial favor.

Many failures may be traced to overcrowding the stock. This practice, while it may seem economical and proper to utilize every available inch of bench space, cannot but end in disaster. Plants, like human beings, require plenty of breathing space, and where this is denied them they fall easy victims to the attacks of black-spot, anthracnose and other fungoid diseases. Varieties such as Richmond, Killarney, Uncle John, etc., should have at least one square foot in which to grow, and if grafted stock is used they ought to have at least one-third more room. American Beauties can use one and one-half square feet of space, and if properly attended to will pay for it.

In planting grafted stock, it is advisable, if possible, to get the graft well under the surface of the soil, as it is there that the conditions of air and moisture best adapted to the welfare of this class of stock are to be found.

J. E. Simpson

Hydrocyanic Gas for White Fly

The white fly is very resistant to fumigants and for this reason tobacco, which will suffice for some greenhouse insects, is useless when used against this pest. The only fumigant which has been found to give good results is hydrocyanic acid gas. If this is used strong enough to kill all stages of the fly, the plants will be killed, so a weaker strength, which will kill certain stages and leave the plants uninjured is used, and this is repeated twice at intervals of two weeks to kill those that escaped the first treatment.

The first step in fumigation is to calculate the number of cubic feet contained in the house, not taking out any space for benches, etc. Probably the easiest way to do this is to draw an end view of the house and divide this into a number of rectangles and triangles by calculating the number of square feet in each and adding the results together the total number of square feet is obtained which multiplied by the length of the house gives the total cubic feet.

For example, the figure represents an end view of a house 100 ft. long, 18 ft. wide and 12 ft. to ridge. This is divided into two rectangles 4x18 and 2x5 and two right triangles whose bases are five and thirteen and whose heights are six and eight. The sum of the square feet of the rectangles is 82 and the sum of the square feet of the triangles is 67. The area of a right triangle being equal to one-half the product of the base times the height. This gives 149 sq. ft., which multiplied by 100 gives 14,900 cubic feet space in the house.

Hydrocyanic acid gas is generated by the action of sulphuric acid on potassium cyanide. The cyanide may be purchased at almost any drug store and must be 98-99 per cent. pure; the inferior 50-60 per cent grade will not do. Sulphuric acid may be obtained at the same place and should be of a sp. gr. of 1.83.

A number of vessels of earthen ware or granite should be obtained; the number depending on the size of the house. For the example quoted, three would be enough, one at each end and one in the middle.

Use one-third of an ounce of cyanide per thousand cubic feet, two times as many fluid ounces of acid and four times as many fluid ounces of water as there are ounces of cyanide. Calculate how much of each is to go into each jar, mix slowly the acid and water in each. Have the cyanide in paper bags suspended by strings directly above the jars and have the strings so fixed as to allow the bags to be dropped from near the door.

The house should be closed tightly before the gas is generated and one or two ventilators fixed so they may be opened from the outside. The plants should be dry and the fumigating done on a dark night. Leave the gas in the house about three hours, then ventilate. Do not under any circumstances enter the house before it is well aired.

All residue left in the jars should be buried where nothing will get at it as it is very poisonous.

staples seem to be now pretty well assured. The occupation of the pessimists is about gone and they have ceased to tell us that "hard times are only just beginning," for, in the face of our glorious agricultural prosperity, nobody will believe them. This prevalent confidence is a most excellent symptom. We hope to see it extend in fullest measure to the flower trade, which has suffered its full share of the adversity of the past season. As compared with the outlook of a few months ago there is today every cause for hopefulness and every encouragement for all to get a move on, eager for the prosperity which is now coming along at full speed.

Unappreciated flower shows

A trade visitor in Boston who took opportunity to attend the recent rhododendron show at Horticultural Hall expresses astonishment at the indifference of the Boston public to this really beautiful exhibition as evinced by their almost entire absence from the hall although the announcement was placarded outside that admission was free. Although in this special instance the fete at Holm Lea was undoubtedly the cause of the absence of many on Saturday and notwithstanding that on Sunday the halls are generally crowded in mid-afternoon yet we have to acknowledge that the criticism is, in the main, well-founded. The apathy of the people to such an attraction is hard to understand and it is not limited to Boston. When florists and the gardeners from suburban estates undertake to transport and stage their products for the pleasure of the public, at much expense and loss of time, it is very disheartening to have the effort go unappreciated and a very strong argument is presented in support of the contemplated reduction in the number of summer free shows given by the Massachusetts Horticultural Society and the concentration of effort on a limited number of spectacular affairs during the inclement season of the year to which an admission fee shall be charged.

Nurserymen headed right

The nurserymen, in their convention at Milwaukee last week, showed by their discussions and resolves that they are thoroughly awake to the glorious business possibilities that lie within their reach and also to the menaces that exist in ill-advised hasty legislation in which their interests are involved and in the reprisals which the transportation companies are so ready to make wherever they think they can find a victim unprepared to resist. We particularly like the sentiments which President Hill expressed concerning forest preservation and would also especially commend to every one in the nursery trade his straightforward advice on the subject of advertising. A more general adoption of liberal advertising methods throughout the season would do much to keep stock moving in a legitimate way, and go far to eliminate the "surplus stock" sales at the end of the season of which President Hill and many others complained. An industry having, as President Hill informed us, more than sixty million dollars invested, giving employment to fifty-five thousand men and three thousand women and devoted to "the noble vocation of bettering and up-lifting mankind," is surely entitled to the advantages of the most modern business facilities, and President Hill is unanswerably right when he places enterprising and truthful advertising at the head of the list.

Reports from all agricultural sections continue favorable. The condition of crops on June 1, as found by the Bureau of Statistics of the U. S. Department of Agriculture in every section of the country shows in practically every item throughout the list of fruits and cereals a largely increased percentage not only over last year but over the average for ten years and "bumper" crops in all "bumper" crops and good times on the way

AFTER ADJOURNMENT.

Attention is called to the information given on this page concerning freight rates on bulbs from Ollionles, Rotterdam and Yokohama.

So long as dealers in one place are short of material which in another place is at the same time over-stocked and being sold at sacrifice figures or going to waste, the assertion stands good that there is something wrong at one end or the other. One of the main factors in "the art of selling" is to wake up the dormant business.

It has been said that "show windows are the eyes of a store." Keep the "eyes" open and bright even though there be little going on in the summer days now coming. The store-keeper who neglects his windows is liable to be neglected by the customers later on. This is a case where a good front is never an extravagance.

Watch our Buyers' Directory and Ready Reference Guide. There are quite a number of small advertisements there from firms that will appear with big ones next season after they have come to realize how good the response from the buyers is even when the offer is a wee one. And when you buy don't fail to tell them that "HORTICULTURE did it."

Have you a surplus of anything for which the selling season is waning? Advertise it now, as a surplus, and at a price that will turn it into cash for you and enable it to make a profit for the buyer who takes a chance on it. People don't know you have bargains for them unless you tell them. Never throw anything away which somebody else may have use for.

Train your customers to prompt settlements and adopt the same policy yourself in paying bills, to the greatest possible extent. A small amount of money will pay a big lot of bills if permitted to circulate. If everybody wouldn't "get the habit" we should all be happier and the flower trade, bulb trade and nursery trade would all stand far better commercially. Six and twelve month credits are a heavy weight for any business to carry.

The merchants' associations and large shippers are up in arms against the recently announced general advance in freight rates. Instead of going up it would seem that freight rates ought to go down and it is not easy to resist the conviction that the present course of the railroads suggests more of retaliation than of justice. Here in New England we have just escaped the regularization of a most dangerous railroad monopoly. The American cultivator, in commenting on the recent manoeuvres in Massachusetts says that "President Mellen is deemed by his admirers the most efficient railroad president in the United States," but that he "has evinced an inadequate conception of the importance of retaining favorable public sentiment." We would add that it exasperating the public by holding them up at every available turn in efficiency, then judged by this test President Mellen has achieved a notable success during the few years since he ascended the throne.

PERSONAL.

Jesse F. Arlin has resigned his position at the Davis greenhouses, Dover, N. H.

R. Vincent, Jr., of White Marsh, Md., has returned from his trip abroad.

M. Norbert Levayasseur has been elected Mayor of Boulon, near Caen, France.

George McWilliam, of Whitinsville, Mass., with his wife, sailed on June 2 for a visit to Scotland.

Philip Einsman, of Long Island City, N. Y., will sail for Bremen on the Kaiser Wilhelm II, June 23.

August Muller, of Philadelphia, is famous for his choice strain of verbenas. His father before him was also a celebrity in this line fifty years ago.

Visitors in Boston: S. S. Skidelsky, Philadelphia, Pa.; H. S. DeForest, representing Pierson U-Bar Co., New York; Prof. L. R. Taft, Agricultural College, Mich.; George F. Struck, of Knight & Struck, New York; R. M. Grey, Cuba.

Chicago visitors this week: Edw. Amerpohl, Janesville, Wis.; Thos. A. Macheh, Springfield, O.; Elmer D. Smith, Adrian, Mich.; F. J. Olson, Ames, Ia., buying glass and building material for two new greenhouses; R. Dintleman, Belleville, Ill., en route from nurserymen's convention.

THE LILY BULB SITUATION.

We quote from the June market report of R. M. Ward & Co., New York, the following notes on present condition and prospects of supply and demand on various florists' lily bulbs:

Lilium Harrisii (August delivery); crop is improving.

Japan Lilies.—Longiflorum (Sept., Oct.), small demand. Multiflorum (Sept., Oct.), moderate demand; crop is improving. Giganteum (Oct., Dec.), strong demand; early orders advised; large sizes scarce. Auratum (Oct., Dec.), demand is increasing. Speciosum Album (Oct., Dec.), scarce; early orders advised. Speciosum Rubrum (Oct., Dec.), moderate demand. Speciosum; Magnificum (Oct., Dec.), demand is increasing. Speciosum Melpomene, or Roseum (Oct., Dec.), small demand.

Formosa Lilies (July, Aug.), early orders advised; quantities of large sizes limited.

A SONG FOR JUNE.

'Tis June! the glad time when I found thee,
Of thou, my sweet flower of love!
The dear olden glimmer is 'round thee,
The same tender sky bends above,
New beauties the summer discloses,
But none that can rival thee now;
Not one of its fairest young roses
Is perfect as thou.

One June brings the red rose of passion
And marks its frail beauty decline,
But June upon June could not fashion
The rose of a love such as thine,
Not long in the gardens of pleasure
Are love's sweetest flowers possessed;
The love that hath leavening measure
Of sorrow is best.

This June its new beauties discloses,
But none that can rival thee now,
Not one of its fairest young roses
Is perfect as thou.

T. A. DALY

FREIGHT RATES ON BULBS.

We have compiled for the benefit of our readers who buy French, Dutch or Japanese bulbs, the following information concerning transatlantic and overland freight rates which will, perhaps be found worthy of a careful perusal.

Rate sheets of freight on bulbs from Ollionles via Marseilles by Nor. Deutscher Lloyd or Fabre line per 1000 Kilo to New York, Boston and Philadelphia and inland cities by through bill of lading all rail from New York are quoted as follows:

	Lots of 50 Parcels	Lots of 50 lbs.	Tons of 12 Cts.
New York	50 fr.	49 fr.	46 fr.
Boston	98 ..	97 ..	68 ..
Philadelphia	114 ..	113 ..	69 ..
Chicago, Louis-ville, St. Mil-waukee	137 ..	136 ..	80 ..
Rochester	91 ..	90 ..	62 ..
Syracuse	91 ..	90 ..	62 ..
Pittsburg or Erie	102 ..	101 ..	65 ..
Albany	86 ..	85 ..	62 ..
Chicoutimi	127 ..	126 ..	75 ..
East St. Louis	150 ..	155 ..	86 ..
Toronto	108 ..	107 ..	73 ..
St. Paul	197 ..	196 ..	102 ..
Richmond	101 ..	100 ..	72 ..
Buffalo	96 ..	95 ..	64 ..
Toledo, Colum-bus or Detroit	120 ..	119 ..	72 ..
Indianapolis	132 ..	131 ..	78 ..
Orlando	112 ..	111 ..	79 ..

100 Kilo is equal to 220 pounds avoirdupois. The average full-size French bulb case, full, weighs about 75 Kilo. Shipments by the Fabre line are preferred.

Better rates for Holland bulbs are afforded by the Cosmopolitan Line via Philadelphia than via the Rotterdam Line especially when quantities are shipped. Carload rate from Rotterdam to Chicago via that route is 62 cents per 100 lbs., whereas the rate from New York to Chicago alone is more, viz., 75 cents per 100 lbs. The Dutchmen, we believe, get no rebates via Philadelphia and consequently do not ship that way unless so instructed.

The Great Northern Railway Railway Co. has announced the fact that the present freight rate from Yokohama to New York, Chicago and other inland cities, will be abolished June 30th and a new tariff will be issued July 1st to conform to the rules and regulations of the Interstate Commerce Commission. This will greatly affect the cost of Japanese bulbs, plants, etc., which have heretofore enjoyed an extremely low freight rate considering the distance covered, or \$1.25 to \$1.50 per 100 lbs. from Yokohama to New York. The rate on the same goods from Pacific Coast ports is \$3.00 per 100 lbs. to New York via the same route; and should the Interstate Commerce Commission raise the rate accordingly, it would make a difference in the cost of Japan Lily bulbs of from \$10.00 to \$20.00 per 1000, according to sizes of the bulbs. Shipments via Suez are impractical. The matter of freight rates from Japan is therefore of much importance to the importers and the final decision of the I. C. C. is awaited with interest.

I am compelled to ask you to discontinue my ad. for chrysanthemum cuttings as I have now as many orders as I will be able to fill.

H. L. CAMERON,

No. Cambridge, Mass., June 4, 1908.

NEWS OF THE CLUBS AND SOCIETIES.

GARDENERS' AND FLORISTS'
CLUB OF BOSTON.

At the meeting of the Gardeners' and Florists' Club at Horticultural Hall, Boston, Tuesday evening, June 16, Mr. A. H. Kirkland, Superintendent of the gypsy moth work in Massachusetts, gave an interesting discussion of the work being done by the department of which he is the head. He touched briefly on the principal factors which had led to an increase in insect damage within comparatively recent years, the three most important being the massing of a single species of shade tree or crop over large areas, thus giving abundance of food for certain insect pests; the importation of the English sparrow, which has crowded out our native insectivorous birds, and the importation of insect pests from abroad which have left behind the natural enemies which check their increase in their native environment. Of the latter insects, the gypsy and brown-tail moth, the leopard moth and the San Jose scale were cited as illustrations. The speaker fully described and explained the working of the present gypsy moth law, which has brought about co-operative efforts on the part of the property owners, the city or town and the state. He estimates that at least \$750,000 was expended in the work against the moth pests from these three sources during the year 1907. The methods of work against the insects were fully described, and particular attention given to the discussion of spraying operations, which under favorable conditions give the best results of any single method. Over 150 tons of Arsenate of Lead will be used in spraying operations this summer, the poison being applied at the rate of 10 pounds to 100 gallons of water. This insecticide has the advantage of adhering firmly to the foliage in spite of rains, and hence is effective for a long time.

The work of importing parasites of the gypsy and brown-tail moths from abroad was gone into detail, and the speaker stated that 8 or 10 important parasites of these insects in Europe had now become successfully established in Massachusetts. He felt quite sanguine that in the end these parasites would bring about the substantial control of these pests, but stated that for the next few years mechanical methods must be used with all possible vigor to keep the insects under control.

The occurrence of the leopard moth and other European pests of shade trees in Massachusetts was reported, and the life history of the insect described. This borer is not especially injurious in out-lying sections where native insectivorous birds such as woodpeckers and chickadees have a chance for their life. It has been and is highly injurious in such thickly settled centers as New York, Brooklyn, Jersey City, Newark and vicinity, where the English sparrow has driven out the native birds. It occurs in Boston in the trees on the Common and Public Gardens, at Louisburg Square and on Commonwealth Avenue. The only remedy of value so far discovered is to remove the broken

infested limbs and burn them in June before the borers have transformed into moths.

As against the rather discouraging announcement of this imported pest, which was unknown in Massachusetts up to last year, the speaker stated that the elm leaf beetle, which has been doing so much damage in Eastern Massachusetts during the past two years, would probably subside after 1908, and its outbreaks seldom extend over three years. A thorough spraying of the infested elms in early June with Arsenate of Lead has proved an entirely satisfactory remedy for the insect.

The lecture, which was well received, was finely illustrated by a large number of lantern slides showing the different insects discussed, and the apparatus used in combating them.

Secretary W. N. Craig took up the defence of the English sparrow which, he said, was the only bird which would devour the pupae of the elm leaf beetle, and the currant worm, and would also eat the cut worm. From a gardener's

Newport, R. I., June 23, 24, Newport Horticultural Society, rose and strawberry show.

Detroit, Mich., June 23-25, American Seed Trade Association, annual convention.

Boston, Mass., June 20, 21, Massachusetts Horticultural Society, rose and strawberry show.

standpoint he had discovered no harm in this bird, and regards it as a friend. In reply to a question, Mr. Kirkland said that the eggs of the leaf miner, which had done so much injury to the hawthorns, are laid on the outside of the leaf and as soon as hatched out the grub burrows in the leaf where he cannot be reached by any insecticide, but that if the foliage is thoroughly sprayed before the eggs hatch no doubt good results would follow. On the exhibition table were some blooming plants of Farquhar's hybrid lilies (*Philippinense* x *longiflorum*), one plant 14 months and 20 days from seed with two spikes of four flowers each, this being the second blooming of this bulb. Wm. Downs showed some superb tomatoes grown from a new strain, introduced by Farquhar, but as yet unnamed. Wilfrid Wheeler had an exhibit of fine strawberries in six varieties.

The schedule of prizes offered by the New England Dahlia Society for its first annual exhibition at Tremont Temple, Boston, has been received. The dates for the show are September 17, 18 and 19. There are 89 regular classes in addition to numerous special prizes, 10 per cent. entrance being required in the former. Copies may be had from Maurice Fuld, secretary, 5 Union street, Boston.

TARRYTOWN HORTICULTURAL
SOCIETY.

The annual June exhibition of the Tarrytown Horticultural Society held in the Music Hall on Friday, June 12, has eclipsed all previous ones, a magnificent display of roses in perfect shape and colors and staged on five large tables. One exhibitor alone had over one hundred varieties of Hybrid Perpetuals and Teas, the majority of them correctly named. Frau Karl Druschki was very much in evidence, having been entered in many classes and carried the honors wherever perfect. Competition was very keen in every class and judging difficult.

Strawberries were also fine, large and well-finished, every class heavily catered, single plate entries numbering eleven and the majority of them perfect in every way. Shrubs were lacking, only two exhibits being staged with common varieties.

Perennials were fine, two exhibitors having over 50 varieties each, well-labelled. The F. R. Pierson Co. had some large exhibits of miscellaneous plants and cut flowers, not for competition, but very interesting.

An innovation which proved successful and interesting was the giving of two prizes for bouquets of wild flowers, open only to school children under 14 years of age. This brought 24 contestants. The judging was eagerly watched by the young contingent.

Certificate of merit was awarded to F. R. Pierson Co. for miscellaneous exhibits and to Mathew J. Muartha, gardener to Mrs. W. L. Bull, Irvington, N. Y., for shrubs, hardy perennials and roses. Cultural certificate to George Whittinger, gardener to Miss Blanche Potter, Ossining, N. Y., for collection of vegetables, and John Elliott, gardener to Geo. Legg, Tarrytown, N. Y., for rose Frau Karl Druschki. Honorable mention to Wm. Jameson, gardener to Emil Berolz-leimer, Tarrytown, N. Y., for Melon "Blenheim" and Tomato "Lorillard," and to Francis Gibson, gardener to Mrs. J. B. Hall, Tarrytown, N. Y., for shrubs, hardy perennials and roses.

Following are the prize awards:

Collection of flowers cut from hardy perennials, F. L. Milne, gardener to E. H. Weatherbee, Mamaroneck, N. Y. Strawberries, 3 varieties, W. H. Waite, gardener to S. Untermyer, Yonkers, N. Y. Strawberries, 2 varieties, W. C. Roberts, gardener to Frederick Potter, Ossining, N. Y. Strawberries, any one variety, Wm. Jameson, gardener to Emil Berolz-leimer, Tarrytown, N. Y. Strawberry, "Marshall," James Stuart, gardener to Mrs. F. A. Constable, Mamaroneck, N. Y. Vase 25 Hyb. Perpetual Roses, John Woodcock, gardener to E. A. McAlpin, Ossining, N. Y. Collection of out-door Roses (silver cup), John Woodcock. Out-door Roses, 6 varieties, John Woodcock. Roses, 3 varieties, John Elliott, gardener to George Legg, Tarrytown, N. Y. 12 Roses, any one variety, H. Nichols, gardener to Mrs. J. B. Trevor, Yonkers, N. Y. Vase of Roses, John Elliott, Tarrytown, N. Y. Display Climbing Roses, John Brunger, gardener to J. N. Seligman, Irvington, N. Y. Collection flowers from hardy shrubs, W. H. Waite, Yonkers, N. Y. Sweet Peas, H. Nichols, Yonkers, N. Y. 12 varieties Vegetables, H. Nichols, Yonkers, N. Y. 6 varieties Vegetables, John Brunger, Irvington, N. Y.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Annual Peony and Rose Exhibition.

Horticultural Hall, Boston, presented a gorgeous picture on Saturday and Sunday, June 13 and 14. In all respects it was the finest display at this date in many years. "Flowers fit for Paradise" were there in profusion and perfection and if the peony dealers don't find an enormously increasing demand for their choice things the coming season it will not be Boston's fault.

It was rather early for the outdoor roses, which will be much better, no doubt, at the rose and strawberry show one week later. But the various rose display classes were well filled and the quality of the flowers was excellent for the season. The peonies were the chief centre of attraction. Exhibitors were numerous and practically every variety shown had a name attached. E. J. Shaylor & Son made a phenomenal display including many superb novelties, among which Georgiana Shaylor, a wonderfully beautiful seedling of Daybreak pink color, shone with transcendent lustre. Mr. Shaylor has a light, clean soil at his plantation in Wellesley Hills and peonies seem to revel in it. He lives for them and takes care of them and could cut 10,000 flowers at present writing without missing them. Another premier exhibitor was R. & J. Farquhar & Co. who staged an extensive collection comprising fully one hundred vases of from six to fifty blooms each, among which were several seedlings of exceptional merit. T. C. Thurlow & Co. were represented in practically every class in the schedule and won the majority of the first prizes with well-balanced selections. George Hollis, well-known as a peony enthusiast, showed fifty varieties, of which about one-half were seedlings, among which Admiral Togo, dark crimson, Aristocrat white flushed, and twelve Lew seedlings under number figured. A. H. Fewkes, William Whitman gardener Martin Sullivan, Dr. Charles Minot, Frederick Mason gardener F. L. Lewis, James McKissock (74 varieties), and Mrs. J. L. Gardner gardener Wm. Thatcher, were all represented by superb groups and vases.

A list of a few of the varieties that might well be termed top-notchers may prove useful to our readers. Among the best, but by no means an unrivalled list, we should place Theresa, rose pink; Felix Crousse, crimson; Aurora, white and soft pink; Edouard Andre, carmine; M. Mechin, very dark; Germaine Bigot, light pink with touches of dull red. James Kelway, a noble broad-petaled white; Eugene Verdier, soft pink; Baroness Schroeder, flushed white; Avalanche, clear white; Mme. Emile Lemoine, broad-petaled blush; Marguerite Gerard, pink, high-built flower; Rosa Bonheur (Dessert novelty), delicate mauve pink; Mme. de Trevevan, light pink with occasional dark streak; Pottsi alba, old but invincible; Souvenir de Exposition de Universalle, unique Killarney-rose pink; Albatre, white with occasional penciling of crimson on edge of petal; Chas. Verdier, dark pink; Mme. Lemoine,

full pink; Couronne d'Or, white with crimson markings on edge of centre petals. Among the most beautiful flowers was A. B. Gould, the best of the famous Richardson seedlings. In many collections this is said to figure as Milton Hill, another Richardson seedling of entirely different character. It is not so well known as it should be that in peonies the variance between crown buds and laterals is fully as great as in chrysanthemums and that, to get best results in blooms for exhibition disbudbing is always necessary.

The prize awards which we give below designate the winners in the general rose displays. Especial credit is due to Mrs. Aaron Ward, Roslyn, N. Y., for her extensive collection of H. T. varieties. In the miscellaneous classes the hardy herbaceous flowers from Blue Hill Nurseries were prominent. Philadelphus Lemoine Mantau d'Hermine bearing a profusion of small pure white flowers, and Lupinus Polyphyllus Marheimii were sterling novelties, the latter being a soft pink flower with bright tipped standard. Sweet Williams were shown in sparkling array by Wm. Whitman, hardy perennials by W. W. Rawson & Co., and Spanish Iris by J. T. Butterworth. From Harvard Botanical Garden came the insectivorous plants, droseras and dionaeas, and the sensitive mimosa and these proved to be of un-failing interest to visitors. W. Whitman's pyrethrams were very fine. A first class certificate of merit was awarded to E. J. Shaylor for peony Georgiana Shaylor, and honorable mention to R. and J. Farquhar & Co. for displays of peonies.

The prizes awarded were as follows:

Roses—Theodore Lyman, special for hardy roses to W. J. Clemson gardener for J. O. Christenson, J. C. Chaffin special for best white H. T. rose to E. E. Lincoln for Frau Karl Druschki. Twelve named varieties, three of each: 1st, E. E. Lincoln; 2nd, W. J. Clemson; 3d, Mrs. Aaron Ward. Six named varieties, three of each: 1st, W. J. Clemson; 2nd, Mrs. Aaron Ward. Twenty-four named varieties, one of each: 1st, Wm. Whitman; 2nd, Mrs. Aaron Ward. Twelve named varieties, one of each: 1st, Mrs. Aaron Ward. Best collection of H. T. roses: 1st, Mrs. Aaron Ward. Best three blooms of a variety introduced since 1903: 1st, W. J. Clemson. Six blooms of Frau Karl Druschki: 1st, W. J. Clemson. Six blooms of Mrs. R. G. Sharrow Crawford: 1st, E. E. Lincoln. Six blooms of Margaret Dickson: 1st, W. J. Clemson; 2nd, E. E. Lincoln. Six blooms of any other variety: 1st, W. J. Clemson; 2nd, Mrs. Frederick Ayer; 3d, ditto. General display One hundred bottles of hardy roses: 1st, W. J. Clemson; 2nd, Mrs. Frederick Ayer; 3d, Mrs. E. M. Gill; 4th, Mrs. J. L. Gardner; 5th, Col. Frederick Mason.

Sweet Williams.—Display, eighteen vases of three trusses each: 1st, Wm. Whitman; 2d, Mrs. J. L. Gardner. Hardy Herbaceous Flowers.—Thirty bottles, distinct species and varieties, not less than ten genera, 1st, Blue Hill Nurseries. Peonies. Collection of thirty or more varieties, double: 1st, T. C. Thurlow & Co.; 2d, James McKissock; 3d, George Hollis; 4th, E. J. Shaylor. Collection of twelve varieties, double, three flowers of each: 1st, Wm. Whitman; 2d, E. J. Shaylor; 3d, George Hollis. Specimen bloom, double: 1st, James McKissock; Therese; 2d, George Hollis, Aristocrat. Collection of twelve or more varieties, single: 1st, T. C. Thurlow & Co.; 2d, George Hollis. Collection of twelve or more varieties, Japanese single: 1st, George Hollis. Vase of blooms on long stems, arranged for effect: 1st, Mrs. J. L. Gardner; 2d, Dr. C. G. Weld. Collection of six double varieties, white: 1st, T. C. Thurlow & Co.; 2d, J. L. Blanchard; 3d, Dr. Charles S. Minot. rose pink, 1st, T. C. Thurlow & Co.

salmon pink: 1st, T. C. Thurlow & Co.; red or crimson: 1st, T. C. Thurlow & Co. Vase of twenty five blooms, double, white or bluish: 1st, T. C. Thurlow & Co.; Festiva maxima; 2d, the same for M. Juppert; 3d, E. J. Shaylor, Baroness Schroeder; pink or rose: 1st, E. J. Shaylor, Pottsi alba; 2d, T. C. Thurlow & Co., Medeste (Guerin); 3d, Wm. Whitman, Lady Bramwell; red or crimson: 1st, T. C. Thurlow & Co., Felix Crousse; 2d, Wm. Whitman, Louis Van Houtte; 3d, Col. Frederick Mason, Triumphe de Nord. For non-commercial growers only. Collection of twelve named varieties, double: 1st, J. L. Blanchard; 2d, Wm. Whitman; 3d, Mrs. J. L. Gardner.

The annual rose and strawberry show of the Massachusetts Horticultural Society will be held at Horticultural Hall, Saturday and Sunday, June 20 and 21.

A special feature of this exhibition will be a magnificent display of hardy roses and hybrid tea roses, filling five hundred vases, from the noted estate of Miss Sarah B. Fay, of Woods Hole. This display will be in charge of M. H. Walsh, who will exhibit also some of his own productions which have made his name familiar to all rose growers the world over.

The exhibition which is free to all will be open Saturday from 12 to 6 and Sunday from 2 to 6 o'clock.

WM. P. RICH, Sec'y.

ST. LOUIS FLORIST CLUB.

A largely attended meeting greeted President Young last Thursday afternoon when the Florist Club held its regular monthly meeting. All the other officers put in their appearance and the meeting throughout was interesting. The trustees reported that they had made all arrangements for the annual picnic for the members and their friends, the place selected being Normandy Grove and the date July 15th. This was acceptable to the members and the report adopted; they were requested to bring in a fully arranged program at the next meeting. Several members present offered special trophies for the picnic. The president appointed a committee of three consisting of Messrs. Ammann, Peneke and Guy to draw up suitable resolutions on the death of William Scott, this being the first meeting since the death of Mr. Scott. Harry Balsley of Detroit, Mich., was present and gave an interesting talk on his travels throughout the country and the business done by others as he saw it.

The next meeting, July 9th, should be largely attended and made interesting as the nomination of officers will take place and there are several candidates for the different offices, especially for those of president, secretary and treasurer.

BUSINESS CHANGES.

C. W. Blatchley has purchased the flower store of Mrs. Lilian Savage, Southington, Conn.

Albert Warner has purchased the Dow greenhouses, Indianapolis, and will take charge of same at once.

Jontry Bros. (M. C. and J. F. Jontry) is the name of the firm succeeding to the business of H. W. Jontry, Chenoa, Ill.

The greenhouses of Coolidge Bros., South Sudbury, Mass., are to be opened up and run in the interest of the mortgage.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Preliminary Program.

The American Association of Park Superintendents will hold its annual convention in Minneapolis, Minn., August 11, 12 and 13, and the Park Board of the convention city has appointed a special committee of five members and the superintendent to work out an interesting program and provide for the welfare and entertainment of their visitors.

The association has never met further west than Buffalo, and Minneapolis will spare no pains to justify its claim as the ideal convention city of the great Northwest. As a park city, Minneapolis stands second to none in the country, and while its system of parks and parkways is far from completion and perfection as compared with the systems of the older cities of the East, the possibilities offered by its present park possessions and through contemplated extensions, will convince every visitor that Minneapolis will have one of the grandest systems of parks, parkways and boulevards in the country.

The many fine lakes, the grand drives along the wooded banks of the Mississippi River and Minnehaha Falls and Creek, the many parkways through the residential parts of the city and the many smaller parks, must of necessity attract and gratify every visitor interested in park work and development.

The following preliminary program has been prepared and will, in the main, be carried out:

Headquarters.—West Hotel, Hennepin Avenue and Fifth street. Rates \$1.50 and up.

First Day—Tuesday.

9:25 A. M. Opening of session, Park Commissioners' Office, City Hall. Address of welcome by His Honor, the Mayor, James C. Haynes, and Hon. Jesse E. Northrup, President of the Board of Park Commissioners. Response by J. E. Cowell, President of Park Superintendents. Business meeting.

12:15 P. M. Automobile ride to Minnehaha Club, Lake Calhoun.

12:45 P. M. Luncheon at club house.

2:00 P. M.—Reading of Essays and discussions at the club house. (An interesting program for this session is being prepared, and the names of the essayists and the subjects of the essays will be sent out with the final program some time in July.)

7:00 P. M. Start from hotel by trolley car for Lake Harriet. Concert and sail on lake.

Second Day—Wednesday.

9:00 A. M. A thirty-five mile automobile trip around the Park System.

12:30 P. M. Luncheon at Minnehaha Pavilion.

1:30 P. M. Photo taken at foot of Minnehaha Falls. Stroll through Glen and Park.

2:30 P. M. Continue automobile ride.

8:00 P. M. Banquet.

Third Day—Thursday.

9:00 A. M. A trip to Minnesota's finest lake resort at Lake Minnetonka.

10:00 A. M. Arrive at Excelsior special boat for two hours sail around Lake Minnetonka.

12:30 P. M. Luncheon at Big Island or Tonka Hotel.

3:00 P. M. First business session.

Lake Minnetonka, with its water area of 39 square miles, its 110 miles of wooded and open shores and back-

ground of rolling land, its numberless bays, narrows and islands, is the most picturesque of the thousands of named lakes in the State of Minnesota. It is one great park, attractive and fascinating from every point of view.

The Park Board and different organizations of the Convention City will act as hosts of the society, providing for the entire entertainment herein outlined.

The West Hotel, selected as headquarters, is centrally located within ten blocks of all the railroad stations and five minutes walk from the City Hall.

It was originally intended to make this convention a Twin City affair, but the St. Paul authorities withdrew from participation and may extend a separate invitation to visit their park system. For that purpose the fourth day of the original mapped out four day meeting, would be available.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The regular monthly meeting of the Club for June 2d was postponed to June 9th, in order that outdoor roses and peonies might be at their best. The postponement proved to be a mistake, however, as the fierce heat of the last days of May threw the peonies into flower and they were past their best at the date of our meeting, with the earlier sorts entirely out of bloom. Roses, too, were none too good. The president appointed as judges of the exhibit: P. S. Randolph, J. W. Ludwig and J. W. Jones, who awarded first prize of \$10 for the best twelve outdoor roses to N. C. Madsen, gardener for R. H. Boggs, Sewickley, Pa.; second prize of \$5 to Robt. Lilley, gardener for Mr. Barnsdale, Pittsburgh. There were no peonies shown that the judges considered worthy of first prize.

The second prize for the best twelve was awarded to N. C. Madsen. Frank Crook, gardener for I. H. Parks, showed a very fine large *Adiantum*, which was specially commended by the judges. Fred Wissenbuch, gardener for W. L. Mullen, showed a collection of roses, delphiniums, foxgloves, etc. Phipps' Conservatories showed exceedingly fine foxgloves, and a good collection of herbaceous material.

The matter of the club outing was decided in favor of Bakerstown, on the grounds of the Pittsburgh Rose and Carnation Co. Mr. E. Burki, who is president of this company, as well as of our club, extending a kind invitation to the club to avail itself of his hospitality. The date was set for June 15 a basket picnic. This affords a rare chance for our members not only to have a pleasant outing, but also to inspect the large and thoroughly modern plant of the Pittsburgh Rose and Carnation Co. J. W. Jones, P. S. Randolph and J. W. Ludwig are the committee in charge. Subject for the next meeting: "Herbaceous Plants and Flowers."

H. P. JOSLIN, Secretary.

AMERICAN ASSOCIATION OF NURSERYMEN.

Convention Report Continued.

HORTICULTURE'S early report of the proceedings at the Milwaukee convention gave much pleasure to many members who were obliged to forego attendance at the convention and was a very complete although brief account of the meetings up to Thursday noon. Thursday afternoon's proceedings were mostly behind closed doors and not of general interest outside the membership of the Association.

On Friday morning the party, numbering about 475, started in three trolley cars for Oconomowoc, a ride of about fifty miles through rolling farming country interspersed with patches of woods and the larger part of the way in sight of beautiful lakes, the shores of which are the summer homes of Milwaukee and Chicago people. A stop was made at the farm of Mr. Fred Pabst, a very wealthy scion of the well-known brewer famous everywhere. At this farm are gathered together as choice hackneys as the world has produced, and the most renowned of them were brought out and put through their paces, and rounds of applause greeted the performance. There were on the farm 200 hackneys and on another farm Mr. Pabst has over 2000 Percheron brood mares. Mr. Pabst had thrown open his mansion to his guests but lack of time prevented accepting the invitation. At Oconomowoc arrangements were perfect for giving dinner to the good-natured throng, and in the afternoon carriages, automobiles and steamers were free to the guests of the city to take them on drives of many miles along the lake shores. Nothing was lacking to make a delightful summer outing. Oconomowoc is a charming old summer resort in a cluster of lakes, and all who were in the party carried back with them a memory of typical Wisconsin rural scenery. One of the party, Mr. Hooker, of Perfection currant fame, whose long trip from his Rochester home was principally undertaken for the purpose of seeing the Pabst stud of hackneys, was in a particularly beatific state of mind.

Notes of the Exhibition.

A notable feature of the exhibition in connection with the nurserymen's meeting at Milwaukee was the new Reed-Bell graft-wrapping machine. In looking at the machine in operation one's doubt as the practicability of doing this work by a machine vanishes at once. An operator can do from 5,000 to 15,000 grafts a day, and do every one alike and far better than they are done by hand. The use of such a hard and unyielding wrapper overcomes the hard crown gall so often produced at the junction. This is nothing more than an overgrown callous knot, an overflow of repair tissue. This machine was invented by Mr. Bell of the Huntsville Nurseries, and his invention joined with decided improvements in details of operation, made by Mr. Reed, superintendent of the Stark Bros. Nursery, is a machine that no nurseryman should be without.

D. Hill of Dundee, Ills., had some fine specimens of evergreens and Ell-

CLUB AND SOCIETY NOTES.

The annual meeting of the Society of Iowa Florists will be held in Des Moines in August.

Since May 1, 1908, Secretary Esler, of the Florists' Hail Association, has adjusted an average of one loss per day.

The Twin City Florists' and Gardeners' Club is considering the advisability of incorporating as a Minnesota state organization.

President Traendly has appointed Mr. V. E. Lambert, of Atlanta, Ga., as State Vice-President of the S. A. F. for the State of Georgia.

The next meeting of the Albany Florists' Club (N. Y.) will be held at Slingerlands with Fred Goldring on the evening of July 2.

About forty members of the Rhode Island Horticultural Society spent June 11 at the Arnold Arboretum and among the parks of Boston, making the day instructive as well as enjoyable.

A special rose night was observed by the New Jersey Floricultural Society at their rooms in Orange, N. J., upon the thirteenth instant when the usual run of blooms of the queen of flowers was displayed. In addition, delphiniums, peonies and dianthus were skillfully introduced, producing a greater variety of color. The honors of the evening were bestowed upon a specimen *Cattleya gigas* exhibited by Joseph A. Manda which had ten phenomenal blooms upon one stem and which was suitably rewarded by the society's first class certificate.

A very fine plan of the cities of Minneapolis and St. Paul, Minn., showing the present park system and contemplated extensions has been expressly prepared and printed for the convention of the American Society of Park

PARIS SPRING SHOW

PARTIAL VIEW IN THE FIRST LARGE GREENHOUSE

Of all months in the year, May is decidedly one of the most enjoyable for a short visit to the French capital. The trees on the boulevards are clothed with their new foliage, the open spaces and gardens are planted with flowers, the air is cool and fresh. We left London on a balmy day in May, to arrive in Paris, where the weather was, with the exception of one wet afternoon, all that could be desired, to view the great annual spring show organized under the auspices of the National Horticultural Society of France, which was opened on the 22nd of the month, and lasted till the 29th, a contrast to our own famous Temple Show, which is never open to the public for more than three days.

The two large greenhouses on the Cours de Reine, which formed part of the International Exposition of 1900, are still standing, and form an admirable site, although we regret to record that after the next Chrysanthemum Show in November, they will be demolished. We can only hope that some new building equally advantageous for these splendid flower shows will be erected to replace the existing spacious glass structures, and that the society will thus be able to continue its useful work in the practical illustration of all that is choicest and best in French horticulture.

Bearing in mind the immense throngs of visitors that crowd into the place after luncheon and there remain during the whole of the afternoon and evening we decide in the interest of our American readers to make an early morning visit. Entering by the gateway near the Alexander bridge we proceed along the promenade which forms so great a feature. Let us at once say that our French friends are ever inventive, fresh and artistic in their arrangement here as elsewhere throughout the show. No two shows are ever arranged alike. Here and there are groups of shrubs, beds of hardy plants in full flower, trained fruit trees, and innumerable exhibits of garden tools, pottery, greenhouses, statuary and horticultural accessories.

We enter the doors of the first large greenhouse and a dazzling blaze of brilliant coloring meets the gaze. The accompanying illustration is a partial view and shows in the foreground zonal pelargoniums, in the middle of the square Begonia Gloire de Lorraine and around it the single and double flowering begonias and gloxinias, a little further to the rear and towards the middle a fine group of hydrangeas. These and the large exhibit of Gloire de Lorraine together with an orchid exhibit were all staged by M. Robert Leboucq, to whom was awarded the grand prix d'honneur offered by the President of the French Republic.

Before we deal with the roses, which are staged in great numbers, just before we reach the portion of the exhibition shown in our illustration we admire a choice little lot of clematis from a well-known specialist, Mr. George Boucher. Marcel Moser, Daniel Deronda, Fairy Queen, La France, William Kennett, Nelly Moser are some of the most effective. Turning now to the queen of flowers, there are many lots, but we can only deal briefly with a few of them. A fine lot is that of Messrs. Leveque et fils, many of them grown as standards. We noted among others some grand blooms of Frau Karl Duschki and Mildred Grant. Among the polyantha exhibits, of which there was also a considerable number, Mme. Nohet Levassieur, Mrs. Cutbush and Maman Levassieur were excellent.

M. Geo. Boucher also staged roses in large numbers, standards in great variety, and among other exhibits mention should be made of M. Ad. Rothberg, who had a continuous display of standards the whole length of one side of the first large greenhouse. M. Aug. Nonin was also a prominent exhibitor, some good examples of Dorothy Perkins, Blush Rambler, Stella Hiawatha, Wedding Bells, and Robert Levassieur. Among other important exhibitors we must not forget M. Defresne, who also staged a good exhibit.

We now come to a most brilliant display of zonal pelargoniums. In France

ORCHIDS

GROWING ON THE ROAD

Just to hand, a beautiful lot of

CATTLEYA MOSSIAE, C. GASKELLIANA and C. SPECIOSISSIMA

Every one of which has many new growths and which we offer at **Special Sale for 15 Days** at \$35 00 per case, each containing 45 bulbs. Come and see them and you will then believe that we quote the lowest prices in America.

C. GIGAS AND OTHERS EXPECTED SOON.

ORDONEZ BROS., - Madison, N. J.

these are not displayed in cut blooms on tables, but as pot plants arranged with considerable skill for effect and in beds of great extent, as will be seen in the right hand corner of our picture. Three beds arranged on the ground floor were set up in masses each color by itself, by M. E. Poirier. The trusses were all of large size, but the individual pips were hardly equal to some of our English growers' standard. The same exhibitor also staged a number of standard zonals, mostly varieties not known on our side of the channel. M. Andre Charmet exhibited a pink semi-double called Dagata. A very dwarf double pink Zonal called Ville de Gardes was staged in large numbers by M. Paul Feron. M. Barillet showed fancy pelargoniums in variety.

A few paces further on bring us to the hollow square, where are displayed the begonias and gloxinias. On the left hand is M. A. Billad, who staged a very effective lot of tuberous begonias. M. E. Cappe had a lovely little bed of foliage begonias with maiden hair ferns intermingled in the most artistic style. Messrs. Valierand staged gloxinias edged with begonias in great variety. In M. Lebaudy's display of Lorraines huge pots were raised at intervals over smaller pots equally well flowered, which exhibit is very plainly visible in the middle of the square in our picture.

To the right and left are two rooms specially devoted to orchid exhibits, the productions of such well-known growers as M. C. Beranek, M. R. Lebaudy, M. A. Regnier, Messrs. Ch. Maron et fils, M. Le Sueur. Hydrangeas were in several cases prominent features. M. Desire Kamelet set up a large number of Thomas Hogg in front of a background of Japanese maples--a tastefully arranged display.

Cannas, azaleas, Iris Kaempferi, carnations, etc., were shown here in great variety, also the dinner table decorations and other floral compositions from the famous house of Lachaume.

In the corridor connecting this with the second house rhododendrons and azaleas fill up two large squares, and are a sight not easily forgotten. Well grown plants of both covered with bloom are staged by Messrs. Croux et fils. There was also a very large show of these handsome plants by Messrs. Moser & Son. Messrs. Vilmorin, Andrieux & Co. had a charmingly arranged water garden and rockery, an attraction of uncommon interest for

ORCHIDS

We beg to announce the following fresh arrivals of Orchids all in finest condition.

CATTLEYA DOWJANA. Of this fine rare, and beautiful orchid we have a splendid shipment to hand.

CATTLEYA LABIATA. This is the third and last lot this season.

CATTLEYA TRIANE. The second lot to arrive in perfect condition.

CATTLEYA PERCIVALIANA in perfect shape.

CATTLEYA GASKELLIANA in best of condition, and

CATTLEYA MOSSIE.

Also Dendrobiums such as **D. THYRSIFLORUM, D. FORMOSUM, YANDA COERULEA, ONCIDIUM SPLENDIDUM,** etc., etc.

Write us for prices and we can assure you that you will be well pleased both as to quality of plants and price of same.

We also have a full line of supplies such as peat, live sphagnum and orchid baskets in all sizes.

LAGER & HURRELL, Summit, N. J.

the visitors. They also set up numerous large beds of hardy flowers in the space adjoining, the varieties being so numerous that any attempt at enumeration is an impossibility.

We are now in the second large greenhouse, and behold a sight equally as brilliant as that in the first. M. Ferard staged a large number of hardy flowers on beds. M. Brochet showed clematis, azaleas, syringas and peonies. Messrs. Angel showed tulips and anemones; M. Falaisi, pansies. A pretty lot of Primula obconica came from M. Tober Maxime. Cayeux et Leclere had hardy plants, also a pretty group of Impatiens Oliveri, bougainvilleas, kalanchoes, etc. A new double anthemis called Perfection came from M. Aubert Maille and was largely shown. M. Dessert had peonies in over 100 varieties, and many other exhibitors figured to advantage. A handsome exhibit of roses and carnations was set up on a rectangular grass lawn by M. Geo. Truffaut, grown by the aid of his famous Biogine chemical manure. Ornamental foliage plants formed

an unimportant feature of the show and we must not forget to mention that M. Chabrier showed crotons, caladiums, calatheas, etc., in a well set-up group which included a hybrid vriesia between Tillandsia tessalata and Vriesia fenestralis. Two fine groups of dracaenas and other decorative plants were staged by M. Emile Morel. Messrs. Cordonnier et fils also staged crotons in variety.

Vegetables in enormous quantities were shown by Messrs. Vilmorin Andrieux & Co., as is usual for that eminent firm on such occasions. Another local exhibitor was the Societe Mutuelle des Jardiniers et Horticulteurs, who also put up a very fine lot. Fruit was of a high quality generally. Some of the best growers participated. Graperies de Somain, neatly arranged their grapes in baskets, Frankenthal, Foster's Seedling, Black Alicante and Gros Colman. Another exhibitor of grapes was M. Alb. Mercier. The Forceries de la Seine showed peaches and nectarines and Messrs. A. Cordonnier et fils also staged a handsome lot of peaches, nectarines, plums and grapes—an imposing display set up in handsome glass cases.

An art gallery consisting of over 400 pictures of fruit and flowers was at the far end of the show and was a fine collection in oil and water colors. A special catalogue of this was provided. Altogether the schedule of the show comprised 370 classes, so that our readers will see the impracticability of attempting to give anything like a detailed account of every exhibitor's lot.

During Recess

The Florists' and Gardeners' Club of Rhode Island to the number of twenty visited the Rhode Island Hospital on invitation of Brother Cornelius Harts-tra and Dr. J. M. Peters as alternate, on June 15. The grounds were gone over and very favorable comments made on the beautiful arrangement of the border beds, etc., and a turn through the greenhouses which were a model of neatness. The party was then turned over to Mr. McLaughlin, janitor of the institution, who gave us an idea of the ground floor work in an able manner.

We were then introduced to a genial guide, Eugene W. Amos, chief engineer of the establishment, who conducted the party through the several wards and apartments. Upon our descent we were introduced to Dr. J. M. Peters who received the party in a very "hospital" manner. In the reception room a most substantial lunch was served after which remarks were made by Secretary Chappell and responded to by Dr. Peters.

Later in the evening the club held their meeting, and added two new members to the roll of honor, after which Messrs. James Hockey and James J. Barclay furnished a very pleasant musical entertainment. Our club seems to be on the pick up. Several new members have been added of late and a number have been reinstated. Our meetings are well attended and we are looking forward to a very good interest this fall. Meetings will be discontinued through July and August.
WM. E. CHAPPELL, Sec'y.

Seed Trade

The following members have just been appointed by the President of the New York Produce Exchange to serve on the Committee on Seeds for the ensuing year: Wm. Jacot, Marshall H. Duyea, Ernest Wehncke, O. W. R. Randolph, Chas. Wimmer.

Des Moines, Ia., Jun. 9.—Iowa seed dealers in session here today are of the opinion that, though the pure seed law enacted in the last general assembly is a step in the right direction, several changes should be made in it. State Commissioner Wright appeared before the convention and answered questions asked by the dealers and in general agreed with them on the needed amendments. The chief objection to the law, as it now stands, is that there is no provision for prosecuting the small dealers who receive seeds marked "to be cleaned" and, removing these tags, sell them. Professor L. H. Pammel of Ames, one of the framers of the law, agreed that he had noticed the defects during the year it had been tested and realized that remedies are needed. He suggested a state commission to get a standard for seeds and that it be made to include vegetable and flower seeds. Professor Holden and Professor Crossley of Ames also spoke.—Council Bluffs Nonpareil.

Of Interest to Retail Florists.

The florists of Holyoke, Mass., report that in spite of dull times there has been no let-up in their business. In fact the trade this spring in many instances has passed the best previous years.

Paul Blome & Co. of 554 N. Clark street, Chicago, have now a fine retail store and conservatories in the rear which have been built during the past season. Mr. Blome reports weddings not quite so numerous as in more prosperous years. The leaving of so many Chicago people for their summer homes is making quite a difference in the volume of trade.

At the banquet of the National Republican Committee at the Auditorium in Chicago on the 8th of June in honor of C. E. Dawes the decorations by Hauswirth were beautiful and unique. Down through the center of the spacious dining hall was an oblong plot or carpet of green moss fifty feet long and about eight feet wide, edged with geraniums and having palms scattered in the center. Around this were the tables and outside of the tables were placed bay trees at intervals interspersed with magnificent bouquets of peonies and roses. The tables themselves were decorated with asparagus plumosa.

Obituary

Lawrence Lundberg.

A sad accident occurred on June 10th in which Lawrence Lundberg, a florist, at 616 Wells street, Chicago, lost his life. Mr. Lundberg was driving with a friend and the buggy was struck by a North avenue car, Mr. Lundberg was thrown out and never recovered consciousness.

LAWRENCE LUNDBERG.

Lawrence Lundberg was born in Sweder twenty-nine years ago, where he remained till six years ago, learning the florist's business in his native country. He had a fine retail store and was doing well. During the three years since he started he has built up a nice trade and his florist friends deeply regret his untimely death. He leaves a wife and little daughter two years of age. Mrs. Lundberg will continue the business.

A. David Rose.

A. David Rose, formerly of Ballin-

A. DAVID ROSE.

dalloch Castle, died on June 16 at his home in Montclair, N. J., after a long

illness. The funeral on Thursday, June 18, was attended by many sorrowing friends in the florist and garden fraternity, for "Davy" Rose was beloved by everybody who knew him and sympathy most sincere has gone out to him during the long suffering which he has faced with so much fortitude. Mr. Rose had a very wide acquaintance among the trade. He had been employed at many places of note—private and commercial—including the Gardner Brewer estate at Newport, R. I., the Pratt estate in Brooklyn, N. Y., E. G. Hill Co., Richmond, Ind., and Pitcher & Manda, Short Hills, N. J., at all of which he had acquitted himself with credit. A few years ago he went into business in Jersey City, N. J., and later moved to Montclair where he secured the old Michie place which he conducted up to the present time.

Alexander Wallace.

As we go to press a telegram advises us of the death of Alexander Wallace, editor of the Florists' Exchange, New York. Mr. Wallace has been ailing for a short time with a complication of diseases. He was out of his office for about ten days and then returned for two days, but was unable to continue and on Wednesday, June 17, he passed away. He was born in Lawrence Kirk, Kincardynshire, Scotland, on November 21, 1859. He came to this country in 1888 and one year later entered the employ of the A. T. De la Mare Printing and Publishing Company, and soon assumed the editorship of the Florists' Exchange published by that company, a position for which a good education and knowledge of stenography made him well fitted. He read much and, having a good memory, was able to apply his insight into horticulture thus obtained to good advantage. One of Mr. Wallace's most striking characteristics was his thoroughness. Whatever he undertook he followed up to the minutest details, and this analytical exactness was in evidence in all his work. On committee assignments in the S. A. F. and the New York Florists' Club, in both of which organizations he was a member, his duties were always accepted cheerfully and performed faithfully. He served as a member of the Executive Board of the S. A. F. for one term of three years, having been appointed by President Patrick O'Mara. We extend to our esteemed contemporary our sincere sympathy in the great loss which they and the cause of horticulture have sustained.

The funeral will be at Church Green and Washington avenues, Brooklyn, N. Y., on Saturday, June 20. Interment at Greenwood.

Ira L. Russell.

Ira L. Russell, market gardener of Arlington, Mass., died on June 12 at the age of 74.

William Barr.

William Barr died at Lewellyn Park, Orange, N. J., on June 16, aged 81 years.

William Graham has leased the Mergenthaler place at East Washington Lane, Germantown, Pa. Dr. Burrows is associated in this new venture.

FLOWER MARKET REPORTS

BOSTON The flower market has picked up a little life this week, due in part to the demand and in part to the decreased supply. The wedding and graduation period is doing excellent work for the lily of the valley, the sweet pea and the American Beauty rose. Pres. Carnot and Kaiserin roses are the only roses that can boast of perfect foliage and acceptable style. The other roses show the wear and tear of the long winter campaign, and most of the carnations are in the same predicament. Prices remain stationary.

CHICAGO There has been no decided change in the Chicago cut flower market during the past week but the general tendency is in the line of improvement. The Republican convention has brought many people to the city and in various ways increased the sale of flowers. Weddings are numerous though there is a difference of opinion as to whether the number is equal to that of last year and lily of the valley is quite in demand. Sweet peas are also selling readily. In one wholesale house was noticed unusually fine *Lilium auratum*. Carnations are plentiful and bringing fair prices for good stock. Flowers are in abundance though not in excess as was the case a week ago. Some fine Canterbury Bells grown by Wittbold are in market. Peonies certainly are excellent and though the supply is very large most of them find buyers. Some very fine Shasta daisies are also seen. Trade in florists' supplies is active.

INDIANAPOLIS June trade up to the present time has more than met the approval of the majority of the florists. The June weddings and commencements as usual have used great quantities of choice stock. Sweet peas of quality had a tremendous run. Beauties, cattleyas and lily of the valley are excellent with good demand. All seasonable stock is plentiful but the quality is daily becoming more inferior. A few asters are in and gladioli are becoming more abundant. Carnations, and in fact everything in the field, is looking very promising.

NEW YORK The volume of business diminishes from week to week. There is still a glut of carnations and quality is poor with a few exceptions. Rose growers are throwing out rapidly and this helps to the extent of not having a lot of unsalable stock in sight. Beauties are moving somewhat better but prices are still low. Of the small roses, Killarney and Testout have the preference. Richmond does not amount to much. Cattleyas and lily of the valley of the best grades sell fairly well, inferior stock finding little outlet.

PHILADELPHIA Trade here for the second week in June was not up to standard. Commencements and weddings were numerous enough but much of the flower work for same was on a very modest scale and in some cases was cut out altogether. Receipts have shortened up, many of the growers having cut out the poorest houses in their roses and carnations, now that these have ceased to be remunerative, with a view to repairs and replanting. American Beauty roses are still of good quality and fairly plentiful. The first of the new crop have commenced. These are limited and come from one or two growers who planted early so as to overlap on the regular throwing-out season. Brides and Bridesmaids are poor, Kaiserin good, Liberty better than Richmond and Killarney is now coming in nice and clean. There is very little that is choice in carnations. Retarded peonies are plentiful—the local outdoor cut being over—demand good and quality excellent. Orchids less plentiful and moving better. Outdoor sweet peas have never been better; color, substance and stem perfect.

TWIN CITIES The cut flower market has been good; the supply equals the demand. American Beau-

ty, Bride, Bridesmaid and Chatenay roses are about gone and whatever is on the market is short-stemmed and of inferior quality. *Gladiolus America* and *Princeps* are selling for \$12 per 100 while the common kinds only bring from \$2 to \$4.

NOTES.

Detroit advices indicate that were it not for a few bouquets and graduation jobs matters in the floral lines would be extremely monotonous. Even as it is there is very little to do. The wholesalers are kept busy throwing out the surplus.

Washington reports that there is almost nothing doing in the flower market now, as this week winds up all of the Washington schools. It will be hard to dispose of flowers now at any price for social affairs are a matter of ancient history.

PHILADELPHIA NOTES.

Arthur T. Boddington of New York was in town recently inspecting seed store fittings.

Charles H. Meehan who has been laid up with a severe attack of quinsy for the past two weeks returned to his duties on Saturday.

Henry F. Ehrsman succeeds to the business of John Lees at Frankford avenue and Bridge street, Frankford. Mr. Lees is reported to have gone West.

"The Garden," London, announces the Garden Flower Show to be held at the Royal Horticultural Society's Hall, on Wednesday, July 29, 1908. The sum of 100 pounds (\$500) will be offered in prizes and one gold and two silver medals will be awarded. Only readers of the paper will be allowed to compete.

Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. SITUATIONS WANTED

GOOD MEN

When you need good men, skilled or unskilled, Write:

THOS. H. BAMBRICK

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

HELP WANTED

A GOOD side line for salesmen calling on greenhouses, etc. Pocket samples, State territory and references. Factory, P. O. Box 1371, New York.

FOR SALE

FOR SALE Greenhouses. About 30,000 feet of glass in first-class condition, well stocked with roses; fine location for retail trade. Handy to Boston market for wholesale; chance of a life time. Reason for selling: all my time is taken up with other business. Write for particulars or call and see them. Address H. F. Crawford, Montpelier Station, Brockton, Mass.

FOR SALE—Special—Glass for sale below cost. 16 x 24 double thick American A. & B. qualities, below cost, for immediate acceptance. Never such an opportunity offered before. Write Parsheley Bros., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—27,000 feet of glass; filled with first-class stock; located in one of Chicago's suburbs; low price. Address Florist, 4016 N. Clark St., Chicago.

NEWS NOTES.

Mr. A. Warren Spalding has opened a florist shop in Newport, R. I.

A. Van Pelt has started in the nursery and market gardening business at Havelock, Neb.

The Blackman Floral Co., Evansville, Ind., are to have a new front in their store at 402 Main street.

The greenhouses of M. Ullenbruch, Port Huron, Mich., were badly damaged by an electrical and wind storm on June 8.

As the result of a hailstorm on May 29 a large quantity of stock in the houses of W. A. Schaefer, Platteville, Wis., was ruined.

William Didden, Mt. Moriah Lane, has purchased a farm at Yeadon, Del. Co., Pa. Two greenhouses and a dwelling house are part of the improvements already in evidence. Mr. Didden is now residing at the new place, and his son, George, is taking care of the old business at Mt. Moriah.

FIRE RECORD.

The greenhouses of F. F. Shepardson, Mansfield, Mass., were entirely destroyed by fire on June 11. Loss about \$1000.

Fire gutted the plant of the American Seeding Company, Louisville, Ky., with a loss of about \$50,000 to plant and building.

F. F. Shepardson, who raises cucumbers extensively at Mansfield, Mass., sustained a loss of about \$2000 on June 11 from fire. Cause unknown; no insurance.

SPRING PLANT TRADE.

Reports from Indianapolis are to the effect that this season's trade has by far exceeded that of any previous year in the bedding plant line, veranda boxes being largely in evidence. There has been an exceptional call for laurel, bay and boxwood trees.

Minneapolis reports that planting of deciduous plants is about done for this spring; the same with conifers. Bedding is in full swing and will probably last for another week or two as owing to the rainy and cold weather orders are coming in late.

A few belated orders are still coming in but the Chicago bedding season is about over. The storemen are now stocking up of Boston ferns, palms, araucarias, aspidistras and other greens. The plant growers generally seem to feel that the close of the season finds them with nothing to regret unless it is that they did not have stock enough to sell.

Detroit reports outdoor plantings nearly all finished and most growers cleaned up at the usual prices. This fact should be appreciated by the public because, thanks to the instability of the growers, no uniformity in prices could be agreed upon and consequently better varieties produced with more expense than ten years ago were offered as low as the price of ten years ago. Local parks have used up close to a half million of plants for flower beds of various descriptions.

GREENHOUSES BUILDING OR CONTEMPLATED.

Sandusky, O.—City Parks, one house, Norfolk, Va.—Park Department, range of houses.

Negaunee, Mich.—Cleveland Cliffs Iron Co., range of houses.

Danbury, Conn.—J. E. Cornell, house 30x70; boiler room, 10x20.

The Globe Floral Co of Evanston, a northern suburb of Chicago, have just purchased six acres of land close to the terminus of the Evanston branch of the North Western Elevated. Their greenhouse plant was torn down to give right of way for the drainage canal, and they received \$27,000 for it. The Globe Floral Co. have their new range well under way and a fine residence is completed.

Kroeschell Boiler Facts

CONTROL. Our boiler is the **most easily controlled** of any boiler made, either when used to its utmost capacity, or when doing very light duty. Those who are using them at full rated capacity write us that they do the full rating with economy; and would do more if necessary.

On the other hand, we could give you names of parties, for example, who have our No. 10 boiler (which has a capacity of 1,250 square feet of glass), and who are heating but one house 20 x 100, which is practically only one-tenth of the capacity of this boiler, and **under these extraordinary conditions, the boiler is perfectly controlled**, economical in the consumption of fuel and satisfactory in every respect.

The object in buying so large a boiler under these conditions is to provide for future increase of greenhouses. We find through experience that this plan is by far more satisfactory and cheaper than to depend upon increasing your boiler capacity by adding sections to cast iron boilers.

MATERIAL. All material is **flange boiler plate**, except the door rings and mud rings which are **wrought iron 2 x 3**. Tubes are best **Charcoal Iron**. Flange boiler plate is the same as used in high pressure, tubular or locomotive boilers; it cannot crack, is many times stronger than cast iron and is a much better conductor of heat.

OPENINGS. Can give you any kind or size of openings you may order. See page 16 of our catalogue.

WORKMANSHIP. We have most skilled workmen, and give the building of each boiler our personal supervision; these boilers are all **made to order** and are no cheap factory made goods.

These boilers are delivered complete and ready to fire up as soon as they are placed on the small brick foundation. Brick work can be built by any Florist.

KROESCHELL BROS. CO., 35 ERIE ST., CHICAGO

Don't Build

without first investigating the best device ever invented for *Heating Economy.*

Don't Repair

until you have got some information as to how we can help you by installing the

ELECTRIC CIRCULATOR

State your proposition and we will reply promptly. It will cost you nothing but a two cent stamp.

THE CASTLE COMPANY, HEATING ENGINEERS
170 Summer Street, - BOSTON, MASS.

OTHER BUSINESS MEN MAY "EASE UP"

during the heated term but the florist does not. His greenhouses must be repaired and it takes **Glass and Pipes and Lumber** to do it.

Now is the time to advertise if you want his trade

His Boiler must be made right now: if you sell heating apparatus get him to buy a new one. Perhaps the time has come for a new watering system. You can reach him most effectually through an advertisement in these pages,

JUST NOW.

THE STANDARD STEAM TRAP

is acknowledged the best for the florist, because it is durable and does its work without trouble and annoyance, saving its cost by the economy in coal bills.

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: **Result**, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

The Advance Ventilating Apparatus

"Your machine is the best we have ever used" is what an Ohio florist writes us in referring to his machine. It is not good only in one part but it is the best in all parts—the results of experience, of careful study, of mechanical construction, best material and backed by moderate prices that makes our line so popular. Give us a trial.

THE BEST JUDGE

West Whiteland P. O.

Chester Co., Pa., May 5, 1908.

In 1896 I built my first greenhouse, and every year have made some addition to the business, until now we have over fifty thousand feet of glass.

Those who have built their business in this way, from the old frame up, usually are in the best position to judge the merits of a boiler. I can, therefore, say the two boilers you installed for us in 1904, have been most satisfactory. We gladly recommend your work.

Yours very truly,

J. L. MAULL,

Millbrook Lea Greenhouse Co.
Whitford Station, Pa.

Notes from the Arnold Arboretum

One of the finest of the native Arrow-roots is *Viburnum venosum* which forms a broad round shrub from six to twelve feet in height now covered with numerous showy white flower clusters. Still handsomer is its variety *V. venosum* var. *Canbyi* which has darker green and larger leaves and somewhat larger flower clusters; it flowers somewhat later and is a native of Pennsylvania, while the true *V. venosum* grows along the coast from Massachusetts to New Jersey. Both these Arrow-roots were passing formerly together with a southern species, *V. scabrellum*, under the name *V. molle* mentioned in the last issue as a shrub but recently introduced into cultivation and still little known. In habit and general appearance *V. venosum* and its variety are much like *V. pubescens* and *V. dentatum* and like those very desirable shrubs particularly for borders of shrubberies with their compact habit, clean foliage not liable to injury by insects and fungi and assuming a handsome fall coloring and with their showy flowers followed in autumn by attractive bluish black fruits. Though almost alike in their ornamental qualities these Arrow-roots differ in the time of flowering and therefore are all equally desirable; the first is *V. pubescens*, about two weeks after it *V. dentatum* begins to bloom and a week later *V. venosum* closely followed by its variety *Canbyi*.

Another shrub now made attractive by its white flower cluster similar to those of the Arrow-roots is *Cornus obliqua* (*C. Purpusii*) formerly confounded with *V. Amomum* from which it differs in its looser habit and narrower and smaller leaves whitish beneath; it flowers a little in advance and more profusely. An interesting and handsome hybrid of *C. obliqua* and the graceful *C. paniculata* is *C. Arnoldiana* in habit much like *C. paniculata*, but forming a larger and more compact shrub and therefore of more than botanical interest; it originated at the Arboretum.

A common native shrub but nevertheless of much ornamental value in suitable places particularly on the borders of ponds and water courses is the Sweet Elder, *Sambucus canadensis*, which is a very effective shrub when covered with its large clusters of white flowers followed later by purplish black berries. A variety of this species with finely dissected leaves, *S. canadensis* var. *acutifolia*, is highly ornamental on account of its light and airy appearance and is to be counted as one of the best cut-leaved shrubs; it is certainly handsomer than *S. nigra* var. *laciniata*. It has been but recently introduced into cultivation and is still little known.

The latest of the Hawthorns to bloom is the Washington Thorn, *Crataegus cordata* or *C. Phacopyrum*, which must be classed as one of the most ornamental of the whole genus. It is a small tree with handsome lustrous foliage changing in autumn to brilliant colors and with abundant white flowers followed in autumn by glossy bright red fruits remaining on the tree late into the winter. Not the least of its good points is its apparent immunity from the leaf-miner disfiguring our Hawthorne so much in spring when they would be such beautiful objects with their wealth of white flowers and delicate young foliage.

Magnolia macrophylla is now adorned with its big white flower by far the largest of any North American tree. It is certainly a highly ornamental tree even when not in bloom on account of its large leaves which give to it an almost tropical appearance; unfortunately it is not perfectly hardy in this section of the country at least while young, when it needs some slight protection.

Older trees, however, stand even severe winters quite well in eastern Massachusetts. Also the shrubby *M. glauca* shows now its handsome white cup-shaped flowers.

A pretty little low shrub particularly adapted for rockeries and gravelly slopes is *Cytisus albus* var. *schipkaensis* forming a dense prostrate shrub covered with numerous heads of white flowers, a color rare in the genus *Cytisus*. An ally of it *Genista tinctoria* is now beginning to show its spikes of bright yellow flowers; it is a low upright shrub well adapted for covering dry slopes and perfectly hardy, in fact it has become naturalized in many places of similar description in the northeastern states. Another handsome low Leguminous shrub for rockeries is *Calophaea vulgarica* with deep yellow flowers in short racemes; it is sometimes grafted high on *Caragana* and forming then very attractive small standard trees.

As one of the few Maples with ornamental fruits *Acer tataricum* merits to be noted; it is a handsome small shrubby tree now very attractive with its light red fruits.

Alfred Rehder.

Arnold Arboretum, Jamaica Plain, Mass.

British Horticulture

A RHODODENDRON SHOW

According to their usual custom, Messrs. John Waterer & Sons are this month making a brilliant display of rhododendrons in an immense marquee erected in the Royal Botanic Gardens. The collection includes the leading varieties which Messrs. Waterer have brought to the front, and these are of meritorious standard of culture. A grand effort is produced with the grouping of the various gay tints on the undulating ground beneath the canvas, and one is impressed with the great value of the rhododendron for producing a bold display when judiciously arranged. This notable event in the London season has done a great deal in popularizing the rhododendron. Messrs. Waterer for some years have made a specialty of rhododendrons, a large acreage being devoted to their cultivation at their American Nurseries at Bagshot. A large number of the leading named sorts have been raised by the firm, for which the demand is well maintained, orders being received from all parts of the world. In the course of an interview sometime ago, one of the members of the firm said, "Exclusive of the little seedlings, we send out from 50,000 to 100,000 rhododendrons each year. Sometimes, as only the other day, we have a retail order for 2,000 of one variety. These are all named varieties, propagated by grafting and layering—by layering as much as possible." The nursery is also noted for its hollies and yews and shrubs which are also supplied in large quantities.

A NEW TOMATO DISEASE

The tomato crop in some parts has recently been found to be attacked by a disease which has not previously been known to exist in this country, according to Mr. H. T. Gussow, who contributes an article to the Board of Agriculture Journal. The disease, it is stated, was first reported from South America, the native country of the tomato. From its sudden appearance in Britain it is assumed that the fungus has been introduced from abroad with imported tomatoes. A crop of outdoor tomatoes in Gloucestershire was entirely

destroyed last year by the disease. The fungus which causes the disease is closely related to the "leaf spot" disease in strawberries, apples, pears, and chrysanthemums, but is quite distinct from any of these diseases. It has been proved that spores of the fungi causing "leaf spot" on the plants before mentioned are incapable of producing this particular disease on tomatoes. In the same way experiments made with the object of infecting potatoes and other plants with spores from this tomato fungus have not resulted in any injury. The tomato plants attacked show small blackish green spots on the leaves. These are irregular in shape at first, but soon become concentric and finally confluent, and the leaves, which are rapidly killed, roll up and hang loosely from the stalk. The fungus also attacks the stem, the calyx, and finally the fruit itself. From experiments made, it has been demonstrated that plants once attacked can only be saved by spraying immediately when the first signs of disease are noticed. The plants should be sprayed with a 3 per cent. solution of Bordeaux mixture early in the morning every second day for two weeks. The spray should be in the form of a fine vapor falling upon the plants like a natural dew. It is recommended that tomato seed from infected areas should not be used, but if so should be steeped for one hour in a 5 per cent. solution of copper sulphate and dried before sowing.

THE POWER OF UNITY

A satisfactory report of progress and prospects was presented at the annual meeting of the British Gardeners' Association, which has been formed to improve the status of the working gardener. The chairman (Mr. Chas. Foster) stated that the Association has attained a membership of 1,200 in four years. Few societies connected with horticulture had ever made so rapid an advance in such a brief period. At the previous council meeting no fewer than 78 new members had been elected. The Association journal was doing excellent work as a monthly publication, and helping materially to bring the provincial members more closely in touch with one another. The improved education of gardeners was receiving earnest attention, and a provisional scheme for examinations had been set forth, which it was intended to carry out in such a modified form as further consideration and discussion might render necessary. The Association is likely to occupy a useful part in protecting the interests of the working members, besides preventing employers being imposed upon by men who have no claim to call themselves gardeners.

A PLEASANT OUTING

The members of the council and committees of the Royal Horticultural Society recently spent an enjoyable day in visiting the Windsor Castle and Frogmore gardens, by permission of King Edward. The visitors were entertained at luncheon by the Mayor of Windsor, who was suitably thanked on behalf of the guests by Sir Trevor Lawrence, the president of the society. In the afternoon the conservatories and gardens were visited under the direction of A. MacKellar, head gardener at Frogmore, and there was much to praise in the well arranged and admirably kept establishment. The display of roses was particularly fine.

W. G. H. Aclsett.

About Some Peonies

On the whole, in this vicinity (Chicago) the crop of flowers is considered above the average and satisfactory. Yet some varieties have not given a solitary flower. In rows of four kinds, 25 of each, exposed to the same conditions of culture established in their positions for four years (the beau ideal of a peony plant's life is then established) we note that there are many varieties without a bloom, or, perhaps a few that have a crippled flower or two.

The question is—are peonies becoming whimsical? Do they have their on years and their off years? In a general way and without any favoritism where one variety doesn't get any more to drink than its neighbor, one would think there would be a general showing. Let's think a bit. No doubt it is a fact that there is a period in a peony plant when its plans are laid for another year and that it goes through many vicissitudes each season. If the rule held good that a plant bearing a large crop of flowers one year does not bear a large crop next year one could reason the matter out, but this is not so. Varieties will continue in their even tenor of flowering for three or four seasons; then all at once there is a failure which is general and not attributable to frost causes after the growth has commenced in spring. One is asked, "How is your Dr. Bretonneau flowering this year? I have not a single flower." "Neither have I." "Nor a flower on M. Bouchardat Aime." It's worth considering why.

ABOUT VARIETIES GENERALLY

Blood red, deep crimson, amaranth and deep maroon peonies are not nearly as much appreciated as they should be. (I leave the commercial cut flower element out of this entirely and under no consideration would I ask the opinion of those who only talk long stems, good snippers, and about a 3-color limit.) It is for garden decoration I am advocating these positively decided, effective colorings; they have no equals; they are in proper positions wherever placed; the white spiraeas and the snowy philadelphus nod their plumes to all peonies but particularly to the deep-colored brigade.

I have rather digressed from my original intention, as I thought I would simply send a list of the very finest and true to name varieties I saw at the Peterson nurseries, Chicago. Undoubtedly the Peterson collection is one of the very best in the country, and if there is a collection where more time, care, money, disappointment, cursing and ultimate satisfaction have been spent and obtained "it's next." I was shown a record of one supposed variety from twenty different sources in which there were actually sixteen kinds—enough for a distinct collection, and that's not so long ago. Peterson's finest reds are:

M. Martin Calizac, deepest crimson velvet maroon—

the most impressive of all dark flowers I have ever seen: Augustin d'Hour, deep red; M. du Ribert, brilliant red; Armandine Mechin, deep crimson on red; Delachéfi, deep amaranth, very old and very good; Adolph Rosseau, amaranth; François Ortegal, very dark; Souvenir de l'Exposition de Universelle, clear red, another good old one; Rubra Triumphans, another of the old guard; Emile Lemoine, deep red; Richardson's Rubra Superba, very dark, late; Felix Crousse, red, distinct and worthy of the name. Other good reds are Henri Demay, violet purple; Jussieu, black purple; Louis Van Houtte, crimson; Calot's Louis Van Houtte, cherry red; Prince Talindyke, purple crimson; Ville de Nancy, brilliant crimson and *Violacea Superba*, deep violet purple.

Rose color peonies, good color: Modeste Guerin, bright rose; Mme. Forel, deep rose; M. Krelage, deep rose; *Edulis Superba*, well named; M. Boucharlataine, bright color.

Pink peonies, all good: Triumphe de l'Exposition de Lille, peach pink; Delicatissima, chaste, old and good; Dr. Bretonneau, clear color; Albert Crousse, light pink; General Bedeau, pink shaded lavender, unique; Jenny Lind, salmon pink; Mme. C. Bancel, deep color; Pottsi Alba, an old gem; *Grandiflora Carnea*, flesh white.

White peonies, and their next of kin: Whitleyi; I wonder how many cognomens this superb variety has been afflicted with: it's the oldest and one of the very best; Festiva Maxima, finest in its class; Alba Sulfurea, very early; Madame Crousse, a gem; M. Dupont, large, fine late; Couronne d'Or, a fine late variety; la Tulipe, blush and red markings; Mad. de Verneville, pure white, flaked red, fragrant, early; Marie Lemoine, large, late; Duchesse de Nemours, pure white, very fragrant late; Charlemagne, flesh white; Bernard Palissy, blush; Virgo Marie, pure white, one of the best; and dear old Albiflora, the mother of so many.

In a class which is undefined there are varieties of decidedly different coloration: for instance, Golden Harvest is classed among the white with this description—blush guard, collar clear yellow, centre white with carmine stripes and tips. Apropos of Golden Harvest, among ten varieties of the very best the question was asked, which of the ten is the best? This was asked at seven different points. Mr. A. Loeffler, an enthusiastic amateur, picked Golden Harvest. An artist of repute in Chicago did the same; so did three others. My opinion of Golden Harvest is that it is a gem of the first water and is one of the most beautiful of all garden peonies; it is dwarf, free, well furnished with foliage and is not affected by the wind. Add M. Boucharlataine, white and yellow; Solfaterre, very beautiful, blush and lemon.

A Test of Peonies

What we want is plants that will stand everything without being discouraged—those that will be prolific and sure bloomers.

We had the most remarkable spring on record. April and May changed places and the mischief was to pay. Warm days brought out the buds and it seemed as if we would have flowers in a few days. Then early in May, we had a succession, not of frosts but of freezes which froze the ground. It was a fearful test. Then came mild days to encourage them. Many recovered and we thought they would be all right. Then a bitter cruel freeze sneaked in and caught everything unawares and we asked, Can any living thing endure this? Our old favorites gave it up. Of one thousand Festiva Maximas not a dozen decent blooms. The faithful L'Esperance, our dependence for Decoration Day, gave up the struggle. Calls poured in, but most of the peonies were nipped in the bud. Yet there were some that just gloried in tribulation and paid no attention whatever to little trials like those. Golden Harvest maintained her never-fail reputation and ought to stand away at the front—hardy everywhere in Manitoba and the Dakotas. The plants covered with flowers of exquisite beauty. They need but a strong and long stem to stamp them as perfect. Charles Verdier was a glory of bloom. Faust, M. Jules Elie, Sarah Bernhardt, and Louis Van Houtte answered the roll call promptly. I was surprised at the vigor of the M. Duponts. They were by far the best and grandest of the whites—splendid, solid hemispheres, seven inches across, centers flecked with carmine, so distinctly marked you could not mistake them. La Subline, literally deluged the plants with crimson beauty. Couronne d'Or never did better. Baroness Schroeder sent out a flower for every stem. One thousand Queen Victorias, usually so hardy, gave up in disgust; not a decent flower on the whole mass. Rosenfield's Triumphs, bred for hardiness and beauty, carefully selected out of thousands, and blooming qualities carefully noted for years before putting them on the market, were on hand promptly. Karl Rosenfield, the ideal crimson and the finest among seven hundred, was all right, arrayed in royal splendor. Ak-sar-ben, brilliant crimson maroon; Grace D. Bryan, splendid large pink; Crimson Victory, radiant in loveliness; Prairie Splendor, with delicious perfume and magnificent bloom, seven inches across, with Prairie King with full globe of brilliant soft violaceous red, all sustained the test. These are very robust, the stems are from forty to forty-eight inches tall. Just what we have been looking for to endure the trying climate of the West.

Jeanne d'Arc and Golden Harvest. As these bloomed this year, it was hard to tell the difference in the flowers. The former is probably the mother of the latter.

There is this difference, a row of Jeanne d'Arc planted last fall did not produce a flower. A row of Golden Harvest planted the same time was covered with bloom.

of pretentious proportions as planned, it is the duty of every plant, flower, fruit or vegetable grower to contribute in some way towards the success of those at least that are in his immediate neighborhood, this not only from the standpoint of disinterested liberality but also in pursuance of self-interest in a business way. As the basis of all exhibiting must be a desire to excel, preparatory work should be begun as early as possible and one uppermost aim should be to bring forward something sufficiently novel to excite public interest.

The feature of novelty should be made a cardinal point in the preparation of the prize schedule of every show where public interest is sought.

We have dwelt on this subject several times already but it will do no harm to dilate further on its various phases for it is what must, in all such enterprises where expense is assumed, stand between the promoters and disaster. Unless public enthusiasm is made to follow on and supplement professional enthusiasm, the best show in the world from a professional viewpoint, will turn out a flat failure financially. And here a word of caution may not be amiss: novelty is not necessarily oddity and public enthusiasm is something different from mere curiosity. Let it be clearly understood that the public soon tire of the fine cultural distinctions which to the gardener are of such vital concern, but will always be found ready to respond to a practical demonstration of the proper disposal and artistic uses of plants and flowers about the home or for social events in which human interest centres. Without this element a "paying" show is a gamble, with the odds against you.

While on the subject of exhibitions the long-talked-of national flower show is a timely topic. Less than five months away, looms up that stupendous project at Chicago. We believe that, if the growers throughout the country do their best the people in and about Chicago may be depended upon for enthusiastic and substantial support. Much is made of the importance of getting together a big representation of all the horticultural interests and, from the standpoint of the professional horticulturist, the advantage to be gained thus cannot be too strongly urged. The event, if carried out as proposed, cannot but result in a vivifying such as no other single event in American horticultural industry has ever brought about. But of equal or even greater importance is the awakening of the public eagerness and zeal and to this end, our Chicago friends who must, of necessity, take the laboring oar, are entitled to and should have, something more than mere contributions of dozens, hundreds or even thousands of well-grown flowers. If each exhibitor will seriously consider what he can present that will, by its impressiveness or novelty, command special attention from the daily press, the grand result need not be for one moment in doubt.

The fall exhibitors Now that the spring rush days are over and the school graduation and the "June wedding" almost passed into history, it will be in order to give a little thought to the fall exhibitions. Whether these be of modest or

A PROTEST.

We learn from the Worcester daily papers that it is the purpose of the directors of the Art Museum in that city to demolish the conservatories on the estate of their benefactor, the late Stephen Salisbury. Considering that the Museum realizes annually the income from a legacy of \$1,000,000, it does not appear that the contemplated abolition of these greenhouses and their contents is called for on grounds of economy, and we heartily concur in the sentiments expressed by remonstrants against the decision of the Museum directors, and especially against the dismissal of that fine old gardener John Coulson, whose charge these conservatories have been for so many years. Mr. Coulson is a gardener of the highest type, a botanist of no small attainments, and he and the greenhouses under his supervision are well worth to Worcester's citizens all they cost. We believe that if the circumstances could be brought home to the leading horticultural spirits in the land a vigorous appeal would be forthcoming for the preservation of this old landmark so closely identified with the memory of the man who did so much for his city.

CROCUSES IN THE GRASS.

Our cover illustration from a photograph by W. H. Waite, of Greystone, Yonkers, N. Y., shows one of the most beautiful scenes that the eye can rest upon. After the dreary aspects of the winter season, one of the first flowers of spring is the crocus and one may well wonder how it is that a flower of so delicate a texture and such purity of color can make itself at home amidst sleet and cold and the remnants of the winter's snowdrifts. It is not in the window box or the garden border that the crocus is seen at its best, but as shown in the picture, when allowed to run riot, as it were in colonies, with colors massed, in the grass, provided only that it is not disturbed by the spring lawn mower and no cutting is done until the crocus foliage has turned yellow. For best effect crocus bulbs should be planted early—say, September or October at the latest. Many defer crocus planting until November or December, which is a mistake, for many of the bulbs are then liable to winter-kill. Early planted bulbs will make long roots and get ready for a good start at the proper time, and these are rarely injured by freezing or thawing. Medium sized bulbs are the best and less liable to injury at any time than those that are extremely large. They should be planted fully three inches below the surface. Some of the most satisfactory varieties are Golden Yellow, Mammoth White syn. Mont Blanc, Sir Walter Scott, striped, *Purpurea Grandiflora*, and Baron Bruno purple. If planted and treated as above advised, once planted they will continue to bloom and increase indefinitely year after year. Every florist should induce his customers to buy and plant them by the thousand and tens of thousands.

THE EXPRESS MONOPOLY.

Express rates are being looked into with much care by the Interstate Commerce Commission. Their findings so far afford some hope that lower rates may be ordered, although such results are not likely for a long time, perhaps for years, during which time the express monopoly will, no doubt, "make hay while the sun shines," and continue to extort enormous profits from the public.

The commission lays down the view that the company should be satisfied to earn 10 per cent. on the money invested after paying salaries and expenses, and that any profit over such an amount would be reason for ordering a reduction in rates. The companies cannot claim to have very great sums invested in the business. A large part of the dividends they pay is paid upon grossly watered stock. They allowed their profits to heap up, gave them to their stockholders as bonds or stocks, and paid interest on these bonds or stocks which did not cost the owners a cent. The express companies own very little property used in the business. The railroads provide the cars and charge the express companies about half their income for carrying the goods. The express companies own almost nothing except office furniture and wagons for delivering goods in the larger cities. They are middlemen of the most objectionable kind coming between the railroad and the shipper in this way.

There is no reason why the railroads could not carry and deliver the class of goods handled by the express companies, and they could do it at little more than half the cost of the present system. The Interstate Commerce Commission ought to be able to separate the real capital from the capital based on nothing but profits and then adjust the rates to the actual situation. If the companies cannot be abolished and the business turned over to the railroads a fair adjustment of rates will be the next best offer of relief to the public.—*American Cultivator*.

FREIGHT RATES ON JAPAN BULBS.

Since our report of last week was published the Great Northern R. R. informs us that the Interstate Commerce Commission have arranged that the present freight rate on goods from Japan to United States will be continued for a period of three months, from June 30th, which will be until October 1st, after which date a separate rate on the Pacific steamers will be charged, and then the through rate from the coast will be applied. The Interstate Commerce Commission have not yet determined the new through rates, but there is little doubt that they will be high enough to raise the cost of Japanese bulbs considerably.

Edw. Amerpohl, the introducer of *Nephtolepis Amerpohli*, has another new sort which gives promise of being superior to others of this type, and which will, if its good qualities continue, be introduced as soon as sufficient stock can be worked up.

A SPRIG FROM THE SPICE BUSH.

The following is the published report of a recent interview with Mr. Frank H. Traendly, New York:

"The ideas expressed before the Florists' Club of Philadelphia are not new, and to my knowledge have been agitated for many years; in fact, as far back as I can remember the question has been brought up every little while by some one. This matter has been thrashed out so often that I feel that anything I might say would be of little consequence. Philadelphia, as usual, seems to have woke up long after all other cities. It is a condition that we all have to buck against and do the best we can."

The phrase I wish to comment on is, "Philadelphia, as usual, seems to have woke up long after all other cities." Now where did Mr. Traendly get that idea? I challenge him to show that New York or any other city has had more discussions during the past twenty years on the wholesaling of flowers than Philadelphia. "Woke up," forsooth; why Philadelphia was awake and working not only in that line but in nearly every other long before New York got the sand rubbed out of its eyes. If Mr. Traendly will take the trouble to look back through the files of the trade papers he will find that Philadelphia has led, and is leading, in the furnishing of papers worth printing right along. This is a matter of common knowledge and comment these many years. A cheap whack at Philadelphia by a certain class of New Yorkers has long been considered the acme of wit in that burg; but coming from a man who has been honored with the highest office in the gift of the whole country—and that too in the city of Philadelphia—the country at large is apt to consider it undignified, and Philadelphia, in particular, to a man resents it with indignation! When any of the cheap Bowery sports indulges in his natural assiduity in this connection the best thing is to look the other way and pretend not to hear; but it is a different thing entirely in the case of our national president. His attitude should be that of adliberantiphosphornic. He should walk along:—

"His cogitative faculties immersed
In congeniality of cogitation."

While the rest of us:—

"Let silence close our folding doors of
speech
Till apt attention tell our hearts the pur-
port
Of this profound profundity of thought."

A pound of silence is worth a peck of trouble.

GEORGE C. WATSON,
Philadelphia, June 23, 1908.

THE PARIS SALON.

The annual exhibition of the Society of French artists known as "Le Salon" this year is of interest to horticulturists who may be visiting the French capital for a short time. We noted during our stay there a few days ago between 90 and 100 paintings of fruit and flowers of various kinds. We may possibly refer to the most interesting of them in a subsequent issue of HORTICULTURE. C. H. P.

NEWS OF THE CLUBS AND SOCIETIES.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual rose and strawberry show, on June 20 and 21, was one of the finest exhibitions of the year. Miss Fay's roses, Farquhar's hardy herbaceous flowers, some new varieties of strawberries, Whitman's sweetwilliams, campanula and delphiniums, and a fine vegetable display, were the features. The rose display made by Miss Sarah B. Fay, of Woods Hole was superb, covering four tables with five hundred or more specimens of the finest blooms ever seen in the hall, attesting the superior cultivation of M. H. Walsh, under whose supervision they were grown. There were some other fine exhibits made by W. A. Riggs, who had a collection covering two tables; W. J. Clemson (J. O. Christenson, gardener), who had a table of blooms of especially fine quality; Mrs. E. M. Gill, W. A. L. Bazeley and others.

Peside the entrance, running around both sides of the hall below the loggia, and over the loggia steps, R. & J. Farquhar displayed a splendid lot of hardy herbaceous plants, and their table of Spanish iris was most attractive both in coloring and arrangement. The Blue Hill Nurseries had a table with *Campanula humosa*, double flowers, of a fine lavender blue color. The Bellevue Greenhouses and Frederick J. Rea had also good exhibits in this class. The centre of the hall was occupied by two tanks, in which the Harvard Botanic Garden showed a fine lot of aquatics including lily, papyrus, nymphacae in variety, pitcher plants and others.

Other of the more notable exhibits in special classes were the sweetwilliams shown by William Whitman (Martin Sullivan, gardener), while the campanulas and delphiniums from the same Brookline estate were of the highest possible quality. On one of the centre tables Edward J. Mitton (J. Lawson, gardener), had a handsome lot of cattloys, George Hollis and T. C. Thurlow fine peonies, and Mrs. John L. Gardner (William Thatcher, gardener), campanulas and delphiniums. Mrs. Frederick Ayer (George Page, gardener) had a fine display of fuchsias and allamandas. There were some novelties in strawberries, the older varieties having been pushed to the rear by the importance of the later seedlings. The sensation in this line was the new Barrymore, which is of surpassing size, fragrance, softness and flavor. It was shown two years ago in a single specimen, last year in a couple of quarts, and is now grown in quantity. It is light red, not seedy, and said to be a large cropper. This is exhibited by H. L. Crane of Westwood. Another new variety is the Franklin, originated by Marshall F. Ewell of Marshfield Hills, which is also a fine berry. A. W. Clark of Ashton, R. L. showed two new seedlings, including the King Edward, not yet introduced, and the Victor, a very large flat berry.

Wilfrid Wheeler was the largest single exhibitor of strawberries, having not less than fifty baskets, includ-

ing fifty different varieties. Isaac E. Coburn had thirty-three baskets and exhibits were also made by John Ward of Newton Centre, Charles B. Travis, Edward B. Wilder and others. There was a special class for strawberries arranged with a foliage as a table centerpiece in which Emily A. Wheeler easily carried off first honors, the others being John Ward and Isaac E. Coburn.

The vegetable display was notably of high quality. Collections were shown by W. S. & J. T. Spaulding of Greenwood Farm, Beverly Farms (F. E. Cole, superintendent), W. J. Clemson of Taunton (J. O. Christenson, superintendent), Colonel Frederick Mason of Taunton (E. L. Lewis, superintendent), and others. Farquhar's new tomato, which has not been named, was shown by W. Downs of Chestnut Hill.

Among the awards outside of the regular prize list were the following:

Silver medal to H. L. Crane, for seedling strawberry Barrymore. Bronze medal to R. & J. Farquhar & Co., for display of Spanish irises. First class certificates of merit to Blue Hill Nurseries for *Campanula humosa* and to Wm. Downs for Farquhar's new tomato. Honorable mention to T. C. Thurlow & Co. for peonies, George Hollis for peonies, R. & J. Farquhar & Co. for display of herbaceous flowers, and F. J. Rea for rose Ruby King.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the above society was held June 18, at 8 P. M., Chas. Eble presiding. As Secretary Pantar was absent, Paul Abele was appointed secretary pro tem. Otto and Paul Abele showed plants of the double lobelia and a bunch of beautiful anemones, the first of the season. This was followed by a general discussion on the care and development of such material. J. A. Newsham was called upon to tell of his researches in Central America. He was very entertaining, and related how he had collected many varieties of orchids. A vote of thanks was tendered him. It was decided to have an outing to Mandeville on July 8. The following committee was appointed to make arrangements: Messrs. P. A. Chopin, Otto Abele and Harry Papworth.

CHAS. R. PANTER, Secretary.

NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

A meeting of the above society was held in their hall in the Courier Building on Tuesday night; about fifty members were present. It was Rose Night. The largest collection—about seventy-five varieties—was exhibited by the superintendent of city parks. Ernest Carrol, gardener to N. W. Kendal, made a splendid display with almost perfect blooms. The Yale Botanical Gardens put up a very fine table. The other chief exhibitors were John Norton, Wm. Symons, Frank Duffy, David Ferguson, James Bruce and David Kydd. Robert Paton and A. J. Thompson were appointed judges. James Kydd read a paper on Rose Culture. The preliminary schedules are already out for the fall show on the 10th, 11th and 12th of November. They can be obtained from Secretary Walter Koella, 58 Bishop street, New Haven, Conn.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The Morris County Gardeners' and Florists' Society held its regular meeting June 10. It was devoted to "Ferns" particularly. Frank Eskesen, the Madison specialist, read a highly commendable paper on the subject. He went into the details of their culture and invited questions during any part of his lecture, which was largely taken advantage of. His group of ferns in commercial and decorative sizes was very attractive, well arranged and contained many rare kinds. His ferns exhibited to show what he could do, or rather what we ought to do, were fine pieces of artistic work. There was also an exhibit of flowering shrubs and herbaceous flowers from C. J. W. Outlander of the F. & F. Nurseries, of Springfield, N. J., that reflected credit to him. Frau Karl Druschki, the famous white rose, was in perfect condition, from Wm. Duckham, A. Herrington and C. J. W. Outlander; in fact all the roses were fine. John C. Elliott, gardener to J. I. Waterbury, had a carnation rose of the Rambler type; very fine. It is ten days earlier than Crimsen Rambler.

The next meeting will be September 9 and then we shall begin to talk flower show. It is too early to do any predicting; we can only hope. All that is ready now is the schedule.

E. R.

NEW BEDFORD HORTICULTURAL SOCIETY.

This society held its annual rose show in the parlors of the Y. M. C. A. Building on Thursday, June 18. Admission was free and the show was well patronized. An excellent showing of roses was made, the principal exhibitors being Miss S. B. Fay, Falmouth; H. A. Jahn, New Bedford, and James Garthly, Fairhaven. Miss Fay's exhibit consisted of a superb collection of roses in named varieties. Mr. Jahn showed several sweet peas and Lloyd carnations. Mr. Garthly, in addition to a table filled with a splendid exhibit of roses in variety, showed a large vase of Frau Karl Druschki and a small table of single blooms of the same rose. The exhibit of this rose formed the principal attraction. It was noticeable towards the close of the day, that Madame Victor Verdier, Abel Carriere, Duchess of Bedford, Lady H. Stewart and Thomas Willis did not exhibit the staying powers of most of the other varieties; although they received the same treatment they drooped decidedly while the other varieties held up their heads.

THOMAS WHITE

PENNSYLVANIA HORTICULTURAL SOCIETY.

An exhibition of sweet peas and other outdoor flowers was held under the auspices of this society at Horticultural Hall, Philadelphia, on the 23rd inst. The hot weather proved detrimental to sweet peas, but a very creditable display was staged notwithstanding. Samuel Hammond swept all the first prizes in the seven classes scheduled. Mr. Hammond is gardener for Rudolph Ellis, Bryn Mawr, the latter

a great admirer of the sweet pea and giving every encouragement to attain perfection. America, Phyllis Unwin, Othello, Dante, Queen Alexandra, White Spencer, Primrose Spencer, King Edward VII, Flora Norton, Duke of Westminster, Helen Lewis, Stella Morse and John Inglis were among the most distinctive varieties in the prize winning lots. William Robertson, James Coleman and Samuel Batchelor were three exhibitors of sweet peas and carried off a good share of the prize money. Joseph Hurley got first honors for collection of Japanese iris.

A fine feature was the display of perennials and the competition between the Newbold and Paul lots for the Dreer prize was keen, but profiting by the experience at the last rose show the Newbold forces turned the tables completely on the victor with the showy lot and lesser variety, on that occasion. The prize for the best pair of gloxinias went to Mr. Robertson.

All the prizes on this occasion were contributed. Dreer, Michell, Waterer, Bodine and Mahan were the donors.

CLUB AND SOCIETY NOTES.

The cactus dahlia has been made the official flower of the Seattle exposition.

The annual field meeting of the New Hampshire State Horticultural Society was held at the Shirley Hill House, Goffstown, June 25.

At the annual rose show of the New London Horticultural Society at Norwich, Conn., prizes were awarded to Augustus Neuman, gardener for Alfred Mitchell, G. S. Palmer and John Waugh, of New London.

At a recent conference at Council Bluffs, Iowa, relative to holding a national horticultural congress in that city in December at the same time the corn exposition is held at Omaha, President Hess appointed a finance committee, with E. H. Doolittle, chairman, and a membership and hustling committee. An outside hustling committee was also appointed.

The exhibit at the last meeting of the Nassau County Horticultural Society, Glen Cove, N. Y., was so successful that it was decided to hold a rose show, to be open to the public. Two silver medals are offered as prizes. S. J. Trepess, V. Cleres and Mr. Wilson are the committee of arrangements. Mr. and Mrs. J. Rogers Maxwell have donated \$100 for prizes for the fall exhibition.

The annual rose and strawberry show of the Hingham (Mass.) Agricultural and Horticultural Society was held in the town hall June 16. There was a fine display of vegetables and flowers. Geo. Hollis of So. Weymouth showed 56 varieties of peonies. Ernest W. Lincoln and E. E. Lincoln were the leaders in the rose display. H. A. Bates, T. L. Rogers and Fearing Shultz showed strawberries. James L. Jones, M. C. Linscott and Harry P. Cross had fine displays of early vegetables. Mrs. Alfred Cummings, Mrs. Warren Locke and R. W. E. Vining showed fruits and flowers. The exhibition was followed by an address, music, etc.

During Recess

A WARETOWN PASTORAL.

It was a lovely June day, Friday 19th inst., and the waters of Barnegat Bay were dancing in the cool sea breeze as amid cheers and singing, the stars and stripes accompanied by the blue and white pennant of the Florists' Club of Philadelphia, glided to the top of the pole in front of Commodore John Westcott's hospitable club house at Waretown on the Jersey coast, and the opening of the season for the Waretown Rod and Gun Club was thus formally inaugurated.

The story of the three days following this inspiring incident would be but a repetition of the story of many a happy gathering of kindred souls at this delightful retreat provided for the happiness of his friends by a man who finds his own greatest happiness in promoting the pleasure of others. The roll book, on this occasion, showed the names of about twenty guests all from the Philadelphia contingent except John N. May, of Summit, N. J.; Col. W. W. Castle and W. J. Stewart, of Boston. Youthful as ever, the 86-year-old patriarch, Richard Lynex, was the Nestor of the party, which included five ex-presidents of the S. A. F. who frisked and gambolled, day and night, just the same as the everyday folks. An interesting incident was the receipt of a lot of antique weapons, firearms, etc., sent as a present to Mr. Westcott by his friend, James Dean, of Freeport, N. Y. Mr. Dean was unable to be present in person, owing to a recent bereavement in his family. The relics will be used to decorate the walls of the club house and will make quite an attractive addition to the furnishings. Some fishing was indulged in but the fish were out of town on other business and Robert Kift with a score of three weakfish was the "high-liner." This gentleman also served as official photographer and posed his

victims in various characteristic groupings. The official invalid was George C. Watson, who indulged unwisely in raw clams, and the official physician was Robert Craig, who administered approved remedies with the austerity of a stern disciplinarian. Silver-voiced P. J. Lynch furnished the music. The close of the conclave was signalized by an appreciative speech by Col. Castle who voiced the sentiments of the visitors in inimitable eloquence and "the smoke went up the chimney just the same."

NEW YORK FLORISTS' CLUB.

The Eighth Annual Outing of the New York Florists' Club takes place at Witzel's Point View Grove, L. I., on Wednesday, July 1. The good steamer "Isabel" will leave foot of Thirty-first street, East River, promptly at 10 A. M. and will proceed directly to the grove, when the following events will take place in the order named:

- Photograph in Group.
- Baseball Match, Benedicts vs. Bachelors Dinner.
- Races, Starting with Children.
- Ladies' Bowling Match.
- Gentlemen's Bowling Match.
- Dancing.

In addition to the prizes for baseball match, the winning members will each receive a budding knife, value, \$1.25.

The committee of twenty members will be on hand to attend to the comforts of all. Stow's orchestra of seven pieces will play during the entire time.

Program of events will be furnished on application to W. E. Marshall, chairman and treasurer, 146 West Twenty-third street, New York.

PICNICS IN PROSPECT.

- Florists' Club, New York, July 1, at Witzel's Point View Grove, L. I.
- Florists' Club, Columbus, O., July 15, at Buckeye Lake.
- Florists' Club, St. Louis, Mo., July 15, at Normandie Grove.
- Florists' Club, Chicago, July 19, at Morton Grove, Ill.

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.
On the occasion of their visit to the grounds of the R. I. Hospital.

AMERICAN PEONY SOCIETY

SIXTH ANNUAL MEETING AT ITHACA, N. Y.

The meeting was called to order at 7:45 o'clock on Friday, June 19. About twenty members were present. E. A. Reeves acted as chairman of the meeting, President C. W. Ward being unaccountably detained in Michigan. The treasurer also was unable to attend but sent a report by mail which shows the treasury to be in a satisfactory condition. The secretary's report showed the work of the Society to be progressing.

Reports.

Mr. Leon D. Batchelor, who is in immediate charge of the test collections, submitted a report of the expenditures charged against the appropriation made by the Society at its last meeting. This showed that a dressing of stable manure had been applied last fall which served as a mulch during the winter. It is proposed to apply commercial fertilizers and lime the present season, and another dressing of stable manure in the fall.

Mr. Batchelor invited suggestions as to the best methods of procedure in the care of the plots and matter connected therewith. Considerable discussion in regard to this ensued, which finally resulted in the appointment of a committee to confer with the College authorities and see what can be done to better the conditions of the collections, which at present are not as satisfactory as could be wished. The chair appointed as that committee, C. W. Ward, S. G. Harris and B. H. Farr. Mr. Batchelor, in speaking for the Nomenclature Committee, stated that the work was proceeding along the lines originally followed by Mr. Coit, and that over two hundred descriptions had been made the present season.

Professor Whetzel, chairman of the committee on diseases, submitted a letter which stated that he was unable to present the report he had intended to have ready for the meeting. The growers have sent in much good material in the way of diseased specimens, and he has under observation a number of the organisms which he suspects are causing the trouble. The work is well in hand and will be continued during the summer, when a report will be published.

Check List.

Following the reading of the reports various matters of business were discussed. The secretary made the statement that the price of the check list, five dollars, as fixed by the Society last year, seemed to be too high, as there has been but little demand for it, although many inquiries have been made about it, and he suggested that the price be fixed at a figure which would give it a larger distribution. Mr. George moved that the price be made two dollars, and it was voted that it be made that amount.

Frauds.

Matters connected with the exhibitions, advertising and transit in the peony trade were other subjects taken up. The latter subject was brought up by Mr. Farr, who had been badly cheated by a certain prominent peony grower of England. The discussion

developed the fact that this concern has been systematically defrauding American peony growers for years, and measures for reprisal were discussed.

Next Place of Meeting.

The selection of a place for the next meeting was the cause for considerable discussion. The secretary read a letter from Mr. C. S. Harrison, inviting the Society to meet with the Minnesota Horticultural Society at the Fair Grounds between the twin cities, Minneapolis and St. Paul. This invitation was corroborated by a letter from Mr. Latham, secretary of the Minnesota Horticultural Society. Both letters were very cordial and enthusiastic in their statements and called attention to the great business opportunities which the region offers to peony growers. After the reading of these letters, Mr. Brown, representing President Ward, invited the Society to meet at the Cottage Gardens, Queens, N. Y., stating that Mr. Ward had long cherished the idea of having the Society meet with him on the Cottage Gardens premises and had waited until such a time as his plants would be in fine condition for studying the varieties, of which he has a very large number. Next year should find them in such a condition, and it is the belief of Mr. Ward that considering that the most important thing for the Society to settle is still in the line of nomenclature matters, no greater help could be given this work than by meeting as suggested. He could offer the best of accommodations for holding an exhibition and would place all the conveniences of the establishment at the disposal of the exhibitors and visiting members. Ithaca was also suggested as the best place for the meeting. After a thorough consideration of the merits of the various places proposed, it was unanimously voted to hold the meeting at Queens, N. Y., the members feeling in doing so that they were not disparaging the merits of the other places but believed that the chance is a most opportune one for studying a large commercial collection in the interest of nomenclature.

Election of Officers.

The election of officers resulted as follows: President, C. W. Ward; vice-president, C. J. Maloy; secretary, A. H. Fewkes; treasurer, J. Howe Humphreys. E. A. Reeves was elected to succeed himself as director for three years.

A resolution was passed expressing appreciation of the work done by the college in furthering the nomenclature work undertaken by the society and asserting the belief that the society should co-operate with those in charge of bringing the work to a successful termination.

A vote of thanks was given Mr. Batchelor for his work on behalf of the society and the courtesy and attention extended by him to all present. The exhibition was a small one, there being only two exhibitors, Professor Saunders of Clinton, N. Y., who had entries in all the amateur classes, and F. C. Thurlow Co. of West Newbury, Mass., who had exhibits in the classes

for fifty blooms, and the general collection. The flowers staged from the test collections helped out the exhibition greatly.

A. H. Fewkes, B. H. Farr and R. T. Brown were elected judges to examine the exhibits and award prizes.

Report of the Secretary.

The present membership of the society is forty-nine, not including four honorary members.

It is gratifying to note that the membership is steadily increasing, slowly to be sure, but in a substantial manner. Those who have dropped out are few and are greatly overbalanced by the new members which are annually admitted.

Since the last meeting the work of the society has been progressing. The Committee on Diseases has sent out a large number of circulars of inquiry which have brought out much information, but which has not as yet been reduced to an orderly condition.

The Nomenclature Committee have the result of the work done by Mr. Coit last summer, in press, in the form of a bulletin, which will be issued shortly.

The secretary has the Proceedings of the Society for the five years from 1903 to 1907, inclusive, in the hands of the printers, and will distribute copies to the members at the earliest opportunity.

In response to the circulars sent out by Prof. Craig last July, in regard to forming a supplementary test collection, a large number of roots were sent in and were planted in accordance with the expressed wishes of the society. These as well as the older collection were top dressed with stable manure last fall, which served as a mulch during the winter.

The exhibition held during the meeting last June was somewhat disappointing, owing principally to the lack of growers in the immediate vicinity of Ithaca, and the dates being unfavorable to those at a distance.

In regard to the diseases of the peony, we can not be too watchful or too persistent in our endeavor to learn all that can be found about their nature, and about different means to prevent them. To the commercial man the matter is not of a directly serious nature, but to the amateur and indirectly the commercial man, it is most serious.

I have in mind a peony garden near Boston which was stocked with many rare and choice varieties. Many of the plants had reached their third and fourth years, and were fine large plants. During last summer the wilt and black rot attacked many of them, causing much loss and distress to the owner. In the fall large roots were dug up which were completely destroyed.

This is but one instance; there are many others who are sufferers and so situated that they can not change their plants to new ground but must either give up growing the peony or find some means of checking or preventing the spread of these diseases.

A. H. FEWKES, Sec.

Obituary

THE LATE ALEXANDER WALLACE.

Since writing the obituary notes which appeared in our issue of last week, some additional facts in the life of Mr. Wallace have come to our knowledge. His early boyhood was one of hardship. At three years of age he was bereaved of a mother's love; a father's care he never knew. At the age of 13 he was feeld out to a farmer, and for two years his lot was one of hard work, abuse and scanty fare. At 15 he found employment with the Caledonia R. R. in his native village in Scotland, where he acquitted himself creditably, and step by step he progressed until he became private secretary to a prominent attorney in Dundee, he having in the meantime taken up the study of shorthand, in which he became remarkably proficient. His knowledge of this art was the foundation of much of the success which he met with in later years. He came to America in 1882, but after a short time returned to Scotland, coming back again in 1888, and soon obtaining employment with A. T. De la Mare on the Florists' Exchange which was then in its infancy. Mr. Wallace's services to the Florists' Exchange are well known to our readers. The story of his life from that time is the story of the paper. His capacity for labor was prodigious. Patiently plodding, working uninterruptedly from early morning until late at night, leaving nothing unfinished, he was always to be found at the post of duty.

Mr. Wallace was a writer of poetry and a constant contributor of short stories to the Scottish American. In the year 1900 he compiled for the sixteenth annual meeting of American Florists, in New York, the souvenir book of the New York Florists' Club, a painstaking and thorough record of the annals of early horticulture in and around New York city, a work which occupied him through many months of patient research in the libraries. In 1906 he prepared an article entitled "What Scotsman have done for Horticulture in America," to be read before the members of the Scottish Horticultural Association. This paper was widely copied in English horticultural journals and received much favorable comment. Probably his most ambitious work and that which will carry his name and fame down to posterity as an author, was the book published in 1903 entitled, "The Heather in Lore, Lyric and Lay." This work, the result of several years of research throughout the libraries of America and Great Britain, is a complete synopsis of the history of Scotland's flower and emblem, including all the literature, both poetry and prose, which it was possible for the writer to glean.

Mr. Wallace assisted largely in the compilation and editing of the various text books which have been issued from time to time by the publishers of The Florists' Exchange. His uncompleted work was "Favorite Flowers of Robert Burns," and in the last

hours of his life he was regretting his inability to proceed with the work he had so lovingly set forth to do.

With the following verses written by him a few years ago, we close our brief biography of Alex. Wallace.

MITHER'S KISS.

When infant pains perplexed me sair,
An' ailments, 'boon what I cud bear,
Robbed childhood o' its bliss,
A balm that failed tae cure but rare
Was mither's soothin' kiss.

When fancied wrongs, 'boot bood or ba',
War ranklin' in my bosom sma',
An' things wad gang amiss,
A truce was made amang us a'
By mither's lovin' kiss.

An' when I left my dear auld hame
Tae Fortune seek - that fickle dame
The goal tae hit or miss,
The guide that pointed strait my aim
Was mither's partin' kiss.

Tae me nae kindly ear she's lent,
But o' a' the trials by Fortune sent
The hardest yin was this -
When owg a pale, worn face I bent
For mither's dooin' kiss.

When Boatman Death, sae grim an' hoar,
My saul has safely ferried o'er
The great unknown abyss,
May it greet me on the ither shore -
My mither's welcome kiss.

ALEXANDER WALLACE

At a special meeting of the directors of the A. T. De La Mare Ptg. & Pub. Co., Ltd., publishers of The Florists' Exchange, held at noon, Saturday, June 20, 1908, the following resolutions were adopted:

Whereas, Most vividly the uncertainty of the tenure of life has been demonstrated through the sudden removal from our midst of our friend and fellow worker, Alexander Wallace, who went for rest from pain and earthly cares, with a smile of perfect peace on his face, to the arms of our Heavenly Father, on Wednesday, June 17, 1908, and

Whereas, We desire to place on record our testimony to his long and faithful career in the office of this Company, and to bear testimony to his zeal, diligence and unwavering loyalty in all things which made for our common good; therefore, be it

Resolved, That in the death of Alexander Wallace we have lost a brother whom we mourn with all our heart, a tried and true coadjutor, a manly man, a faithful friend, a valuable citizen, and we do hereby express our profound and sincere grief at his untimely death in the hour of his matured mental vigor and manhood; and be it further

Resolved, That these resolutions be expressed in full upon the minutes of this Company, and a copy thereof sent to the bereaved widow of the deceased.

Emanuel Hippard.

Emanuel Hippard, a well-known florist and business man of Youngstown, O., died on June 16, aged 63 years. Mr. Hippard was stricken with paralysis in Jacksonville, Fla., six weeks ago while returning to Youngstown from a trip to Cuba. He was brought home a short time later in a serious condition from which he never rallied.

Deceased was born in Elizabethtown, Pa., Aug. 6, 1845. He was married to Miss Catherine Auchenbach, Nov. 4 1866.

Mr. Hippard moved to Youngstown in 1882, and immediately began a business career which marked him as a man of ability in many lines. Shortly after his arrival there he purchased the property in West Rayen avenue, where the family now resides, and erected thereon a number of greenhouses. Later he constructed the large building now owned by Dr. Booth and opened a flower store. For ten years he conducted these enterprises jointly, with credit to himself and to the city.

About this time he purchased the farm where the greenhouses of John Walker are now located. These greenhouses were built by Mr. Hippard and conducted by him until a few years ago when he disposed of them to Mr. Walker. For a number of years he has manufactured and sold as a specialty the Standard Steam Trap for greenhouse use.

For years Mr. Hippard served in the navy of the United States on board the man-of-war "Wachusett." During the last years of the Civil War he saw service in the 20th Pennsylvania cavalry. He was a member of Tod Post, No. 29, G. A. R.

Mr. Hippard is survived by his wife and one daughter. The latter is Mrs. C. J. Little of Youngstown.

Our personal acquaintance with Mr. Hippard has been long and pleasant. We found him at all times a genial, considerate, courteous gentleman. He was a member of the S. A. F. from the early years of that organization, a constant attendant and frequent exhibitor at the conventions. In his business relations Mr. Hippard was always a man of honor, in his home life he was ideal, and his demise is a great loss to the trade and to his town.

John Cammack.

John Cammack, a well-known business man of Washington, D. C., formerly a florist, died at his home, 2553 Brightwood avenue, on the 15th inst.

MONSIEUR ABEL CHATENAY.

This distinguished French horticulturist, and secretary of the National Horticultural Society of France, if not known personally to many Americans interested in the gardening art, must be well known by name. It may be used to draw a tention to the fact that a very fine portrait of M. Chatenay is exhibited in this year's Paris Salon. Those American who happen to be staying in Paris during the summer and who would like to see the portrait should note the picture No. 861 by Leon Armand Hult, entitled "Portrait de M. A. C. . . ." It is a life-like three-quarter length picture of the gentleman whose name heads this note. C. H. P.

THE ALASKA YUKON PACIFIC
EXPOSITION.

In an interesting letter from Seattle under date of May 29, Mr. J. Fred. Dawson, of Olmsted Bros., describes the progress being made in the building and landscape work for the Alaska-Yukon Pacific Exposition. Several of the large buildings are already finished. Most of the rough grading has been completed. "We are just starting the finish grading in the vicinity of the Geyser Basin and south along Rainier Vista, Washington Vista and Union Vista. These vistas vary from two to four hundred feet wide and were cut through thick growths of Douglas firs, many of the trees being over three hundred feet high and 4 to 10 feet in diameter. The entire layout is centered on Mt. Rainier which is over 14,000 feet high and is covered with snow the year round. Along the Washington Vista you can look out across many miles of Lake Washington with the great range of Cascade Mountains whose caps are covered with snow, back of it.

"Along the Union Vista you look across the waters of Lake Union to heights of the city beyond. We expect to fringe the base of all the buildings in the central Court of Honor with thousands of large native rhododendrons, together with fox-gloves, lilies, peonies, etc., mixed through them. The formal gardens, which are almost ready to be planted, are just south of the great Geyser Basin on the line of Rainier Vista.

"I expect to remain here for a few weeks yet with Mr. Olmsted and then go to Spokane and Portland. We have just submitted our report to the Park Commissioners of Spokane, Wash., for a system of parks for the entire city. We are now preparing plans for the development of some of the parks already owned by the city. We have several private places there, the largest of which is owned by L. M. Davenport who keeps the finest restaurant in the Northwest. William Donald is carrying out our plans for us there and is getting along finely."

GHEENT QUINQUENNIAL SHOW.

All the reports of this great gathering in Europe unite in pronouncing it to be one of the finest horticultural shows ever held. Most of the leading horticultural journals have contained reports, some of them well illustrated, with very full details of the exhibits and festivities. Lord Reddick presided, M. Viger being the next in the post of honor. Our bright little Belgian contemporary, "La Tribune Horticole," of Brussels in several of its recent numbers gives full particulars, many portraits of those concerned in organizing the show, some views of the show, and a four-page group of the members of the jury. Among them we recognize many of our old friends on the other side of the Channel. Bravo! little Tribune Horticole. C. H. P.

The plans submitted by W. H. Ritchie, Boston, were accepted by the Massachusetts Agricultural College, Amherst, Mass., for the new greenhouse and accompanying buildings.

CATTLEYA GIGAS SANDERIANA.

Our illustration shows a plant of this beautiful cattleya exhibited by Joseph A. Manda at a recent meeting of the New Jersey Floricultural Society where it caused quite a sensation

among the orchid fraternity. It was in a six-inch pan, with eight bulbs and carried ten well developed flowers. The plant came in last year's importation.

NEWS NOTES.

A fire in the building occupied by H. Corvi, florist, San Francisco, Cal., June 8, was discovered before it had done great damage in his store.

A big fire in the up-town section of New Orleans, La., destroyed the florist establishment of Justin St. Mard, who is reported to have lost \$10,000.

Plans for extensive alterations and improvements are under way in the florist store of A. M. York at Calumet, Mich. Mrs. Norquist will be in charge as heretofore.

Howard Stone has closed his branch store above Hotel Fulmer, Stroudsburg, Pa., for the summer, and transferred that business to the greenhouse, 183 Scott street.

The will of Mrs. Jerome Jones, whose death we recorded in a recent issue bequeaths \$75,000 to various hospitals and charitable institutions in Boston and Brookline, Mass.

The Civic Improvement League of Denison, Texas, finds the interest in the school garden work unabated, there having been many claimants for the awards at the end of the school year. All are eagerly anticipating the annual

flower show scheduled for November 4, 5 and 6.

Frank Ben, Chicago, Ill., is just completing three large new greenhouses, the widest of which accommodates seven benches. This one is now planted with chrysanthemums to be followed by Kaiserin.

Mrs. James McMillan has presented the North Shore (Mass.) Society with a silver cup to be known as the Eagle Head cup. This is to be offered in a rose competition to be competed for in an exhibition of 10 varieties of garden grown roses, four blooms each, and is to be won three times in succession before becoming the absolute property of the exhibitor. The above conditions have been changed from those as originally intended and as they appear in the printed schedule which specifies that there be three blooms, each variety to be correctly named, and to be won twice before becoming the absolute property of the exhibitor. At the last meeting of the society the subject of incorporation was brought up by the president and after a little discussion the matter was referred to a committee who will make their report at the next meeting. Philemon R. Sargent exhibited a fine table of rhododendrons.

LILIUM HARRISII

We offer a selected stock of the original true Harrisii for early forcing. These bulbs have been grown from the original pure Harrisii, and will be found to be splendid stock for early forcing, for which purpose Harrisii is so valuable. We have had the stock inspected, and are assured that it is almost absolutely pure and almost entirely free from disease. This is not stock picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Lilium Harrisii has been deteriorating slowly for years, and in order to get back to the true type of the original Harrisii, we have had our stock grown from the original pure stock, and it will be found very superior to the Lilium Harrisii usually offered. While the stock is A No. 1, our prices are as low as, or lower than, the prices asked for indifferent stock.

We have only a limited quantity of this stock to offer, so it will be advisable to place order without delay in order to ensure securing the stock. Bulbs ready for delivery middle to last of July.

6-7 in. bulbs, 350 to the case, \$6.00 per 100, \$50.00 per 1000 } Full Case Lots at Thousand Rates
 7-9 in. bulbs, 200 to the case, 9.00 per 100, 80.00 per 1000 }
 9-11 in. bulbs, 100 to the case, 18.00 per 100, 170.00 per 1000 }

FREESIA REFRACTA ALBA Bermuda-grown, finest selected bulbs, 1/2-in. up, \$1 per 100, \$7.50 per 1000.
 French-grown, Mammoth size, 3/4-in. up, \$1.50 per 100, \$12 per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

BUSINESS CHANGES.

H. F. Ehresmann has bought out the florist establishment of John Lees, Frankford, Pa.

The Rocky River establishment of the Gasser Co., Cleveland, O., will be under the management of F. H. Friedley hereafter.

Joseph Richards has purchased the interest of his partner at Atlantic City, N. J., and will continue the business at 1423 Pacific avenue.

H. H. Hensley has leased the plant of the Long View Floral Co., Rock Island, Ill., and will carry on the business in connection with his other establishments in that place.

William Thomas has purchased the greenhouse of F. W. Meyer, Kalamazoo, Mich. Mr. Meyer will take the position of head gardener at the State Agricultural College, Ames, Ia.

PROPOSED LAW AFFECTING INSECTICIDES.

On Thursday, June 18th, beginning at 10 A. M., there was an all day session held in the American Institute Building, West 11th street, New York City, between manufacturers, representatives of the entomologists, and some of the leading chemists who have charge of the state control of the insecticide laws for the discussion of Senate Bill 6515 and House of Representatives Bill 21316 entitled "A bill for preventing the manufacture, sale or importation of adulterated or misbranded fungicides, paris greens, lead arsenates and other insecticides, and for regulating traffic therein and for other purposes." There were about forty persons present, and all business commenced promptly.

The Senate Bill and the House of Representatives Bill are the same, excepting that in section 7 there is a fourth clause added to the House of Representatives Bill, which was amended. Section by section was taken up. The bill appears to be promulgated by those connected with the Agricultural Department.

The first section provides that any violation is a misdemeanor, punishable by a fine not to exceed \$500 or one year's imprisonment, or both, and if brought up on a second count the fine is doubled with the imprisonment clause in the discretion of the court. This section was adopted. Sections 2 and 4 the same.

Section 1, which provides for the examination of specimens of fungicides, paris greens, lead arsenates and other insecticides, called for discussion looking for enlightenment. Under section 4 a motion was made to insert the word willfully (willfully violated), but the entomologists and representatives of the Department voted against that, and in section 5 a discussion arose as to who should have the authority to start prosecution, and a clause "Under authority of the Secretary of Agriculture" was inserted, so as to make it plain that in the National Bill there was some head to its enforcement and not leave the initiative to any director of Experiment Stations or agent of any State, or the District of Columbia.

Sections 6 and 7 caused the most discussion. The intent of the promoters of the bill seems to be to concentrate unquestioned authority of oversight in the hands of the Department of Agriculture, and the manufacturers brought up various questions, all of which were fairly and frankly considered.

In section 6, the words "Man or other animals" were stricken out so as to confine the section to its legitimate purpose, that of affecting insecticides used upon vegetation. There was also a definition added, that the term "Miscible Oils" shall include all preparations of petroleum to be used in water. In section 7, after some discussion in which the actual work of the manufacturing chemist is compared with the laboratory chemists' small tests, the amount of arsenious Sulfide As₂O₃ was made 50 per cent.

"STOKES STANDARD" PANSY SEED

Stokes' Standard Mixed Pansy is the finest strain of Giant Pansies it is possible to produce. It is a blend of all that is finest in Pansies from France, England and Germany. It is absolutely unrivaled in range of magnificent colors, size and substance. Trade pkt. (2000 seeds) 50c; 1/8 oz. 85c; 1/2 oz. \$3.25; 1 oz. \$6.00; 1/4 lb. \$20.00.

Kingly Collection of Giant Pansies Mixed. A most excellent strain, the same as has been sold for years by the late firm of Johnson and Stokes and has given great satisfaction. Price, 1/2 trade pkt. 30c; trade pkt. (2000 seeds) 50c; 5000 seeds \$1.00; per oz. \$5.00; per 1/4 lb. \$14.00.

Send for Special Pansy Circular

FRENCH and DUTCH BULBS in season—CET PRICES

STOKES' SEED STORE, 219 Market St., Philadelphia, Pa.

instead of 55 per cent. The standard of lead arsenates is one of the things which are indefinite. There is a variation in the actual working of these things from the commercial basis, where they are sent out literally by the tons. To make a commercial article match a chemically pure preparation for a special test, the quantity of water permissible, the actual working conditions of transportation, the evaporation of water by a leaky package, that is to say the real "work-a-day" conditions, which all commercial articles are subject to were talked over, in effecting any penalty, and the result of the talk was apparently some enlightenment, and the expression of opinion by the professional entomologists that no construction was wished by putting into the bill or to be made a part of it, anything which could in any way hamper fair trade.

The fourth division of the House Bill reads, "Any article which is intended for use on vegetation and shall contain any substance or substances which, although destroying, repelling or mitigating insects, shall be injurious to such vegetation." This clause, which is not in the Senate Bill, was taken up as it is a trap which might be used to the great annoyance and harm of anyone, for there are no substances commonly used but what if a small overdose is used will destroy vegetation, and as the paragraph read there was no explanation to its construction.

To qualify this paragraph the sentence, "By following the directions expressed upon the package," was added. With this amendment the section was adopted.

A question arose in regard to selling in foreign countries; that while the Consular Service of the United States was endeavoring to increase foreign trade, the demands of foreigners, which may call for something entirely different from what is used in this country, should not in any way be restricted.

A motion was made that the Bill as amended according to the secretary's notes be adopted and the same was carried.

A resolution was offered on part of the manufacturers to the effect that they thank the gentlemen in charge of this meeting, Mr. E. Dwight Sanderson of Durham, N. H., and Prof. Smith of New Brunswick, N. J., for inviting them to be present.

BENJAMIN HAMMOND

DETROIT PARK BOARD vs. SAN JOSE SCALE.

This is a most important issue, fully recognized by Park Commissioner Philip Preitmeyer, who has had an ordinance passed which enables him to not only inspect plants under his direct supervision but also those on private property. Property owners are disposed to co-operate heartily. Several inspectors are going through the streets, etc., etc., and every plant which is infested is tagged with a yellow cardboard on which is printed: "This Tree, Shrub, Must be Sprayed"; such as are beyond redemption or already dead are tagged with a red cardboard on which it is stated that the plant must be removed. Laborers follow the inspector and act according to those cards.

FRANK DANZER.

SEED TRADE NOTES.

Albert McCullough and family started from the Detroit convention en route for London, Eng.

The Fredonia Seed Co., Fredonia, N. Y., are erecting a three-story building to be used as office, factory and retail store.

The model seed farm at Milford, Va., which T. W. Wood & Sons, of Richmond, Va., have recently added to their already large holdings, will be in charge of an expert seed grower.

Seed Trade

AMERICAN SEED TRADE ASSOCIATION.

The 20th Annual Convention of the American Seed Trade Association met on June 23 at the Hotel Pontchartrain, Detroit, with President George S. Green in the chair.

A very muggy, warm atmosphere made everything most uncomfortable but the convention was well attended and received a hearty welcome to the City of the Straits by City Comptroller Doremus. He was courteously answered by S. F. Willard.

President Green's address followed and then came the reports of Secretary and Treasurer C. E. Kendel.

Mr. Chas. N. Page offered a resolution to work in favor of any reasonable regulation of Parcels Post.

D. M. Ferry & Co. invited the members to visit their trial grounds on Wednesday morning and to a boat ride on Thursday at 1.30 p. m.

The convention went into executive session at 8 p. m., Tuesday.

On Wednesday evening, June 24, the members were entertained at a banquet. Music, decorations, singing and speeches by local and visiting members were of a high order. Mr. Northrup served as toastmaster.

At the session on Thursday forenoon officers were elected as follows: President, W. S. Woodruff, Orange, Conn.; first vice-president, J. C. Robinson, Waterloo, Neb.; second vice-president, Marshall H. Duryea, New York; secretary and treasurer, C. E. Kendal, re-elected, Niagara Falls was favored for the next meeting. The executive committee will decide at its meeting next January. A fruit dish was presented to outgoing President Green by J. C. Robinson. All the meetings were well attended and the program carried out as scheduled.

Albert Houle, of Toronto, Can., has purchased the Abbs greenhouses in that city and started in business.

PERSONAL.

Visitors in New York: D. B. Long, Buffalo; W. F. Kasting, Buffalo; W. W. Castle, Boston.

Frank Saunders has taken the position of manager of the Bedford Park Floral Co., Toronto, Can.

Walter Reimels, of Woodhaven, N. Y., was married to Miss May Specht, of New York city, on June 17.

Edwin H. Cooley has opened the retail store of the Mt. Desert Nurseries, Bar Harbor, Me., for the season.

Harry Hall has left the State College at Durham, N. H., to engage in commercial horticulture at Brighton, Mass.

Wm. T. Bell, Franklin, Pa., sailed from Quebec on S. S. Empress of Britain, June 12, for a visit to England.

T. Mellstrom, representing Sander & Son, St. Albans, Eng., sailed on June 24 on the S. S. Deutschland for Europe.

August E. Baumer, of Louisville, Ky., was married on the evening of June 11 to Miss Jessie Lauser, of the same city.

George Hunter, a florist, who has spent the past year in Australia and New Zealand, has returned to New Haven, Conn.

Mrs. E. A. Anderson, who has a flower store at 14 Colorado avenue, Chicago, has lately married and the new sign reads Mrs. Wells. She will continue the business as before.

Visitors in Boston: Mrs. C. B. Whitnall, Milwaukee, Wis.; T. Mellstrom, representing Sander & Son, St. Albans, Eng.; Mr. and Mrs. Walter Reimels, Andrew R. Kennedy, gardener for Dr. L. D. Ward, Madison, N. J.

Visitors in Chicago: Theodore Thurston, Kalamazoo, Mich.; A. L. Glaser, Dubuque, Ia.; Fred Chapman, of Clinton Falls Nursery Co., Owatonna, Minn.; O. F. Brant, Faribault, Minn.; J. B. Baker, of Baker Bros., Fort Worth, Texas.

Miss N. C. Moore, of N. C. Moore & Co., Morton Grove, Ill. is recovering from illness. Miss Moore has a

stand in the Cut Flower Exchange and her father has charge of the greenhouses. They are making arrangements to go into the plant business.

J. W. Adams, the veteran nurseryman and florist of Springfield, Mass., celebrated on June 20 his 80th birthday. Mr. Adams feels that time has dealt very kindly with him. He is active and alert, mentally and physically and we hope the coming years will be equally lenient and that he may continue long to adorn the profession to which he has devoted his life.

PERSONAL ITEMS FROM MADISON, N. J.

Rumor has it that Wm. Duckham intends to sail for Europe for a three months' vacation. The good wishes of all will go with him.

C. H. Totty is turning out chrysanthemums and roses to the trade by the truck load. There seems to be no "hard times" around him.

R. M. Schultz has rented his greenhouses on Rosedale avenue and has become identified with Vaughan's Seed Store as traveling solicitor.

A. R. Kennedy leaves on his vacation soon for a few weeks and no doubt will have a number of interesting things to tell us when he gets back.

Percy Herbert, president, of the Florists' Society, left last Saturday for Scotland, with his family. He expects to be away ten or twelve weeks and will see all he can of Scotland, England and maybe some of Ireland.

FLOWER MARKET REPORTS

BOSTON

Business is fairly satisfactory this week. White roses, American Beauty and lily of the valley are having a good call. The quality of white roses, unfortunately, is not good. Kaiserin is all right but there are not enough of them and Bride is the main reliance. Much complaint is made by the retailers of the quality of the latter, but it is the same every year at this season and nobody can help it. Carnot roses are good. It is a wonder that more of this reliable summer rose and the equally desirable Kaiserin are not grown. There is a good market for them. Good Killarneys are also short of the demand. Carnations are abundant and prices are down to the lowest notch. If fancy grades could be obtained they would find a good sale but most of the carnations are in bad shape and the growers might just as well throw them out.

BUFFALO

Stock of all kinds has been plentiful for the past two weeks, especially carnations, for which the demand has been light; Lawson, Victory and Windsor are of good quality; too much ordinary and small-bloom stock drag along from day to day. The severe warm weather has shut off the supply of good Fridesmaid and Bride roses and much of this stock is mildewed. Kaiserin, Carnot, Killarney and Richmond are in ample supply and sell readily. Peonies have had their inning and are over with. Spanish iris in colors of purple, white and yellow are in and sell well. Longiflorum and Japan lilies are in good supply and at times need a little urging to move. Pans, mostly outdoor, are coming in heavily. Graduations and school commencements are in order the coming week and a good lively week's business is looked for with both the wholesaler and retailer.

CHICAGO

There has been quite a shortage in tea roses recently, which has a tendency to cause quite an advance in price of good stock. There is also quite a shortage in good strings of Asparagus plumosus, everything of good quality going quickly. Field daisies are not so common in this vicinity as in the New England States, but the fields at Clarendon Hill about twenty miles west have produced an abundance lately, one firm having sold

170,000 last week. The cool weather of last week has been followed by torrid weather this week, the temperature at this writing being in the nineties. If this weather continues a few days longer it will take the quality out of the flowers and the life out of trade.

INDIANAPOLIS

June has brought an unprecedented demand for stock for weddings and school closings. Beauties are about the best flower now on the market. Carnations are rapidly going out. Outside sweet peas are available in great quantities and fill the major portion of the demand for small flowers. Hydrangeas remain about the only good offering in the way of a pot plant. Some fine lilies and gladioli have been on the market. There seems to be quite a lively demand for asparagus plumosus and smilax, while call for other greens is light. Judging by the reports the present season has been one of the best on record in every line.

NEW YORK

The early part of the present week was brightened up by a noticeable revival of activity which gave encouragement to the hope that it might forecast a permanent improvement, but past experience has shown the futility of planning for any steady business at this season, and it is the expectation of those who have been through similar experiences before that a lay or two will mark the limit of the present spurt. In the meantime the supply is rapidly shortening up and quality, under the blazing weather conditions, is "on the toboggan." Peonies and other outdoor material have practically disappeared, leaving the field to the weakened greenhouse product.

PHILADELPHIA

Supplies of flowers have shortened up considerably, not only locally but at shipping distances.

thus causing an extra demand from outside which has made business appear to be better than the previous week, although when figures were totaled for the week, the results were found not quite as good. Tea roses moved in better shape and were one of the most satisfactory subjects in the week's business, especially in good quality grades which were very scarce. The so-called "Summer Beauties" and Kaiserins are now very much in evidence and are one of the best features of the market. Good carnations are very scarce but about anything near average finds a ready market. Sweet peas are now in much larger receipts and sluggish demand. Cattleya Gaskelliana is the reigning favorite in orchids. C. Mossiae about over for the season. Lily of the valley continues of fine quality and the demand is better. Retarded peonies are about over, although a much larger stock than usual was put into storage here a month ago. This is a pointer for next year. Peonies would sell for a month yet.

ON THE ALLEYS.

At the last practice game of the New York bowlers only three of the twelve contestants succeeded in reaching the coveted average of 155, viz.: Chadwick 183, Fenrich 171 and Schreiner 167. Four games were played, the highest score in any one game being 205 by Chadwick.

About fifteen of the Baltimore florists journeyed to Washington on the 26th, for a match game at bowling, and were entertained sumptuously by the Washington bowlers at the Royal bowling alleys. The following is the score for three games:

BALTIMORE.	WASHINGTON	
Parry	Shaffer	526
Moss	Simmonds	421
Lehr	McCully	393
Richmond	Campbell	529
Spehold	McLennan	461
Kuerst	Barry	459

GREENHOUSE HEATING

From The Weekly Florists' Review, Dec. 20, 1906.

A HEATING RECORD

I have two houses, each 23 x 100, in which I grow lettuce and general stock. I keep a night temperature 50 to 52 degrees. They are heated with hot water. I had a special boiler made to order that has proved itself beyond my expectations. In the winter of 1905-6 I used thirty-one tons of coal at \$1.90 and ten cords of 3 foot wood worth about \$2.50 per cord. This I thought very reasonable. The circulation is perfect. Last winter in moderate weather, that is, not windy and outside temperature 20 degrees or so above zero, I would leave the boiler nine hours with a variation of but 3 degrees.

Ten days ago I was called to Cleveland over night. The outside temperature was 40 degrees at 2.45 p. m., when I left the boiler, with a gradually sinking mercury. There being no men about, I left instructions that the boiler should not be touched until next morning. My wife, on my return next evening, reported that at 7 p. m. it became quite windy and by 9.30 was freezing, with stormy outlook. When she awoke at 6 a. m., the outside temperature was 20 degrees, and the greenhouses were 47 degrees. I think this is a record for **fifteen hours and twenty minutes without attention.** I would like to hear from anyone who can beat it.

C. S. TEMPLEN, Garrettsville, Ohio.

GREENHOUSE CONSTRUCTION

LUMBER

John C. Moninger Co.

117 E. Blackhawk St., CHICAGO

Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: **Result**, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

PATENT APPLIED FOR

The Advance Ventilating Apparatus

"Your machine is the best we have ever used" is what an Ohio florist writes us in remitting for his machine. It is not good only in one part but it is the best in all parts—the results of experience, of careful study, of mechanical construction, best material and backed by moderate prices that makes our line so popular. Give us a trial.

SOMETIMES YOU FORGET

that we make every part of a greenhouse but the glass—and sell any part.

You remember us on the bigger things, but often it never enters your head to think of sending to us for a tub of putty or a few fittings.

But you ought to — and here's why:

Our sole business is manufacturing every part of a greenhouse. We give it, and it only, our undivided attention.

Everything we make is made with an exact knowledge of just what conditions it must meet, and that is why an ever increasing number from all over the country are continually sending us their orders for just the smaller things.

You know how well we do the big things, and if you only stop to think, it is just because of well done little things that it is possible for us to do so thoroughly and enduringly, the big things. So whether white lead, glazing nails, bench fittings, it matters not what, first write to
